p.33 **3.** Consider approval of professional engineering services contract for Cobb, Fendley & Associates, Inc. to perform the engineering design services and specifications for the Turtle Cove Blvd from Ridge Rd to Railroad Tracks and W. Yellow Jacket Lane from Ridge Road to Greencrest Boulevard Reconstruction Project in an amount not to exceed $196,718.50, to be paid for out of the 2018 Street Bond funds, and take any action necessary.

p.57 **4.** Consider approval of professional engineering services contract for Teague Nall and Perkins, Inc. to perform the engineering design services and specifications for the Alta Vista Drive from Lakeshore Drive to Westway Drive and West Street from Rusk Street to Highland Drive Reconstruction Project in an amount not to exceed $313,500.00, to be paid for out of the 2018 Street Bond funds and water wastewater funds, and take any action necessary.

p.91 **5.** Consider awarding multiple bids to Trade Contractors for the construction of a Pickle Ball Court at Myers Park and authorizing the City Manager to execute contracts totaling $125,000 including project contingency to be funded out of the Recreation Development Fund, and take any action necessary.

p.93 **6.** Consider approving a five-year contract with Axon Enterprise Inc. and authorizing the City Manager to execute the contract for Police Taser Replacement in the amount of $116,687 to be funded out of General Fund Reserves first year cost of $17,400, and take any action necessary.

p.95 **7.** Consider awarding bids to Caldwell Country Chevrolet and Grapevine Dodge and authorizing the City Manager to execute Purchase Orders for multiple vehicle purchases totaling $349,003 to be funded out of the General Fund Reserves ($304,785), Water and Sewer Fund ($21,345) and Seized Funds ($22,873), and take any action necessary.

p.97 **8.** Consider awarding a bid to Waukesha-Pearce Industries Inc. and authorizing the City Manager to execute a Contract for the purchase and install of fixed generators at three lift stations in the amount of $234,714.80 to be funded out of the Water and Sewer Fund, Sewer Operations Budget, and take any action necessary.

p.99 **9.** **P2018-029** - Consider a request by Derek Jones of Munson Partners, LLC for the approval of a replat for Lots 1 & 2, Block A, Jones Addition, being a 0.488-acre tract of land currently identified as Lot 47A of the BF Boydston Addition, City of Rockwall, Rockwall County, Texas, zoned Single Family 7 (SF-7) District, situated within the Old Town Rockwall (OTR) Historic District and the Historic Overlay (HOV) District, addressed as 201 S. Clark Street, and take any action necessary.

p.104 **10.** **P2018-033** - Consider a request by Matthew St. Marie of G&A Consultants, LLC on behalf of Spencer Byington of SWBC Rockwall, LP for the approval of a final plat for Lot 1, Block A, SWBC Rockwall Addition, Phase 1 being currently identified as a 21.280-acre tract of a larger 42.555-acre tract of land identified as Tract 1-4 of the J. M. Allen Survey, Abstract No. 2, City of Rockwall, Rockwall County, Texas, zoned Planned Development 83 (PD-83) District, situated within the SH-205 By-Pass Overlay (205 BY-OV) District, located east of the intersection of Discovery Boulevard and John King Boulevard, and take any action necessary.

X. APPOINTMENTS

1. Appointment with the Planning and Zoning Chairman to discuss and answer any questions regarding cases on the agenda and related issues and take any action necessary.

2. Appointment with County Elections Administrator, Christopher Lynch, to hear about the Precinct 1 polling location changing from Reinhardt Elementary School to the Rockwall Golf & Athletic Club Conference Center (2600 Champions Drive).

XI. PUBLIC HEARING ITEMS

p.124 **1.** **Z2018-032** - Hold a public hearing to discuss and consider a request by Bill Bricker of Columbia Development Company, LLC for the approval of an **ordinance** for a zoning change from a Light Industrial (LI) District to a Planned Development District for commercial, light industrial and townhome land uses on a 16.26-acre tract of land identified as a portion of Lot 1, Block 1, Indalloy Addition (7.409-acres) and Tract 31 of the R. Ballard Survey, Abstract No. 29, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, addressed as 1100 & 1300 E. Washington Street, and take any action necessary **(1st Reading)**.

p.180 **2.** **Z2018-042** - Hold a public hearing to discuss and consider the approval of an **ordinance** for a text amendment affecting various sections of the Unified Development Code [Ordinance No. 04-38] for the purpose of generally amending the Development Standards and procedural processes for the approval of Variances, Exceptions, and Waivers, and take any action necessary **(1st Reading)** ***[Postponed to the November 5, 2018 City Council Meeting].***

p.182 ***3.*** **Z2018-043** - Hold a public hearing to discuss and consider a request by Michael Worrell of Rockwall Honda for the approval of an **ordinance** amending SUP No. S-76 (Ordinance No. 10-26) to allow changes to be made to an existing Motorcycle Dealership with Accessory Boat and Trailer Sales being a 1.152-acre parcel of land identified as Lot 6, Block A, Newman Center #1 Addition, City of Rockwall, Rockwall County, Texas, zoned Commercial (C) District, situated within the IH-30 Overlay (IH-30 OV) District, and take any action necessary **(1st Reading) [*Postponed to the November 5, 2018 City Council Meeting].***

XII. ACTION ITEMS

p.184 **1.** **SP2018-028** - Discuss and consider a request by Debora Allegranti of CBOCS Texas, LLC on behalf of Eric Borkenhagen of Kohls Illinois, Inc. for the approval of variances to the articulation and materials requirements in conjunction with an approved site plan for a restaurant on a 1.61-acre portion of a larger 9.0142-acre parcel of land identified as Lot 1, Block A, Rockwall Market Center East Addition, City of Rockwall, Rockwall County, Texas, zoned Commercial (C) District, situated within the IH-30 Overlay (IH-30 OV) District, situated west of the intersection of Mims Road and the frontage road for E. IH-30, and take any action necessary.

p.191 **2.** Discuss and consider directing staff to proceed with the 2018 Comprehensive Plan amendment, and take any action necessary.

p.193 **3.** Discuss and consider a policy for requiring a Traffic Impact Analysis (TIA), and take any action necessary.

XIII. EXECUTIVE SESSION

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding possible sale or lease of real property / land in the vicinity of County Line Road pursuant to Section §551.072 (Real Property).
2. Discussion regarding potential litigation associated with Breezy Hill Road pursuant to Section §551.071 (Consultation with Attorney).
3. Discussion regarding (re)appointment of municipal court judge and associate judge, pursuant to Section 551.074 (Personnel Matters)
4. Discussion regarding restaurant permitting and inspections pursuant to §551.071 (Consultation with Attorney).
5. Discussion regarding management personnel and organization pursuant to §551.071 (Consultation with Attorney).

6. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney).

XIV. RECONVENE PUBLIC MEETING & TAKE ANY ACTION AS RESULT OF EXECUTIVE SESSION

XV. ADJOURNMENT

This facility is wheelchair accessible and accessible parking spaces are available. Request for accommodations or interpretive services must be made 48 hours prior to this meeting. Please contact the City Secretary's Office at (972) 771-7700 or FAX (972) 771-7727 for further information.

The City of Rockwall City Council reserves the right to adjourn into executive session at any time to discuss any of the matters listed on the agenda above, as authorized by Texas Government Code § 551.071 (Consultation with Attorney) § 551.072 (Deliberations about Real Property) § 551.074 (Personnel Matters) and § 551.087 (Economic Development)

I, Kristy Cole, City Secretary for the City of Rockwall, Texas, do hereby certify that this Agenda was posted at City Hall, in a place readily accessible to the general public at all times, on the 12th day of October, 2018 at 4:00 p.m. and remained so posted for at least 72 continuous hours preceding the scheduled time of said meeting.

_____ _____

Kristy Cole, City Secretary Date Removed

Rockwall, Texas

Proclamation

Whereas, breast cancer is the most prevalent cancer and the second most common cause of cancer-related death among Texas women; and

Whereas, it's expected that over 18,000 new cases of female breast cancer and about 3,000 new cases of male breast cancer are expected to be diagnosed in Texas this year alone; and

Whereas, the statistics are staggering, yet we are encouraged by the physicians, researchers, public health professionals, and advocates who've made tremendous progress in the fight against this type of cancer, with mortality rates from this disease having declined nationwide; and

Whereas, each life is precious; therefore, we continue to pursue a greater understanding of this disease, support pioneering research, promote effective prevention strategies, and ensure broad access to healthcare screenings; and

Whereas, each October organizations throughout the nation promote awareness of breast cancer, prevention options, and ongoing steps toward a cure; and

Whereas, together, we can usher in a new era of hope in the fight against breast cancer and anticipate the victorious day when this disease is no longer prevalent.

Now, Therefore, I, Jim Pruitt, Mayor of the City of Rockwall, Texas, do hereby proclaim the month of October, 2018 as

Breast Cancer Awareness Month

in the City of Rockwall and encourage all of our citizens to participate in efforts to support breast cancer patients, the families and friends affected by this disease, and the medical professionals who provide invaluable care.

In Witness Whereof, I hereunto set my hand and official seal this 15th day of October, 2018.

Jim Pruitt, Mayor

Proclamation

Whereas, change is constant and affects all cities, towns, suburbs, counties, boroughs, townships, rural areas, and other places; and

Whereas, community planning and plans help manage this change in a way that provides better choices for how people work and live; and

Whereas, community planning provides an opportunity for all residents to be meaningfully involved in making choices that determine the future of their community; and

Whereas, the full benefits of planning requires public officials and citizens who understand, support, and demand excellence in planning and plan implementation; and

Whereas, the American Planning Association and its professional institute, the American Institute of Certified Planners, annually endorse National Community Planning Month as an opportunity to highlight the contributions sound planning and plan implementation make to the quality of our settlements and environment; and

Whereas, this month, we would like to publicly recognize the participation and dedication of the members of our planning-related commissions and other citizen planners who contribute their time and expertise to the improvement of the City of Rockwall.

Now, Therefore, I, Jim Pruitt, Mayor of the City of Rockwall, Texas, do hereby proclaim October 2018 as:

APA National Community Planning Month

in the City of Rockwall and urge all citizens to join me in recognizing the many valuable contributions made by both the professional planners of the City and by our many volunteers and extend our heartfelt thanks for the continued commitment to public service by these individuals.

In Witness Whereof, I hereby affix my official hand and seal this 15th day of October, 2018.

Jim Pruitt, Mayor

Rockwall, Texas

Proclamation

Whereas, Chambers of Commerce work with area industry, businesses, and merchants to advance the civic, economic, industrial, professional, and cultural life of our city; and

Whereas, Chambers of Commerce were first chartered by the Republic of Texas in 1840 and have contributed to the civic and economic life of Texas for 177 years; and

Whereas, this year is the 89th anniversary of the Rockwall Area Chamber of Commerce and the 112th Anniversary of the Texas Association of Chamber of Commerce Executives, the state's longest standing association of Chamber professionals in the nation; and

Whereas, the Rockwall Area Chamber of Commerce, founded in 1929, is the leading broad-based business organization that serves as a unified voice for area business; and

Whereas, Chambers of Commerce encourage the growth of existing industries, services, and commercial firms and encourage new businesses and individuals to locate in Rockwall, acting as a liaison with the State of Texas, City and County of Rockwall, schools and the business community; and

Whereas, Chambers of Commerce remain strong, viable organizations of professionals throughout the nation; and

Whereas, Chambers of Commerce provide guidance and leadership to communities across the state and serve as a career development organization for chamber of commerce professionals.

Now, Therefore, I, Jim Pruitt, Mayor of the City of Rockwall, Texas, do hereby proclaim **October 15-19th, 2018** as

Chamber of Commerce Week

in the City of Rockwall and encourage all citizens to recognize and applaud this organization for its many professional endeavors which benefit our city and beyond.

In Witness Whereof, I hereunto set my hand and official seal this 15th day of Oct., 2018.

Jim Pruitt, Mayor

Rockwall, Texas

Proclamation

Whereas, the Texas Amateur Athletic Federation (T.A.A.F) is an organization that provides Amateur Athletics for athletes between the ages of 6u-18U, allowing them the opportunity to compete with athletes on a statewide basis, rather than just locally; and

Whereas, Keviah Ealy, a Rockwall High School freshman, is a member of the Rockwall Mustangs, which is one of two Track Clubs under the umbrella of the City of Rockwall; and

Whereas, this past July, the Texas Amateur Athletic Federation held its annual "Summer Games of Texas" in College Station; and

Whereas, after having excelled in the Region 7 competition, Keviah proudly progressed on to represent Rockwall at the T.A.A.F Summer Games; and

Whereas, Keviah's accomplishments at the state competition were quite notable in that she competed against 40 other Long Jumpers from across the state and set a new state record for her age division; and

Whereas, the results of her efforts included placing First in the Long Jump competition and Third in the 200 Meter Run; and

Whereas, it was her Long Jump that set the new state record, coming in at a distance of 18-05.00ft, or 5.61m.

Now, Therefore, I, Jim Pruitt, Mayor of the City of Rockwall, Texas, do hereby proclaim **October 15, 2018** as

Keviah Ealy Recognition Day

in the City of Rockwall and encourage all citizens to celebrate and applaud this young lady for her noteworthy accomplishments and for representing our City so very well.

In Witness Whereof, I hereunto set my hand and official seal this 15th day of October, 2018.

MINUTES
ROCKWALL CITY COUNCIL
Monday, October 01, 2018
4:00 p.m. Regular City Council Meeting
City Hall - 385 S. Goliad, Rockwall, Texas 75087

I. CALL PUBLIC MEETING TO ORDER

Mayor Pruitt called the meeting to order at 4:04 p.m. Present were Mayor Jim Pruitt, Mayor Pro Tem Kevin Fowler and Council Members Dana Macalik, John Hohenshelt, Patrick Trowbridge, and Bennie Daniels. Also present were City Manager Rick Crowley, Assistant City Managers Brad Griggs and Mary Smith and City Attorney Frank Garza. Councilmember Johannesen was absent from the meeting.

Mayor Pruitt reordered the work session agenda to address item #2 first.

II. WORK SESSION

1. Hold a work session to discuss providing TxDOT a local preferred option of having a continuous left turn lane on the proposed section of FM 549 from FM 1139 to Haymaker Drive rather than a raised curbed median.

City Engineer Amy Williams provided brief comments pertaining to this work session item. Mayor Pruitt described the lane as being more like a "suicide lane." Ms. Williams shared brief details of the homes in the area, including commenting that some have large lots with barns and horse trailers. She indicated that Council will have an opportunity to take action on this topic during the 'Action Item' that's scheduled later on this evening.

2. Hold a work session with Kent Donahue of Donahue Development Corporation to discuss a potential Public Improvement District (PID).

Kent Donahue with Donahue Development Corp. came forth and addressed the council during this work session item. He explained that the project they are working on is called "Heritage Park," and it is located near the intersection of SH-205 and SH-(3)549 (SW corner). He went on to share details of the project, including a proposed regional park that would highlight the State of Texas (a water feature/pond) as well as the various regions of the state (i.e. prairies & plains; hills & highlands; woods & streams; coastal waters, etc.). It would also contain hike and bike trails and some ball fields. The 545 lots (residential, single family homes) within the development would be in the $400,000-$750,000 price range. Two to three high quality builders would be involved. An amenity center will also be included within the development.

Mr. Donahue went on to share details of the proposed "Public Improvement District" (PID). General discussion also took place pertaining to the utility-related needs associated with this potential development (i.e. wastewater lift station). Discussion also ensued pertaining to how the PID would be structured and approximately how much it might cost the residents within this development. Questions and answers also took place related to the proposed park, including who would maintain it and who would 'own' it (the developer or neighborhood vs. the city).

Council took no action as a result of this work session discussion item.

Mayor Pruitt read the following discussion items into the record before recessing the public meeting to go into Executive Session at 4:53 p.m.

III. EXECUTIVE SESSION.

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding Breezy Hill Road pursuant to Section §551.071 (Consultation with Attorney).
2. Discussion regarding possible lease of real property on city owned land at Yellowjacket Park pursuant to Section §551.072 (Real Property).
3. Discussion regarding possible sale or lease of real property / land in the vicinity of County Line Road pursuant to Section §551.072 (Real Property).
4. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney).

IV. ADJOURN EXECUTIVE SESSION

Council adjourned from Executive Session at 5:52 p.m.

V. RECONVENE PUBLIC MEETING

Mayor Pruitt reconvened the public meeting at 6:01 p.m. with six of the seven council members being present (Johannesen was absent).

VI. TAKE ANY ACTION AS A RESULT OF EXECUTIVE SESSION

Mayor Pro Tem Fowler moved to approve the temporary construction easement on parcels 11, 12, 13 and 14 associated with the County Line Road construction project. Councilmember Trowbridge seconded the motion, which passed unanimously of those present (Johannesen absent).

VII. INVOCATION AND PLEDGE OF ALLEGIANCE – COUNCILMEMBER DANIELS

Councilmember Daniels delivered the invocation and led the Pledge of Allegiance.

VIII. PROCLAMATIONS / AWARDS

1. Presentation by Lakeshore Composite Squadron of Civil Air Patrol

Members of this organization came forth and thanked the City of Rockwall, including the city council members and staff, for all of their support over the years. A framed certificate of appreciation was then presented to the mayor and the city by the organization.

2. Domestic Violence Awareness Month

Mayor Pruitt invited several individuals forward, including County District Attorney, Kenda Culpepper, Rockwall Police Chief, Kirk Riggs, Assistant Chief, Kirk Aldridge, and representatives from the Rockwall Children's Advocacy Center and Women in Need as well as family violence detectives from the Rockwall Police Department. He then read the proclamation for Domestic Violence Awareness Month.

Mrs. Culpepper pointed out that several organizations are involved in helping with the prosecution of domestic violence and child related violent crimes in Rockwall County. She expressed sincere appreciation for the various organizations, and asked Mrs. Pettit from "Women in Need" to briefly speak. She expressed that Women in Need in Rockwall see about twenty-five new clients per month (as compared to about 15 clients per month when the organization was first formed). She went on to explain the various services that "Women in Need" provides, encouraging those who may be victims of domestic violence to reach out to them for help.

3. Presentation by Rockwall Firefighters Association

Michael Caffey, President of the Rockwall Professional Firefighters Association came forth, along with several other members of the department/association. Caffey explained that back in June, several members of the Rockwall City Council participated in a half day of simulated fire-related training in Garland. He then presented fire helmets to each of those council members who participated in the training day, thanking them for doing so and expressing appreciation for their support.

4. Fire Prevention Month

Chief Kenneth Cullins, Assistant Chief Ariana Hargrove, and others from the Rockwall Fire Department came forth at this time. The chief introduced each person and explained that October is "Fire Prevention Month." The mayor then read the proclamation. Chief Cullins encouraged all residents to be certain they have an adequate number of smoke alarms in their homes and that they are in proper working order. He also encouraged everyone to have a pre-planned fire escape plan, ensuring that everyone has at least two ways out in case of a fire.

IX. OPEN FORUM

Mayor Pruitt explained how Open Forum is conducted and asked if anyone would like to come forth and speak at this time. There being no one indicating such, he then closed Open Forum.

X. CONSENT AGENDA

1. Consider approval of the minutes from the September 17, 2018 regular city council meeting, and take any action necessary
2. **Z2018-036** - Consider a request by Reubin E. Harle for the approval of an **ordinance** for a zoning change from an Agricultural (AG) District to a Single Family 1 (SF-1) District for a 4.632-acre parcel of land identified as Lot 5R, Block A, Zion

Addition, City of Rockwall, Rockwall, Texas, zoned Agricultural (AG) District, addressed as 825 Zion Hills Circle, and take any action necessary **[2nd Reading].**

3. **Z2018-035** - Consider a request by Gregory S. Braden for the approval of an **ordinance** for a Specific Use Permit (SUP) for an accessory building that does not meet the requirements stipulated by the Unified Development Code (UDC) on a 3.02-acre tract of land identified as Lot 7R of the Lofland Lake Estates No. 2 Addition, City of Rockwall, Rockwall County, Texas, zoned Single Family Estate 2.0 (SFE-2.0) District, addressed as 2914 S. FM-549, and take any action necessary **[2nd Reading].**

4. **Z2018-038** - Consider a request by Scott A. Simonts on behalf of Ridgeview Church for the approval of an **ordinance** for a zoning change from an Agricultural (AG) District to a Commercial (C) District for a 7.67-acre parcel of land identified as Lot 28 of the Skyview Country Estates #3 Addition, City of Rockwall, Rockwall, Texas, zoned Agricultural (AG) District, addressed as 1362 E. FM-552, and take any action necessary **[2nd Reading].**

5. **Z2018-039** - Consider a request by Brandon Waldrum of CEI Engineering Associates, Inc. on behalf of Kelly Cannell of Murphy Road, LTD for the approval of an **ordinance** for a Specific Use Permit (SUP) for a carwash in conjunction with an existing retail store with gasoline sales on a 0.996-acre tract of land being identified as a portion of Lot 2 and all of Lot 1, Block B, Horizon Ridge Center Addition, City of Rockwall, Rockwall, Texas, zoned Planned Development District 9 (PD-9) for General Retail (GR) District land uses, addressed as 3520 Horizon Road [FM-3097], and take any action necessary **[2nd Reading].**

6. **Z2018-040** - Consider a request by John David of Express Oil Change, LLC for the approval of an **ordinance** for a Specific Use Permit (SUP) for a Minor Auto Repair Garage (i.e. Brakes Plus) on a 0.656-acre tract of land being identified as Lots 1 & 2, Block A, Billy Peoples #1 Addition, City of Rockwall, Rockwall County, Texas, zoned General Retail (GR) District, situated within the SH-205 Overlay (SH-205 OV) District, addressed as 1902 & 2000 S. Goliad Street [SH-205], and take any action necessary **[2nd Reading].**

7. Consider authorizing the City Manager to execute a professional engineering services contract with Binkley & Barfield, Inc. to perform the engineering design services and specifications for the South Lakeshore Drive Reconstruction Project from Summit Ridge Drive to Tanya Drive in an amount not to exceed $508,770.00, to be funded by 2018 Street Bond funds and water/wastewater funds, and take any action necessary.

8. Consider awarding a bid to Caldwell Country Chevrolet and authorizing the City Manager to execute a Purchase Order for a new 2019 Animal Services truck totaling $56,546 to be funded out of General Fund Reserves, and take any action necessary.

9. Consider awarding bids to Caldwell Country Chevrolet, Kubota Tractor and Quality Turf Renovation and authorizing the City Manager to execute Purchase Orders for Parks Department vehicles and equipment totaling $140,820.96 to be funded out of General Fund Reserves, and take any action necessary.

10. Consider awarding a bid to Chastang Ford and authorizing the City Manager to execute a Purchase Order for a new Fire Response Unit (1-ton truck) totaling $70,888 for Fire Operations to be funded out of General Fund Reserves, and take any action necessary.

11. Consider entering into a cooperative purchasing agreement with the City of Rowlett and awarding a bid to American Pavement Solutions for pavement crack sealing services; authorizing the City Manager to execute the Cooperative Purchasing agreement and contract totaling $100,000 funded out of the Streets and Drainage department operating budget , and take any action necessary.

12. Consider approval of the Engineering Services Agreement with HydroLogical Support Services, L.L.P. to provide general engineering services for flood plain impacts in the City of Rockwall, to be funded by the 2018-2019 Engineering Consulting budget and developer reimbursement, and take any action necessary.

13. Consider awarding bids to Caldwell Country Chevrolet and Grapevine Dodge and authorizing the City Manager to execute Purchase Orders for three new 2019 model vehicles totaling $74,022 for Police CID to be funded out of General Fund Reserves, and take any action necessary.

14. Consider authorizing the City Manager to execute a contract with the Texas Department of Transportation, Aviation Division for participation in the Routine Airport Maintenance Program (RAMP) at the Ralph M. Hall / Rockwall Municipal Airport, with matching funds for the grant to be provided by the Airport Operating Budget, and take any action necessary.

15. Consider authorizing the City Manager to execute a contract between the City of Rockwall and STAR Transit for transportation services for fiscal year 2019 in the amount of $99,960 to be funded by the Administration Department Operating Budget, and take any action necessary.

16. Consider authorizing the City Manager to execute a contract with Meals on Wheels Senior Services for certain nutritional and senior service programs for fiscal year 2019 in the amount of $35,000 to be funded from the Administration Department Operating Budget, and take any action necessary.

17. Consider awarding a bid to My Computer Guy for purchase, installation, and support of information technology data backup and storage solutions in the amount of $62,925 to be funded by the Internal Operations Department operating budget, authorizing the City Manager to execute a contract on the City's behalf, and take any action necessary.

Councilmember Trowbridge commented that there are a lot of things on the agenda that are 'purchasing' related. He assumes this is due to the start of a new fiscal year. He wonders what the turnaround time is for receiving some of these items from the time they're ordered. Mrs. Smith clarified his questions, indicating that Trowbridge's assumptions are correct and that the items are paid for after they actually arrive/are received.

Councilmember Trowbridge moved to approve the entire Consent Agenda (#1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16 and 17). Councilmember Macalik seconded the motion. The ordinances were read as follows:

CITY OF ROCKWALL
ORDINANCE NO. 18-45
SPECIFIC USE PERMIT NO. S-197

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE OF THE CITY OF ROCKWALL, TEXAS, AS PREVIOUSLY AMENDED, SO AS TO GRANT A SPECIFIC USE PERMIT (SUP) TO ALLOW FOR A MINOR AUTO REPAIR GARAGE IN A GENERAL RETAIL (GR) DISTRICT, ON A 0.656-ACRE TRACT OF LAND BEING IDENTIFIED AS LOTS 1 & 2, BLOCK A, BILLY PEOPLES #1 ADDITION, CITY OF ROCKWALL, ROCKWALL COUNTY, TEXAS; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE

The motion passed by a vote of 6 ayes with 1 absence (Johannesen).

Mayor Pruitt introduced representatives from STAR Transit and the local Meals on Wheels organization who were present this evening, thanking them for their partnerships and for all they do for the community.

XI. ACTION ITEMS

1. Discuss and consider approval of a resolution creating a Regional Emergency Communication District and consider acting on the Emergency Communication District Questionnaire, and take any action necessary.

Mark Poindexter came forth and shared that he serves on a committee at the North Central TX Council of Governments (NCTCOG) pertaining to the creation of a regional emergency communication district. He explained that the Council does not actually need to take action on the resolution this evening and that it may be acted upon at a later date. He went on to explain how emergency communication is funded via phone carrier fees that are funneled to the State Comptroller's Office and then distributed to the regional councils of government. He generally explained that the money that is supposed to be being distributed back to the COGs is not actually being distributed. He generally explained that a new board is being formed that will require elected representation from either the Rockwall City Council or Rockwall County. This new board will essentially ensure that monies that fund emergency communications in our region will be fairly budgeted and will stay in our region. Mr. Poindexter further explained that a questionnaire that was included in the council meeting packet does need to be answered by the City at this time, although the resolution does not need to be acted upon until the December 3 city council meeting. At the conclusion of the comments, questions and answers, Mayor Pruitt indicated to Mr. Poindexter that the City is in support of formation of this district.

2. **SP2018-023** - Discuss and consider a request by Pan S. Sribhen, P. E. of PSA Engineering on behalf of Shailesh C. Vora of DFW Hospitality of Rockwall, LLC for the approval of a variance to the vertical articulation requirements in conjunction with an approved site plan for a hotel on a 2.111-acre tract of land identified as a portion of Lots 7 & 8, Block A, La Jolla Pointe Addition, Phase 2, City of Rockwall, Rockwall County, Texas, zoned Commercial (C) District, situated within the Scenic Overlay (SOV) District and the IH-30 Overlay (IH-30 OV) District, situated south of the intersection of Carmel Circle and Laguna Drive, and take any action necessary.

Planning Director Ryan Miller provided background information pertaining to this agenda item. The applicant is requesting variances related to the city's vertical articulation requirements. Specifically Section 4.1.C.1.b, of Article V, of the UDC require all building facades to not extend for a distance more than three (3) times the walls height without having an off-set vertically. The elevations depicted for the north and south facades do not meet this requirement. This will require approval by the City Council by a "simple majority" vote. On July 31, 2018, the Architectural Review Board (ARB) reviewed the proposed building elevations for the site. General discussion concerning a thematic appearance amid all buildings within the Vora Addition took place between the board members and the applicant. The board requested the applicant incorporate the Coronado stone with the wood appearance at the main entrance where the AVID logo is located. The board shared their concern for the lack of vertical and horizontal elements that provide relief for the building. The ARB provided a recommendation to the Planning and Zoning Commission during its August 14, 2018. On August 14, 2018, the applicant provided elevations meeting the intent of the ARB's recommendations, with the exception of the use of the Coronado Stone, which has the "wood" appearance, to be located on the element where the hotels logo would be inserted. The applicant indicated they would not be able to meet this request due to corporate branding. After reviewing the revised elevations, the Architectural Review Board made a motion recommending approval of the elevations, which passed by a vote of 6 to 0 with Board Member Mitchell absent. This motion included a condition of approval that the applicant provide Austin Stone as depicted on the elevations and not the synthetic stone that was attached to the materials sample board. Additionally, the motion included a recommendation of approval for the variance being requested regarding the lack of horizontal and vertical articulation for the north and south elevations.

After being remanded back to the ARB by the Planning and Zoning Commission for the purpose of meeting the technical requirements of the UDC, the applicant made the changes requested by the ARB and the Planning and Zoning Commission, and the plan was in conformance with the UDC. On September 25, 2018, the ARB made a motion to deny the resubmitted elevations, meeting the technical requirements of the UDC, based on aesthetics. Additionally, the motion included a recommendation for the approval of the revised elevations originally reviewed during August 14, 2018 meeting, which included a recommendation of the variance to the vertical articulation by a vote of 5 to 0, with Board Members Neill and Mitchell being absent.

Following brief comments, Councilmember Trowbridge moved to approve the requested variances. Councilmember Macalik seconded the motion, which passed by a vote of 5 ayes, 1 against (Daniels) and 1 absence (Johannesen).

3. **A2018-004** – Discuss and consider a request by Pat Atkins on behalf of the owner C.D.T. Rockwall/2017 LLC for the voluntary annexation of a 15.0-acre tract of land identified as Tracts 1-03 of the P. B. Harrison Survey, Abstract No. 97, Rockwall County, Texas, and take any action necessary.

Following Mr. Miller's brief, introductory comments, Councilmember Trowbridge moved to approve this request for voluntary annexation. Councilmember Hohenshelt seconded the motion, which passed unanimously of those present (6 ayes with 1 absence (Johannesen)).

4. Discuss and consider establishing a policy regarding Traffic Impact Analysis (TIA) requirements in Planned Development District 32 (PD-32), and take any action necessary.

Mayor Pruitt provided comments pertaining to this agenda item. He expressed that he believes the City itself needs to be the one to hire the consultants to conduct Traffic Impact Analysis (TIA) studies and then be reimbursed by the developers. He believes TIAs should take place as part of the (re)zoning process. Mr. Miller commented that waiting until the zoning application and associated process before having TIAs conducted would be too late in the development process. Instead, it would perhaps be best for TIAs to be conducted during the "pre-development" timeframe. Lengthy dialogue ensued related to the optimal time for conducting TIAs, whether or not they should be required citywide (or just in PD-32), whether the size of a project should be a factor in triggerring a TIA (or not), and how the process of conducting TIAs might work. Mr. Crowley, City Manager, suggested that Council allow staff an opportunity to bring some ideas and suggestions back for consideration in two weeks. Council took no formal action pertaining to this agenda item at this time.

5. Discuss and consider providing TxDOT a local preferred option of having a continuous left turn lane on the proposed section of FM 549 from FM 1139 to Haymaker Drive rather than a raised curbed median, and take any action necessary.

Mayor Pruitt indicated that the Council held a work session earlier this afternoon to discuss this item. Councilmember Hohenshelt moved to approve the local preferred option of having a continuous left turn lane on the proposed section of FM 549 from FM 1139 to Haymaker Drive. Mayor Pro Tem Fowler seconded the motion, which passed by a vote of 6 ayes with 1 absence (Johannesen).

XII. CITY MANAGER'S REPORT TO DISCUSS CURRENT CITY ACTIVITIES, UPCOMING MEETINGS, FUTURE LEGISLATIVE ACTIVITIES, AND OTHER RELATED MATTERS.

1. Departmental Reports
Building Inspections Monthly Report - August 2018
Fire Department Monthly Report - August 2018
GIS Division Monthly Report - August 2018
Harbor PD Monthly Report - August 2018
Internal Operations Department Monthly Report - August 2018
Police Department Monthly Report - August 2018
Recreation Monthly Report - August 2018
Rockwall Animal Adoption Center Monthly Report - August 2018

2. City Manager's Report

Mr. Crowley reminded the Council that tomorrow night is "National Night Out" in the City, and several neighborhoods will be hosting events. He encouraged everyone to attend. No questions or comments took place pertaining to monthly reports.

XIII. EXECUTIVE SESSION

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding Breezy Hill Road pursuant to Section §551.071 (Consultation with Attorney).
2. Discussion regarding possible lease of real property on city owned land at Yellowjacket Park pursuant to Section §551.072 (Real Property).
3. Discussion regarding possible sale or lease of real property / land in the vicinity of County Line Road pursuant to Section §551.072 (Real Property).
4. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney).

XIV. RECONVENE PUBLIC MEETING & TAKE ANY ACTION AS RESULT OF EXECUTIVE SESSION

The Council did not go into Executive Session at the conclusion of the public meeting agenda.

XV. ADJOURNMENT

Mayor Pruitt adjourned the meeting at 7:10 p.m.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS 15th DAY OF OCTOBER, 2018.

ROCKWALL CITY COUNCIL
PLANNING AND ZONING COMMISSION, AND
COMPREHENSIVE PLAN ADVISORY COMMITTEE (CPAC)
JOINT WORK SESSION MEETING
City Hall, 385 South Goliad, Rockwall, Texas
Foyer/Main Entry of City Hall
October 8, 2018 - 6:00 PM

I. CALL TO ORDER

Mayor Pruitt called the meeting to order. Present were the following City Council Members:

- **Mayor Jim Pruitt**
- **Mayor Pro Tem Kevin Fowler**
- **Councilmember Patrick Trowbridge**
- **Councilmember Bennie Daniels**
- **Councilmember John Hohenshelt**
- **Councilmember Dana Macalik (arrived at 6:06 p.m.)**
- **Councilmember Trace Johannesen (arrived at 6:14 p.m.)**

Present from the Planning & Zoning Commission were the following:

- **Chairman Johnny Lyons**
- **Vice Chairman Eric Chodun**
- **Commissioner John Womble**
- **Commissioner Mark Moeller**
- **Commissioner Tracey Logan**
- **Commissioner Jerry Welch**

Commissioner Annie Fishman was absent from the meeting.

Present from the Comprehensive Plan Advisory Committee (CPAC) were the following:

- **Chairman Jerry Welch (also on the P&Z Commission)**
- **Vice Chairman Bob Wacker**
- **Committee Member Donna Dorman**
- **Committee Member Dale Cherry**
- **Committee Member Mike Larivierre**
- **Committee Member Shannon Nerren**
- **Committee Member Johnny Lyons (also on the P&Z Commission)**

The following city staff members were also present:

- **Rick Crowley, City Manager**
- **Mary Smith, Assistant City Manager**
- **Brad Griggs, Assistant City Manager**
- **Joey Boyd, Director of Internal Operations**
- **Kristy Cole, City Secretary**

- **Ryan Miller, Planning Director**
- **David Gonzales, Senior Planner**
- **Korey Brooks, Senior Planner**

II. WORK SESSION

1. **Work Session Concerning the DRAFT Comprehensive Plan Update for the OURHometown Vision 2040 Comprehensive Plan.**

    - The CPAC Chairman, Vice Chairman and Committee members will update the City Council and Planning and Zoning Commission on the DRAFT Comprehensive Plan, and answer any questions.

Following the call to order, general discussion took place among and between City Council, Planning & Zoning Commission, and Comprehensive Plan Advisory Committee members and city staff concerning the draft plan.

Commissioner/Chairman Jerry Welch indicated that the CPAC has held regular meetings to extensively review and draft proposed updates to the Comp. Plan since February of 2017. Indication was given that a great deal of work, time, thought and logic has gone into the draft plan.

Regarding the proposed "annual review" of the Comp. Plan, Councilmember Hohenshelt indicated that he believes an annual review is likely too often, even though our city continues to rapidly grow and change. He believes to do so would be burdensome and not altogether necessary. He suggested a review of the plan on an "as needed" basis but at least once every two (2) years instead.

Planning Director Ryan Miller and Chairman/Committee Member Johnny Lyons briefed everyone on the phased timeline associated with implementation of the Comp. Plan. Welch noted that the plan is strictly a guideline – its contents do not reflect things that are "written in stone." Mr. Miller pointed out that City Attorney Frank Garza has written some verbiage into the plan that, in part, generally makes it clear that it is to be utilized as a guideline. Mayor Pruitt strongly agreed that the Comp. Plan is a guideline and that it should not be something by which citizens or developers attempt to hold the P&Z Commission and/or City Council "hostage."

General discussion ensued pertaining to the various districts, land uses and zoning designations contained within the draft plan. Mayor Pruitt inquired about the city's downtown area / historic district. City Manager Rick Crowley indicated that money was budgeted in this fiscal year budget for an economic study and a zoning-related evaluation of those areas to be conducted. Staff and the Council want to ensure that downtown Rockwall and that area, in general, remains lively and vibrant. This study would also review and evaluate the city's policies pertaining to these areas.

Following the discussions concerning the draft plan, Mr. Crowley explained that the next step in the process will be for the draft plan to be placed on an upcoming City Council meeting agenda so that the Council may take formal action to forward the draft plan to the Planning & Zoning Commission for consideration. Thereafter, the plan would come back to City Council for formal approval. Those present indicated a strong desire to seek and obtain public input regarding the proposed plan. Mr. Miller shared that a public

hearing will be advertised and held at an upcoming Planning & Zoning Commission meeting, likely in the month of November. Also, a draft of the Comp. Plan will be made available on the main page of the City's website. In addition, staff will send out various notices (i.e. on "E-News," "NextDoor," "Facebook," etc.) advertising the draft plan and encouraging public input. Mr. Miller indicated that staff may also host an "open house" of sorts before the public hearing(s) are held in order to meet with any interested citizens to try and help answer any questions they may have concerning the plan.

III. ADJOURNMENT

There being no further questions or discussion, Mayor Pruitt adjourned the meeting at 6:56 p.m.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS 15th DAY OF OCTOBER, 2018.

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Amy Williams, P.E., Director of Public Works/City Engineer**

DATE: **October 11, 2018**

SUBJECT: **Professional Engineering Services Contract**
Turtle Cove Blvd and W. Yellow Jacket Lane Reconstruction Project

The Turtle Cove Blvd from Ridge Rd to Railroad Tracks and W. Yellow Jacket Lane from Ridge Road to Greencrest Boulevard Reconstruction Project is one of the first roadway projects scheduled for engineering design on the 2018 Street Bond Program. The roadways in total are approximately 1340 feet in length, and the project will consist of roadway, sidewalk and storm drainage improvements. The project will include a public input process where surveys will be sent out to adjacent property owners and public meeting will be held with schematics of the roadway and comments will be received.

Staff requested a proposal from Cobb, Fendley & Associates, Inc. to provide the engineering design and specifications for this project. The engineering fee to reconstruct Turtle Cove Blvd and W. Yellow Jacket Lane is $196,718.50. The funding of this project will be provided through the sale of bonds approved by the voters in the 2018 Street Bond Election fund. Staff recommends City Council consideration to approve a professional engineering services contract for Cobb, Fendley & Associates, Inc. to perform the engineering design services and specifications for the Turtle Cove Blvd from Ridge Rd to Railroad Tracks and W. Yellow Jacket Lane from Ridge Road to Greencrest Boulevard Reconstruction Project in an amount not to exceed $196,718.50, to be paid for out of the 2018 Street Bond funds, and take any action necessary.

If you have any questions, please advise.

STATE OF TEXAS ♦

♦

COUNTY OF ROCKWALL ♦

PROFESSIONAL ENGINEERING SERVICES CONTRACT

This Agreement is made and entered into in Rockwall County, Texas, between City of Rockwall, Texas ("CITY"), a municipal corporation and political subdivision of the State of Texas, acting by and through its City Manager and Cobb, Fendley & Associates, Inc. ("ENGINEER"), located at 2801 Network Boulevard, Suite 800, Frisco, Texas, Engineers duly licensed and practicing under the laws of the State of Texas.

WHEREAS, CITY desires to engage Engineer as an independent contractor to render certain technical and professional services necessary for performing:

PROFESSIONAL ENGINEERING SERVICES for Turtle Cove Blvd/Yellowjacket Ln Reconstruction

NOW, THEREFORE, for and in consideration of the mutual covenants and agreements contained herein, the Parties hereby agree as follows:

1. Scope of Work

Engineer agrees to perform professional engineering services as specifically defined in this Contract as Attachment "A" and as authorized by CITY. Specifically, Engineer shall perform Professional services as requested by CITY and detailed in Attachment "A".

The Parties by mutual agreement through contract amendments may provide for additional technical and professional services to be performed under the basic general terms and conditions of this Contract. CITY reserves the right to enter into another agreement with other engineering firms to provide the same or similar professional services during the term of this Contract for different projects.

2. Compensation & Term of Agreement

Cost for such services will be an annual amount not to exceed one hundred ninety-six thousand, seven hundred eighteen dollars and fifty cents ($196,718.50.00) and billed as a *lump sum or hourly* basis per rates provided in Attachment "B". Engineer is not authorized to perform any work beyond the limited not to exceed amount without authorized written approval by CITY.

The term of this Agreement shall commence upon execution of this agreement and follow the schedule described in Attachment "B". In the event of termination, Engineer will assist the CITY in arranging a smooth transition process. However, Engineer's obligation to provide services to the

CITY will cease upon the effective date of termination, unless otherwise agreed in writing.

3. Method of Payment

CITY shall pay Engineer its fees based on the presentation by Engineer to CITY of a correct monthly statement for all the amounts earned under the Contract together with reasonable supporting documentation verifying the accuracy of the fees and expenses. CITY shall then pay Engineer its fee within thirty (30) days after presentation of the accurate monthly statement by Engineer to CITY. CITY is a State sales and use tax exempt political subdivision of the State of Texas. All records supporting payment shall be kept in the offices of Engineer for a period of not less than three (3) years and shall be made available to CITY for inspection, audit or copying upon reasonable request.

4. Engineer's Standard of Care

Engineer shall provide its services under this Contract with the same degree of care, skill and diligence as is ordinarily provided by a professional Engineer under similar circumstances for a similar project. Engineer represents that it has the capability, experience, available personnel, and means required to perform the services contemplated by this Contract. Services will be performed using personnel and equipment qualified and/or suitable to perform the work requested by the CITY. CITY retains the right to report to Engineer any unsatisfactory performance of Engineer personnel for appropriate corrective action. Engineer shall comply with applicable federal, state, and local laws in connection with any work performed hereunder.

Engineer will seek written CITY approval to accept any contract or perform any services for any person, entity, or business working on this project. CITY may waive this potential conflict, but such waiver is at CITY's sole discretion and its decision shall be final.

5. Ownership of Documents

As part of the total compensation which CITY has agreed to pay Engineer for the professional services to be rendered under this Contract, Engineer agrees that hard copies of all finished and unfinished documents, data, studies, surveys, drawings, specifications, field notes, maps, models, photographs, preliminary reports, reports, bid packet/construction contract documents/advertisement for bids incorporating any CITY standard provisions provided by Engineer, will remain the property of the CITY. Engineer will furnish CITY with paper and electronic copies, to the extent they are available, of all of the foregoing to facilitate coordination, however, ownership of the underlying work product shall remain the intellectual property of the Engineer. Engineer shall have the right to use such work products for Engineer's purposes. However, such documents are not intended to be suitable for reuse by CITY or others on extension of the Project or on any other project. Any reuse without the express written consent of the Engineer will be at reuser's sole risk and without liability or legal exposure to the Engineer, and CITY to the extent allowed by law, shall hold harmless the Engineer from all claims, damages, losses, expenses, and costs, including attorneys' fees arising out of or resulting from the reuse of said documents without the Engineer's consent. The granting of such consent will entitle the Engineer to further

compensation at rates to be agreed upon by CITY and the Engineer. The above notwithstanding, Engineer shall retain all rights in its standard drawing details, designs, specifications, databases, computer software and any other proprietary and intellectual property information provided pursuant to this Contract, whether or not such proprietary information was modified during the course of providing the services.

6. Insurance

A. Engineer agrees to maintain Worker's Compensation and Employer's Liability Insurance to cover all of its own personnel engaged in performing services for CITY under this Contract in at least the following amounts:

Workmen's Compensation – Statutory
Employer's Liability – $100,000
Bodily Injury by Disease - $500,000 (policy limits)
Bodily Injury by Disease - $100,000 (each employee)

B. Engineer also agrees to maintain Commercial General Liability, Business Automobile Liability, and Umbrella Liability Insurance covering claims against Engineer for damages resulting from bodily injury, death or property damages from accidents arising in the course of work performed under this Contract in not less than the following amounts:

$2,000,000 General aggregate limit

$1,000,000 each occurrence sub-limit for all bodily injury or property damage incurred all in one occurrence

$1,000,000 each occurrence sub-limit for Personal Injury and Advertising

C. Engineer shall add CITY, its City Council members and employees, as an additional insureds on all required insurance policies, except worker's compensation, employer's liability and errors and omissions insurance. The Commercial General Liability Policy and Umbrella Liability Policy shall be of an "occurrence" type policy.

D. Engineer shall furnish CITY with an Insurance Certificate on the date this Contract is executed and accepted by CITY, which confirms that all above required insurance policies are in full force and effect.

E. Engineer agrees to maintain errors and omissions professional liability insurance in the amount of not less than one million dollars ($1,000,000) annual aggregate, on a claims made basis, as long as reasonably available under standard policies.

7. **INDEMNIFICATION**

ENGINEER SHALL INDEMNIFY AND SAVE HARMLESS THE CITY AND ITS

CITY COUNCIL MEMBERS AND EMPLOYEES FROM SUITS, ACTIONS, LOSSES, DAMAGES, CLAIMS, OR LIABILITY, INCLUDING WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, ALL EXPENSES OF LITIGATION, COURT COSTS, AND REASONABLE ATTORNEY'S FEES FOR INJURY OR DEATH TO ANY PERSON, OR INJURY TO ANY PROPERTY, RECEIVED OR SUSTAINED BY ANY PERSON OR PERSONS OR PROPERTY, TO THE EXTENT CAUSED BY THE NEGLIGENT ACTS OF ENGINEER OR ITS AGENTS OR EMPLOYEES, IN THE EXECUTION OF PERFORMANCE OF THIS CONTRACT.

ENGINEER'S TOTAL LIABILITY TO CITY FOR ANY LOSS OR DAMAGES FROM CLAIMS ARISING OUT OF, OR IN CONNECTION WITH, THIS CONTRACT FROM ANY CAUSE INCLUDING ENGINEER'S STRICT LIABILITY, BREACH OF CONTRACT, OR PROFESSIONAL NEGLIGENCE, ERRORS AND OMISSIONS SHALL NOT EXCEED ONE MILLION DOLLARS ($1,000,000). NEITHER PARTY TO THIS AGREEMENT SHALL BE LIABLE TO THE OTHER PARTY OR ANY THIRD PARTY CLAIMING THROUGH THE OTHER RESPECTIVE PARTY, FOR ANY SPECIAL, INCIDENTAL, INDIRECT, PUNITIVE, LIQUIDATED, DELAY OR CONSEQUENTIAL DAMAGES OF ANY KIND INCLUDING BUT NOT LIMITED TO LOST PROFITS OR USE OF PROPERTY, FACILITIES OR RESOURCES, THAT MAY RESULT FROM THIS AGREEMENT, OR OUT OF ANY GOODS OR SERVICES FURNISHED HEREUNDER.

8. Addresses for Notices and Communications

CITY
Amy Williams, P.E.

City of Rockwall
385 S. Goliad Street
Rockwall, Texas 75087

ENGINEER
Cobb, Fendley & Associates, Inc.
2801 Network Boulevard, Suite 800
Frisco, TX 75034

All notices and communications under this Contract shall be mailed or delivered to **CITY** and **Engineer** at the above addresses.

9. Successors and Assigns

CITY and Engineer each binds itself and its successors, executors, administrators and assigns to the other parties of this Contract and to the successors, executors, administrators and assigns of such other parties, in respect to all covenants of this Contract. Except as noted in the first part of this Paragraph, neither CITY nor Engineer shall assign, sublet or transfer its interest in this Contract

without the written consent of the other. Nothing herein shall be construed as creating any personal liability on the part of any officer, council member, employee or agent of any public body which is a party hereto.

10. Termination for Convenience of the Parties

Engineer and CITY may terminate this Contract for their convenience at any time by giving at least thirty (30) days notice in writing to each other. If the Contract is terminated by CITY and/or Engineer as provided herein, Engineer will be paid for the Work provided and expenses incurred up to the termination date, if such final compensation is approved by CITY, in its sole discretion. If this Contract is terminated due to the fault of Engineer, Paragraph 10 hereof, relative to Termination for Cause, shall apply.

11. Changes

CITY may, from time to time, request changes in the Scope of Work of **Engineer** to be performed hereunder. Such changes, including any increase or decrease in the amount of **Engineer's** compensation, or time for performance, which are mutually agreed upon by and between **CITY** and **Engineer**, shall be incorporated in written amendments to this Contract. Any subsequent contract amendments shall be executed by the City Manager or other authorized representative as designated by the City Manager or City Council.

Any alterations, additions or deletions to the terms of this Contract, including the scope of work, shall be by amendment **in writing** executed by both CITY and Engineer.

13. Reports and Information

Engineer, at such times and in such forms as **CITY** may reasonably require, and as specified in the Scope of Work or in additional Contract Amendments shall furnish **CITY** periodic reports pertaining to the Work or services undertaken pursuant to this Contract, the cost and obligations incurred, or to be incurred in connection therewith, and any other matter covered by this Contract.

14. Entire Agreement

This Contract and its Attachments and any future Contract Amendments constitute the entire agreement and supersede all prior agreements and understandings between the parties concerning the subject matter of this Contract.

15. Waiver

The failure on the part of either party herein at any time to require the performance by the other party, of any portion of this Contract, shall not be deemed a waiver of, or in any way affect that party's rights to enforce such provision, or any other provision. Any waiver by any party herein of

any provision hereof, shall not be taken or held to be a waiver of any other provision hereof, or any other breach hereof.

16. Severability

The invalidity or unenforceability of any provision of this Contract shall not affect the validity or enforceability of any other provision of this Contract.

17. Survival

Any and all representations, conditions and warranties made by Engineer under this Contract are of the essence of this Contract and shall survive the execution, delivery and termination of it.

18. Governing Powers and Law

Both Parties agree and understand that the City does not waive or surrender any of its governmental powers by execution of this Agreement. To that end, the parties further understand that this agreement shall not be considered a contract for goods or services under Texas Local Government Code, Section 271.151 and Contractor waives any right or entitlement granted said provisions. This Contract is governed by the laws of the State of Texas and all obligations of the parties under this Contract are performable in Rockwall County, Texas.

19. Attorney's Fees

If it is necessary for either Party herein to file a cause of action at law or in equity against the other Party due to: (a) a breach of this Contract by the other Party and/or (b) any intentional and/or negligent act or omission by the other Party arising out of this Contract, the non-breaching or non-negligent Party shall be entitled to reasonable attorney's fees and costs, and any necessary disbursements, in addition to any other relief to which it is legally entitled.

20. State or Federal Laws

This Contract is subject to all applicable federal and state laws, statutes, codes, and any applicable permits, ordinances, rules, orders and regulations of any local, state or federal government authority having or asserting jurisdiction, but nothing contained herein shall be construed as a waiver of any right to question or contest any such law, ordinance, order, rule or regulation in any forum having jurisdiction.

ATTACHMENT "A"

Turtle Cove Blvd (Ridge Rd. to Briar Oak Dr.)
Yellowjacket Lane (Ridge Rd. to Greencrest Blvd.)
Reconstruction Project
For
City of Rockwall

Scope of Services

Project Understanding

Turtle Cove Boulevard:
The City of Rockwall (City) wishes to reconstruct Turtle Cove Boulevard an existing two-lane concrete roadway, from Ridge Rd. to Briar Oak Dr., approximately 775 feet in length; The roadway lies within a commercial area of the City of Rockwall. Reconstruction will be two-lane: one vehicle lane (25' B-B) in each direction with concrete curb and gutter with 5 ft sidewalks on each side. These improvements will be with the existing 60' Right of Way (ROW); however, the contract will include a provision for two (2) parcel takes or easements in the event that they are required.

Yellowjacket Lane:
The City of Rockwall (City) wishes to reconstruct westbound Yellowjacket Lane, an existing four- lane divided concrete roadway, from Ridge Rd. to Greencrest Blvd., approximately 550 feet in length. The roadway lies within a commercial area of the City of Rockwall. Reconstruction will be two-lane: two vehicle lanes (25' B-B) in the westbound direction separated by existing median with concrete curb and gutter with 5 ft sidewalk on the westbound side. These improvements will be with the existing 90' Right of Way (ROW); however, the contract will include a provision for two (2) parcel takes or easements in the event that they are required.

Additional design will include storm sewer improvements. The existing storm sewer will be analyzed using current City drainage criteria and improvements will be designed where the existing system is inadequate.

Other design components include coordinating with ONCOR for street lighting, utility coordination, TDLR compliance with ADA and traffic control plans.

CobbFendley will provide plans, specifications, estimates, and permits for the project and will support the City of Rockwall's advertising/bidding administration.

BASIC SERVICES

1. Schematic Conceptual Design (30%)

1.1. Project Management

1.1.1. Conduct CobbFendley internal project kickoff meeting with entire project team and City Staff.

1.1.2. Prepare and send Project Status Update (PSU) to City's Project Manager on monthly basis. PSU will address work completed in previous period, work in progress and/or anticipated to be completed in next period, actions or information needed from City, and a schedule update.

1.1.3. Develop design criteria and design decisions tables.

1.1.4. Prepare project correspondence and invoicing documents.

1.1.5. Prepare and submit project schedule to City staff and provide general project management activities.

1.1.6. Project Administration

- Prepare project correspondence and invoicing documents

1.2. Project stakeholder coordination

- Develop project stakeholder contact list including but not limited to franchise utilities, City's water and sewer department, traffic department, railroad, TxDOT and other governmental agencies.
- Conduct progress meetings to monitor the development of the project. During this phase of the project, conduct up to two (2) meetings with the City staff regarding project status and coordination issues. The first meeting will be the project kick-off meeting, and the second meeting will be the conceptual design presentation and review.

1.3. Public Meetings

1.3.1. Meetings

1.3.1.1. Attend two (2) public involvement meeting as directed by City staff. Provide exhibits suitable for public meeting use depicting street section, alignments etc. Support City staff during meetings by providing technical information, responding to citizen questions, and recording citizen input.

1.3.1.1.1. First Public Meeting will be with adjacent property owners and residents.

- Mail out all first public meeting notification for the City.
- Revise 30% Schematics Roll Plots based on public input from first public meeting and City direction to be used in second public meeting.

1.3.1.1.2. Second Public Meeting will be with adjacent property owners and residents as well as the neighborhood.

- Mail out all second meeting public meeting notification for the City (Neighborhood to be at a typical 500ft buffer off the street)
- Revise 30% Schematics Roll Plots based on public input from second public meeting and City direction to be used in City Council presentation for schematic and typical section approval.

1.4. Schematic Roll Plot and Graphics (30%)

The following services will be provided as part of the Conceptual Design Phase (30%):

- Review and research previously prepared construction plans record documents, and other pertinent information related to proposed project.
- Review City master plans, design standards, specifications, construction details, and other pertinent information that may impact the design. Review of documents will include but not limited to:
  - City of Rockwall Master Thoroughfare Plan
  - City of Rockwall Water/Wastewater Master Plan
  - City of Rockwall Standards of Design and Construction
  - City of Rockwall Trail Master Plan

- Develop complete and accurate base map showing all existing Right-of-Way (ROW), easements, and utilities.
- Develop and evaluate typical sections (up to two (2)) to use for Turtle Cove Blvd. and Yellowjacket Lane.
- Develop drainage area maps and analyze street and inlet capacities.
- Develop horizontal alignments for roadway,
- Develop vertical alignment for roadway and cut cross sections at critical points, at center of driveways, alley approaches, cross streets, lead walks, at alignment geometric points and at 25' intervals to evaluate the grading.
- Review City Master Trail Plan and incorporate hike and bike trails if necessary.
- Prepare 30% schematic paving plan and profile roll plots, produced at 1" =40' horizontal scale and 1" =5' vertical scale. The horizontal alignment of proposed water lines and sewer lines will be included in the roll plots.
- Prepare cross sections sheets.
- Meet with City staff and present concept paving plan and profile roll plots.
- Incorporate comments and feedback from City staff and other stakeholders prior to public meetings.

1.5. Drainage Analysis (30%)

The following services will be provided as part of the Conceptual Design Phase (30%):

- Review and research existing construction plans and record documents, historical flooding events and other pertinent information related to the existing drainage infrastructure along, upstream and downstream of the proposed project.
- Prepare a hydrologic and hydraulic analysis of the existing drainage infrastructure and prepare a report in memo format signed and sealed. Analysis/report shall include the following.
    - Existing drainage infrastructure analysis
        - Drainage Area Map of existing conditions/infrastructure.
        - Analysis effect on existing system of proposed off-site development or infrastructure improvements currently being planned.
        - Drainage calculations – Drainage Area, Inlet, Storm Sewer, Culvert, etc. (to be in City Standard's tabular format)
        - Synopsis of hydraulic deficiencies in written and plan format, includes downstream off-site drainage infrastructure.
        - Synopsis of structural deficiencies of drainage system as a result of TV inspection in written and plan format.
    - Recommendation of improvements to existing drainage system to meet the City's current 100-year design storm criteria.
        - Drainage Area Map of proposed improvements
        - Proposed drainage calculations – Drainage Area, Inlet, Storm Sewer, Culvert, etc. (to be in City Standard's tabular format)
        - Summary of proposed improvement of drainage infrastructure in written and plan format to fix hydraulic and structural deficiencies in order to meet current City drainage criteria standards.

2. Construction Documents

2.1. Project Management

- Conduct progress meetings at each stage of the construction documents phase to monitor the development of the project regarding project status, coordination issues and go over City review comments of the plans.
- Coordinate with other utilities, (electric power, cable TV, phone, gas, optic fiber, etc.)
- Prepare and send Project Status Update (PSU) to City's Project Manager on monthly basis. PSU will address work completed in previous period, work in progress and/or anticipated to be completed in next period, actions or information needed from City, and a schedule update.
- Update project schedule and interim milestones (coordinate with City staff as necessary)
- Project site visits (up to three (3) trips)

2.2. Construction Plans, Specifications and Estimates (60%, 90%, 100%)

2.2.1. Submittals

CobbFendley will submit 60%, 90% and 100% submittals for the City for review and comment. The following will be required for each submittal:

- Construction Plans
  - Two (2) Full Size copies – 22"x34"
  - Two (2) Half Size copies – 11"x17"
  - One (1) PDF copy
  - One (1) PDF copy– Scanned City comments previous submittal
- Engineers Opinion of Construction Cost
- Construction Contract Template/Specification Book

2.2.2. Construction Plans

Each plan sheet in the construction plans set will conform to the Engineering Drawing Requirements set forth in the City of Rockwall's Standards of Design and Construction. Plan sheets will also include any other additional documentation, notation, and clarification required by the City's Project Manager to prove design and constructability of the project. Each stage of the construction plan review process will incorporate any changes associated with City comments on previous submittals.

Below is a table of the required construction plan sheets and which submittals they are required.

Plan Sheets	**60%**	**90%**	**100%**
Cover Sheet	X	X	X
Legend Sheet	X	X	X
General Notes Sheet	X	X	X
Existing Condition Plan (1"=20' scale)	X	X	X
Horizontal/Vertical Control Sheet (1"=40' scale)	X	X	X
Typical Sections (Existing and Proposed)	X	X	X
Erosion Control Plan (1"=40' scale)		X	X
Demolition/Removals Plan (1"=20' scale)	X	X	X
Roadway Plan/Profiles (1"=20'H, 1'=5'V scale)	X	X	X
Alley and Driveway Plan/Profile (1"=20'H, 1'=5'V scale)		X	X
Intersection Grading Plan (major and critical intersections)		X	X

Pavement Signage and Striping Plan (1"=20' scale)		X	X
Drainage Area Map (Existing and Proposed)	X	X	X
Drainage Calculations (Area, Inlet, Storm, Culvert)		X	X
Drainage Plan/Profile (Trunks and Laterals) (1"=20'H, 1'=5'V scale)	X	X	X
Retaining Wall Plan/Profile (1"=20'H, 1'=5'V scale)	X	X	X
Construction Sequencing Phasing Narrative	X	X	X
Detour Plan (for each Phase)		X	X
Traffic Control Plan (for each phase & typ. sections) (1"=40' scale)		X	X
Roadway Cross-Sections (25' int. & crit. pts.) (1"=20'H, 1'=5'V scale)	X	X	X
Structural Layout Sheets		X	X
Details (for each section of plans)		X	X

Each subsection below details out the services to be perform for each section of the construction plan set.

2.2.2.1. Roadway Design

- Incorporate the preliminary design submittal review comments
- Prepare plan / profile sheets (24"x36" plan sheets at a scale of 1"=20' horizontal, and 1"=5' vertical).
- Analyze all driveways within the project and develop driveway adjustment and crosswalk profiles as needed. Typically, driveways will be defined vertically by profiles.
- Develop design cross-sections
    - Develop on 25' station intervals and other critical points.
    - Show pavement and subgrade, right-of-way limits, sides slopes, pavement cross slopes, curbs, and retaining walls (if applicable)
    - Cross-sections will be provided in the plan set.
- Prepare roadway details to clarify intent of design
- Modify standard details as needed and include

2.2.2.2. Drainage

- Create Drainage Area Maps (existing and proposed)
- Create Drainage Calculation Sheets (Tables to be formatted to match City Standard's tabular format)
- Identify the need for additional drainage easements to accommodate the proposed offsite drainage improvements (if required)
- Perform final storm sewer sizing and alignment design. Prepare final inlet design sheets and hydraulic design sheets for inclusion in the plans.
- Prepare storm sewer plan/profile sheets depicting storm sewer lines, inlets, junction boxes, connections, manholes, utility crossings and the hydraulic grade lines.
- Prepare profiles for all trunks and laterals (to be profiled along centerline of pipe)
- If drainage flow patterns/areas are changing due to proposed improvements, then existing downstream and upstream systems will be analyses and included in plan set to prove that there are no adverse impacts as a result. Full Hydrologic and Hydraulic Calcs Sheets and storm sewer plan and profiles sheets for these existing upstream and downstream systems are to be included in the plan set.
- Prepare drainage details to clarify intent of design.
- Compile applicable City standard details. Modify standard details as needed.

- Prepare erosion control plan.

2.2.2.3. Utilities

2.2.2.3.1. Public (Water, Wastewater, Storm Drainage, etc.)

- Establish the location of existing public utilities based upon information provided by the City, SUE and field survey information

2.2.2.3.2. Franchise Utility Coordination

- Identify franchise utility contacts
- Send one set of plans to each franchise utility for their review will be submitted at each phase. Request each franchise utility to mark up the plans to show the size, type and location of their utilities.
- Notify the City if any relocations are required
- CobbFendley shall perform the coordination with the franchise utilities if any relocations are required.
- Attend City-run Franchise Utility Coordination Meetings (typically 2-4 meetings per year are held). CobbFendley will give background on particular project and coordinate with franchise utility companies on foreseen conflicts and pass out current plan set.

2.2.2.4. Structural

- Structural design and layout of retaining wall (plan and profile)
- Structural design and layout for other elements of the project not covered in the standard details (Junction boxes, stairs, etc.)

2.2.2.4.1. Pavement Marking and Signing Plans

- Determine potential conflicts with existing signs and propose sign relocations
- Prepare crosswalk pavement marking and signing layouts in accordance with City design standards and the Texas Manual on Uniform Traffic Control Devices (TMUTCD).
- Prepare details to clarify intent design
- Compile applicable City standard details. Modify standard details as needed.

2.2.2.5. Traffic Control Plans, Detour Plans, Construction Sequencing/Phasing

- Develop construction sequence plan showing:
  - Construction area for each phase of construction and closure of existing travel lanes (if needed).
  - Temporary signing and striping, barricades, and other channelization device
  - Narrative of the sequence of work.
  - Detour Plan for each construction phase
  - Storm sewer construction phasing.
  - Public utilities relocation phasing.
  - Pedestrian routing during construction.
- Develop typical cross section showing lane widths, edge conditions, channelization and proposed construction area.
- Develop typical driveway staging plans for similar driveways. Develop custom driveway staging layouts for special conditions.
- Prepare traffic control details to clarify intent of design.

2.2.3. Specifications/Construction Contracts

Prepare general notes, specification data, and final Bid Book in accordance with City of Rockwall requirements. Identify and prepare special specifications and/or special provisions applicable to the project. Prepare Bid-Tab sheets of applicable items for Contractor to fill/present bid prices.

- Contact documents, including the following:
  - City of Rockwall standard construction contract forms
  - Notice to bidders
  - Special instructions to bidders
  - Bid form (Bid-Tab) – Electronic for Bidding
  - Standard construction contract
  - Performance bond
  - Payment bond
  - Maintenance bond
  - Certificate of insurance
  - General conditions
  - Special conditions
  - Technical specifications
  - Permits (TXDOT, City of Dallas, etc.)
  - Geotechnical Report

2.2.4. Estimates

Compile an overall opinion of probable construction cost based on current market values. Cost shall be broken out in to separate schedules for each section of the job.

2.3. Agency Permitting/Coordination (City of Dallas, NTMWD, TDLR, etc.)

2.3.1. NTMWD

- CobbFendley to coordinate with the NTMWD on items related to the project where any improvements cross any NTMWD line or facility. There is a 14-inch force main along Turtle Cove Blvd. This shall include all coordination meetings, plan submittals, permit submittals, etc. in order to achieve acceptance of proposed improvements.

2.3.2. Union Pacific / Dallas, Garland & Northeastern Railroad

- CobbFendley to coordinate with the Railroad on items related to the project where any improvements cross any Railroad facilities. This shall include all coordination meetings, plan submittals, permit submittals, etc. in order to achieve acceptance of proposed improvements.

2.3.3. Accessibility Review (TDLR)

- Prepare a completed application for submittal to the Texas Department of Licensing and Regulation for review in accordance with the Elimination of Architectural Barriers Act.
- CobbFendley to complete application and submit with set of plans to a Registered Accessibility Specialist (RAS) from review and TDLR project registration. All coordination and fees with TDLR compliance will be done by CobbFendley.
- While we do not anticipate accessibility revisions to be required, we will address minor revisions to the plans based on review comments from the RAS.

SPECIAL SERVICES

3. Data Collection & Property Research / Topographic and Design Survey

3.1. Data Collection and Property Research

3.1.1. Gather existing plat information

3.1.2. Collect property owner and record information

3.1.3. Gather existing ROW and easement information, identify all easements through typical research methodologies (i.e. plats, court house filings, etc.).

3.2. Topographic and Design Survey

3.2.1. Turtle Cove Blvd: The limits of the survey shall be from the intersection of Turtle Cove Blvd. and Ridge Road to the intersection of Turtle Cove Blvd. and Briar Oaks Drive. The survey shall be from ROW line to ROW line (60-foot ROW) of Turtle Cove Blvd. Survey will include intersecting roadways extending 50 feet along each leg of the major intersections and 50 feet along each leg of the minor intersections.

Yellowjacket Lane: The limits of the survey shall be from the intersection of Yellowjacket Lane. and Ridge Road to the intersection of Yellowjacket Lane and Greencrest Blvd. The survey shall be from the north ROW line to center of median (90-foot ROW) of Yellowjacket Lane. Survey will include intersecting roadways extending 50 feet along each leg of the major intersections and 50 feet along each leg of the minor intersections.

3.2.2. Establish a vertical control benchmark circuit as needed throughout the project. Use existing City established monument information for the City and tie survey into. A differential level loop will be run through all Primary Control Points to verify elevations.

3.2.3. A minimum of three Primary Control Points will be set in each project area in locations that are unlikely to be disturbed by construction activity. Secondary Control Points will also be set as required to perform the survey. Horizontal data will be referenced to the Texas State Plane Coordinate System, North Central Zone (4202), NAD 83(2011), Epoch 2010.00. Elevations will be referenced to NAVD 88 and computed using GEOID12A.

3.2.4. Grid coordinates will be converted to Surface values using a Combined Surface Adjustment Factor 1.000146135 (or as otherwise specified by the City of Rockwall).

3.2.5. Perform a field survey to identify and locate existing topographic elements within the roadway corridor. All identified topographic elements shall be tied down horizontally and vertically. The field survey shall include but not be limited to the following:

- Property corner monumentation: Sufficient property corners will be located, and Deed and Plat information obtained to approximately show the existing ROW line along the corridor within a 0.5’ accuracy.
- Existing pavement, curbs, sidewalks, barrier free ramps, etc.
- Roadway and lane striping
- Driveways
- Existing storm sewer inlets, manholes, junction boxes Headwalls (including culvert sizes and invert elevations)
- Outfalls, bridges and erosion control
- Existing driveway culverts and swales (flowlines, sizes, types, etc.)
- Guardrail

- Utility manholes, vaults, water valves, water meters, wastewater cleanouts, sprinkler heads, telephone poles, power poles, utility markers, other public utilities and franchise utilities
- Traffic Signal poles, cabinets, pull boxes and other signal equipment
- Signs (excluding temporary signs)
- Trees, including species and caliper (all sizes)
- Landscape planters, Shrubs, rocks and other features.
- Buildings and permanent structures
- Retaining walls
- Fencing walls
- Fence limits and material types (excluding temporary fences)
- Mailboxes (types – wood, brick, stone)
- Other applicable physical features that could impact design

3.2.6. Perform cross-sections throughout project limits at 25-foot intervals and at grade breaks and prepare cross-section field notes. Spot elevations will be taken from apparent ROW to apparent ROW along Turtle Cove Blvd. and the westbound lanes only of Yellowjacket Lane from the southern edge of the median to the northerly apparent ROW line.

3.2.7. Prepare a final topographic drawing in digital format (including contours and breaklines) showing the features located in the field, an ASCII coordinate file of the points located in the field, and a hard copy of the coordinates and feature descriptions.

3.2.8. CobbFendley will perform site visits for the purposes of reviewing the provided survey in the field and making notes for additional survey needs and design considerations.

4. Subsurface Utility Engineering (S.U.E.) Services

4.1. Provide S.U.E. Services for the purpose of locating horizontal and vertical locations of underground city and franchise utilities, in conjunction with and /or prior to the field survey.

- S.U.E. Level 'B' Services will be provided to determine horizontal location of utilities up to two days.
- S.U.E. Level 'A' Services will be provided as deemed necessary, as follows:
  - Up to two (2) test holes of 0-5 ft depth will be provided
  - Test holes in addition to those listed above will be provided at the rate per test hole agreed to by the City of Rockwall.
- TV Inspection of Storm Sewer Lines will be provided for Turtle Cove Blvd.
  -

4.2. CobbFendley shall arrange and make provisions for access to perform the services specified within this scope. The surveyor shall provide the City with the name and address of the property owners.

4.3. The City shall be responsible for the coordination of all ROW and easement acquisitions. CobbFendley will provide survey information and easement/ROW documents (sketch and legal description) to the City. Additional ROW and easement documentation services are detailed below in Section 2.

5. Right-of-Way / Easement Instruments of Conveyance

5.1. Prepare ROW instruments (narrative and graphic exhibits of ROW takes) and setting new property corners (for new ROW only) in the field

5.1.1. Up to two (2) parcels

5.2. Prepare easement instruments (narrative and graphic exhibits of easements required for drainage, City utilities, temporary construction, etc.)

5.2.1. Up to two (2) parcels

5.3. Individual parcel exhibits shall be on 8-1/2"x11" paper and pdf copy shall be sealed, dated, and signed by a Registered Professional Land Surveyor and shall contain the following:

5.3.1. Parcel number

5.3.2. Area required

5.3.3. Area remaining

5.3.4. Legal description

5.3.5. Current owner

5.3.6. Any existing platted easements or easements filed by separate instrument including easements provided by utility companies

5.3.7. Metes and bounds description of parcel to be acquired. The description shall be provided on a separate sheet from the exhibit. Each type of easement shall be described separately.

5.4. Upon written notification by the City of acceptance of the ROW exhibits and instruments, and as directed by the City, the surveyor shall set all corners and points of curvature for the proposed ROW and submit final sealed plans and exhibits, including location of the control points and their NAD-83 reference

5.5. CobbFendley will provide the information listed in Section 2 to the City and/or their selected ROW and easement acquisition agent. This task will include the following:

5.5.1. Transmittal of survey and existing property information.

6. Geotechnical

6.1. Subsurface Exploration

6.1.1. Five (5) borings are planned for this project. The borings and report will be through a subconsultant.

The locations are as follows:

- Two borings to ten (10) feet will be located along Yellowjacket Lane.
- Three borings to ten (10) feet will be located along Turtle Cove Blvd.

6.1.2. Boring Services –Borings will be sampled to 10 feet. A total of 50 feet for drilling is planned.

- Check samples for consistency with a hand penetrometer
- Stake the boring locations using normal taping procedures
- Backfill bore holes and plug at the surface

6.2. Laboratory Services

6.2.1. Considering the planned facilities, anticipated soil conditions, and geology, the following laboratory test will be required for classification purpose and to determine strength characteristics:

- Visual Classification
- Moisture content and soil identification
- Liquid and plastic limit determinations
- Unconfined compression
- Calibrated hand penetrometer tests
- Lime/pH series tests
- Soluble sulfate tests (to determine lime-induced heaving potential)

6.3. Engineering Services

6.3.1. Prepare an engineering report presenting the following:

- Sample boring location map
- Boring logs and laboratory results
- General soil and ground-water conditions

- Recommendations will be based on a 30 year design life.
- Subgrade design recommendations for lime treated and cement treated
- Pavement design recommendation for reinforced concrete, asphalt or combination of concrete and asphalt system (including pavement thickness, strength, reinforcement size and spacing, and joint spacing)
- Recommendations for retaining walls
- Earthwork recommendations

6.3.2. The geotechnical engineer's design recommendations shall be relied upon by the civil and structural engineers for their design.

6.3.3. Submit one (1) paper copy and one pdf file copy of the report to the City

7. Additional Services

Services not specifically identified in the Scope of Services above shall be considered additional and shall be performed on an individual basis upon authorization by the City of Rockwall. Such services shall include, but are not limited to the following:

7.1. Construction staking.
7.2. _____
7.3. _____

-End of Scope of Service-

ATTACHMENT "B"

Payment Schedule

Compensation for Basic Services in Tasks 1-2 shall be on a lump sum basis. The tabulation below establishes the not to exceed amount for each category of contract service:

	Task	Fee
	BASIC SERVICES	
1.	Schematic Conceptual Design (30%)	$ 21,540.00
2.	Construction Documents	
2.1	60% Design	$ 45,925.00
2.2	90% Design	$ 47,215.00
2.3	100% Design	$ 17,530.00
	Basic Services Subtotal:	**$ 132,210.00**
Compensation for special services under Tasks 4-7 shall be a labor fee plus expense (reimbursable) basis with the max fee shown below.		
	SPECIAL SERVICES	
4.	Data Collection & Property Research / Topographic and Design Survey	$ 9,950.00
5.	Subsurface Utility Engineering (S.U.E.) Services	
5.1	Quality Level 'B' S.U.E. Services (2 days max, assumes 5,000 LF)	$ 7,000.00
5.2	Quality Level 'A' S.U.E. Services (2 test holes from 0 – 5 ft, with traffic control	$ 3,700.00
5.3	TV Inspection of Storm Sewer Lines (1 day, assumes 200 LF)	$ 2,350.00
6.	Right-of-Way/Easement Instruments of Conveyance	$ 14,000.00
	(2 Easements and 2 ROW documents are assumed @ $3,500.00/document)	
7.	Geotechnical	$ 9,625.00
	Special Services Subtotal*	**$ 46,625.00**
	ENGINEERING SERVICES CONTINGENCY**	**$ 17,883.50**
	***(This service is a miscellaneous amount to be used at the discretion of the City for additional Services outside of the scope of the contract. This item will be controlled by the City and will only be used if the City chooses. The Engineer has no right or guarantee to the use of this Contingency)*	
	Project Total*	**$ 196,718.50**

Fees that are Lump Sum for each task and will be invoiced monthly based upon the overall percentage of services performed.

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Amy Williams, P.E., Director of Public Works/City Engineer**

DATE: **October 10, 2018**

SUBJECT: **Professional Engineering Services Contract**
Alta Vista Drive and West Street Reconstruction Project

The Alta Vista Drive from Lakeshore Drive to Westway Drive and West Street from Rusk Street to Highland Drive Reconstruction Project is one of the first roadway projects scheduled for engineering design on the 2018 Street Bond Program. The roadways in total are approximately 1670 feet in length, and the project will consist of roadway, sidewalk, water line, wastewater line, and storm drainage improvements. The project will include a public input process where surveys will be sent out to adjacent property owners and public meeting will be held with schematics of the roadway and comments will be received.

Staff requested a proposal from Teague Nall and Perkins, Inc. to provide the engineering design and specifications for this project. The engineering fee to reconstruct Alta Vista Drive and West Street is $313,500.00. The funding of this project will be provided through the sale of bonds approved by the voters in the 2018 Street Bond Election and water and wastewater funds. Staff recommends City Council consideration to approve a professional engineering services contract for Teague Nall and Perkins, Inc. to perform the engineering design services and specifications for the Alta Vista Drive from Lakeshore Drive to Westway Drive and West Street from Rusk Street to Highland Drive Reconstruction Project in an amount not to exceed $313,500.00, to be paid for out of the 2018 Street Bond funds and water wastewater funds, and take any action necessary.

If you have any questions, please advise.

ALTA VISTA DR AND WEST ST

58

CIP PROJECT

STATE OF TEXAS ♦
♦
COUNTY OF ROCKWALL ♦

PROFESSIONAL ENGINEERING SERVICES CONTRACT

This Agreement is made and entered into in Rockwall County, Texas, between City of Rockwall, Texas ("CITY"), a municipal corporation and political subdivision of the State of Texas, acting by and through its City Manager and Teague Nall and Perkins, Inc., ("ENGINEER"), located at 825 Watters Creek Boulevard, Suite M300, Allen, Texas, Texas, Engineers duly licensed and practicing under the laws of the State of Texas.

WHEREAS, CITY desires to engage ENGINEER as an independent contractor to render certain technical and professional services necessary for performing:

PROFESSIONAL ENGINEERING SERVICES for Reconstruction of Alta Vista Drive from Lakeshore Drive to Westway Drive, and West Street from Rusk Street to Highland Drive

NOW, THEREFORE, for and in consideration of the mutual covenants and agreements contained herein, the Parties hereby agree as follows:

1. Scope of Work

Engineer agrees to perform professional engineering services as specifically defined in this Contract as Attachment "A" and as authorized by CITY. Specifically, ENGINEER shall perform Professional services as requested by CITY and detailed in Attachment "A".

The Parties by mutual agreement through contract amendments may provide for additional technical and professional services to be performed under the basic general terms and conditions of this Contract. CITY reserves the right to enter into another agreement with other engineering firms to provide the same or similar professional services during the term of this Contract for different projects.

2. Compensation & Term of Agreement

Cost for such services will be an amount of One Hundred Ninety-Seven Thousand Seven Hundred Dollars ($197,700.00) billed as a *lump sum* basis for Basic Services, and Eighty-Seven Thousand Three Hundred Dollars ($87,300.00) billed on a *lump sum/hourly/unit price* basis for Special Services, per rates provided in Attachment "B". ENGINEER is not authorized to perform any work beyond the limited not to exceed amount without authorized written approval by CITY.

The term of this Agreement shall commence upon execution of this agreement and follow the schedule described in Attachment "C". In the event of termination, ENGINEER will assist the CITY

in arranging a smooth transition process. However, ENGINEER's obligation to provide services to the CITY will cease upon the effective date of termination, unless otherwise agreed in writing.

3. Method of Payment

CITY shall pay ENGINEER its fees based on the presentation by ENGINEER to CITY of a correct monthly statement for all the amounts earned under the Contract together with reasonable supporting documentation verifying the accuracy of the fees and expenses. CITY shall then pay ENGINEER its fee within thirty (30) days after presentation of the accurate monthly statement by Engineer to CITY. CITY is a State sales and use tax exempt political subdivision of the State of Texas. All records supporting payment shall be kept in the offices of ENGINEER for a period of not less than three (3) years and shall be made available to CITY for inspection, audit or copying upon reasonable request.

4. Engineer's Standard of Care

ENGINEER shall provide its services under this Contract with the same degree of care, skill and diligence as is ordinarily provided by a professional Engineer under similar circumstances for a similar project. ENGINEER represents that it has the capability, experience, available personnel, and means required to perform the services contemplated by this Contract. Services will be performed using personnel and equipment qualified and/or suitable to perform the work requested by the CITY. CITY retains the right to report to ENGINEER any unsatisfactory performance of ENGINEER personnel for appropriate corrective action. ENGINEER shall comply with applicable federal, state, and local laws in connection with any work performed hereunder.

ENGINEER will seek written CITY approval to accept any contract or perform any services for any person, entity, or business working on this project. CITY may waive this potential conflict, but such waiver is at CITY's sole discretion and its decision shall be final.

5. Ownership of Documents

As part of the total compensation which CITY has agreed to pay ENGINEER for the professional services to be rendered under this Contract, ENGINEER agrees that hard copies of all finished and unfinished documents, data, studies, surveys, drawings, specifications, field notes, maps, models, photographs, preliminary reports, reports, bid packet/construction contract documents/advertisement for bids incorporating any CITY standard provisions provided by ENGINEER, will remain the property of the CITY. ENGINEER will furnish CITY with paper and electronic copies, to the extent they are available, of all of the foregoing to facilitate coordination, however, ownership of the underlying work product shall remain the intellectual property of the ENGINEER. ENGINEER shall have the right to use such work products for ENGINEER's purposes. However, such documents are not intended to be suitable for reuse by CITY or others on extension of the Project or on any other project. Any reuse without the express written consent of the ENGINEER will be at reuser's sole risk and without liability or legal exposure to the ENGINEER, and CITY to the extent allowed by law, shall hold harmless the Engineer from all

claims, damages, losses, expenses, and costs, including attorneys' fees arising out of or resulting from the reuse of said documents without the ENGINEER's consent. The granting of such consent will entitle the ~~Engineer~~ ENGINEER to further compensation at rates to be agreed upon by CITY and the ENGINEER. The above notwithstanding, ENGINEER shall retain all rights in its standard drawing details, designs, specifications, databases, computer software and any other proprietary and intellectual property information provided pursuant to this Contract, whether or not such proprietary information was modified during the course of providing the services.

6. Insurance

A. ENGINEER agrees to maintain Worker's Compensation and Employer's Liability Insurance to cover all of its own personnel engaged in performing services for CITY under this Contract in at least the following amounts:

Workmen's Compensation – Statutory
Employer's Liability – $100,000
Bodily Injury by Disease - $500,000 (policy limits)
Bodily Injury by Disease - $100,000 (each employee)

B. ENGINEER also agrees to maintain Commercial General Liability, Business Automobile Liability, and Umbrella Liability Insurance covering claims against Engineer for damages resulting from bodily injury, death or property damages from accidents arising in the course of work performed under this Contract in not less than the following amounts:

$2,000,000 General aggregate limit

$1,000,000 each occurrence sub-limit for all bodily injury or property damage incurred all in one occurrence

$1,000,000 each occurrence sub-limit for Personal Injury and Advertising

C. ENGINEER shall add CITY, its City Council members and employees, as an additional insureds on all required insurance policies, except worker's compensation, employer's liability and errors and omissions insurance. The Commercial General Liability Policy and Umbrella Liability Policy shall be of an "occurrence" type policy.

D. ENGINEER shall furnish CITY with an Insurance Certificate on the date this Contract is executed and accepted by CITY, which confirms that all above required insurance policies are in full force and effect.

E. ENGINEER agrees to maintain errors and omissions professional liability insurance in the amount of not less than one million dollars ($1,000,000) annual aggregate, on a claims made basis, as long as reasonably available under standard policies.

7. **INDEMNIFICATION**

ENGINEER SHALL INDEMNIFY AND SAVE HARMLESS THE CITY AND ITS CITY COUNCIL MEMBERS AND EMPLOYEES FROM SUITS, ACTIONS, LOSSES, DAMAGES, CLAIMS, OR LIABILITY, INCLUDING WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, ALL EXPENSES OF LITIGATION, COURT COSTS, AND REASONABLE ATTORNEY'S FEES FOR INJURY OR DEATH TO ANY PERSON, OR INJURY TO ANY PROPERTY, RECEIVED OR SUSTAINED BY ANY PERSON OR PERSONS OR PROPERTY, TO THE EXTENT CAUSED BY THE NEGLIGENT ACTS OF ENGINEER OR ITS AGENTS OR EMPLOYEES, IN THE EXECUTION OF PERFORMANCE OF THIS CONTRACT.

ENGINEER'S TOTAL LIABILITY TO CITY FOR ANY LOSS OR DAMAGES FROM CLAIMS ARISING OUT OF, OR IN CONNECTION WITH, THIS CONTRACT FROM ANY CAUSE INCLUDING ENGINEER'S STRICT LIABILITY, BREACH OF CONTRACT, OR PROFESSIONAL NEGLIGENCE, ERRORS AND OMISSIONS SHALL-NOT EXCEED ONE MILLION DOLLARS ($1,000,000). NEITHER PARTY TO THIS AGREEMENT SHALL BE LIABLE TO THE OTHER PARTY OR ANY THIRD PARTY CLAIMING THROUGH THE OTHER RESPECTIVE PARTY, FOR ANY SPECIAL, INCIDENTAL, INDIRECT, PUNITIVE, LIQUIDATED, DELAY OR CONSEQUENTIAL DAMAGES OF ANY KIND INCLUDING BUT NOT LIMITED TO LOST PROFITS OR USE OF PROPERTY, FACILITIES OR RESOURCES, THAT MAY RESULT FROM THIS AGREEMENT, OR OUT OF ANY GOODS OR SERVICES FURNISHED HEREUNDER.

8. Addresses for Notices and Communications

CITY
Amy Williams, P.E.
Director of Public Works/City Engineer
City of Rockwall
385 S. Goliad Street
Rockwall, Texas 75087

ENGINEER
Michael G. DeMotte, P.E.
Director of Engineering Services-Allen Office
Teague, Nall, and Perkins, Inc.
825 Watters Creek Blvd, Suite M300
Allen, TX, 75013

All notices and communications under this Contract shall be mailed or delivered to **CITY** and ENGINEER at the above addresses.

9. Successors and Assigns

CITY and ENGINEER each binds itself and its successors, executors, administrators and assigns to the other parties of this Contract and to the successors, executors, administrators and assigns of such other parties, in respect to all covenants of this Contract. Except as noted in the first part of this Paragraph, neither CITY nor ENGINEER shall assign, sublet or transfer its interest in this Contract without the written consent of the other. Nothing herein shall be construed as creating any personal liability on the part of any officer, council member, employee or agent of any public body which is a party hereto.

10. Termination for Convenience of the Parties

ENGINEER and CITY may terminate this Contract for their convenience at any time by giving at least thirty (30) days notice in writing to each other. If the Contract is terminated by CITY and/or Engineer as provided herein, Engineer will be paid for the Work provided and expenses incurred up to the termination date, if such final compensation is approved by CITY, in its sole discretion. If this Contract is terminated due to the fault of Engineer, Paragraph 10 hereof, relative to Termination for Cause, shall apply.

11. Changes

CITY may, from time to time, request changes in the Scope of Work of ENGINEER to be performed hereunder. Such changes, including any increase or decrease in the amount of ENGINEER**'s** compensation, or time for performance, which are mutually agreed upon by and between CITY and ENGINEER, shall be incorporated in written amendments to this Contract. Any subsequent contract amendments shall be executed by the City Manager or other authorized representative as designated by the City Manager or City Council.

Any alterations, additions or deletions to the terms of this Contract, including the scope of work, shall be by amendment **in writing** executed by both CITY and ENGINEER.

13. Reports and Information

ENGINEER, at such times and in such forms as CITY may reasonably require, and as specified in the Scope of Work or in additional Contract Amendments shall furnish CITY periodic reports pertaining to the Work or services undertaken pursuant to this Contract, the cost and obligations incurred, or to be incurred in connection therewith, and any other matter covered by this Contract.

14. Entire Agreement

This Contract and its Attachments and any future Contract Amendments constitute the entire agreement, and supersede all prior agreements and understandings between the parties concerning the subject matter of this Contract.

15. Waiver

The failure on the part of either party herein at any time to require the performance by the other party, of any portion of this Contract, shall not be deemed a waiver of, or in any way affect that party's rights to enforce such provision, or any other provision. Any waiver by any party herein of any provision hereof, shall not be taken or held to be a waiver of any other provision hereof, or any other breach hereof.

16. Severability

The invalidity or unenforceability of any provision of this Contract shall not affect the validity or enforceability of any other provision of this Contract.

17. Survival

Any and all representations, conditions and warranties made by Engineer under this Contract are of the essence of this Contract and shall survive the execution, delivery and termination of it.

18. Governing Powers and Law

Both Parties agree and understand that the CITY does not waive or surrender any of its governmental powers by execution of this Agreement. To that end, the parties further understand that this agreement shall not be considered a contract for goods or services under Texas Local Government Code, Section 271.151 and ENGINEER waives any right or entitlement granted said provisions. This Contract is governed by the laws of the State of Texas and all obligations of the parties under this Contract are performable in Rockwall County, Texas.

19. Attorney's Fees

If it is necessary for either Party herein to file a cause of action at law or in equity against the other Party due to: (a) a breach of this Contract by the other Party and/or (b) any intentional and/or negligent act or omission by the other Party arising out of this Contract, the non-breaching or non-negligent Party shall be entitled to reasonable attorney's fees and costs, and any necessary disbursements, in addition to any other relief to which it is legally entitled.

20. State or Federal Laws

This Contract is subject to all applicable federal and state laws, statutes, codes, and any applicable permits, ordinances, rules, orders and regulations of any local, state or federal government authority having or asserting jurisdiction, but nothing contained herein shall be construed as a waiver of any right to question or contest any such law, ordinance, order, rule or regulation in any forum having jurisdiction.

EXECUTED in triplicate originals on this 11th day of October 2018.

Richard Crowley
City Manager

ATTACHMENT “A”

Scope of Service

8.

66

Attachment "A"
Reconstruction of Alta Vista Drive from Lakeshore Drive to Westway Drive and
West Street from Rusk Street to Highland Drive
For
City of Rockwall

Scope of Services

Project Understanding

The City of Rockwall (City) wishes to reconstruct Alta Vista Drive (from Lakeshore Drive to Westway Drive) and North West Street (from Rusk Street to Highland Drive), existing two-lane residential roadways, approximately 1670 feet in total length. The roadways lie within an area zoned Single Family (SF-10) of the City of Rockwall. Improvements generally be within the existing 50' Right-of-Way (ROW) for Alta Vista Drive, and within the existing 60' Right-of-Way for West Street from Kaufman Street to Highland Drive, and within the 28'(+/-) Right-of-Way for West Street from Rusk Street to Kaufman Drive. The contract will include a provision for up to six (6) parcels for corner clip takes or easements in the event that they are required. There will be no traffic signal modifications necessary for the roadway improvements. For Alta Vista Drive, the paving improvements will begin at the eastern curb return of the intersection of Alta Vista Drive and Lakeshore Drive, and end at the western curb return of the intersection of Alta Vista Drive and Westway Drive. For West Street, the paving improvements will begin at the northern curb return of the intersection of West Street and Rusk Street, and end approximately at the northern curb return of the intersection of West Street and Highland Drive. The West Street improvements also includes the intersection of West Street and Kaufman Street.

Additional design will include storm sewer, sanitary sewer and water line improvements. The existing storm sewer will be analyzed using current City drainage criteria. Storm drain improvements are limited to rerouting of the existing storm drain pipe between the lots with address 303 and 305 Carriage Trail. The proposed storm drain will begin at the intersection of Alta Vista Drive and Lakeshore Drive, and end at the intersection of Alta Vista Drive and Carriage Trail. Sanitary sewer and water lines will be replaced, and upsized if required by the City's Wastewater and Water Master Plans. Wastewater and water lines will be evaluated to be placed behind the back of curb and within the right-of-way line where possible.

Other design components include coordinating with ONCOR for street lighting, support services for TXDOT permit application for West Street improvements, utility coordination, TDLR compliance with ADA, erosion control plans, and traffic control plans.

ENGINEER will provide plans, specifications, estimates, and permits (if applicable) for the project. Support services for the project bidding, and the construction phase is excluded from the scope of services at the CITY's request.

BASIC SERVICES

1. Schematic Conceptual Design (30%)

1.1. Project Management

1.1.1. Prepare a detailed Project Work Plan for TNP internal use. The work plan will serve as guide and communication tool for the TNP project team and will include the following elements:

- Project description
- Client critical success factors and project budget

- TNPs project goals
- Contract provisions
- Scope of services, person-hour estimate and fees
- List and description of deliverables
- Schedule and milestones
- Project contracts
- Communication protocols
- Quality control plan
- Filing and project administration requirements
- Design standards and criteria
- Applicable codes
- Permitting requirements
- CADD standards (if applicable)
- Mock plans
- Labor and expense phases (billings)
- Project close-out requirements

1.1.2. Conduct TNP internal project kickoff meeting with entire project team and City Staff.

1.1.3. Conduct weekly TNP internal project review meetings to review project status, review and update schedule, identify and assign next action items, etc.

1.1.4. Prepare and send Project Status Update (PSU) to City's Project Manager on monthly basis. PSU will address work completed in previous period, work in progress and/or anticipated to be completed in next period, actions or information needed from City, and a schedule update.

1.1.5. Develop design criteria and design decisions tables.

1.1.6. Prepare project correspondence and invoicing documents.

1.1.7. Prepare and submit project schedule to City staff and provide general project management activities.

1.1.8. Project Administration

- Prepare project correspondence and invoicing documents

1.2. Project stakeholder coordination

- Develop project stakeholder contact list including but not limited to franchise utilities, City's water and sewer department, traffic department, and TXDOT.
- Conduct progress meetings to monitor the development of the project. During this phase of the project, conduct up to two (2) meetings with the City staff regarding project status and coordination issues. The first meeting will be the project kick-off meeting, and the second meeting will be the conceptual design presentation and review.

1.3. Schematic Roll Plot and Graphics (30%)

The following services will be provided as part of the Conceptual Design Phase (30%):

- Review and research previously prepared construction plans record documents, and other pertinent information related to proposed project.
- Review City master plans, design standards, specifications, construction details, and other pertinent information that may impact the design. Review of documents will include but not limited to:
  - City of Rockwall Master Thoroughfare Plan
  - City of Rockwall Water/Wastewater Master Plan
  - City of Rockwall Standards of Design and Construction

- City of Rockwall Trail Master Plan

- Develop complete and accurate base map showing all existing Right-of-Way (ROW), easements, and utilities.
- Develop and evaluate typical sections (up to two (2)) to use for Alta Vista Drive and West Street and other intersecting streets with in the project limits.
- Develop drainage area maps and analyze street and inlet capacities, and proposed storm drain system to reroute the existing 18" RCP between the lots with address 303 Carriage Trail and 305 Carriage Trail. The proposed storm drain system will begin at the intersection of Lakeshore Drive and Alta Vista Drive and will end the intersection of Alta Vista Drive and Carriage Trail. The analysis will also include addition to flanking inlets in Alta Vista Drive east of the intersection of Lakeshore Drive.
- Develop horizontal alignments for roadway,
- Develop and evaluate up to two (2) alignments for proposed water lines and wastewater lines.
- Develop vertical alignment for roadway and cut cross sections at critical points, at center of driveways, alley approaches, cross streets, lead walks, at alignment geometric points and at 25' intervals to evaluate the grading.
- Review City Master Trail Plan and incorporate hike and bike trails if necessary.
- Prepare 30% schematic paving plan and profile roll plots, produced at 1" =420' horizontal scale and 1" =5' vertical scale. The horizontal alignment of proposed water lines and sewer lines will be included in the roll plots.
- Prepare cross sections sheets.
- Meet with City staff and present concept paving plan and profile roll plots.
- Incorporate comments and feedback from City staff and other stakeholders prior to public meetings.

1.4. Drainage Analysis (30%)

The following services will be provided as part of the Conceptual Design Phase (30%):

- Review and research existing construction plans and record documents, historical flooding events and other pertinent information related to the existing drainage infrastructure within the project limits, and upstream and downstream of the proposed project.
- Prepare a hydrologic and hydraulic analysis of the existing drainage infrastructure and prepare a report in memo format signed and sealed. Analysis/report shall include the following.
  - Existing drainage infrastructure analysis
    - Drainage Area Map of existing conditions/infrastructure.
    - Analysis effect on existing system of proposed off-site development or infrastructure improvements currently being planned.
    - Drainage calculations – Drainage Area, Inlet, Street Capacity, Storm Sewer grade line computations in City Standard's tabular format.
    - Synopsis of hydraulic deficiencies in written and plan format, includes downstream off-site drainage infrastructure (if any). The drainage study will also include evaluation of flooding issue in or around the alley for a lot with address 305 Highland Drive. Recommendations will be included in the drainage memo to resolve the drainage issue.
  - The drainage analysis will include analysis of proposed storm drain system beginning at the existing storm drain in Lakeshore Drive and end at the intersection of Alta Vista Drive and Carriage Trail. This proposed system will be analyzed to reroute the existing storm drain system of Carriage Trail. The proposed system will be stubbed out in Carriage Trail for future connection.

- The proposed infrastructure analysis will include drainage areas delineation, evaluation of street capacities, and performing hydraulic grade line computations for proposed system in Alta Vista Drive. Starting hydraulic grade line of existing storm drain in Lakeshore Drive will be either derived from the record documents or an assumed starting HGL will be utilized.
- Analysis of existing storm drain system in Lakeshore Drive is not anticipated for this project; however, it may be provided as additional services if it is discovered and needed during the design phase.
- Recommendation of improvements to existing drainage system to meet the City's current 100-year design storm criteria. The recommendations will be limited to
  - Drainage Area Map of proposed improvements
  - Proposed drainage calculations – Drainage Area, Inlet, and Street Capacity, and Storm Sewer HGL Calculations (to be in City Standard's tabular format).
  - Summary of proposed improvement of drainage infrastructure in written and plan format to fix hydraulic deficiencies in order to meet current City drainage criteria standards.

1.5. Existing Traffic Analysis and Recommendation (30%)

The following services will be provided as part of the Conceptual Design Phase (30%):

- City will conduct Traffic Counts, Speed Studies, and Accident Reports from Police Department along Alta Vista Drive and West Street.
- ENGINEER shall take the data provided by the City and analyze in order to provide recommendations to the City. Such recommendations will serve as basis of design of speed calming devices, traffic signage or striping plans. The recommendations will be provided in memo format signed and sealed of proposed improvements along the corridor.
- A Traffic Study (TIA) is not anticipated for this project and excluded from the scope of services.

2. Construction Documents

2.1. Project Management

- Conduct progress meetings at each stage of the construction documents phase to monitor the development of the project regarding the project status, coordination issues and go over City review comments of the plans.
- Coordinate with other utilities, (electric power, cable TV, phone, gas, optic fiber, etc.)
- Prepare and send Project Status Update (PSU) to City's Project Manager on monthly basis. PSU will address work completed in previous period, work in progress and/or anticipated to be completed in next period, actions or information needed from City, and a schedule update.
- Update project schedule and interim milestones (coordinate with City staff as necessary)
- Project site visits (up to two (2) trips)

2.2. Construction Plans, Specifications and Estimates (60%, 90%, 100%)

2.2.1. Submittals

ENGINEER will submit 60%, 90% and 100% submittals for the City for review and comments. The following will be required for each submittal:

- Construction Plans
  - Two (2) Full Size copies – 22"x34"
  - Two (2) Half Size copies – 11"x17"

- One (1) PDF copy
- One (1) PDF copy– Scanned City comments previous submittal

- Engineers Opinion of Construction Cost
- Construction Contract /Specification Book
- City to provide the front end documents, and City special provisions to NCTCOG standard in electronic format.

2.2.2. Construction Plans

Each plan sheet in the construction plans set will conform to the Engineering Drawing Requirements set forth in the City of Rockwall's Standards of Design and Construction. Plan sheets will also include any other additional documentation, notation, and clarification required by the City's Project Manager to prove design and constructability of the project. Each stage of the construction plan review process will incorporate any changes associated with City comments on previous submittals.

Below is a table of the required construction plan sheets and which submittals they are required.

Plan Sheets	**60%**	**90%**	**100%**
Cover Sheet	X	X	X
Legend Sheet	X	X	X
General Notes Sheet	X	X	X
Summary of Quantities	X	X	X
Existing Condition Plan (1"=20' scale)	X	X	X
Horizontal/Vertical Control Sheet (1"=40' scale)	X	X	X
Typical Sections (Existing and Proposed)	X	X	X
Erosion Control Plan (1"=40' scale)		X	X
Demolition/Removals Plan (1"=20' scale)	X	X	X
Roadway Plan/Profiles (1"=20'H, 1'=5'V scale)	X	X	X
Alley and Driveway Plan/Profile (1"=20'H, 1'=5'V scale)		X	X
Intersection Grading Plan (major and critical intersections)		X	X
Pavement Signage and Striping Plan (1"=20' scale)		X	X
Drainage Area Map (Existing and Proposed)	X	X	X
Drainage Calculations (Runoff, Street Capacity, Inlet, and Storm Sewer Pipes)	X	X	X
Drainage Plan/Profile (Trunks and Laterals) (1"=20'H, 1'=5'V scale)	X	X	X
Water Line Plan (1"=20'H)	X	X	X
Wastewater Plan/Profile (1"=20'H, 1'=5'V scale)	X	X	X
Retaining Wall Plan/Profile (1"=20'H, 1'=5'V scale) (if applicable)	X	X	X
Construction Sequencing Phasing Narrative	X	X	X
Detour Plan (for each Phase)		X	X
Traffic Control Plan (for each phase & typ. sections) (1"=40' scale)		X	X
Roadway Cross-Sections (25' int. & crit. pts.) (1"=20'H, 1'=5'V scale)	X	X	X
Details (for each section of plans)		X	X

Each subsection below details out the services to be perform for each section of the construction plan set.

- Roadway Design

- Incorporate the previous design submittal review comments
- Prepare plan / profile sheets (224"x34" plan sheets at a scale of 1" =20' horizontal, and 1" =5' vertical).
- Analyze all driveways within the project and develop driveway adjustment and crosswalk profiles as needed. Typically, driveways will be defined vertically by profiles.
- Develop design cross-sections
    - Develop on 25' station intervals and other critical points.
    - Show pavement and subgrade, right-of-way limits, sides slopes, pavement cross slopes, curbs, and retaining walls (if applicable)
    - Cross-sections will be provided in the plan set.
- Prepare roadway details to clarify intent of design
- Modify and include standard details as needed

- Drainage
    - Create Drainage Area Maps (existing and proposed). Proposed Drainage Area Map will be only prepared if there is no change in the drainage pattern from the existing conditions.
    - Create Drainage Calculation Sheets (Tables to be formatted to match City Standard's tabular format)
    - Identify the need for additional drainage easements to accommodate the proposed offsite drainage improvements (if required)
    - Perform final storm sewer sizing and alignment design. Prepare final inlet design sheets and hydraulic design sheets for inclusion in the plans.
    - The design of storm drain system is limited to a proposed line in Alta Vista Drive from Lakeshore Drive to Carriage Trail. The proposed line will be stubbed out at Carriage Trail for future connection to existing storm drain in Carriage Trail. The intent of proposed line is to eliminate the existing 18" storm drain line between the lots with address 303 and 305 Carriage Trail.
    - The design of storm drain system also includes addition of two flanking inlets in Alta Vista Drive at Lakeshore Drive intersection.
    - Analysis of existing storm drain system in Lakeshore Drive is not anticipated for this project; however, it may be provided as additional services if it is discovered and needed during the design phase.
    - The starting hydraulic grade line of existing storm drain in Lakeshore Drive will be either derived from the record documents or an assumed starting HGL will be utilized. Calculation of the existing HGL is not included in this scope, but may be provided as an Additional Service.
    - Storm drain improvements is not anticipated for West street.
    - The proposed grading for West Street will be evaluated to collect the discharge from the alley between Kaufman Street and Highland Drive.
    - Prepare storm sewer plan/profile sheets depicting storm sewer lines, inlets, junction boxes, connections, manholes, utility crossings and the hydraulic grade lines.
    - Prepare profiles for all trunks and laterals (to be profiled along centerline of pipe)
    - Prepare drainage details to clarify intent of design.
    - Compile applicable City standard details. Modify standard details as needed.
    - Prepare erosion control plan.

- Utilities

2.2.2..1. Public (Water, Wastewater, Storm Drainage, etc.)

- Establish the location of existing public utilities based upon information provided by the City, SUE and field survey information

2.2.2..2. Franchise Utility Coordination

- Identify franchise utility contacts
- Send one set of plans to each franchise utility for their review at each phase. Request each franchise utility to mark up the plans to show the size, type and location of their utilities.
- Notify the City if any relocations are required
- ENGINEER shall perform the coordination with the franchise utilities if any relocations are required.
- Attend City ran Franchise Utility Coordination Meetings (typically 2-4 meetings per year are held). ENGINEER will give back ground on particular project and coordinate with franchise utility companies on foreseen conflicts and pass out current plan set.

2.2.2..3. Water

- Prepare all water plan sheets. Water line profiles are not anticipated as the proposed water lines will be 8 inches in diameter.
- Check coverage of Fire Hydrants to meet City Standard.
- Prepare water details to clarify intent of design. Compile applicable City Standard details, modify standard details as needed.

2.2.2..4. Wastewater

- Prepare all wastewater plans and profiles for proposed line in Alta Vista Drive and West Street.
- The proposed wastewater improvements include replacement of existing wastewater lines in Alta Vista Drive, and replacement of existing 6” line between lots with address 206 and 208 Alta Vista Drive by pipe bursting or other trenchless method. City will provide the video of line to evaluate the adequacy of the replacement by pipe bursting method.
- The rerouting of existing 6” line between the lots with address 206 and 208 Alta Vista Drive will also be evaluated.
- The proposed wastewater improvements for West Street include replacements of existing 4” line from Rusk Street to Kaufman Street, existing 4” line from Kaufman Street to existing manhole at 400 feet north of the intersection of Interurban and Highland Drive.
- Evaluate options to eliminate the existing 4” line between lots with address 202 Interurban Street and 302 Highland Drive. ENGINEER shall coordinate with City of Rockwall Sewer Department to verify the location and depth of the existing 4” line and service locations.
- Prepare wastewater details to clarify intent of design. Compile applicable City Standard details, modify standard details as needed.

- Street Lighting
  - ENGINEER will coordinate with ONCOR for the relocation of street lights.
  - It is assumed that the ONCOR is responsible for the design and installation of street lights.
  - ENGINEER shall coordinate with ONCOR for the location of proposed street lights and underground conduits.

- Structural
  - Structural design is not anticipated for this project; however, structural design services can be provided as an Additional Services if it is needed or discovered during the design.

- Traffic

2.2.2..1. Traffic Signals

- The project does not include traffic signals. Traffic signal improvements are not anticipated for this project.

2.2.2..2. Pavement Marking and Signing Plans

- Determine potential conflicts with existing signs and propose sign relocations
- Prepare crosswalk pavement marking and signing layouts in accordance with City design standards and the Texas Manual on Uniform Traffic Control Devices (TMUTCD).
- Prepare details to clarify intent design
- Compile applicable City standard details. Modify standard details as needed.

- Traffic Control Plans, Detour Plans, Construction Sequencing/Phasing
  - Develop construction sequence plan showing:
    - Construction area for each phase of construction and closure of existing travel lanes (if needed).
    - Temporary signing and striping, barricades, and other channelization device
    - Narrative of the sequence of work.
    - Detour Plan for each construction phase
    - Storm sewer construction phasing shall be incorporated by sequencing notes.
    - Public utilities relocation phasing.
    - Pedestrian routing during construction.
  - Develop typical cross section showing lane widths, edge conditions, channelization and proposed construction area.
  - Develop typical driveway staging plans for similar driveways. Develop custom driveway staging layouts for special conditions.
  - Prepare traffic control details to clarify intent of design.

2.2.3. Specifications/Construction Contracts

Prepare general notes, specification data, and final Bid Book in accordance with City of Rockwall requirements. Identify and prepare special specifications and/or special provisions applicable to the project. Prepare Bid-Tab sheets of applicable items for Contractor to fill/present bid prices.

- Contact documents, including the following:
  - City of Rockwall standard construction contract forms
  - Notice to bidders
  - Special instructions to bidders
  - Bid form (Bid-Tab) – Electronic for Bidding
  - Standard construction contract
  - Performance bond
  - Payment bond
  - Maintenance bond
  - Certificate of insurance
  - General conditions

- Special conditions
- Technical specifications
- Permits (TXDOT, City of Dallas, etc.)
- Geotechnical Report

2.2.4. Estimates

Compile an overall opinion of probable construction cost based on current market values. Cost shall be broken out in to separate schedules for each section of the job.

2.3. Agency Permitting/Coordination (TXDOT, TDLR, etc.)

2.3.1. TXDOT

- ENGINEER to coordinate with City for the items related to the project for work within the TXDOT right-of-way. This will include preparation of package for TXDOT submittal to achieve the acceptance of proposed improvements. West Street improvements within the Highway 66 right-of-way is anticipated to be permitted through TXDOT. ENGINEER will prepare the necessary documents and City will apply for the permit.

2.3.2. Accessibility Review (TDLR)

- Prepare a completed application for submittal to the Texas Department of Licensing and Regulation for review in accordance with the Elimination of Architectural Barriers Act.
- ENGINEER to complete application and submit with set of plans to a Registered Accessibility Specialist (RAS) from review and TDLR project registration. All coordination and fees with TDLR compliance will be done by the ENGINEER.
- While we do not anticipate accessibility revisions to be required, we will address minor revisions to the plans based on review comments from the RAS.

SPECIAL SERVICES

3. Public Meetings and Public Input Survey

3.1. **Meetings**

- Attend two (2) public involvement meeting as directed by City staff. Provide exhibits suitable for public meeting use depicting street section, alignments etc. Support City staff during meetings by providing technical information, responding to citizen questions, and recording citizen input.

3.1.1. First Public Meeting will be with adjacent property owners and residents.

- Mail out all first public meeting notification for the City.
- Revise 30% Schematics Roll Plots based on public input from first public meeting and City direction to be used in second public meeting.

3.1.2. Second Public Meeting will be with adjacent property owners and residents as well as the neighborhood.

- Mail out all second meeting public meeting notification for the City (Neighborhood to be at a typical 500ft buffer off the street)
- Revise 30% Schematics Roll Plots based on public input from second public meeting and City direction to be used in City Council presentation for schematic and typical section approval.

3.2. Public Input Surveys

- Work with City to develop Public Input Survey to be sent to adjacent property owners and residents.

- Mail out surveys to adjacent property owner and residents.
- Tally survey results and other received public input into presentable format to City Staff and City Council.

4. Data Collection & Property Research / Topographic and Design Survey

4.1. Data Collection and Property Research

4.1.1. Gather existing plat information

4.1.2. Collect property owner and record information

4.1.3. Gather existing ROW and easement information, identify all easements through typical research methodologies (i.e. plats, court house filings, etc.). Undocumented easements may not be identified.

4.2. Topographic and Design Survey

4.2.1. The limits of the survey for Alta Vista Drive shall be from the intersection of Alta Vista Drive and Lakeshore Drive to the intersection of Alta Vista Drive and Westway Drive. The limits of the survey for West Street shall be from the intersection of West Street and Rusk Street to the intersection of West Street and Highland Drive. The survey shall extend twenty (20) feet outside of the ROW (50-foot ROW for Alta Vista Drive and Variable width ROW for West Drive) where accessible of Alta Vista Drive and West Street. Survey will include intersecting roadways extending 250 feet along each leg of the major intersections and 100 feet along each leg of the minor intersections. The survey will only include the east half (from median east ROW line) of Lakeshore Drive at the intersection of Alta Vista Drive. The survey will include entire intersection of West Street and Rusk Street.

4.2.2. The Alta Vista Drive survey also includes survey of area between the houses with address 206 Alta Vista Drive and 208 Alta Vista Drive. The survey shall extend to alley and existing sewer manhole located at the southeast corner of a lot with address 206 Alta Vista Drive. The survey limits shall be sufficient for the replacement of wastewater line between the lots with address 206 Alta Vista Drive and 208 Alta Vista Drive.

4.2.3. The West Street survey includes survey of approximately 300 feet alley between the houses with address 202 Interurban Street and 302 Highland Drive. This survey shall extend approximately 300 feet north of the intersection of West Street and Highland Drive. The survey shall be sufficient for the replacement of existing 4" wastewater line to a manhole located approximately 250 feet north of the intersection of West Street and Highland Drive.

4.2.4. The West Street Survey also includes survey of approximately 400 feet long alley (from ROW to ROW) located between Kaufman Street and Highland Drive. The survey limits shall be from the intersection of the alley and West Street to the west lot line of lot with address 307 Highland Drive. The design survey shall be sufficient for the drainage study to surface drain the alley on the back of lots with address 301, 303, 305, and 307 Highland Drive, to West Street.

4.2.5. Establish horizontal control points at 500' maximum spacing.

4.2.6. Establish a vertical control benchmark circuit as needed throughout the project. Use existing City established monument information for the City and tie survey into.

4.2.7. Set control points, which shall be based on NAD-83, on both sides of the roadway, as required to maintain horizontal control throughout the project limits.

4.2.8. Perform a field survey to identify and locate existing topographic elements within the roadway corridor. All identified topographic elements shall be tied down horizontally and vertically. The field survey shall include but not limited to the following:

- Property corner monumentation
- Existing pavement, curbs, sidewalks, barrier free ramps, etc.

- Roadway and lane striping
- Driveways
- Existing storm sewer inlets, manholes, junction boxes Headwalls (including culvert sizes and invert elevations)
- Existing driveway culverts and swales (flowlines, sizes, types, etc.)
- Guardrail
- Utility manholes, vaults, water valves, water meters, wastewater cleanouts, sprinkler heads, telephone poles, power poles, utility markers, other public utilities and franchise utilities
- Traffic Signal poles, cabinets, pull boxes and other signal equipment
- Signs (excluding temporary signs)
- Trees, including species and caliper (all sizes)
- Landscape planters, Shrubs, rocks and other features.
- Buildings and permanent structures
- Retaining walls
- Fencing walls
- Fence limits and material types (excluding temporary fences)
- Mailboxes (types – wood, brick, stone)
- Other applicable physical features that could impact design

4.2.9. Perform cross-sections throughout project limits at 25-foot intervals and at grade breaks and prepare cross-section field notes.

4.2.10. Prepare a final topographic drawing in digital format (including contours and breaklines) showing the features located in the field, an ASCII coordinate file of the points located in the field, and a hard copy of the coordinates and feature descriptions.

4.2.11. ENGINEER will perform site visits for the purposes of reviewing the provided survey in the field and making notes for additional survey needs and design considerations.

4.2.12. ENGINEER shall arrange and make provisions for access to perform the services specified within this scope. The surveyor shall provide the City with the name and address of the property owners.

4.2.13. The City shall be responsible for the coordination of all ROW and easement acquisitions. ENGINEER will provide survey information and easement/ROW documents (sketch and legal description) to the City. Additional ROW and easement documentation services are detailed below in Section 6.

5. Subsurface Utility Engineering (S.U.E.) Services

Provide S.U.E. Services for the purpose of locating horizontal and vertical locations of underground city and franchise utilities, in conjunction with and /or prior to the field survey.

5.1. S.U.E. Level 'B' Services will be provided to determine horizontal location of utilities up to 3,150 linear feet. The Quality Level 'B' also includes Quality Level 'C/D' S.U.E. services.

- S.U.E. Quality Level 'B' Services will be provided as defined in CI/ASCE 38-02.
  - Quality Level B (QL-"B") – Generally, QL-"B" indicates information obtained through the application of appropriate surface geophysical methods to determine the existence and approximate horizontal position of subsurface utilities. Quality level B data should be reproducible by surface geophysics at any point of their depiction. This information is surveyed to applicable tolerances defined by the project and reduced onto plan documents.
- Determine horizontal location of utilities up to 3,150 linear feet which will include 1,150 linear feet along Alta Vista Drive from Lakeshore Drive to Westway Drive, 650 linear feet

along West Street from Rusk Street to Highland Drive, 100 LF along each cross street (7 individual intersections), and 4" wastewater line to an existing manhole approximately 220 feet north of the intersection of Interurban and West Street. Level "B" S.U.E. shall also include around the existing wastewater manhole in the alley at the southeast corner of the property with address 206 Alta Vista Drive.

- Engineer will create and call in locate tickets for Texas811 for the project corridor. Timing of locates will be coordinated to help ensure that locates are performed in conjunction with surveying operations.
- As part of the services provided in the Topographic and Boundary Survey Phase, Engineer will visibly investigate surface features and appurtenances or all utility systems shown on the record drawings that are included within the project site, including but not limited to:
  - sanitary sewer manholes (including measure down)
  - storm sewer manholes (including measure down)
  - communication/fiber manholes
  - hand holds
  - pull boxes
  - water valves
  - water meters
  - fire hydrants
  - cleanouts
  - blow-offs
  - pedestals (communication, fiber, electric)
  - gas meters
  - signal boxes
  - electric poles (transmission and distribution)
  - electric transformers
  - light poles
  - utility signs
- Investigate all utility systems shown on the record drawings that are included within the project site. Visible surface features and appurtenances of subsurface utilities found within the project site will also be evaluated. Using appropriate surface geophysical methods, Engineer will search for detectible indications of the horizontal location of anticipated subsurface utilities.
- Mark all locations that can be validated, using paint, flags or other devices.
- These services are for the purpose of aiding the design of the project by providing information related to subsurface utilities in order to allow potential utility conflicts to be minimized or eliminated.
- Prepare documentation of the utilities encountered and marked, including their general location, orientation, type & size, if known.
- Deliverable will consist of a Quality Level B – AutoCad DWG 2D file depicting all sub-surface utilities found and verified and above ground appurtenances. The drawing will be signed and sealed by a Professional Engineer licensed in the State of Texas.

5.2. Provide Quality Level 'A' S.U.E. Services for the purpose of vertically locating the utility lines.

- Provide S.U.E. Quality Level 'A' Services will be provided as defined in CI/ASCE 38-02.
  - Quality Level A (QL-"A") – Generally, QL-"A" indicates precise horizontal and vertical location of utilities obtained by the actual exposure (or verification of previously exposed and surveyed utilities) and subsequent measurement of subsurface utilities, usually at a specific point. Minimally intrusive excavation equipment is typically used to minimize the potential for utility damage. A precise horizontal and

vertical location, as well as other utility attributes, is shown on plan documents. Accuracy is typically set to 15-mm vertical and to applicable horizontal survey and mapping accuracy as defined or expected by the project owner.

- Provide all necessary personnel, equipment, supplies, management and supervision needed for the test hole excavation, backfill and restoration.
- Coordinating with CLIENT, property owner, and/or permitting authorities, as needed and assisting the City in obtaining any required permits, permission or rights-of-entry.
- Contacting the appropriate one-call system to request utilities to be marked on-the-ground prior to beginning excavation of test holes.
- Providing and utilizing appropriate traffic control devices, as necessary, in conformance with the MUTCD, including any state or locally adopted supplements.
- Excavate by air-vacuum or other minimally invasive methods up to ten (10) test holes, at locations yet to be determined within the project limits in order to identify the exact horizontal & vertical locations of crucial utilities. For the purpose of the scope, five of such test holes are assumed will be in the paved area and five will be in outside paving area. Furthermore, following assumptions are made for the depth of test holes:
  - Up to Five (5) test holes of 0-12 ft depth will be provided
- Test holes in addition to those listed above will be provided at the rate per test hole agreed to by the City of Rockwall.
- Prepare documentation for each test hole attempted. This documentation will include the horizontal and vertical position of the targeted utility or structure, a general description of the target utility, with condition, material and general orientation noted a generalized description of the material encountered in the test hole, and any other field observations noted during the excavation.
- Deliverable will consist of a Quality Level A – AutoCA DWG 2d (DGN) file showing X, Y and Z w/ depth, a PDF of the same signed and sealed, Utility Summary Sheet, Individual Sheets on Test Holes and ASCII Point List.

6. Right-of-Way / Easement Instruments of Conveyance

6.1. Prepare ROW instruments (narrative and graphic exhibits of ROW takes) and setting new property corners (for new ROW only) in the field. For the purpose of the scope services, six (6) corner clips ROW documents are planned.

6.1.1. Up to Six (6) parcels

6.2. Individual parcel exhibits shall be on 8”x11” paper and pdf copy shall be sealed, dated, and signed by a Registered Professional Land Surveyor and shall contain the following:

6.2.1. Parcel number
6.2.2. Area required
6.2.3. Area remaining
6.2.4. Legal description
6.2.5. Current owner
6.2.6. Any existing platted easements or easements filed by separate instrument including easements provided by utility companies
6.2.7. All physical features
6.2.8. Metes and bounds description of parcel to be acquired. The description shall be provided on a separate sheet from the exhibit. Each type of easement shall be described separately.

6.3. Upon written notification by the City of acceptance of the ROW exhibits and instruments, and as directed by the City, the surveyor shall set all corners and points of curvature for the

proposed ROW and submit final sealed plans and exhibits, including location of the control points and their NAD-83 reference

6.4. ENGINEER will provide the information listed in Section 6.2 to the City and/or their selected ROW and easement acquisition agent. This task will include the following:

6.4.1. Transmittal of survey and existing property information.

7. Geotechnical

7.1. Subsurface Exploration

7.1.1. Three (3) borings are planned for this project. The borings and report will be thru a subconsultant.

The locations are as follows (or as determined by Geotechnical Engineer):

- One boring will be located nearby the intersection of Lakeshore Drive and Alta Vista Drive.
- One boring will be located nearby the intersection of Alta Vista Drive and Westway Drive.
- One boring will be located nearby the intersection of West Street and Kaufman Street.

7.1.2. Boring Services – Pavement borings will be sampled to 15 feet. A total of 45 feet for drilling is planned.

- Check samples for consistency with a hand penetrometer
- Stake the boring locations using normal taping procedures
- Backfill bore holes and plug at the surface

7.2. Laboratory Services

7.2.1. Considering the planned facilities, anticipated soil conditions, and geology, the following laboratory test will be required for classification purpose and to determine strength characteristics:

- Visual Classification
- Moisture content and soil identification
- Liquid and plastic limit determinations
- Unconfined compression
- Calibrated hand penetrometer tests
- Lime/ph series tests
- Soluble sulfate tests (to determine lime-induced heaving potential)

7.3. Engineering Services

7.3.1. Prepare an engineering report presenting the following:

- Sample boring location map
- Boring logs and laboratory results
- General soil and ground-water conditions
- Recommendations will be based on a 30-year design life.
- Subgrade design recommendations for lime treated and cement treated subgrade.
- Pavement design recommendation for reinforced concrete, (including pavement thickness, strength, reinforcement size and spacing, and joint spacing)
- Pavement design alternatives: Provide recommendations for the following street sections:
  - Reinforced concrete pavement on lime and or cement treated subgrade.
  - Reinforced concrete pavement on flex base.
  - Reinforced concrete pavement on compacted subgrade.
- Earthwork recommendations

7.3.2. The geotechnical engineer's design recommendations shall be relied upon by the civil and structural engineers for their design.

7.3.3. Submit one (1) paper copy and one pdf file copy of the report to the City

8. Additional Services

Services not specifically identified in the Scope of Services above shall be considered additional and shall be performed on an individual basis upon authorization by the City of Rockwall. Such services shall include, but are not limited to the following:

8.1. Construction staking.
8.2. Geotechnical recommendations for the design of retaining wall.
8.3. Structural design of retaining walls, junction boxes or any other structures.
8.4. Photometric or coverage study/analysis for street lighting.
8.5. Design or modification of traffic signal.
8.6. Traffic Impact Analysis
8.7. Quality control and testing services during construction.
8.8. Offsite storm drains design and analysis.
8.9. Environmental or Archeological study and permitting through state agencies.
8.10. Support services for Project Bidding
8.11. Support services for Right-of-Way Acquisition and Negotiation
8.12. Flood study for streams/creeks and permitting through FEMA or US Army Corps of Engineers.
8.13. Construction phase services, including responding contractor questions, reviewing contractor pay application, performing site visits to observe construction, reviewing shop drawings/submittals, preparation of record drawings etc.

-End of Scope of Service-

ATTACHMENT "B"

Payment Schedule

Compensation for Basic Services in Tasks 1-2 shall be on a lump sum basis. The tabulation below establishes the not to exceed amount for each category of contract service:

	Task	Fee Basis	Fee
	BASIC SERVICES		
1.	Schematic Conceptual Design (30%)	Fixed Fee	$ 57,000
2.	Construction Documents		
2.1	60% Design	Fixed Fee	$ 67,000
2.2	90% Design	Fixed Fee	$ 49,500
2.3	100% Design	Fixed Fee	$ 24,200
	Basic Services Subtotal:		**$ 197,700**
Compensation for Special Services under Tasks 3-7 shall be on a lump sum, unit price, or labor fee plus expense (reimbursable) basis with the estimated fee shown below.			
	SPECIAL SERVICES		
3.	Public Meetings and Public Input Surveys	Fixed Fee	$ 6,000
4.	Data Collection & Property Research / Topographic and Design Survey	Fixed Fee	$ 26,500
5.	Subsurface Utility Engineering (S.U.E.) Services		
5.1	Quality Level 'B' (Including Level "C/D") S.U.E. Services (assumes 3,150 LF)	Hourly*	$ 23,400
5.2	Quality Level 'A' S.U.E. Services (5 test holes assumed @ 1,800/test holes)	Unit Price	$ 9,000
6.	Right-of-Way/Easement Instruments of Conveyance (6 ROW documents are assumed @ $1,250/document)	Unit Price	$ 7,500
7.	Geotechnical	Fixed Fee	$ 14,900
	Special Services Subtotal*		**$ 87,300.00**
	ENGINEERING SERVICES CONTINGENCY**		**$ 28,500**
	***(This service is a miscellaneous amount to be used at the discretion of the City for additional Services outside of the scope of the contract. This item will be controlled by the City and will only be used if the City chooses. The Engineer has no right or guarantee to the use of this Contingency)*		
	Project Total*		**$ 313,500.00**

*Estimate only (see notes below).

Notes:

1. **Hourly Consulting Services**: Services shall be provided on an hourly, reimbursable basis at the ENGINEER'S standard hourly rates when the Fee Basis is defined as hourly. Actual fees for the services will be based on actual hours required to perform the services, and will vary based upon actual cost, and could potentially exceed the estimates provided above. ENGINEER shall notify the City in writing before exceeding the budgeted fees, and obtain written authorization from City to

exceed the contract amount. Please refer to attached schedule of TNP's standard hourly rates. Services shall be billed monthly based on actual time spent working on the project by the ENGINER'S staff. Actual out-of-pocket expenses that are incurred during the progress of the work for hourly services tasks shall be billed at TNP's cost plus 10%. Any project related fees paid by the ENGINEER on behalf of the City shall be reimbursed by the City under the hourly services task. Examples of these type fees include, but are not limited to, application fees, filing fees, permit fees, review fees, title company/closing fees, or fees related to the purchase or acquisition of information or documents requested by the City for inclusion in the Project's deliverables.

2. **Fixed Fee Consulting Services**: Fees for tasks described as "fixed fee" (lump sum) are total fees for all labor and expenses associated with those tasks. Lump Sum fee for each task will be invoiced monthly based upon the overall percentage of services performed.

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: **Richard Crowley, City Manager**

FROM: **Lea Ann Ewing, Purchasing Agent**

DATE: **October 8, 2018**

SUBJECT: **Construction of a Pickle Ball Court at Myers Park**

Approved in the Recreation Development Fund, out of Park District 21, is $125,000 for the construction of a side-by-side three court Pickle Ball Court at Myers Park. The new Court will be constructed on an existing concrete slab that was once used as a skateboard park.

Following are trade and specialty item bids received:

Surface/Nets – Master Systems Court $14,200
Canopy – PlayWell Group (Buy Board purchasing coop contract) $74,308.97
Drinking Fountain – Most Dependable Fountains $6,030
Benches – Lea Park & Play (Buy Board purchasing coop contract) $4,770
Concrete Slab – Nortex (City of Grand Prairie purchasing coop contract) $15,720
Fence – Liberty Fence Company $6,373
Contingency - $3,598.03
Total project cost $125,000 if contingency is used

As a member and participant in the BuyBoard cooperative program, the City has met all formal bidding requirements pertaining to the purchase and install of the canopy.

For Council consideration is this Pickle Ball Court construction project bid award to the above listed vendors for the respective dollar amounts and authorize the City Manager to execute purchase orders for this project.

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: **Richard Crowley, City Manager**

FROM: **Lea Ann Ewing, Purchasing Agent**

DATE: **October 8, 2018**

SUBJECT: **Police Taser Replacement**

Approved in the General Fund, Police Patrol operating budget is $17,400 for the first year replacement payment of a five-year replacement contract of $116,687 for 75 Police conducted electrical weapon (brand name "Taser"). The 75 replacement Tasers will be received this budget year. Taser is the only manufacturer of the shooting stun gun. *Taser International, Inc.'s United States Patent 7,234,262;* US6636412B2.

Local Government Code Chapter 252.022 does not require formal competitive bidding for the purchase of items available from only one source because of patents, copyrights, secret processes or national monopolies.

For Council consideration is the approval of the 5-year contract $116,687 with Axon Enterprise Inc. for Taser replacement and authorize the City Manager to execute a purchase order for the first year expense of $17,400 to be funded out of General Fund Reserves.

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: **Richard Crowley, City Manager**

FROM: **Lea Ann Ewing, Purchasing Agent**

DATE: **October 9, 2018**

SUBJECT: **Purchase of 2019 Model Vehicles for Various Departments**

Approved vehicles is this year's budget are as follows:

Dept.	Vehicle		Cost	Funding Source
Recreation	½ ton truck		$ 29,600	General Fund Reserves
Building Insp	½ ton truck	22,989 x 2 =	$ 45,978	General Fund Reserves
NIS	½ ton truck	22,989 x 2 =	$ 45,978	General Fund Reserves

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: **Richard Crowley, City Manager**

FROM: **Lea Ann Ewing, Purchasing Agent**

DATE: **October 3, 2018**

SUBJECT: **Purchase of onsite fixed generators for Lift Stations**

Approved in the Sewer Operating budget is the purchase of fixed generators for stand-by power at Chevy House, Castle Ridge and Amity lift stations. The Generac generators are available for purchase from WPI (Waukesha-Pearce) including installation for a total amount of $234,714.80 through the Buy Board purchasing cooperative contract #501-15. Budget of $240,500 is adequate to cover the cost of this project.

As a member and participant in the BuyBoard cooperative program, the City has met all formal bidding requirements pertaining to the purchase and install of these new generators.

For Council consideration is this generator project bid award to WPI for $234,714.80 and authorize the City Manager to execute a contract for this project.

CITY OF ROCKWALL
CITY COUNCIL MEMO

AGENDA DATE: 10/15/2018

APPLICANT: Derek Jones

AGENDA ITEM: **P2018-029;** *Lots 1 & 2, Block A, Jones Addition*

SUMMARY:

Discuss and consider a request by Derek Jones of Munson Partners, LLC for the approval of a replat for Lots 1 & 2, Block A, Jones Addition, being a 0.488-acre tract of land currently identified as Lot 47A of the BF Boydston Addition, City of Rockwall, Rockwall County, Texas, zoned Single Family 7 (SF-7) District, situated within the Old Town Rockwall (OTR) Historic District and the Historic Overlay (HOV) District, addressed as 201 S. Clark Street, and take any action necessary.

PLAT INFORMATION:

☑ The objective of this request is to replat a 0.488-acre parcel of land (*i.e*. *Lot 47A of the B. F. Boydston Addition*) into two (2) parcels of land (*i.e*. *Lots 1 & 2, Block A, Jones Addition*) for the purpose of subdividing one (1) lot into two (2) lots to construct a single-family home on Lot 2.

☑ The surveyor has completed the majority of the technical revisions requested by staff, and this plat, conforming to the requirements for replats as stated in the *Subdivision Ordinance* in the *Municipal Code of Ordinances*, is recommended for conditional approval pending the completion of final technical modifications and submittal requirements.

☑ On October 2, 2018, the Parks Board reviewed proposed *replat* and made the following recommendations:

1) The developer shall pay pro-rata equipment fees in the amount of $343.00 to be paid at final plat; and.

2) The developer shall pay cash-in-lieu of land fees in the amount of $410.00 to be paid at final plat.

☑ Conditional approval of this plat by the City Council shall constitute approval subject to the conditions stipulated in the *Recommendation* section below.

☑ With the exception of the items listed in the *Recommendation* section of this case memo, this plat is in substantial compliance with the requirements of the *Subdivision Ordinance* in the *Municipal Code of Ordinances*.

RECOMMENDATIONS:

If the City Council chooses to approve the *replat* for *Lots 1 & 2, Block A, Jones Addition,* staff would recommend the following conditions:

1) All technical comments from the Engineering, Planning and Fire Departments shall be addressed prior to the filing of this plat;

2) Any construction resulting from the approval of this *replat* shall conform to the requirements set forth by the Unified Development Code, the International Building Code, the Rockwall Municipal Code of Ordinances, city adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION:

On October 09, 2018, the Planning and Zoning Commission's motion to recommend approval of the replat passed by a vote of 6-0, with Commissioner Fishman absent.

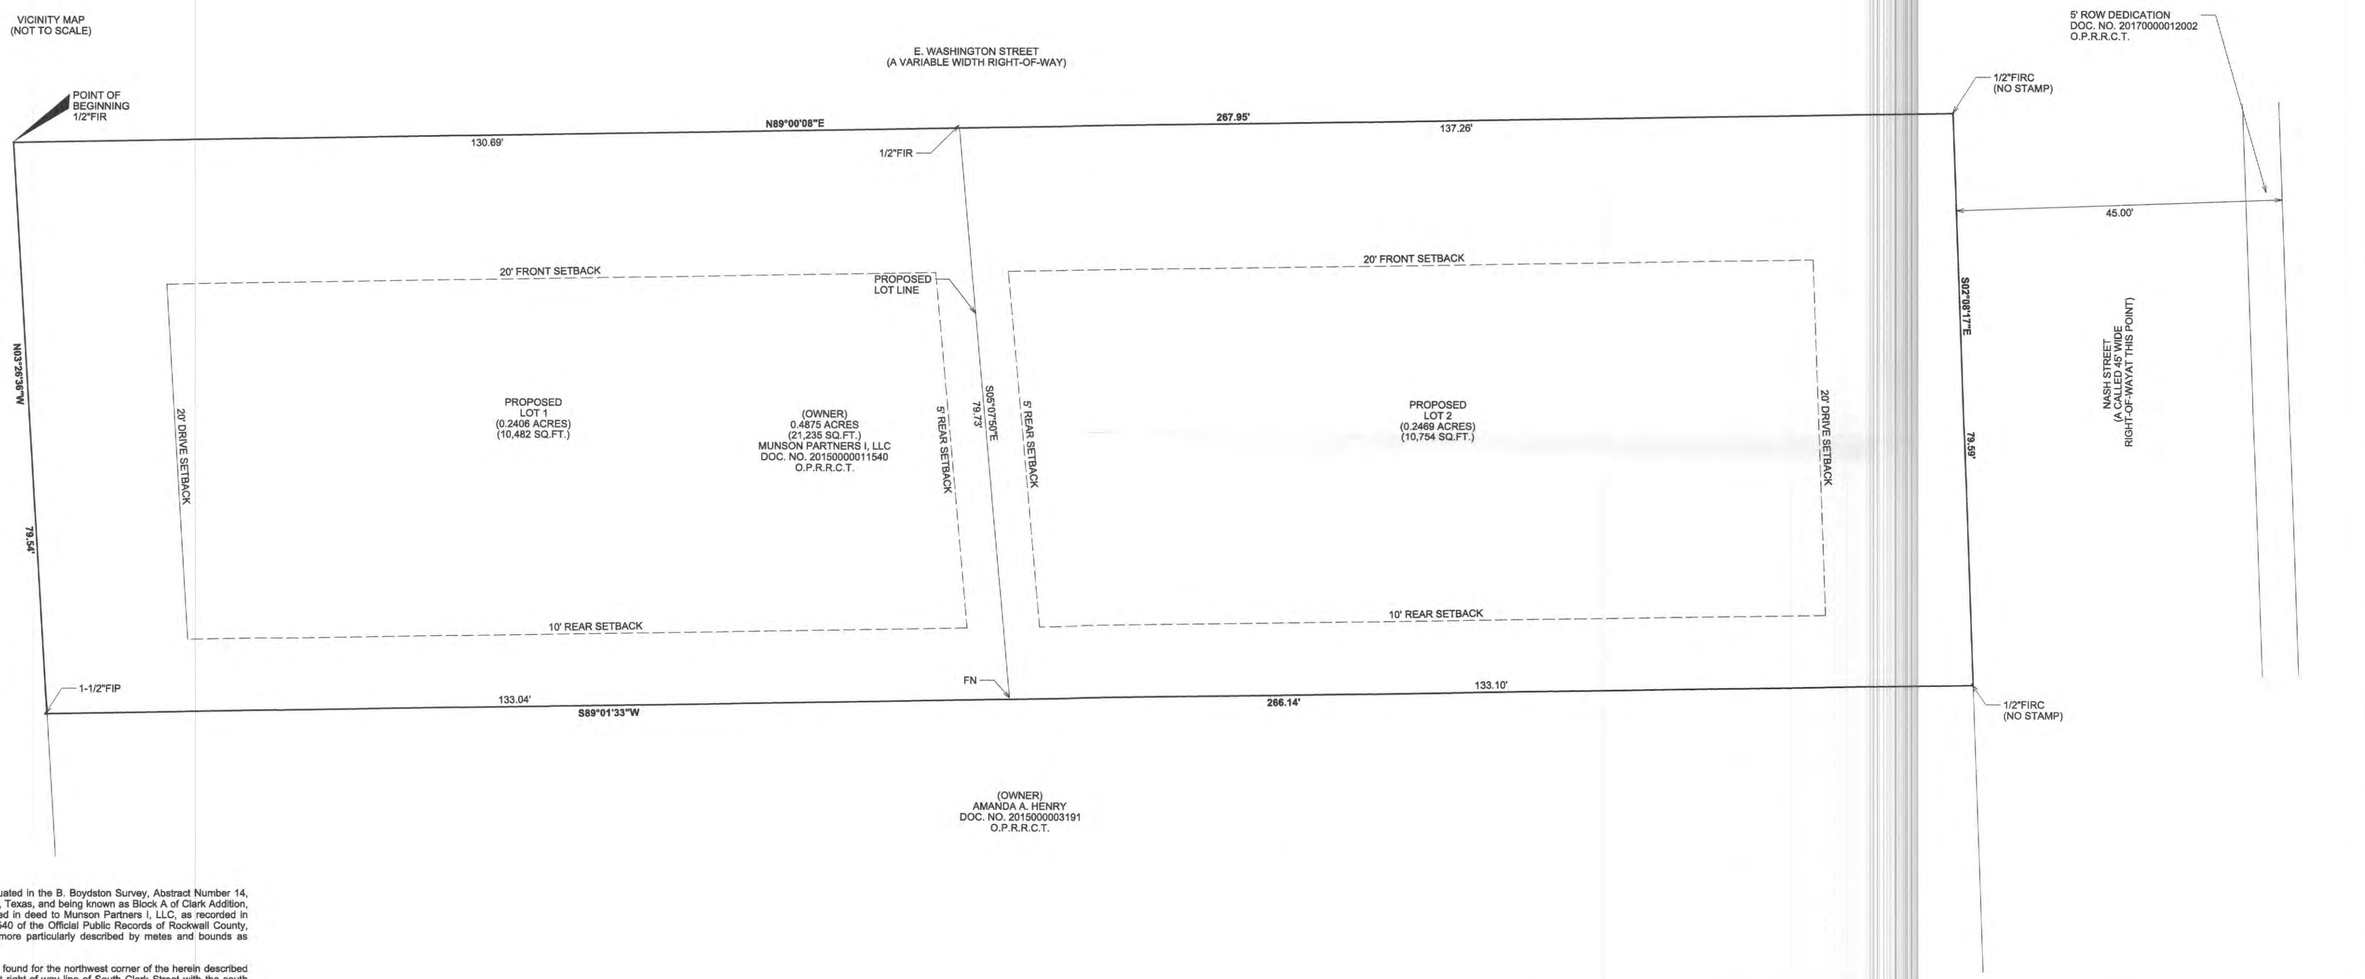
SURVEYOR'S NOTES:

1. The Basis of Bearings is the Texas Coordinate System of 1983, North Central Zone (4202).

2. This survey was prepared without the benefit of a title commitment.

3. By graphical plotting of FEMA Flood Insurance Rate Map No. 48397C0040L, having an effctive date of September 26, 2008, the subject property lies entirely within Zone X (unshaded) designated as those areas outsie the 0.2% annual chance floodplain.

4. According to the City of Rockwall Zoning Maps, teh subject property is zoned SF-7(Single Family Residential).



LEGAL DESCRIPTION:

BEING a 0.4875 acres of land situated in the B. Boydston Survey, Abstract Number 14, City of Rockwall, Rockwall County, Texas, and being known as Block A of Clark Addition, and being all of that land described in deed to Munson Partners I, LLC, as recorded in Document Number 20150000011540 of the Official Public Records of Rockwall County, Texas, O.P.R.R.C.T., and being more particularly described by metes and bounds as follows:

BEGINNING at a 1/2-inch iron rod found for the northwest corner of the herein described tract at the intersection of the east right-of-way line of South Clark Street with the south line of Washington Street;

THENCE North 89 degrees 00 minutes 00 seconds East, along the common north line of said Munson tract and said south right-of-way line of Washington Street, a distance of 267.95 feet to 1/2-inch iron rod with cap (no stamp) found at the intersection of said common line with the west right-of-way line of Nash Street for the northeast corner of the herein described tract;

THENCE South 02 degrees 08 minutes 17 seconds East, along the common east line of said Munson tract and said west right-of-way line, a distance of 79.59 feet to a 1/2-inch iron rod with a cap for corner (no stamp), for the common southeast corner of the herein described tract and the northeast corner of the that tract of land described in deed to Amanda A. Henry, as recorded in Document Number 2015000003191, O.P.R.R.C.T.;

THENCE South 89 degrees 01 minutes 33 seconds West, departing said west right-of-way and along the common south line of said Munson tract and north line of said Henry tract, a distance of 266.14 feet to a 1-1/2-inch iron pipe found for the common southeast corner of the herein described tract and northwest corner of said Henry tract, said corner being on said east right-of-way line of South Clark Street;

THENCE North 03 degrees 26 minutes 36 seconds West, along the common west line of said Munson tract and said east right-of-way line, a distance of 79.54 feet to the POINT OF BEGINNING AND CONTAINING 21,235 square feet or 0.4875 acres of land, more or less.

I, Joel C. Howard, do hereby certify that this exhibit is based upon an on-the-ground survey performed under my direct supervision and completed on August 7, 2018. All corners have been foud or set as shown. This exhibit meets or exceeds the minomum TBPLS & TSPS standards for a boundary survey.

CITY OF ROCKWALL
CITY COUNCIL MEMO

AGENDA DATE: 10/15/2018

APPLICANT: Matthew St. Marie of *G&A Consultants, LLC*

AGENDA ITEM: **P2018-033;** *Final Plat: SWBC Rockwall Addition, Phase 1*

SUMMARY:

Discuss and consider a request by Matthew St. Marie of G&A Consultants, LLC on behalf of Spencer Byington of SWBC Rockwall, LP for the approval of a final plat for Lot 1, Block A, SWBC Rockwall Addition, Phase 1 being currently identified as a 21.280-acre tract of a larger 42.555-acre tract of land identified as Tract 1-4 of the J. M. Allen Survey, Abstract No. 2, City of Rockwall, Rockwall County, Texas, zoned Planned Development 83 (PD-83) District, situated within the SH-205 By-Pass Overlay (205 BY-OV) District, located east of the intersection of Discovery Boulevard and John King Boulevard, and take any action necessary.

PLAT INFORMATION:

- ☑ The applicant is requesting approval of a final plat for a multi-family apartment complex on a 21.280-acre portion of a larger 42.555-acre tract of land for the purpose of constructing phase one (1) [*i.e. SWBC Rockwall Addition*] and consisting of 295-units. The development is zoned Planned Development 83 (PD-83) District, and is located east of the intersection of Discovery Boulevard and John King Boulevard.

- ☑ The proposed multi-family apartment use was approved on August 17, 2017 as Planned Development No. 83 (PD-83) District [*i.e. Ordinance No. 17-18*], which allows for the construction of a 590-unit multi-family apartment complex in two (2) phases. Phase 1 will consist of 295-units.

- ☑ The proposed final plat conforms to the approved Site Plan [*i.e. SP2017-027*], which was approved on September 12, 2017.

- ☑ The surveyor has completed the majority of the technical revisions requested by staff, and this plat, conforming to the requirements for final plats as stated in the *Subdivision Ordinance* in the *Municipal Code of Ordinances*, is recommended for conditional approval pending the completion of final technical modifications and submittal requirements.

- ☑ On October 2, 2018, the Parks Board reviewed the proposed *final plat* and assessed pro-rata equipment fees and cash in lieu of land fees as required for Park District No. 25 and made the following recommendations:

    1) The developer shall pay pro-rata equipment fees in the amount of $376,420.00 [*295 Lots @ $1,276.00 Per Lot*] to be paid at final plat; and,

    2) The developer shall pay cash-in-lieu of land fees in the amount of $343,970.00 [*295 Lots @ $1,166.00 Per Lot*] to be paid at final plat.

    3) The developer shall construct a ten (10) foot trail along the entire length of the property adjacent to Discovery Boulevard.

☑ Conditional approval of this plat by the City Council shall constitute approval subject to the conditions stipulated in the *Recommendation* section below.

☑ With the exception of the items listed in the *Recommendation* section of this case memo, this plat is in substantial compliance with the requirements of the *Subdivision Ordinance* in the *Municipal Code of Ordinances*.

RECOMMENDATIONS:

If the Planning and Zoning Commission and City Council choose to approve the final plat for the *SWBC Rockwall Addition, Phase 1*, staff would recommend the following conditions:

1) All technical comments from the Engineering, Planning and Fire Departments shall be addressed prior to the filing of this plat;

2) The *final plat* shall conform to the recommendations made by the Parks Board; and,

3) Any construction resulting from the approval of this *final plat* shall conform to the requirements set forth by the Unified Development Code, the International Building Code, the Rockwall Municipal Code of Ordinances, city adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION RECOMMENDATION:

On October 9, 2018, the Planning and Zoning Commission's motion to recommend approval of the final plat for the SWBC Rockwall Addition, Phase 1 with staff conditions passed by a vote of 6 to 0, with Commissioner Fishman absent.

LANDSCAPE ORDINANCE
CITY OF ROCKWALL

Final landscape plan will meet all City of Rockwall development ordinances.
All landscape will be maintained according to city standards.
All required landscape will be 100% watered by an underground irrigation system.

SITE LANDSCAPE
REQUIRED: All canopy/shade trees planted within this development shall be a minimum of 4 caliper inches in size and all. Accent/Ornamental trees shall be a minimum of 4 feet in total height.
PROVIDED: All canopy trees are 4 caliper inches
REQUIRED: A minimum of 20% (8.5 acres) open space. Floodplain acreage my comay count for up to 50% of the 20% open space requirement.
PROVIDED: 10% Floodplain + 14% Landscaped area = 24% Open Space

XERISCAPE LANDCAPE MATERIAL PROVIDED AND OVERALL LANDSCAPE REDUCED BY 2.5% PER THE REQUIREMENTS IN SECTION 5.1

BUFFER LANDSCAPE
REQUIRED: A minimum 20' landscape street buffer shall be required along Discovery Blvd. street frontage.
PROVIDED: 20' landscape buffer

REQUIRED: Three large shade 3 and 2 small ornamental trees shall be required per 100 linear feet of street buffer frontage. Discovery Boulevard : 969 l.f. of street frontage / 100 l.f. = 29 canopy trees and 19 ornamental trees.
PROVIDED: 29 canopy trees + 21 ornamental trees

PARKING LANDSCAPE
REQUIRED: Any parking lot with more than two rows of spaces shall have a minimum of five percent or 200 feet, whichever is greater, in the interior of the parking lot in landscaping. Such landscaping shall be counted toward the total landscape requirement.
REQUIRED: If the parking and maneuvering space exceeds 20,000 SF, one large canopy tree for every ten spaces. Each parking stall shall be located no greater than 80' from a canopy tree. Phase 1 parking = 465 parking spaces or 47 canopy trees required.
PROVIDED: (204) 3" canopy trees and (20) ornamental trees.

LANDSCAPE TREES SHALL NOT BE PLANTED WITHIN 5' OF ANY PUBLIC UTILITIES.

LANDSCAPE NOTES:
1) Contractor shall stake out tree locations and bed configuration for approval approval by owner prior to installation.
2) Contractor is responsible for verifying location of all underground utilities prior to construction.
3) It is the responsibility of the contractor to advise the owners representative of any condition found on site which prohibits installation as shown on these plans
4) All shrub and groundcover beds shall have a minimum of 3" of hardwood bark mulch
5) Landscape edging shall be located as noted on plan.
6) Trees overhanging walks and parking areas shall have a clear trunk height of seven feet.
7) Multi trunk and ornamental trees will be allowed in the city's right of way with staff approval only. Must be outside any visibility triangles.
8) A visibility triangle must be provided at all intersections as required by the thoroughfare standards code. Trees will have a minimum clear trunk branching height of nine feet.
9) All plant material shall be maintained in a healthy and growing condition,and must be replaced with plant material of similar variety and size if damaged, destroyed, or removed.
10) Landscape areas shall be kept free of trash, litter and weeds.
11) An automatic irrigation system shall be provided to maintain all landscape areas. Over spray on streets and walks is prohibited. A permit from the building inspection department is required for each irrigation system. Impact fees must be paid to the development services department for separate irrigation meters prior to any permit release.
12) Irrigation Controller to have a Rain and Freeze Stat.
13) All landscape is to be greater than 8 feet from all underground utilities.
14) All areas of grading disturbance are to have grass reestablished at 75% coverage prior to letter of acceptance from the city. Means and methods of grass establishment and application of water for grass establishment are at the discretion of the owner and contractor.

AE2680STX— Airi Stix 6' Contour Bench

6' perforated steel contour bench with stix pattern seat and cast aluminum legs

Material
The 6' contour bench is composed of a 10-gauge perforated steel seat with cast aluminum legs. The seat features a unique architectural perforated stix pattern inspired by trees. The bench seat is 72" long and will support 200 lbs. per linear foot.
The bench legs have predrilled .33" diameter holes for surface mounting to prevent movement; mounting hardware is not included.

Finish
Fade-resistant, powder coated steel and aluminum components feature a state-of-the-art primer proven to prevent rusting. Treated components exceed the industry standard by 34% in testing by independent sources.

Color
See website or sales representative for color choices.

Assembly
The bench requires some assembly. Stainless steel assembly hardware is included.

Maintenance
The product is virtually maintenance-free and requires only periodic cleaning with a sponge and a solution of mild detergent and water to remove surface dirt. Do not clean with solvent or petroleum base products.

Warranty
20-year limited structural warranty with 7-year finish warranty against fading from the date of purchase. See full details on multi-year warranties for components at *www.anovafurnishings.com/warranty.aspx*.

AE2645CT-STX — Airi Stix 45-Gallon Trash Receptacle with Side Door and Built-In Top

45-gallon perforated steel and aluminum receptacle with tree line pattern, side door, built-in top, plastic liner and rubber feet

Material
The receptacle is 46.72" tall and is composed of heavy-duty 12-gauge steel panels with an extruded aluminum frame. Steel side panels feature a unique architectural perforated tree line pattern inspired by trees. The side door features a magnetic door latch, a continuous geared hinge and a tamper-resistant cam lock and key system. The built-in canopy style top is 16-gauge steel with 9.63" tall x 22.01" wide front and back openings.
The receptacle is designed to be portable for flexibility in placement or surface mounted using pre-drilled holes inside base to prevent movement. The rubber feet are adjustable to assist in leveling the receptacle. The reusable plastic liner is made of high-density polyethylene. Mounting hardware is not included.

Finish
Fade-resistant, powder coated steel and aluminum components feature a state-of-the-art primer proven to prevent rusting. Treated components exceed the industry standard by 34% in testing by independent sources.

Color
See website or sales representative for color choices.

Assembly
The receptacle ships fully assembled and ready for use.

Maintenance
The product is virtually maintenance-free and requires only periodic cleaning with a sponge and a solution of mild detergent and water to remove surface dirt. Do not clean with solvent or petroleum base products.

Replacement Parts
Black Plastic Liner R-DOM2009

Warranty
20-year limited structural warranty with 7-year finish warranty against fading from the date of purchase. See full details on multi-year warranties for components at *www.anovafurnishings.com/warranty.aspx*.

TREE PRUNING, REMOVAL AND PROTECTION MEASURES

A. QUALITY ASSURANCE
1) Comply with applicable Federal, state, county and local regulations governing landscape work.
2) Employ only experienced personnel. Provide adequate supervision by qualified foreman.

B. JOB CONDITIONS
1) Coordination: Coordinate and cooperate with other contractors to enable the work to proceed as rapidly and efficiently as possible.
2) In order to minimize conflict, secure from the Construction Manager copies of layout drawings showing the location of all underground utility lines and other structures.

C. PRODUCTS
1) MULCH: Double shredded hardwood mulch free of sticks, dirt and other debris as derived from the site clearing.

D. DEFINITIONS
1) CRZ: Critical Root Zone: The soil space directly under the canopy of any tree, extending out at least 7 feet from the trunk or 2/3 the distance to the dripline, whichever is greater.
2) TPZ: Tree Protection Zone: The entire soil space located directly under the dripline of any tree (the entire dripline).
3) CRS: Complete Root System: The soil space directly under the dripline of any tree and an additional 7 feet beyond said dripline.
4) TPF: Tree Protection Fence: The orange safety barrier netting that shall extend around the entire circumference of the tree at the TPZ.

E. PRE – CONSTRUCTION TREE PRUNING
1) Personnel Qualifications: All pruning shall be performed under the supervision of an International Society Arboriculture (ISA) Certified Arborist.
2) All trees within the project area shall be pruned to:
   i) Clear the crown of diseased, crossing, weak and dead wood to a minimum of 1 ½ inches in diameter.
   ii) Provide 14 feet of vertical clearance over streets and 8 feet over sidewalks.
   iii) Remove stubs, cutting outside the woundwood tissue that has formed around the branch.
   iv) Reduce end weight on heavy, horizontal branches by selectively removing small diameter branches, no greater than 2 to 3 inches, near the ends of the scaffolds.
3) Pruning cuts shall be made in accordance with ANSI 300 Pruning Standard and work shall be performed in accordance with ANSI Z133.1 Safety Standard. Pruning shall be in accordance with ISA's Best Management Practices: Tree Pruning
4) No more than 20 percent of live foliage shall be removed from any tree.
5) Brush shall be chipped and chips shall be spread underneath trees within the tree protection zone to a maximum depth of 4 inches, leaving the trunk clear of mulch.

F. TREE REMOVAL
1) Trees preservation requires a commitment to preserving and maintaining retained trees, as well as removal of any unsuited trees within the Project Area.
2) All wood debris from all tree removals at the Project Site is to be chipped and stored on site for use on site in the tree preservation efforts at the discretion of the Landscape Architect.
3) The limits of all tree protection zones shall be staked in the field and observed by all contractors.
4) Any brush clearing required within the tree protection zone shall be accomplished with hand operated equipment.
5) Trees to be removed from within the tree protection zone shall be removed under the supervision of a Certified Arborist. The trees shall be cut near ground level and the stump ground out.

G. TREE PROTECTION
1) Before beginning work, the Project Manager, Landscape Architect and/or Owner or their agents are required to meet at the site to review all work procedures, access routes, storage areas, and tree protection measures. Any intended construction activities inside the TPZ shall be clearly outlined.
2) Fences shall be erected to protect trees to be preserved prior to construction equipment arriving on the Project Site . Fences will define the specific protection zone for each tree or group trees. Fences are to be maintained and remain until all site work has been completed and final landscape operations begin. Fences may not be relocated or removed without written permission from the
3) Landscape Architect. Fences may be constructed from 6' "T" stakes and orange web fence material.
All trees to be preserved shall have 4 inches of hardwood mulch applied inside the tree protection zone. This hardwood mulch shall be replenished as necessary to maintain a 4 inch depth.
5) Construction trailers, traffic and storage areas must remain outside fenced areas at all times.
6) Tree roots extend out in a straight, radial direction from the tree much like spokes on a wheel (to a depth generally not exceeding 24"). All underground utilities and drain or irrigation lines shall be routed outside the tree protection zone. If lines must traverse the protection area, they shall be tunneled or bored under the tree. Trench es "airdug" with Air Spade (registered trademark) or similar technology are
the only exceptions. Irrigation line may be routed in any direction outside the dripline of retained trees. Irrigation lines inside the dripline must be in a straight, radial direction towards the tree trunk and terminate in a dead end sprinkler head no greater than 7 feet from a tree trunk. (irrigation lines shall not in any way bisect and therefore damage the "spoke-like" root system).
7) No materials, equipment, spoil, or waste or washout water may be deposited, stored, or parked within the tree protection zone.
8) If unintentional injury should occur to any tree during construction, it shall be reported to the Landscape Architect within six hours so that remedial action can be taken. Timeliness is critical to tree health. The cost of any remedial treatments will become the burden of the offending contracting company.
Any grading, construction, demolition, or other work that is expected to encounter tree roots must be monitored by the Landscape Architect. Specific locations or tree tag numbers should be identified.

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: Mayor and City Council

CC: Rick Crowley, *City Manager*
Brad Griggs, *Assistant City Manager*

FROM: Ryan Miller, *Director of Planning and Zoning*

DATE: October 15, 2018

SUBJECT: Z2018-032; *Zoning Change for Park Station (LI to PD)*

As directed by the City Council at the September 17, 2018 City Council meeting, staff has met with the applicant (*Bill Bricker*) to discuss the right-of-way dedication of SH-66. Through this meeting, staff and the applicant have come to a consensus concerning SH-66, which involves minor revisions to the schematic alignment of this roadway. In accordance with this agreement, the applicant has revised the concept plan to show the dedication of ~1.8-acres of right-of-way that will be landscaped and irrigated by the City until the roadway is constructed. Due to the substantial changes to the concept plan that are involved with this new proposal and in accordance with Section 17, *Procedure in Planning and Zoning Cases – Additional Information Submitted*, of Article 2, *Authority and Administrative Procedures*, of the UDC, the applicant is requesting that the City Council remand the case back to the Planning and Zoning Commission. Should the City Council choose to approve the applicant's request the Planning and Zoning Commission would hold a public hearing on *October 30, 2018* to reconsider the case. This means that the City Council public hearing and first reading of the ordinance would be held on *November 5, 2018*. Should the City Council have any questions, staff and the applicant will be available at the meeting on October 15, 2018 to discuss.

Columbia Development Company, L.L.C.

Ryan Miller
Director of Planning
City of Rockwall
385 S Goliad
Rockwall, TX 75087
CC: Rockwall City Council
Case Z2018-032

Dear Mr. Miller and Members of the Rockwall City Council,

I certainly appreciated the opportunity provided by Council for Columbia and the City Staff to try and work out a solution to the alignment issue of SH 66. Due the fact the land is negatively impacted it was quite a problem for us in our desire to properly develop Park Station.

I am very pleased to say that our discussions have proven fruitful and that Staff and Columbia have a workable solution, should it be acceptable to Council. In generalized terms the ROW for the current SH 66 preferred alignment will be left out of the project. This requires us to relocate nearly every building and parking lot and of course a loss of area in the development. This is a very substantial change to the project and thus will take it some time to re-design in a creative manner.

As this is a substantial change, we feel the best way to bring this to the City correctly is for the project to be remanded back to P&Z for their approval. We felt the road issue was the largest stumbling block and with the changes the project should meet their approval, and subsequently the Council's as well.

I will be visiting family out of state next week; however, Tom Jones will be there for any questions or statements necessary to your decision to remand the case to the P&Z.

Sincerely;

C.W. Bricker
President

CITY OF ROCKWALL
CITY COUNCIL MEMO

AGENDA DATE: 09/17/2018

APPLICANT: Bill Bricker, *Columbia Development Company, LLC*

AGENDA ITEM: **Z2018-032**; *Zoning Change for Park Station (LI to PD)*

SUMMARY:

Hold a public hearing to discuss and consider a request by Bill Bricker of Columbia Development Company, LLC for the approval of a zoning change from a Light Industrial (LI) District to a Planned Development District for commercial, light industrial and townhome land uses on a 16.26-acre tract of land identified as a portion of Lot 1, Block 1, Indalloy Addition (*7.409-acres*) and Tract 31 of the R. Ballard Survey, Abstract No. 29, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, addressed as 1100 & 1300 E. Washington Street, and take any action necessary.

PURPOSE & BACKGROUND:

The subject property is a 16.26-acre tract of land, located on the south side of E. Washington Street, which was annexed on February 6, 1961 by *Ordinance No. 60-01*. According to the City's historic zoning maps, the subject property has been zoned Light Industrial (LI) District since at least January 3, 1972. On July 14, 2000, a final plat for a portion of this property (*7.409-acres*) was incorporated into *Lot 1, Block 1, Indalloy Addition* by *Case No. PZ2000-055-01*. The subject property is currently vacant with the exception of a private driveway that connects the property south of the subject property to E. Washington Street.

On July 13, 2018, the applicant -- *Bill Bricker with Columbia Development Company, LLC* -- submitted an application requesting to establish a Planned Development District on the subject property. Specifically, the applicant was proposing to entitle the subject property for 12 townhomes on 2.02-acres, limited commercial land uses on 6.57-acres, and limited light industrial land uses on 7.67-acres. These areas would be subject to the requirements and land uses of the Single-Family 10 (SF-10), General Retail (GR), and Light Industrial (LI) Districts unless specifically indicated in the Planned Development District ordinance.

ADJACENT LAND USES AND ACCESS:

The land uses adjacent to the subject property are as follows:

North: Directly north of the subject property is E. Washington Street, which also delineates the future alignment of SH-66. This roadway is identified as a TXDOT4D (*i.e. four [4] lane, divided highway, owned by the Texas Department of Transportation*) on the City's Master Thoroughfare Plan. North of this thoroughfare is a 67.036-acre public park (*i.e. Harry Myers Park*), which is zoned Light Industrial (LI) District. Beyond this is a 17.861-acre vacant tract of land that was platted as a 78-lot subdivision (*i.e. Oak Creek*) in 1984. This property is zoned Two Family (2F) District. Adjacent to this residentially zoned area is a 21.326-acre tract of land that is zoned Light Industrial (LI) District. This property has a school and administrative offices (*i.e. Rockwall Quest Academy/RISD Administrative Offices*) situated on it.

South: Directly south of the subject property is an 8.197-acre tract of land and a 14.53-acre parcel of land (*i.e. Lot 1-01, Block 1, Indalloy Addition*). Both of these properties are zoned Light Industrial (LI) District. Situated on these properties is a large industrial building and various other improvements. Beyond this is the right-of-way for the *Union Pacific Dallas/Garland Northeast Railroad*.

East: Directly east of the subject property is a 2.093-acre parcel of land (*i.e. Lot 1, Block A, Soroptimist Rockwall Children's Home*), a vacant 7.97-acre tract of land, and a vacant 11.3736-acre tract of land. All of these properties are zoned Light Industrial (LI) District. Beyond this are E. Washington Street, Airport Road, and Industrial Boulevard. These roadways are all identified as an M4U (*i.e. minor collector, four [4] lane, roadway*) on the City's Master Thoroughfare Plan.

West: Directly west of the subject property is *Phases 2 & 3* of the *Park Place Subdivision*, which currently contains 94 single-family residential lots. This property is zoned Planned Development District 59 (PD-59) for Neighborhood Services (NS) and Single-Family 7 (SF-7) District land uses.

CHARACTERISTICS OF THE REQUEST:

The applicant has submitted a concept plan and development standards for the proposed development. According to the concept plan, the subject property will be broken down into five (5) tracts of land that will include commercial, light industrial and townhome land uses. The characteristics and development standards for each of these tracts are as follows:

Tract 1: Townhomes (2.02-Acres)

The proposed townhome land use will be situated on *Tract 1*, which is located directly adjacent to *Phase 2* of the *Park Place Subdivision*. More specifically, the concept plan shows that the townhomes will face west towards the existing amenity center and be accessible via driveways located at the rear of the property facing on to a proposed public right-of-way (*i.e. Street 'A' on the concept plan*). This public right-of-way will end in a cul-de-sac and only serve the proposed townhomes. The concept plan currently shows the provision of ten (10) townhomes; however, the applicant has requested the ability to provide up to 12 townhomes through the Planned Development District ordinance. The applicant has stated that these residential units will be incorporated into the existing Park Place Homeowner's Association (HOA). Staff has included a requirement that an HOA be established regardless if they are incorporated into the existing HOA or put into a separate HOA.

This tract is subject to the Single Family 10 (SF-10) District land uses with the added townhome use; however, any accessory buildings, portable buildings or guest quarters have been prohibited through the Planned Development District ordinance. A summary of the proposed density and dimensional requirements for *Tract 1* is as follows:

Ordinance Provisions	*Zoning District Standards*
Minimum Lot Width [1]	*28-Feet*
Minimum Lot Depth	*115-Feet*
Minimum Lot Area	*3,000 SF*
Minimum Front Yard Setback [2] & [4]	*20-Feet*
Minimum Side Yard Setback	*0-Feet*
Minimum Distance Between Buildings	*10-Feet*
Minimum Length of Driveway Pavement	*20-Feet*
Maximum Height [3]	*36-Feet*
Minimum Rear Yard Setback [4]	*10-Feet*
Minimum Area/Dwelling Unit (SF) [Air Conditioned Space]	*1,400 SF*
Garage Orientation	*Rear Entry*

Maximum Number of Attached Units Per Buildings	*5 Units*
Maximum Lot Coverage	*75%*

General Notes:
1: The minimum lot width shall be measured at the *Front Yard Building Setback*.
2: The location of the *Front Yard Building Setback* as measured from the front property line.
3: The *Maximum Height* shall be measured to the eave or top plate (*whichever is greater*) of the single-family home.
4: Porches, stoops, bay windows, balconies, eaves and similar architectural features may encroach beyond the *Front* and *Rear Yard Building Setbacks* by up to five (5) feet for any property; however, the encroachment shall not exceed three (3) feet on *Side Yard Setbacks* where appropriate for such use and shall not encroach into public right-of-way.

It should be noted that the applicant is proposing to match the design style of the Park Place Subdivision, which is constructed in a *Neo Traditional* architecture style (*e.g. the use of material blends heavy in cementitious siding, front porch elements, bay windows, etc.*). Due to this proposed design, the applicant is proposing to use up to 100% cementitious materials excluding stucco, which is prohibited. In addition, the townhomes will have varying front façades, and additional anti-monotony requirements are incorporated into the Planned Development District ordinance. An example of the type of design provided by the applicant has been included in the attached packet.

The applicant has stated that the purpose of the townhome land use is to provide a transition from the Park Place Subdivision to the limited light industrial land uses that are proposed on *Tracts 4 & 5*, which are located east of the subject property. Staff should point out that under the current zoning, light industrial land uses can be established in the area (i.e. *Tract 1*) without restriction.

Tracts 2 & 3: Limited General Retail (6.57-Acres)

Tracts 2 & 3 on the concept plan are dedicated for limited General Retail (GR) District land uses, and General Retail (GR) District density and dimensional requirements. A summary of the density and development requirements permitted in the General Retail (GR) District is as follows:

Ordinance Provisions	*Zoning District Standards*
Minimum Lot Area	*6,000 SF*
Minimum Lot Width	*60-Feet*
Minimum Lot Depth	*100-Feet*
Minimum Front Yard Setback (1)	*15-Feet*
Minimum Rear Yard Setback (2)	*10-Feet (0-Feet w/ Fire Rated Wall)*
Minimum Rear Yard Setback Adjacent to Residential (2)	*20-Feet + (½ Height Greater than 36-Feet)*
Minimum Side Yard Setback (2)	*10-Feet (0-Feet w/ Fire Rated Wall)*
Minimum Side Yard Setback Adjacent to Residential (2)	*20-Feet + (½ Height Greater than 36-Feet)*
Maximum Height	*60-Feet (Greater Than 36-Feet Requires SUP)*
Max Lot Coverage	*40%*
Minimum Masonry Requirement	*90%*
Maximum Building Size	*26,000 SF*
Minimum Landscaping Percentage	*15%*
Maximum Impervious Coverage	*85-90%*

Notes
1: *Parking should not be located between the front façade and the property line.*
2: *In no case shall the setback exceed more than 50-feet.*

The applicant has stated that the purpose of *Tracts 2 & 3* are to screen the limited light industrial land uses from E. Washington Street and Harry Myers Park. In addition, the applicant has stated a desire to establish a two (2) story mixed office/neighborhood services development of *Tract 2* that can take advantage of views towards Harry Myers Park to the north. It should be noted that staff has limited the uses permitted on these tracts to ensure compatibility with the proposed and existing residential land uses to the west of *Tract 2*.

Tracts 4 & 5: Limited Light Industrial (7.67-Acres)

The concept plan shows that *Tracts 4 & 5* will remain subject to the land uses and density and dimensional requirements of the Light Industrial (LI) District; however, the applicant has consented to limit the land uses to ensure that no uses that would be incompatible with the adjacent residential and limited commercial land uses would be established. Specifically, the applicant has prohibited the majority of land uses that incorporate outside storage or that would create incompatibility. In addition, the applicant has agreed to put a Specific Use Permit (SUP) requirement on automotive and mini-warehouse land uses. Staff should point out that under the current zoning the applicant could establish any of the land uses that are being limited by the proposed zoning ordinance.

A summary of the density and dimensional requirements is as follows:

Ordinance Provisions	*Zoning District Standards*
Minimum Lot Area	*12,500 SF*
Minimum Lot Width	*100-Feet*
Minimum Lot Depth	*125-Feet*
Minimum Front Yard Setback	*25-Feet*
Minimum Rear Yard Setback [1]	*10-feet (0-Feet w/ Fire Rated Wall)* [2]
Minimum Side Yard Setback [1]	*10-feet (0-Feet w/ Fire Rated Wall)* [2]
Maximum Height	*120-Feet (Greater Than 60-Feet Requires SUP)*
Max Lot Coverage	*60%*
Minimum Masonry Requirement	*90%*
Minimum Landscaping Percentage	*10%*
Maximum Impervious Coverage	*90-95%*

Notes
[1]: *In no case shall the setback exceed more than 50-feet.*
[2]: *When directly abutting a residentially zoned property the setback is 36-Feet + ½ Building Height Greater than 36-feet. This is not applicable in this case due to the separation of Tract 1 from Tract 4 by the roadway and detention pond.*

INFRASTRUCTURE:

Based on the applicant's submittal, staff is requiring an infrastructure study -- *at the applicant's expense* -- to be performed to ensure that all water and wastewater improvements necessary to serve the proposed developments are incorporated. With regard to streets, the City's Master Thoroughfare Plan depicts E. Washington Street as the future alignment of SH-66. The proposed alignment of this roadway begins at the western boundary of the subject property, dips down into the front of the subject property approximately 105-feet, and extends northward at the approximate mid-point of the subject property (*see attached exhibit*). The total area of the subject property affected by the proposed alignment of SH-66 is 1.18-acres. From the point that the alignment of the future SH-66 extends northward, the remainder of E. Washington is depicted as a M4U (*minor arterial, four [4] lane, undivided roadway*) according to the Master Thoroughfare Plan. The applicant has submitted a letter requesting this alignment be changed, and is requesting that the City Council waive the dedication for this roadway. This means that if the Planning and Zoning Commission and City Council choose to approve the applicant's request, the Master Thoroughfare Plan will need to be amended to show a revised alignment of SH-66. The new alignment will require coordination between the Texas Department of Transportation (TXDOT), the City of Rockwall, and any affected property owners. Staff has added this as a condition of approval for this case.

CONFORMANCE WITH THE CODES:

While the proposed Planned Development District does conform to many of the City's code requirements, it should be noted that the development standards contained within the Planned Development District ordinance for *Tract 1* deviate from the requirements of the Unified Development Code (UDC), Municipal Code of Ordinances and the Engineering Department's *Standards of Design and Construction* Manual in the following ways:

- ☑ *Garages*. The proposed townhomes are intended to front towards the existing Park Place Subdivision, and the garages will front onto a public street (*i.e. Road 'A'*) at the rear of the property. Based on the current codes, it is debatable if this constitutes rear or front entry product; however, the current codes do not clarify this issue, and staff is of the opinion that this issue is best left up to the discretion of the Planning and Zoning Commission and City Council.

- ☑ *Sidewalks*. The Engineering Department's *Standards of Design and Construction* Manual and the Municipal Code of Ordinances require that a five (5) foot sidewalk be constructed adjacent to any public street. In this case, the applicant is proposing to run the sidewalk adjacent to *Road 'A'* from E. Washington Street southward, but break the adjacency to the roadway and run the sidewalk along the front side of the townhomes (*i.e. in between the townhome and the Park Place Subdivision*).

- ☑ *Masonry Requirements.* The minimum masonry requirement for residential properties stipulated by the UDC is 80% with a maximum of 50% of the masonry requirement being permitted to be cementaceous materials. In this case, the applicant is proposing to match the adjacent residential subdivision and is requesting to use up to 100% cementaceous materials. In addition, the applicant has stated that he will be using varying façades on the proposed townhomes and has prohibited the use of stucco.

- ☑ *Lot Size*. Currently, the Two Family (2F) and Downtown (DT) Districts are the only zoning district that allow townhomes in the City of Rockwall. In addition, there are no specific standards for townhomes contained in the UDC. This means that the City's smallest single-family lot size for a townhome is within the Two Family (2F) District and is 7,000 SF. This is not conducive to the development of a townhome product and the applicant is proposing a minimum lots size of 3,000 SF for *Tract 1*.

Tracts 2, 3, 4 & 5 conform to all applicable requirements of the Unified Development Code (UDC), Municipal Code of Ordinances and the Engineering Department's *Standards of Design and Construction* Manual. By approving the proposed Planned Development District, the City Council is waiving the standards for *Tract 1* as listed above.

CONFORMANCE WITH THE COMPREHENSIVE PLAN:

The Future Land Use Map contained in the Comprehensive Plan designates the subject property for *Commercial/Industrial* land uses. According to the *Land Use* section of the Comprehensive Plan the *Commercial/Industrial* land use designation is appropriate for areas, "…where more industrial activities may occur. It is largely buffered from residential by roads and open space." Staff should point out that the property directly west of the subject property is currently designated *Medium Density Residential* and is developed with a single-family subdivision (*i.e. Park Place*). Currently, these properties share a common property line, with no roadways or open space intervening. The adjacency of these two (2) land use designation poses the potential for conflicting development (*e.g. residential directly adjacent to industrial*).

The residential density for *Tract 1* (*i.e. 5.94 dwelling units per acre*) falls within the *High Density Residential* land use designation, which according to the Comprehensive Plan, "…should be used as a transitional use from commercial (*or existing retail*) use, or where it will serve as a logical extension of an existing high density development." In this case, the applicant has stated that he would like to create a transition from the single-family subdivision to the west to the proposed limited light industrial land uses to the east. In addition, the applicant is proposing to screen the limited light industrial land uses from Harry Myer's Park -- *which is north of the subject property* -- with commercial/retail buildings that will be directly adjacent to E. Washington Street. This will necessitate that *Tracts 2 & 3* on the concept plan be changed to a *Commercial* designation. In accordance with the requirements of the Comprehensive Plan staff has requested that the applicant

make the retail areas pedestrian-oriented and easily accessible to the adjacent residential neighborhood. Finally, *Tracts 4 & 5* will be designated for limited light industrial land uses, which is better suited under the *Technology/Light Industrial* designation as opposed to the projected *Commercial/Industrial* land use designation.

Considering these proposed changes, any deviations from the Future Land Use Map or the Comprehensive Plan are discretionary to the City Council. Should the City Council choose to approve the applicant's request staff has included a condition of approval that would amend the Future Land Use Map to reflect this change.

NOTIFICATION:

On August 1, 2018, staff mailed 40 notices to property owners and occupants within 500-feet of the subject property. Staff also notified the Park Place Homeowner's Associations (HOA), which is the only HOA/Neighborhood Organization that is within 1,500-feet of the subject property participating in the Neighborhood Notification Program. Additionally, staff posted a sign on the subject property as required by the UDC. At the time this report was drafted, staff had received seven (7) notices in support of the request, and one (1) in opposition.

RECOMMENDATIONS:

If the Planning and Zoning Commission chooses to recommend approval of the applicant's request to change the zoning of the subject property from a Light Industrial (LI) District to a Planned Development District for commercial, light industrial and townhome land uses, then staff would propose the following conditions of approval:

1) The applicant shall be responsible for maintaining compliance with the conditions contained within the *Planned Development District* ordinance;

2) An *Infrastructure Study* -- *at the applicant's expense* -- will be required to be submitted concurrently with the submission of a preliminary plat;

3) The Master Thoroughfare Plan contained in the Comprehensive Plan shall be amended to realign SH-66 or take other mitigating actions to account for the loss of right-of-way;

4) By approving this zoning change, the City Council will effectively be approving changes to the Comprehensive Plan and Future Land Use Map. Specifically, this will change the designation of portions of the subject property from a *Commercial/Industrial* designation to *High Density Residential*, *Commercial*, and *Technology/Light Industrial* designations; and,

5) Any construction resulting from the approval of this *zoning change* shall conform to the requirements set forth by the Unified Development Code (UDC), the International Building Code (IBC), the Rockwall Municipal Code of Ordinances, city adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION:

On August 28, 2018, the Planning and Zoning Commission approved a motion to recommend denial of the applicant's request by a vote of 4-3, with Commissioners Welch, Womble and Fishman dissenting.

To whom it may concern:

Per your participation in the Neighborhood Notification Program, you are receiving this notification to inform your organization and residents of a request for a zoning change that lies within 1,500 feet of the boundaries of your neighborhood or subdivision. As the primary contact for the organization, you are encouraged to share this information with the residents of your subdivision. Please find attached a map detailing the location of the subject property requesting the zoning change in relation to your subdivision boundaries. Additionally, below is a summary of the zoning request that was published in the Rockwall Herald Banner ***July 20, 2018***. The Planning and Zoning Commission will hold a public hearing on ***Tuesday 8/14/2018 at 6:00 p.m.***, and the City Council will hold a public hearing on ***Monday, 8/20/2018 at 6:00 p.m***. These hearings will be held in the City Council Chambers at City Hall, 385 S. Goliad Street. These hearings will be held in the City Council Chambers at City Hall, 385 S. Goliad Street. If you have any questions or comments regarding this request, the contact information for the Planning Department is listed below. Additional information can also be found at
https://sites.google.com/site/rockwallplanning/development/development-cases

Z2018-030- Hold a public hearing to discuss and consider a request by Pat Atkins of Saddlestar Land Development on behalf of the Stagliano Family Trust for the approval of a zoning change from an Agricultural (AG) District, Commercial (C) District and Heavy Commercial (HC) District to a Planned Development District for commercial/retail and single-family land uses on a 63.71-acre tract of land identified as Tract 3 of the W. H. Barnes Survey, Abstract No. 26, City of Rockwall, Rockwall County, Texas, zoned Agricultural (AG) District, Commercial (C) District and Heavy Commercial (HC) District, situated within the SH-205 Overlay (SH-205 OV) District, located at the northwest corner of S. Goliad Street [*SH-205*] and Mims Road, and take any action necessary.

If this email is reaching you in error, please forward it to your HOA or neighborhood group representative and update the contact information at http://www.rockwall.com/planning/hoa.asp.

NOTICE OF PUBLIC HEARING
CITY OF ROCKWALL, PLANNING & ZONING DEPARTMENT

PHONE: (972) 771-7745
EMAIL: PLANNING@ROCKWALL.COM

To Whom It May Concern:

You are hereby notified that the City of Rockwall Planning and Zoning Commission and City Council will consider the following application:

Case No. Z2018-032: Park Station (LI to PD)

Hold a public hearing to discuss and consider a request by Bill Bricker of Columbia Development Company, LLC for the approval of a zoning change from a Light Industrial (LI) District to a Planned Development District for commercial, light industrial and townhome land uses on a 16.26-acre tract of land identified as Lot 1, Block 1, Indalloy Addition (7.409-acres) and Tract 31 of the R. Ballard Survey, Abstract No. 29, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, addressed as 1100 & 1300 E. Washington Street, and take any action necessary.

For the purpose of considering the effects of such a request, the Planning and Zoning Commission will hold a public hearing on **Tuesday, 8/14/2018 at 6:00 p.m.,** and the City Council will hold a public hearing on **Monday, 8/20/2018 at 6:00 p.m.** These hearings will be held in the City Council Chambers at City Hall, 385 S. Goliad Street.

As an interested property owner, you are invited to attend these meetings. If you prefer to express your thoughts in writing please return the form to:

Ryan Miller
Rockwall Planning and Zoning Dept.
385 S. Goliad Street
Rockwall, TX 75087

You may also email your comments to the Planning Department at planning@rockwall.com. If you choose to email the Planning Department please include your name and address for identification purposes.

Your comments must be received by **8/20/2018** to ensure they are included in the information provided to the City Council.

Sincerely,

Ryan Miller, AICP
Director of Planning & Zoning

NOTICE OF PUBLIC HEARING
CITY OF ROCKWALL, PLANNING & ZONING DEPARTMENT

PHONE: (972) 771-7745
EMAIL: PLANNING@ROCKWALL.COM

To Whom It May Concern:

You are hereby notified that the City of Rockwall Planning and Zoning Commission and City Council will consider the following application:

Case No. Z2018-032: Park Station (LI to PD)

Hold a public hearing to discuss and consider a request by Bill Bricker of Columbia Development Company, LLC for the approval of a zoning change from a Light Industrial (LI) District to a Planned Development District for commercial, light industrial and townhome land uses on a 16.26-acre tract of land identified as Lot 1, Block 1, Indalloy Addition (7.409-acres) and Tract 31 of the R. Ballard Survey, Abstract No. 29, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, addressed as 1100 & 1300 E. Washington Street, and take any action necessary.

For the purpose of considering the effects of such a request, the Planning and Zoning Commission will hold a public hearing on **Tuesday, 8/14/2018 at 6:00 p.m.**, and the City Council will hold a public hearing on **Monday, 8/20/2018 at 6:00 p.m.** These hearings will be held in the City Council Chambers at City Hall, 385 S. Goliad Street.

As an interested property owner, you are invited to attend these meetings. If you prefer to express your thoughts in writing please return the form to:

Ryan Miller
Rockwall Planning and Zoning Dept.
385 S. Goliad Street
Rockwall, TX 75087

You may also email your comments to the Planning Department at planning@rockwall.com. If you choose to email the Planning Department please include your name and address for identification purposes.

Your comments must be received by **8/20/2018** to ensure they are included in the information provided to the City Council.

Sincerely,

Ryan Miller, AICP
Director of Planning & Zoning

MORE INFORMATION ON THIS CASE CAN BE FOUND ON THE CITY'S WEBSITE: HTTPS://SITES.GOOGLE.COM/SITE/ROCKWALLPLANNING/DEVELOPMENT-CASES

PLEASE RETURN THE BELOW FORM

Case No. Z2018-032: Park Station (LI to PD)

Please place a check mark on the appropriate line below:

☑ I am in favor of the request for the reasons listed below.

☐ I am opposed to the request for the reasons listed below.

Although we are in favor of this proposal, it is important to note that as the property owner to the south of the proposed development we will require access to said property via current (or alternate) access point (currently under easement) from the north (Washington St).

Name: Airexplast US Development (1200 Washington St)

Address: 1480 Justin Road 75087

Tex. Loc. Gov. Code, Sec. 211.006 (d) **If a proposed change to a regulation or boundary is protested in accordance with this subsection, the proposed change must receive, in order to take effect, the affirmative vote of at least three-fourths of all members of the governing body. The protest must be written and signed by the owners of at least 20 percent of either: (1) the area of the lots or land covered by the proposed change; or (2) the area of the lots or land immediately adjoining the area covered by the proposed change and extending 200 feet from that area.**

Subject: Case No. Z2018-032: Park Station (LI to PD)

To Whom It May Concern:

I am writing to say that I am opposed to the request for a zoning change because the proposed plan and build out do not closely resemble the current look and feel of the Park Place neighborhood. The plan also does not adequately minimize the flow of traffic from Harry Myers Park. I would like to see the plan changed to better resemble the the current neighborhood so that Park Place continues to be a community that draws people in and distinguishes Rockwall from other cities in the area.

Sincerely,
Jocelyn Sherman

From: John Wardell
To: Miller, Ryan
Subject: In Favor of Z2018-032 Columbia Development PD
Date: Wednesday, August 22, 2018 6:21:49 PM

Ryan – My name is John Wardell and my wife Julie and I have lived in the Park Place Subdivision for over 10 years. We are the most deeply invested residents having restored the Jordan Farm House that has been the anchor of this property since the early 1900's. We wanted to express our approval of
Z2018-032 submitted by Bill Bricker for Columbia Development. When we purchased our lot and invested two years of our lives moving and restoring our home we knew the adjacent property was zoned Light Industrial but chose to invest in the area anyway. We believed the land that is the subject of this rezoning request would be developed for a higher purpose because of its proximity to Old Town, the parks, and to achieve greater value for the developer.

We believe the Planned Development should be approved for the following reasons:

1. The proposed Planned Development offers the best possible option for the homeowners of Park Place to have a visual break from the commercial and light industrial formed by the town homes.
2. The retail strip along Washington gives a fresh retail option to this area that is needed to service the visitors to the Park and area residents.
3. The Light Industrial sites are concealed on the north by retail and on the west by the town homes and provide a needed small footprint option.
4. Bill Bricker and Columbia have proven to be responsible developers that have given Rockwall one of its premier neighborhoods in Park Place and we believe this new development will be no exception.
5. By adding the townhomes to our HOA our Architectural Review Committee has the opportunity to exercise guidance on the exterior finishes.
6. The PD will bring more taxable commercial and residential real estate to our tax base. It will also provide possible growth in sales tax and personal property tax.

Some of our neighborhood members will email you in fear of parking problems with future public events at Myers Park. We share their parking concerns but it is not the responsibility of Columbia to provide parking for public events. If the city is going to host these events then parking solutions will have to be found in the future by the city.

Allow us to communicate also our strong opposition to Washington becoming State Highway 66 and being widened and rerouted adjacent to our neighborhood. We expressed our opposition to this reroute when it was originally proposed and we still stand in opposition to this misguided solution.

If you have questions you may return email to this address.

Thank you for your service.

Subject:	Case # Z2018-032: Park Station
Date:	Thursday, August 23, 2018 4:32:03 PM

To Planning Commission and Mayor/ Council Members

I am in favor of the proposed Park Station development.

I have to raise concerns if the city does not prepare for all of the parking area that will be lost . During festivals such as Founders Day, disk golf championships, 4th of July, and other large events this land has generously been used to handle overflow Harry Meyers Parking.

We live in Park Place adjacent (WEST) to the proposed development and during these events we struggle to stop the multitude of non-resident cars in our neighbored. Some break the no parking rules, smoke/drink/ speed and basically cause hazards. In addition the foot traffic up and down Washington migrates to the middle of the street causing even more dangerous situations. There are no sidewalks adjacent to the Park and roadway.

The city needs to be pro-active to plan for these events and future lack of parking. Possibly city should prepare to shuttle overflow traffic to Harry Meyers from a remote location? (High School)? Post a police officer at our entrance to detour non-resident traffic. In addition, if you continue to project HWY 66 passing in front of the development the issue will only get worse.

What will the city do to protect Park Place owners when this property is developed?

Park Place is in the midst of a 2nd phase and the homes are beautiful. The Park Place development is a benchmark for other development both style and quality. If ever there was a role model to sell the Rockwall style for others to relocate—Park Place is it!!
Why tarnish it with these other issues. Please don't be short sighted in this decision.

Plan for the loss of this land.
Plan for possible negative effects of Hwy 66.

Maybe the city should purchase the land and extend the Harry Meyers Park facilities!!

Respectfully,

Michael and DeLila Rasmussen

From: Chris
To: Miller, Ryan
Subject: Z2018-032:Park Station (L1 to PD)
Date: Thursday, August 23, 2018 7:43:33 PM

We live in the Park Place neighborhood across from Harry Myers Park. We are writing with concern about the P & Z activity which addresses the development of the proposed Park Station by the Columbia Development LLC and the proposed route of Highway 66.
We are in a state of limbo not knowing how plat of land just north of the Aluminum plant will be developed. (with or without Hwy 66) We hope Columbia Development is granted their P & Z request. Rerouting Hwy 66 with a 4 lane divided highway along Harry Myers will absolutely ruin the aesthetics of the Park and interfere with the plan to develop the proposed Park Station.
Obviously, developing Park Station will have a huge impact on the loss of parking for events at Harry Myers . This will directly affect spectator parking encroaching and overflowing into our Park Place neighborhood. This is an issue the city at some point must address when the current vacant lot used for parking is no longer available.
Congestion in our neighborhood will be oppressive and possibly a hazard as far as ability for emergency vehicles accessing the interior of the Park Place neighborhood. The remedy for this could possibly be a shuttle system during major high volume events.
Harry Myers Park, a jewel in our city, should be protected from being marred by a 4 lane divided highway.
The area across the street (proposed Park Station) should be developed in a fluid pleasing manner that will allow our neighborhood to seamlessly blend with the adjacent property.
We would just like to know what we have to look forward to for our beautiful Park Place neighborhood. Please work with Columbia Development LLC in their vision to develop the plat of land in Z2018-032:Park Station (L1 to PD) We support it.

Respectfully
David and Christine David

City of Rockwall
385 S Goliad
Rockwall, TX 75087

Columbia Development is proposing to convert approximately 15.6 acres of Light Industrial property located at 1200 E Washington to Light Industrial planned development. This property has been zoned LI for many years and the expected use has been industrial based manufacturing, much as has been the case for the portion of the property located directly south of the subject property and now owned by Alvaplast US Development.

The City plan would reflect the future use of this property as LI. With the property rezoned to PD we would lessen the impact of the use on the surrounding area which is adjacent to Harry Myers Park and the Park Place West subdivision to the west. We feel that developing the land into several types of uses will buffer the industrial component of the property to adjacent uses.

We proposed to build approximately 10 townhouse units on the west property line facing the Park Place community center. This component would be annexed to the Park Place West HOA, be built to the same architectural standards as Park Place West and subject to the Park Place West ARC for approval of the facades. This would be an effective transition to the industrial buildings immediately to the east.

Along Washington we propose retail, commercial and restaurant space in buildings designed to convey a sense of Texas historic bus and rail stations. The first building is presented as a 22,000 sq ft two story structure with views of the park from all tenant spaces.

As the project develops additional buildings of various sizes and similar uses would be built as specs, leased space, build to suit or purchased for particular uses. These structures would be restricted to carrying forward the Park Station theme for all buildings facing Washington.

The interior of the project would remain based in LI uses with certain restrictions to limit uses that are not compatible with the surrounding townhomes, single family, and retail, restaurant and commercial activities.

Columbia feels this project will be appreciated by the City as one that removes the potential of large industrial use and provides a type of housing that is desirable for people who want a Park Place lifestyle with the convenience of a townhome. Additionally the retail/commercial aspect of the project will complement Harry Myers with uses that enjoy the view and proximity of the City's preeminent park. Limiting the potential for industrial and providing land for smaller businesses to lease or build their own space is a healthy benefit for the community.

CW Bricker

CITY OF ROCKWALL

ORDINANCE NO. 18-XX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, SO AS TO CHANGE THE ZONING FROM A LIGHT INDUSTRIAL (LI) DISTRICT TO PLANNED DEVELOPMENT DISTRICT XX (PD-XX) FOR TOWNHOMES, COMMERCIAL/RETAIL, AND LIGHT INDUSTRIAL LAND USES ON THE SUBJECT PROPERTY, BEING A 16.26-ACRE TRACT OF LAND IDENTIFIED AS LOT 1, BLOCK 1, INDALLOY ADDITION AND TRACT 31 OF THE R. BALLARD SURVEY, ABSTRACT NO. 29, CITY OF ROCKWALL, ROCKWALL COUNTY, TEXAS AND MORE FULLY DESCRIBED HEREIN BY *EXHIBIT 'A'* AND DEPICTED HEREIN BY *EXHIBIT 'B'*; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City has received a request by the applicant Bill Bricker on behalf of the owner, Columbia Development Company, LLC, for the approval of a zoning change from a Light Industrial (LI) District to a Planned Development District for the purpose of establishing commercial/retail, light industrial, and townhome land uses on a 16.26-acre tract of land identified as Lot 1, Block 1, Indalloy Addition and Tract 31 of the R. Ballard Survey, Abstract No. 29, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, addressed as 1100 & 1300 E. Washington Street and more fully described in *Exhibit 'A'* and depicted in *Exhibit 'B'* of this ordinance, which hereinafter shall be referred to as the *Subject Property* and incorporated by reference herein; and

WHEREAS, the Planning and Zoning Commission of the City of Rockwall and the governing body of the City of Rockwall in compliance with the laws of the State of Texas and the ordinances of the City of Rockwall have given the requisite notices by publication and otherwise, and have held public hearings and afforded a full and fair hearing to all property owners generally and to all persons interested in and situated in the affected area, and in the vicinity thereof, and the governing body in the exercise of its legislative discretion, has concluded that the Unified Development Code [*Ordinance No. 04-38*] should be amended as follows:

NOW, THEREFORE, **BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:**

SECTION 1. That the *Subject Property* shall be used only in the manner and for the purposes authorized by this Planned Development District Ordinance and the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future;

SECTION 2. That development of the *Subject Property* shall be in accordance with the *Planned Development Concept Plan*, contained in *Exhibit 'D'* of this ordinance, attached hereto and incorporated herein by reference as *Exhibit 'D'*, which is deemed hereby to be a condition of approval of the amended zoning classification for the *Subject Property*;

SECTION 3. That development of the *Subject Property* shall be in accordance with the *Development Standards*, described in *Exhibit 'E'* of this ordinance, attached hereto and incorporated herein by reference as *Exhibit 'E'*, which is deemed hereby to be a condition of approval of the amended zoning classification for the *Subject Property*;

SECTION 4. That a preliminary plat for the entire *Subject Property -- as depicted in Exhibits 'C' & 'D' of this ordinance* -- shall be submitted prior to any other submittal for any portion of the *Subject Property*.

DRAFT ORDINANCE 09.04.18

SECTION 5. That development of *Tract 1* of the *Subject Property -- as depicted in Exhibits 'C' & 'D' of this ordinance* -- shall be in conformance with the schedule listed below (*except as set forth below with regard to simultaneous processing and approvals*).

(a) The procedures set forth in the City's subdivision regulations on the date this ordinance is approved by the City, as amended by this ordinance [*including Subsections 5(b) through 5(d) below*], shall be the exclusive procedures applicable to the subdivision and platting of *Tract 1* as depicted in *Exhibits 'C' & 'D'* of this ordinance.

(b) The following plans and plats shall be required in the order listed below (*except as set forth below with regard to simultaneous processing and approvals*). If required, the City Council shall act on an application for an *Open Space Master Plan* in accordance with the time period specified in *Section 212.009* of the *Texas Local Government Code*.

(1) PD Site Plan
(2) Final Plat

(c) *PD Site Plan.* A *PD Site Plan* covering all of *Tract 1* as depicted in *Exhibit 'B'* of this ordinance shall be submitted and shall identify all site/landscape/hardscape plan(s) for all open space, neighborhood parks, trail systems, street buffers and entry features. A *PD Site Plan* application may be processed by the City concurrently with a *Final Plat Application* after engineering approval.

(d) *Final Plat.* Prior to the issuance of any building permits, a *Final Plat*, for all of *Tract 1* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be submitted for approval.

SECTION 6. That development of *Tracts 2, 3, 4 & 5* of the *Subject Property -- as depicted in Exhibits 'C' & 'D' of this ordinance* -- shall be in conformance with the procedures set forth in the Unified Development Code [*Ordinance No. 04-38*];

SECTION 7. That any person, firm, or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a penalty of fine not to exceed the sum of *Two Thousand Dollars* (*$2,000.00*) for each offense and each and every day such offense shall continue shall be deemed to constitute a separate offense;

SECTION 8. That if any section, paragraph, or provision of this ordinance or the application of that section, paragraph, or provision to any person, firm, corporation or situation is for any reason judged invalid, the adjudication shall not affect any other section, paragraph, or provision of this ordinance or the application of any other section, paragraph or provision to any other person, firm, corporation or situation, nor shall adjudication affect any other section, paragraph, or provision of the Unified Development Code, and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions for this ordinance are declared to be severable;

SECTION 9. The standards in this ordinance shall control in the event of a conflict between this ordinance and any provision of the Unified Development Code or any provision of the City Code, ordinance, resolution, rule, regulation, or procedure that provides a specific standard that is different from and inconsistent with this ordinance. References to zoning district regulations or other standards in the Unified Development Code (including references to the *Unified Development Code*), and references to overlay districts, in this ordinance or any of the Exhibits hereto are those in effect on the date this ordinance was passed and approved by the City Council of the City of Rockwall, Texas;

SECTION 10. That this ordinance shall take effect immediately from and after its passage;

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 4TH DAY OF SEPTEMBER, 2018.

DRAFT ORDINANCE 08-21-2018

Jim Pruitt, *Mayor*

ATTEST:

Kristy Cole, *City Secretary*

APPROVED AS TO FORM:

Frank J. Garza, *City Attorney*

1st Reading: *September 4, 2018*

2nd Reading: *September 17, 2018*

DRAFT ORDINANCE 09.04.2018

Exhibit 'A':
Legal Description

All that certain lot, tract or parcel of land situated in the *R. BALLARD SURVEY, ABSTRACT NO. 29*, City of Rockwall, Rockwall County, Texas, and being a part of Lot 1, Block 1, *INDALLOY ADDITION*, an Addition to the City of Rockwall, Texas, according to the Plat thereof recorded in Cabinet D, Slide 273 of the Plat Records of Rockwall County, Texas, and also being a part of a 98.319 acres tract of land as described in a Warranty deed from Alumax Aluminum Corporation to Columbia Extrusion Corporation, dated December 22, 1988 and being recorded in Volume 444, Page 102 of the Real Property Records of Rockwall County, Texas, and being more particularly described as follows:

BEGINNING at a 1/2" iron rod found for corner at the northeast corner of said Lot 1, Block 1, said point being in the south right-of-way line of E. Washington Street;

THENCE S. 06 deg. 42 min. 50 sec. E. along the east boundary line of Lot 1,a distance of 718.54 feet to a 1/2" iron rod found for corner;

THENCE N. 85 deg. 37 min. 16 sec. W .a distance of 435 .64 feet to a 1/2" iron rod found for corner on the West boundary line of said Lot 1, Block 1;

THENCE N. 83 deg. 23 min. 14 sec. W. a distance of 274.94 feet to a 1/2" iron rod found for corner;

THENCE S. 81 deg. 27 min. 00 sec. W. a distance of 408.12 feet to a Y," iron rod found for corner in the east boundary line of *PARK PLACE WEST II*, according to the Amended plat thereof recorded in Cabinet G, Slide 100, of the Plat Records of Rockwall County, Texas;

THENCE N. 04 deg. 52 min. 54 sec. W. along said addition, a distance of 106.88 feet to a W' iron rod found for corner;

THENCE N. 07 deg. 20 min. 27 sec. E. along said addition, a distance of 603.20 feet to a W' iron rod found for corner in the south line of E. Washington Street;

THENCE N. 89 deg. 51 min. 05 sec. E. along the south line of said street, a distance of 513.76 feet to a P-K nail found for corner at the northwest corner of said Lot 1, Block 1;

THENCE N. 89 deg. 34 min. 40 sec. E. along the south line of said street and north line of said Lot 1, a distance of 445.34 feet to the *POINT OF BEGINNING* and containing 16.26 acres of land.

Exhibit 'E':
PD Development Standards

Tracts 1-5 (16.26-Acres): Development Standards for all Tracts

(1) *Landscaping Standards.*

(i) *Landscape Requirements.* Landscaping shall be reviewed and approved with a *PD Site Plan*. All *Canopy/Shade Trees* planted within this development shall be a minimum of three (3) caliper inches in size and all *Accent/Ornamental/Under-Story Trees* shall be a minimum of four (4) feet in total height.

(ii) *Landscape Buffers (Streets A, B, & C).* A minimum of a ten (10) foot landscape buffer shall be provided along the frontage of *Streets A, B & C* as depicted in *Exhibit 'D'* of this ordinance, and shall incorporate a minimum of one (1) canopy tree per 50-feet of linear frontage unless otherwise specified in this ordinance.

(iii) *Landscape Buffer and Sidewalks (E. Washington Street)*. A minimum of a 20-foot landscape buffer shall be provided along E. Washington Street (*outside of and beyond any required right-of-way dedication*), and shall incorporate ground cover, a *built-up* berm and/or shrubbery or a combination thereof along the entire length of the frontage. Berms and/or shrubbery shall have a minimum height of 30-inches and a maximum height of 48-inches. In addition, two (2) canopy trees shall be planted per 100-feet of linear frontage.

(iv) *Landscape Buffer (Adjacent to Residential).* A minimum of a 20-foot landscape buffer shall be provided along the western boundary of *Tracts 2 & 4* (*i.e. areas adjacent to residential land uses*). The landscape buffer shall incorporate a combination of shrubbery and ground cover along the entire length of the adjacency for the purpose of screening the commercial areas from the residential areas without using a physical barrier. In addition, the landscape buffer shall incorporate canopy trees planted on 20-foot centers along the entire length of the adjacency. *Tract 4* shall also incorporate a minimum of a six (6) foot wrought iron fence in the required landscape buffer.

(v) *Irrigation Requirements.* Irrigation shall be installed for all required landscaping. Irrigation installed in these areas shall be designed by a Texas licensed irrigator or landscape architect.

(2) *Washington Street.* The applicant shall be proportionally responsible for upgrading E. Washington Street to a M4U (*major collector, four [4] lane, undivided roadway*) where adjacent to the *Subject Property*.

(3) *Buried Utilities.* New transmission and distribution power-lines required to serve the *Subject Property* shall be placed underground, whether such lines are located internally or along the perimeter of the *Subject Property*, unless otherwise authorized by the City Council. The *Developer* shall not be required to re-locate existing overhead power-lines along the perimeter of the *Subject Property* as long as these lines remain in their current pre-developed state. Temporary power-lines constructed across undeveloped portions of the *Subject Property* to facilitate development phasing and looping may be allowed above ground, but shall not be considered existing lines at the time the area is developed, and if they are to become permanent facilities, such lines shall be placed underground pursuant to this paragraph. Franchise utilities shall be placed within a ten (10) foot public utility easement behind the sidewalk, between the home and the property line.

(4) *Variances.* The variance procedures and standards for approval that are set forth in the Unified Development Code [*Ordinance No. 04-38*] shall apply to any application for variances to any provisions of this ordinance.

DRAFT ORDINANCE 09.04.18

Exhibit 'E':
PD Development Standards

Tract 1: Townhomes (2.02-Acres)

(1) *Permitted Uses.* Unless specifically provided by this Planned Development ordinance, *Tract 1* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the land uses permitted for the Single Family 10 (SF-10) District as stipulated by the *Permissible Use Charts* contained in Article IV, *Permissible Uses*, of the Unified Development Code (UDC) [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future; however, the following conditions shall apply:

The following land uses shall be permitted on the *Tract 1* in addition to the land uses permitted in the Single Family 10 (SF-10) District:

☑ Townhomes

However, the following land uses shall be expressly prohibited on *Tract 1*:

☑ Accessory Building
☑ Guest Quarters/Secondary Living Unit
☑ Portable Buildings
☑ Church/House of Worship
☑ Day Care
☑ Private or Public School
☑ Railroad Yard or Shop

(2) *Density and Dimensional Requirements.* Unless specifically provided by this Planned Development ordinance, *Tract 1* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the development standards for the Single Family 10 (SF-10) District as stipulated by Article V, *District Development Standards*, of the Unified Development Code [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future. The maximum permissible density for the *Subject Property* shall not exceed *5.94* dwelling units per gross acre of land; however, in no case should the proposed development exceed *12* dwelling units. All lots shall conform to the standards depicted in *Table 2*, which are as follows:

Table 2: Lot Dimensional Requirements

Minimum Lot Width [1]	28'
Minimum Lot Depth	115'
Minimum Lot Area	3,000 SF
Minimum Front Yard Setback [2] & [4]	20'
Minimum Side Yard Setback	0'
Minimum Distance Between Buildings	10'
Minimum Length of Driveway Pavement	20'
Maximum Height [3]	36'
Minimum Rear Yard Setback [4]	10'
Minimum Area/Dwelling Unit (SF) [Air Conditioned Space]	1,400 SF
Garage Orientation	*Rear Entry*
Maximum Number of Attached Units Per Buildings	5 Units
Maximum Lot Coverage	75%

General Notes:
[1]: The minimum lot width shall be measured at the *Front Yard Building Setback*.
[2]: The location of the *Front Yard Building Setback* as measured from the front property line.
[3]: The *Maximum Height* shall be measured to the eave or top plate (*whichever is greater*) of the single-family home.
[4]: Porches, stoops, bay windows, balconies, eaves and similar architectural features may encroach beyond the *Front* and *Rear Yard Building Setbacks* by up to five (5) feet for any property; however, the encroachment shall not exceed three (3) feet on *Side Yard Setbacks* where appropriate for such use and shall not encroach into public right-of-way.

DRAFT ORDINANCE 09.04.2018

(3) *Garage Orientation.* All garages are required to be rear entry and shall generally conform to the Concept Plan depicted in *Exhibit 'D'* of this ordinance (*i.e. the Townhomes will front towards the Park Place Subdivision*).

(4) *Building Standards.* The building elevations shall generally conform to the *Conceptual Building Elevations* depicted in *Exhibit 'F'* of this ordinance; however, all development shall adhere to the following building standards:

(i) *Masonry Requirements.* The minimum masonry requirement for the exterior façades of all buildings shall be 90%. For the purposes of this ordinance, the masonry requirement shall be limited to full width brick, natural stone, and cast stone. Cementaceous fiberboard horizontal lap-siding (*e.g. HardiBoard or Hardy Plank*) and/or similar cementaceous products may be used for up to *100%* of the exterior of the building pending conformance with the anti-monotony restrictions outlined in this ordinance. Stucco (*i.e. three [3] part stucco or similar*) shall be prohibited.

(ii) *Roof Design Requirements.* All buildings shall be designed such that no roof mounted mechanical equipment (*i.e. HVAC, satellite, vents, etc.*) shall be visible from any direction. *Note: Screening of mechanical equipment is necessary for all equipment regardless of location (i.e. roof mounted, ground mounted, or otherwise attached to the building and/or located on the site).*

(iii) *Architectural Requirements.* All units shall be architecturally finished on all sides of the building that are visible from a public right-of-way or open space with the same materials, detailing and features.

(5) *Anti-Monotony Restrictions.* The development shall generally conform to development scheme portrayed in the *Conceptual Building Elevations* depicted in *Exhibit 'F'* of this ordinance; however, all development shall adhere to the following anti-monotony restrictions:

(i) Identical brick blends and paint colors may not occur on adjacent (*i.e. side-by-side*) properties within the development without at least two (2) intervening townhomes of differing materials on the same side of the adjacent townhome beginning with the adjacent property.

(ii) Front building elevations shall not repeat along any block face without at least two (2) intervening homes of differing appearance on the same block face within the development.

(iii) The rear elevation of the homes, backing to the public right-of-way (*i.e. Street A*), shall not repeat without at least two (2) (*i.e. side-by-side*) intervening homes of differing appearance. Homes are considered to have a differing appearance if any of the following two (2) items deviate:

a) Front Encroachment (*i.e. Porch and/or Sunroom*) Type and Layout
b) Roof Type and Layout
c) Articulation of the Front Façade
d) Differing Primary Exterior Materials

(6) *Sidewalks.* The sidewalk adjacent to *Road 'A'* as depicted in *Exhibit 'D'* of this ordinance shall be constructed adjacent to the roadway with the exception of the area directly adjacent to the townhomes. In this area the sidewalk may be deviated to run in between the western property line of the *Subject Property* and the front facades of the townhomes. Where the sidewalk is on private property it shall be in a *pedestrian access easement.*

DRAFT ORDINANCE 09.04.2018

(7) *Fence Standards.* All fences shall be required to be wrought iron or a tubular steel fence. Wrought iron/tubular steel fences shall be a minimum of four (4) feet in height; however, may not exceed a maximum of eight (8) feet in height.

(8) *Homeowner's Association (HOA).* A Homeowner's Association shall be created to enforce the restrictions established in accordance with the requirements of *Section 38-15* of the *Subdivision Regulations* contained within the *Municipal Code of Ordinances* of the City of Rockwall. As an alternative -- *and pending the approval of an adjacent HOA* --, this property can be incorporated into an existing HOA. The HOA shall also maintain all neighborhood parks, open space and common areas, irrigation, landscaping, screening fences and the private roadway, drive aisles and drive approaches for the subject property associated with this development.

Tracts 2 & 3: Commercial/Retail (6.57-Acres)

(1) *Permitted Uses.* Unless specifically provided by this Planned Development ordinance, *Tracts 2 & 3* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the land uses permitted for the General (GR) District as stipulated by the *Permissible Use Charts* contained in Article IV, *Permissible Uses*, of the Unified Development Code (UDC) [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future; however, the following conditions shall apply:

The following land uses shall be expressly prohibited on *Tracts 2 & 3*:

- ☑ Convent or Monastery
- ☑ Hotel or Motel
- ☑ Residence Hotel
- ☑ Cemetery/Mausoleum
- ☑ Church/House of Worship
- ☑ Convalescent Care Facility/Nursing Home
- ☑ Emergency Ambulance Services (*Ground*)
- ☑ Hospital
- ☑ Mortuary or Funeral Chapel
- ☑ Social Service Provider
- ☑ Billiard Parlor or Pool Hall
- ☑ Carnival, Circus, or Amusement Ride
- ☑ Commercial Amusement/Recreation (*Outside*)
- ☑ Golf Driving Range
- ☑ Astrologer, Hypnotist, or Psychic Art and Science
- ☑ Night Club, Discotheque, or Dance Hall
- ☑ Secondhand Dealer
- ☑ Auto Repair Garage (*Minor*)
- ☑ Car Wash/Auto Detail
- ☑ Car Wash (*Self Service*)
- ☑ Retail Store with Gasoline Product Sales (*Any Amount of Dispensers*)
- ☑ Service Station
- ☑ Mining and Extraction (*Sand, Gravel, Oil & Other*)
- ☑ Helipad
- ☑ Railroad Yard or Shop
- ☑ Transit Passenger Facility

(2) *Density and Dimensional Requirements.* Any development on *Tracts 2 & 3* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the development standards required for properties in a General Retail (GR) District as stipulated by Article V, *District Development Standards*, of the Unified Development Code [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future.

DRAFT 09.04.2018

Tracts 4 & 5: Light Industrial (7.67-Acres)

(1) *Permitted Uses.* Unless specifically provided by this Planned Development ordinance, *Tracts 4 & 5* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the land uses permitted for the Light Industrial (LI) District as stipulated by the *Permissible Use Charts* contained in Article IV, *Permissible Uses*, of the Unified Development Code (UDC) [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future; however, the following conditions shall apply:

The following land uses shall be expressly prohibited on the *Tracts 4 & 5*:

- ☑ Animal Shelter
- ☑ Hotel or Motel
- ☑ Residence Hotel
- ☑ Cemetery/Mausoleum
- ☑ Church/House of Worship
- ☑ Crematorium (*Stand Alone*)
- ☑ Emergency Ambulance Services (*Ground*)
- ☑ Mortuary or Funeral Chapel
- ☑ Prison/Custodial Institution
- ☑ Rescue Mission or Shelter for the Homeless
- ☑ Social Service Provider
- ☑ Billiard Parlor or Pool Hall
- ☑ Carnival, Circus, or Amusement Ride
- ☑ Commercial Amusement/Recreation (*Outside*)
- ☑ Golf Driving Range
- ☑ Private Sports Arena, Stadium or Track
- ☑ Night Club, Discotheque, or Dance Hall
- ☑ Secondhand Dealer
- ☑ Car Wash (*Self Service*)
- ☑ Building & Landscape Material with Outside Storage
- ☑ Building & Landscape Material with Limited Outside Storage
- ☑ Building Maintenance, Service & Sales with Outside Storage
- ☑ Commercial Cleaners
- ☑ Food Processing
- ☑ Heavy Machinery & Equipment (Rental, Sales & Service)
- ☑ Motor Vehicle Dealership (*New or Used*)
- ☑ Recreation Vehicle Sales
- ☑ Service Station
- ☑ Towing & Impound Yard
- ☑ Truck Rental
- ☑ Truck Stop with Fuel and Accessory Services
- ☑ Asphalt or Concrete Batch Plant
- ☑ Environmentally Hazardous Materials
- ☑ Food Processing (*No Slaughtering*)
- ☑ Heavy Manufacturing
- ☑ Metal Plating/Electro Plating
- ☑ Mining and Extraction (*Sand, Gravel, Oil & Other*)
- ☑ Salvage or Reclamation of Products (*Indoors or Outdoors*)
- ☑ Heavy Construction Trade Yard
- ☑ Outside Storage and/or Outside Display
- ☑ Bus Charter Service & Service Facility
- ☑ Airport, Heliport or Landing Field
- ☑ Railroad Yard or Shop
- ☑ Transit Passenger Facility

DRAFT ORDINANCE 09.04.2018

The following land uses shall be permitted by Specific Use Permit (SUP) on the *Tracts 4 & 5*:

- ☑ Auto Repair Garage (*Minor*)
- ☑ Auto Repair Garage (*Major*)
- ☑ Mini-Warehouse

(2) *Density and Dimensional Requirements.* Any development on *Tracts 4 & 5* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the development standards required for properties in a Light Industrial (LI) District as stipulated by Article V, *District Development Standards*, of the Unified Development Code [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future.

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: Mayor and City Council

CC: Rick Crowley, *City Manager*
Brad Griggs, *Assistant City Manager*

FROM: Ryan Miller, *Director of Planning and Zoning*

DATE: October 15, 2018

SUBJECT: *Z2018-042; Amendment to Various Articles of the UDC*

On October 9, 2018, the Planning and Zoning Commission continued the public hearing on the proposed text amendment to the ***October 30, 2018*** Planning and Zoning Commission work session meeting. This motion was the result of a request from staff to have an additional two (2) weeks to review the text amendment to ensure that, due to the magnitude of the proposed changes, no other sections of the Unified Development Code (UDC) would be affected. This means that the anticipated City Council public hearing date will be ***November 5, 2018***.

According to Section 6.2, *Public Hearing Postponements, Recess, and Continuations*, of the Article II, *Authority and Administrative Procedures*, of the Unified Development Code (UDC), a public hearing may be postponed by announcing the postponement at the public hearing and indicating the time and place the new public hearing is scheduled to begin. The announcement of a postponement shall be sufficient notice and no additional notice shall be required.

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: Mayor and City Council

CC: Rick Crowley, *City Manager*
Brad Griggs, *Assistant City Manager*
Ryan Miller, *Director of Planning and Zoning*

FROM: David Gonzales, *Senior Planner*

DATE: October 15, 2018

SUBJECT: Z2018-043: SUP Amendment for *Rockwall Honda*

At their regularly scheduled meeting on October 9, 2018, the Planning and Zoning Commission approved a motion to continue the public hearing for *Case No. Z2018-043* to the *October 30, 2018* meeting. The motion was approved by a vote of 6-0, with Commissioner Fishman absent. The purpose of this motion was to allow the applicant time to address issues raised by the Planning and Zoning Commission and staff concerning the landscape buffer along IH-30. This means that the projected City Council public hearing will be held at the *November 5, 2018* meeting. According to Section 6.2, *Public Hearing Postponements, Recess, and Continuations*, of the Article II of the Unified Development Code, a public hearing may be postponed by announcing the postponement at the public hearing by stating the time and place the new public hearing is scheduled to begin. The announcement of a postponement shall be sufficient notice and no additional notice shall be required.

CITY OF ROCKWALL
CITY COUNCIL MEMO

AGENDA DATE: 10/15/2018

APPLICANT: Debora Allegranti; *CBOCS Texas, LLC*

AGENDA ITEM: **SP2018-028**; Cracker Barrel

SUMMARY:

Discuss and consider a request by Debora Allegranti of CBOCS Texas, LLC on behalf of Eric Borkenhagen of Kohls Illinois, Inc. for the approval of variances to the articulation and materials requirements in conjunction with an approved site plan for a restaurant on a 1.61-acre portion of a larger 9.0142-acre parcel of land identified as Lot 1, Block A, Rockwall Market Center East Addition, City of Rockwall, Rockwall County, Texas, zoned Commercial (C) District, situated within the IH-30 Overlay (IH-30 OV) District, situated west of the intersection of Mims Road and the frontage road for E. IH-30, and take any action necessary.

PURPOSE:

The applicant is requesting approval of variances in conjunction with an approved site plan for a restaurant (*i.e. Cracker Barrel)* on the subject property. The proposed restaurant will be situated on a 1.62-acre portion of a larger 9.0142-acre parcel of land (*i.e. a portion of Lot 1, Block A, Rockwall Market Center East Addition*) that is currently occupied by an existing department store (*i.e. Kohls)*. The subject property is zoned Commercial (C) District and situated within the IH-30 Overlay (IH-30 OV) District.

The subject property is an existing parking lot that will be demolished in order to construct the proposed restaurant. Additionally, there is off-site signage that will need to be demolished in order to develop the property. By developing this portion of the subject property as shown in the site plan, the parking lot for the existing department store will be reduced; however, both the department store and the restaurant will meet the parking requirements stipulated by the Unified Development Code.

VARIANCES:

The applicant is requesting the following variances to the IH-30 Overlay (IH-30 OV) District standards. Staff should note, the IH-30 Overlay (IH-30 OV) District standards allows variances to by granted on a case-by-case basis to allow for corporate identity conflicts with the building design. These variances require a ¾ majority vote of the City Council members present to be passed.

A) *Four (4)-Sided Architecture*

a. *Horizontal Articulation*. Subsection 4.1.C, *Building Articulation*, of Section 4, *Commercial District Standards,* of Article V, *District Development Standards*, of the Unified Development Code (UDC) states that no building wall shall extend for a distance equal to three (3) times the wall's height without having an offset of 25% of the wall's height, and that new plane shall extend for a distance equal to at least 25% of the maximum length of the first plane. In this case, the offsets should be five (5)-feet, however, the applicant is providing two (2)-foot offsets on the northeast, southwest, and southeast elevations.

Additionally, the applicant is not providing any horizontal articulation on the northwest elevation (*i.e. front elevation*). The proposed restaurant does have a front porch that extends the length of the building that provides some relief in the wall plane.

b. *Vertical Articulation*. Subsection 4.1.C, *Building Articulation*, of Section 4, *Commercial District Standards*, of Article V, *District Development Standards*, of the Unified Development Code (UDC) states that no horizontal wall shall extend for a distance greater than three (3) times the height of the wall without a change in height by a minimum of 25% (*i.e. five (5) feet*) of the wall's height. In this case, the change in height for the front façade is 3 ½-feet (*i.e. 1 ½-feet shorter than the requirement*).

B) *Masonry Requirements.* Subsection C.1, *Architectural Standards*, of Section 6.6, *IH-30 Overlay (IH-30 OV) District Development* of Article V, *District Development Standards*, of the Unified Development Code (UDC) states that each façade shall be limited to 50% cementitious materials. In this case, the applicant is proposing to utilize between 63% to 80% cementitious material (*i.e. hardie board*) on the building façades.

ARCHITECTURAL REVIEW BOARD

On September 25, 2018 the Architectural Review Board (ARB) reviewed the proposed building elevations and requested more vertical and horizontal articulation, to utilize natural stone in-lieu of cultured stone, and to increase the amount of stone on each façade. The applicant has submitted revised building elevations and the Architectural Review Board (ARB) will review the revised building elevations and forward a recommendation to the Planning and Zoning Commission at the October 9, 2018 meeting.

On October 9, 2018, the Architectural Review Board (ARB) reviewed the revised elevations and approved a motion to recommend approval of the revised building elevations by a vote of 6-0, with Board Member Meyrat absent.

RECOMMENDATIONS:

If the City Council chooses to approve the applicant's request then staff would recommend the following conditions of approval:

1) All comments provided by the Planning, Engineering and Fire Department must be addressed prior to the submittal of a building permit;

2) All offsite signage must be removed prior to issuance of Certificate of Occupancy.

3) Any construction or building necessary to complete this *Site Plan* request must conform to the requirements set forth by the UDC, International Building Code, the Rockwall Municipal Code of Ordinances, city adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION:

On October 9, 2018, the Planning and Zoning Commission's motion to approve the applicant's request passed by a vote of 6-0, with Commissioner Fishman absent.

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: Mayor and City Council

CC: Rick Crowley, *City Manager*
Brad Griggs, *Assistant City Manager*
Mary Smith, *Assistant City Manager*

FROM: Ryan Miller, *Director of Planning and Zoning*

DATE: October 15, 2018

SUBJECT: Comprehensive Plan Update

At the October 8, 2018 joint City Council/Planning and Zoning Commission/Comprehensive Plan Advisory Committee meeting, the City Council indicated that the Comprehensive Plan Update was ready to move forward through the approval process. This item is intended to give the City Council the option of officially directing staff to proceed with the update of the Comprehensive Plan. Should the City Council choose to direct staff to bring the *OURHometown Vision 2040 Comprehensive Plan* forward for adoption, staff has put together the following schedule for all required work sessions, public hearings and the final adoption of the document:

Work Session with the Planning and Zoning Commission:	October 30, 2018
Open House Meeting for the General Public:	November 12, 2018
Planning and Zoning Commission Public Hearing:	November 13, 2018
City Council Public Hearing and First Reading of the Ordinance:	November 19, 2018
City Council Second Reading of the Ordinance:	December 3, 2018

If the City Council has any questions concerning this process staff will be available at the *October 15, 2018* City Council meeting.

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: Mayor and City Council

CC: Rick Crowley, *City Manager*
Brad Griggs, *Assistant City Manager*
Amy Williams, *Director of Public Works/City Engineer*

FROM: Ryan Miller, *Director of Planning and Zoning*

DATE: October 15, 2018

SUBJECT: Policy for Requiring Traffic Impact Analysis (TIA) with Zoning Applications

At the last City Council meeting on October 1, 2018, the City Council directed staff to prepare a policy regarding when a Traffic Impact Analysis (TIA) would be required in conjunction with a zoning application. Based on the discussion at this meeting, staff proposes requiring a TIA when [*1*] a proposed Planned Development District is 25-acres or greater, or [*2*] when a proposed zoning change necessitates a change in the Future Land Use Map that is considered to be more intense than the current designation (*e.g. a change from a Low Density Residential designation to a Medium Density Residential designation*). This is similar to the criteria that staff is currently using to require infrastructure studies concurrently with zoning applications.

With this policy, the City Council will need to provide direction with regard to how the TIA is prepared and when the applicant will initiate the study. Staff has identified the following possibilities that were mentioned in the meeting on October 1, 2018:

(1) An engineer that is chosen by the City could prepare the TIA. This is similar to how the City's infrastructure studies are currently being prepared, and would involve the developer paying a minimum retainer to initiate the study. Staff should point out that this could present challenges with regard to the required timing of zoning cases (*i.e. timing associated with public hearings mandated by state and local requirements*), and would require the applicant to initiate the study prior to submitting a zoning application. Staff should also note that any application submitted for this type of study prior to a zoning application would have the same vesting effect as a zoning application.

(2) The City could require a developer to submit a TIA with the submittal of a zoning application. An engineer that is chosen by the City would then need to review the TIA to ensure that the study is valid and meets the City's requirements. This would require a fee -- *estimated to be between $500.00 - $1,000.00* -- be submitted along with the zoning application and application fees to cover the cost of the review. These standards would be reviewed against the City's current requirements (*which are the same standards as TXDOT's TIA standards*) for a TIA. Staff should note that the City's standards are currently being revised by the Engineering Department and could become more restrictive than TXDOT's standards in the future. These standards will come before the City Council for consideration at a later date.

Pending direction from the City Council, staff would be able to implement this policy within the next zoning application submittal deadline (*i.e. November 16, 2018*). Should the City Council have any questions staff will be available at the meeting on October 15, 2018 to discuss.

XV. RECONVENE PUBLIC MEETING & TAKE ANY ACTION AS RESULT OF EXECUTIVE SESSION

XVI. ADJOURNMENT

This facility is wheelchair accessible and accessible parking spaces are available. Request for accommodations or interpretive services must be made 48 hours prior to this meeting. Please contact the City Secretary's Office at (972) 771-7700 or FAX (972) 771-7727 for further information.

The City of Rockwall City Council reserves the right to adjourn into executive session at any time to discuss any of the matters listed on the agenda above, as authorized by Texas Government Code § 551.071 (Consultation with Attorney) § 551.072 (Deliberations about Real Property) § 551.074 (Personnel Matters) and § 551.087 (Economic Development)

I, Kristy Cole, City Secretary for the City of Rockwall, Texas, do hereby certify that this Agenda was posted at City Hall, in a place readily accessible to the general public at all times, on the 2nd day of November, 2018 at 4:00 p.m. and remained so posted for at least 72 continuous hours preceding the scheduled time of said meeting.

_____ _____

Kristy Cole, City Secretary Date Removed

Rockwall, Texas

Proclamation

Whereas, the Texas Amateur Athletic Federation (T.A.A.F) is an organization that provides Amateur Athletics for athletes between the ages of 6u-18U, allowing them the opportunity to compete with athletes on a statewide basis, rather than just locally; and

Whereas, Keviah Ealy, a Rockwall High School freshman, is a member of the Rockwall Mustangs, which is one of two Track Clubs under the umbrella of the City of Rockwall; and

Whereas, this past July, the Texas Amateur Athletic Federation held its annual "Summer Games of Texas" in College Station; and

Whereas, after having excelled in the Region 7 competition, Keviah proudly progressed on to represent Rockwall at the T.A.A.F Summer Games; and

Whereas, Keviah's accomplishments at the state competition were quite notable in that she competed against 40 other Long Jumpers from across the state and set a new state record for her age division; and

Whereas, the results of her efforts included placing First in the Long Jump competition and Third in the 200 Meter Run; and

Whereas, it was her Long Jump that set the new state record, coming in at a distance of 18-05.00ft, or 5.61m.

Now, Therefore, I, Jim Pruitt, Mayor of the City of Rockwall, Texas, do hereby proclaim **November 5, 2018** as

Keviah Ealy Recognition Day

in the City of Rockwall and encourage all citizens to celebrate and applaud this young lady for her noteworthy accomplishments and for representing our City so very well.

In Witness Whereof, I hereunto set my hand and official seal this 5th day of November, 2018.

Jim Pruitt, Mayor

12

Rockwall, Texas

Proclamation

Whereas, the science of Geographic Information Systems (GIS) connects people, regions, and systems; and

Whereas, geography is a common language that strengthens decision-making for governments, communities, NGOs, and businesses all over the world; and

Whereas, promoting GIS education provides opportunities for people to create positive change at the local and global scale;

Whereas, GIS plays a crucial role in managing our natural resources; and

Whereas, GIS helps people collaborate and share knowledge so the systems we rely on work each day; and

Whereas, having a dedicated day of GIS activities for students, citizens, and government leaders demonstrates the benefits of GIS in a unique and concentrated way.

Now, Therefore, I, Jim Pruitt, Mayor of the City of Rockwall, Texas, do hereby proclaim **November 14, 2018** as:

GIS day

In the City of Rockwall and urge all citizens, students and interested parties to come out and enjoy the City of Rockwall's 5th Annual GIS Day Event, which will be held in the City Council Chambers at City Hall from 11:00 AM to 4:00 PM on November 14, 2018.

In Witness Whereof, I hereby affix my official hand and seal this 5th day of November, 2018.

Jim Pruitt, Mayor

MINUTES
ROCKWALL CITY COUNCIL
Monday, October 15, 2018
4:00 p.m. Regular City Council Meeting
City Hall, 385 S. Goliad, Rockwall, Texas 75087

I. CALL PUBLIC MEETING TO ORDER

Mayor Pruitt called the public meeting to order at 4:01 p.m. Present were Mayor Jim Pruitt, Mayor Pro Tem Kevin Fowler, and Council Members Patrick Trowbridge, Dana Macalik, John Hohenshelt, Bennie Daniels and Trace Johannesen. Also present were City Manager Rick Crowley, Assistant City Managers Mary Smith and Brad Griggs, and City Attorney Frank Garza.

II. EXECUTIVE SESSION.

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding possible sale or lease of real property / land in the vicinity of County Line Road pursuant to Section §551.072 (Real Property).
2. Discussion regarding potential litigation associated with Breezy Hill Road pursuant to Section §551.071 (Consultation with Attorney).
3. Discussion regarding (re)appointment of municipal court judge and associate judge, pursuant to Section 551.074 (Personnel Matters)
4. Discussion regarding restaurant permitting and inspections pursuant to §551.071 (Consultation with Attorney).
5. Discussion regarding management personnel and organization pursuant to §551.071 (Consultation with Attorney).
6. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney).

III. ADJOURN EXECUTIVE SESSION

Executive Session adjourned at 4:55 p.m.

IV. RECONVENE PUBLIC MEETING

Mayor Pruitt reconvened the public meeting at 6:00 p.m. with all seven council members being present.

Mayor Pruitt then acknowledged eleven guests who are current members of the city's Youth Advisory Council (YAC). He had each one introduce him/herself, including what grade they are in currently and what school they attend.

V. TAKE ANY ACTION AS A RESULT OF EXECUTIVE SESSION

Mayor Pro Tem Fowler moved to authorize the purchase of parcels 1a and 1b for the County Line Road project. Councilmember Hohenshelt seconded the motion, which passed by a vote of 7 ayes with 0 absent.

VI. INVOCATION AND PLEDGE OF ALLEGIANCE – MAYOR PRO TEM FOWLER

Mayor Pro Tem Fowler delivered the invocation and led the Pledge of Allegiance.

VII. PROCLAMATIONS / AWARDS

1. Breast Cancer Awareness Month

Mayor Pruitt read the proclamation for Breast Cancer Awareness Month.

2. Community Planning Month

Mayor Pruitt called forth members of the city's (ad hoc) Comprehensive Plan Advisory Committee, including Jerry Welch, Bob Wacker and Johnny Lyons (also P&Z Chairman). He then read and presented them with this proclamation.

3. Chamber of Commerce Week

Mayor Pruitt called forth representatives of the Rockwall Area Chamber of Commerce. After brief introductions, he then read and presented them with this proclamation.

4. T.A.A.F. Region 7 Athlete of the Year (Keviah Ealy Recognition Day)

Mayor Pruitt indicated that this proclamation will be delayed until next month at the request of this family.

VIII. OPEN FORUM

Mayor Pruitt explained how Open Forum is conducted and asked if anyone would like to come forth and speak at this time. There being no one indicating such, he then closed Open Forum.

IX. CONSENT AGENDA

1. Consider approval of the minutes from the October 1, 2018 regular city council meeting, and take any action necessary.
2. Consider approval of the minutes from the October 8, 2018 joint work session meeting with the City Council, Planning & Zoning Commission, and the Comprehensive Plan Advisory Committee, and take any action necessary.
3. Consider approval of professional engineering services contract for Cobb, Fendley & Associates, Inc. to perform the engineering design services and specifications for the Turtle Cove Blvd from Ridge Rd to Railroad Tracks and W. Yellow Jacket Lane from Ridge Road to Greencrest Boulevard Reconstruction Project in an amount not to exceed $196,718.50, to be paid for out of the 2018 Street Bond funds, and take any action necessary.

4. Consider approval of professional engineering services contract for Teague Nall and Perkins, Inc. to perform the engineering design services and specifications for the Alta Vista Drive from Lakeshore Drive to Westway Drive and West Street from Rusk Street to Highland Drive Reconstruction Project in an amount not to exceed $313,500.00, to be paid for out of the 2018 Street Bond funds and water wastewater funds, and take any action necessary.

5. Consider awarding multiple bids to Trade Contractors for the construction of a Pickle Ball Court at Myers Park and authorizing the City Manager to execute contracts totaling $125,000 including project contingency to be funded out of the Recreation Development Fund, and take any action necessary.

6. Consider approving a five-year contract with Axon Enterprise Inc. and authorizing the City Manager to execute the contract for Police Taser Replacement in the amount of $116,687 to be funded out of General Fund Reserves first year cost of $17,400, and take any action necessary.

7. Consider awarding bids to Caldwell Country Chevrolet and Grapevine Dodge and authorizing the City Manager to execute Purchase Orders for multiple vehicle purchases totaling $349,003 to be funded out of the General Fund Reserves ($304,785), Water and Sewer Fund ($21,345) and Seized Funds ($22,873), and take any action necessary.

8. Consider awarding a bid to Waukesha-Pearce Industries Inc. and authorizing the City Manager to execute a Contract for the purchase and install of fixed generators at three lift stations in the amount of $234,714.80 to be funded out of the Water and Sewer Fund, Sewer Operations Budget, and take any action necessary.

9. **P2018-029** - Consider a request by Derek Jones of Munson Partners, LLC for the approval of a replat for Lots 1 & 2, Block A, Jones Addition, being a 0.488-acre tract of land currently identified as Lot 47A of the BF Boydston Addition, City of Rockwall, Rockwall County, Texas, zoned Single Family 7 (SF-7) District, situated within the Old Town Rockwall (OTR) Historic District and the Historic Overlay (HOV) District, addressed as 201 S. Clark Street, and take any action necessary.

10. **P2018-033** - Consider a request by Matthew St. Marie of G&A Consultants, LLC on behalf of Spencer Byington of SWBC Rockwall, LP for the approval of a final plat for Lot 1, Block A, SWBC Rockwall Addition, Phase 1 being currently identified as a 21.280-acre tract of a larger 42.555-acre tract of land identified as Tract 1-4 of the J. M. Allen Survey, Abstract No. 2, City of Rockwall, Rockwall County, Texas, zoned Planned Development 83 (PD-83) District, situated within the SH-205 By-Pass Overlay (205 BY-OV) District, located east of the intersection of Discovery Boulevard and John King Boulevard, and take any action necessary.

Councilmember Trowbridge pulled item #9 for further discussion. Mayor Pruitt pulled item #10 for further discussion.

Councilmember Trowbridge moved to approve the entire Consent Agenda (except for item #9 and item #10). Councilmember Macalik seconded the motion, which passed by a vote of 7 ayes to 0 nays.

Regarding item #9, Councilmember Trowbridge asked for clarification about splitting this existing lot since it is considered a "highly contributing" structure within the city's "Historic District." Mr. Miller clarified that the existing structure will still retain said designation; however, the back portion will no longer be considered as such. Trowbridge asked if this property will interfere with the future realignment / expansion of SH-66. Mr. Miller indicated that it will not. Following brief, additional comments, Mayor Pro Tem Fowler moved to approve

Consent Agenda item #9 (P2018-029). Councilmember Daniels seconded the motion, which passed by a vote of 5 ayes to 2 nays (Macalik and Trowbridge).

Mayor Pruitt asked questions concerning Consent Agenda item #10. Mr. Miller shared hat the first phase will consist of 295 (apartment) units, and the second phase will have an additional 295 units. Mayor Pruitt believes that these additional 600 (approximately) units will result in additional traffic, so he is not in favor of it. Councilmember Hohenshelt moved to approve Consent Agenda item #10 (P2018-033). Mayor Pro Tem Fowler seconded the motion. Councilmember Johannesen clarified with Mr. Miller that this was approved for "multifamily" back in August of 2017. Councilmember Macalik asked if this reflects the same number of units as when the item was discussed back in August. Mr. Miller and Mayor Pruitt confirmed that it does reflect the same number of units. The motion to approve Consent Agenda item #10 (P2018-033) passed by a vote of 4 in favor with 3 against (Pruitt, Fowler and Daniels against).

X. APPOINTMENTS

1. Appointment with the Planning and Zoning Chairman to discuss and answer any questions regarding cases on the agenda and related issues and take any action necessary.

Planning & Zoning Commissioner Johnny Lyons came forth and briefed the Council on recommendations of the Commission relative to planning-related items on tonight's meeting agenda. Council took no action as a result of his briefing.

2. Appointment with County Elections Administrator, Christopher Lynch, to hear about the Precinct 1 polling location changing from Reinhardt Elementary School to the Rockwall Golf & Athletic Club Conference Center (2600 Champions Drive).

County Elections Administrator, Chris Lynch came forth and shared that Reinhardt Elementary has been torn down, and that was previously a location where residents were able to vote. In lieu of this location, voters who would have otherwise voted at Reinhardt will instead need to cast their ballot at the Rockwall Golf & Athletic Club (RGAC) Conference Room, which also commonly known as The Shores Country Club. Information about early and election day voting, including times and locations may be found on the County Election Administrator's webpage (www.rockwallvotes.com).

XI. PUBLIC HEARING ITEMS

1. **Z2018-032** - Hold a public hearing to discuss and consider a request by Bill Bricker of Columbia Development Company, LLC for the approval of an **ordinance** for a zoning change from a Light Industrial (LI) District to a Planned Development District for commercial, light industrial and townhome land uses on a 16.26-acre tract of land identified as a portion of Lot 1, Block 1, Indalloy Addition (7.409-acres) and Tract 31 of the R. Ballard Survey, Abstract No. 29, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, addressed as 1100 & 1300 E. Washington Street, and take any action necessary **(1st Reading)**.

Planning Director Ryan Miller provided brief background information pertaining to this agenda item. Mayor Pruitt then called forth the applicant to speak.

Tom Jones
5815 Meadowcrest
Dallas, TX

Mr. Jones came forth and briefly shared that Mr. Bricker is out of town this evening, so he is here representing him.

Following brief comments, Mayor Pruitt moved to remand this item back to the Planning & Zoning Commission. Councilmember Macalik seconded the motion. Clarification was provided by Mr. Miller that this action will resent the public hearing at Planning & Zoning, and a subsequent public hearing will occur at a future Council meeting. The motion to remand back to the P&Z passed by a vote of 7 ayes with 0 nays.

2. **Z2018-042** - Hold a public hearing to discuss and consider the approval of an **ordinance** for a text amendment affecting various sections of the Unified Development Code [Ordinance No. 04-38] for the purpose of generally amending the Development Standards and procedural processes for the approval of Variances, Exceptions, and Waivers, and take any action necessary **(1st Reading)** ***[Postponed to the November 5, 2018 City Council Meeting].***

See motion / action taken on Public Hearing item #3 below.

3. **Z2018-043** - Hold a public hearing to discuss and consider a request by Michael Worrell of Rockwall Honda for the approval of an **ordinance** amending SUP No. S-76 (Ordinance No. 10-26) to allow changes to be made to an existing Motorcycle Dealership with Accessory Boat and Trailer Sales being a 1.152-acre parcel of land identified as Lot 6, Block A, Newman Center #1 Addition, City of Rockwall, Rockwall County, Texas, zoned Commercial (C) District, situated within the IH-30 Overlay (IH-30 OV) District, and take any action necessary **(1st Reading) [*Postponed to the November 5, 2018 City Council Meeting].***

Mayor Pruitt moved to postpone Public Hearing item #2 and Public Hearing item #3 until the November 5 city council meeting. Councilmember Johannesen seconded the motion.

XII. ACTION ITEMS

1. **SP2018-028** - Discuss and consider a request by Debora Allegranti of CBOCS Texas, LLC on behalf of Eric Borkenhagen of Kohls Illinois, Inc. for the approval of variances to the articulation and materials requirements in conjunction with an approved site plan for a restaurant on a 1.61-acre portion of a larger 9.0142-acre parcel of land identified as Lot 1, Block A, Rockwall Market Center East Addition, City of Rockwall, Rockwall County, Texas, zoned Commercial (C) District, situated within the IH-30 Overlay (IH-30 OV) District, situated west of the intersection of Mims Road and the frontage road for E. IH-30, and take any action necessary.

Mr. Miller provided brief background information concerning this agenda item, sharing that this item is pertaining to a Cracker Barrel restaurant, which will be located in the Kohl's parking lot adjacent to IH-30. He indicated that approval of this item will require a ¾ majority vote of Council since it is located in an existing 'overlay district.' Councilmember Trowbridge moved to approve Variance request #1, which pertains to Horizontal Articulation associated

with the 4-sided architectural requirements. Councilmember Hohenshelt seconded the motion, which passed unanimously (7 ayes to 0 nays).

Mayor Pruitt indicated that, regarding the variance request related to "Vertical Articulation," no horizontal wall shall extend for a distance greater than three (3) times the height of the wall without a change in height by a minimum of 25% (i.e. five (5) feet) of the wall's height. In this case, the change in height for the front façade is 3 ½-feet (i.e. 1 ½-feet shorter than the requirement). Councilmember Hohenshelt moved to approve this variance request associated with "vertical articulation," and Councilmember Daniels seconded the motion. The motion passed unanimously (7 ayes to 0 nays).

Regarding the variance related to masonry requirements, Mayor Pruitt stated that the city's standards call for each façade to be limited to 50% cementitious materials. In this case, the applicant is proposing to utilize between 63% to 80% cementitious material (i.e. hardie board) on the building façades. Mayor Pro Tem Fowler moved to approve this variance request. Councilmember Daniels seconded the motion, which passed by a vote of 7 ayes to 0 nays.

2. Discuss and consider directing staff to proceed with the 2018 Comprehensive Plan amendment, and take any action necessary.

Mr. Miller explained that this item has been placed on tonight's meeting agenda as a result of the discussions that took place at the recent joint meeting that was held with the city council, Planning & Zoning Commission and the Comprehensive Plan Advisory Committee (CPAC).

Mayor Pruitt made a motion to send the Comp. Plan to the Planning & Zoning Commission for review and consideration. Councilmember Hohenshelt seconded the motion, which passed by a vote of 7 ayes to 0 nays.

3. Discuss and consider a policy for requiring a Traffic Impact Analysis (TIA), and take any action necessary.

Mr. Miller provided brief introductory comments pertaining to this agenda item. He indicated that this topic was initially discussed at the last council meeting. At Council's request, staff evaluated some options pertaining to creation of a policy regarding conducting of Traffic Impact Analyses associated with new, proposed development projects.

Extensive dialogue took place pertaining to when TIAs should be required and when they should not be required, especially pertaining to the timing associated with land entitlements and the proposed density. Discussion also took place pertaining to who currently pays for TIAs, when they are currently required, and who pays for those (the developer or the city). Mayor Pruitt suggested that TIAs should be paid for by the developer with the city choosing the engineer(ing firm). Mayor Pruitt expressed a desire to discuss PD-32 as related to the powers that the city's Planning & Zoning Commission currently has (or does not have) related to requiring a developer conduct a TIA.

Mr. Miller shared that any new policy that the Council may institute pertaining to requiring TIAs will not affect PD-32 unless a zoning change is requested within PD-32.

Mayor Pruitt summarized that the Council may wish to require a developer to conduct a TIA if the project will affect the future land use map (basically if it changes it to a 'more intense use' in instances where conducting a TIA would make logical sense).

Mayor Pruitt summarized a desire to have staff draft a policy and bring it back to Council for further discussion and consideration. He also asked staff to create an explanatory document that clarifies what would trigger a TIA in PD-32 and what powers the P&Z Commission and Council currently have relative to requesting TIAs.

XIII. EXECUTIVE SESSION

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding possible sale or lease of real property / land in the vicinity of County Line Road pursuant to Section §551.072 (Real Property).
2. Discussion regarding potential litigation associated with Breezy Hill Road pursuant to Section §551.071 (Consultation with Attorney).
3. Discussion regarding (re)appointment of municipal court judge and associate judge, pursuant to Section 551.074 (Personnel Matters)
4. Discussion regarding restaurant permitting and inspections pursuant to §551.071 (Consultation with Attorney).
5. Discussion regarding management personnel and organization pursuant to §551.071 (Consultation with Attorney).
6. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney).

XIV. RECONVENE PUBLIC MEETING & TAKE ANY ACTION AS RESULT OF EXECUTIVE SESSION

The Council did not reconvene in Executive Session following the close of the public meeting agenda. (See start of the 6:00 p.m. meeting (above) for action taken as a result of Executive Session).

XV. ADJOURNMENT

Mayor Pruitt adjourned the meeting at 7:10 p.m.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS 5th DAY OF NOVEMBER, 2018.

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Mary Smith, Assistant City Manager**

DATE: **November 2, 2018**

SUBJECT: **Resolution Consenting to Forney Addition to Wastewater Interceptor**

The cities of Rockwall, Heath, and Forney share in the debt service and operations cost for a wastewater interceptor line which conveys wastewater from the cities to the NTMWD treatment plant in Mesquite. Each city's proportionate share is determined by their respective flow into the line.

A provision in the contract allows each city to add services outside their respective city limits to the interceptor line with the consent of the other partners. This has happened several times over the life of the agreement with Heath adding Travis Ranch and Forney adding their high school site as well as a portion of the Devonshire development to the line. Rockwall added Sonoma Verde in Mclendon Chisholm to the line and bills the cost back to Mclendon Chisholm.

Forney now proposes to add just over 114 acres of their ETJ which is served by a MUD and is referred to in their plans as the Evans Tract. The Heath City Council has granted their consent and Rockwall has been asked to consider the request at the next Council meeting. All costs for this addition to the interceptor flows will be borne entirely by Forney in keeping with the agreement now in place and staff does not anticipate any issues related to this addition.

The resolution is included on the Council's consent agenda for consideration.

CITY OF ROCKWALL

RESOLUTION NO. 18-24

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AUTHORIZING AND CONSENTING TO THE CITY OF FORNEY, TEXAS PROVIDING SANITARY SEWER SERVICE TO 114.446 ACRES OF LAND (THE "EVANS TRACT") THROUGH AN AMENDMENT TO THE CITY OF FORNEY WASTEWATER SERVICE CONTRACT WITH THE KAUFMAN COUNTY MUNICIPAL UTILITY DISTRICT NO. 3 (DEVONSHIRE DEVELOPMENT); AND PROVIDING FOR AN EFFECTIVE DATE.

Whereas, the North Texas Municipal Water District (the "District"), the City of Rockwall, the City of Heath, and the City of Forney (collectively, the "Participants") originally entered into a "Buffalo Creek Interceptor System Contract," dated January 22, 2004 (the "Contract"); and

Whereas, the City of Forney currently desires the consent of the District and the Participants to provide service from the Interceptor System (as defined in the Contract) to an area outside the municipal limits of Forney; and

Whereas, the District and Participants have been requested to consent to the providing of sanitary sewer service from the Interceptor System, through the City of Forney, to an area consisting of approximately 114.446 acres of land (the "Evans Tract").

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THAT:

Section 1. The City Council hereby gives its consent to the City of Forney, Texas to provide sanitary sewer services to the 114.446 acre tract of land (the "Evans Tract"), which is located outside of the municipal limits of Forney, through an amendment to the City of Forney Wastewater Service Contract with Kaufman County Municipal Utility District No. 3 (Devonshire Development) as provided in the Third Amendment to the Wastewater Services Contract between the City of Forney and the Kaufman County Municipal Utility District No. 3 effective June 26, 2018.

Section 2. This Resolution shall take effect and be in full force and effect from and after its passage, and it is so resolved.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, this 5th day of November, 2018.

Jim Pruitt, Mayor

25

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: **Richard Crowley, City Manager**

FROM: **Lea Ann Ewing, Purchasing Agent**

DATE: **October 31, 2018**

SUBJECT: **Fire Department Community Risk Assessment: Standard of Cover Project**

In September, the Fire Department was awarded a Department of Homeland Security Fire Prevention and Safety Grant of $48,500 for a Community Risk Assessment. The City's share or cost match for this grant is $2,309 and will be funded in the General Fund, Fire Operations budget.

The intent of this project is to produce a Community Risk Assessment: Standards of Cover document that is fully compliant with industry best practices in the field of deployment analysis. This evaluation and analysis of data will be based on nationally recognized guidelines and criteria, including recognized National Fire Protection Association standards, Insurance Services Office schedules, any federal and state mandates relative to emergency services, and generally accepted best practices within emergency services. Following this memo is the contract price proposal for service that identifies all aspects of this project.

Staff has contacted Emergency Services Consulting International (ESCI) who provides specialized, professional Fire, EMS, Law Enforcement and communications consulting services since 1976. ESCI is a Community Risk Assessment Project vendor through the Request For Proposal process with the Public Procurement Authority (PPA). By means of the Public Procurement Authority's cooperative purchasing program, the City would have the opportunity to piggyback the ESCI contract and move forward with the assessment project. To do so, the City needs to enter into a purchasing cooperative agreement with PPA. Also following this memo is the PPA cooperative purchasing agreement for Council consideration. Should the City enter into this coop program, then the City will meet all formal bidding requirements pertaining to this professional service contract.

For Council consideration are the RFP award to ESCI for $47,346 and the cooperative purchasing agreement with the PPA and authorize the City Manager to execute the ESCI and PPA contracts. Chief Cullins will be at the City Council meeting to answer any questions you may have regarding the grant award and Community Risk Assessment project.

Emergency Services Consulting International

Providing Expertise and Guidance that Enhances Community Safety

PERSONAL SERVICES CONTRACT

This agreement made this_____day of_____2018 by and between **City of Rockwall** hereinafter called "Client" and **Emergency Services Consulting International** doing business as an Oregon corporation in Wilsonville, Oregon, hereinafter called "ESCI".

WITNESSETH:

1. For and in consideration of the payment, agreements, and scope of work herein attached as **Addendum A** to be made and performed, Client and *ESCI* hereby agree to commence and complete the consultation, to provide the work described, and comply with the terms of the contract to conduct a **Community Risk Assessment:Standard of Cover (Project).** Client designates its Fire Department to be the department responsible on behalf of the Client to meet the terms of this Agreement.

2. *ESCI* will furnish labor, materials, and other services necessary to complete the **Project** for Client, and Client shall provide to *ESCI* the information, data, and assistance required as specified in the attached scope of work.

3. Fees: The Client shall pay *ESCI* a sum not to exceed **Forty Seven Thousand, Three Hundred Forty-Six Thirty Five Thousand Dollars ($47,346) including expenses**. Client shall pay *ESCI* according to the following schedule:
   A. 10% due at contract signing
   B. Monthly payments as work progresses
   C. Payment shall be made within 30 days of receipt of invoice

4. This agreement shall be binding upon all parties hereto and their respective heirs, executors, administrators, successors, and assigns.

5. The laws of Texas shall govern this agreement.

6. *ESCI* shall comply with all federal, state, and local laws applicable to the work under this agreement.

7. Termination. Client may terminate this agreement for any reason upon thirty (30) days written notice to *ESCI*. Payment for all work completed and expenses incurred up to the time of termination shall be due immediately upon termination by Client.

8. Amendment. This agreement may be amended by mutual written agreement of all parties.

9. Independent Contractor. *ESCI* is engaged as an independent contractor and will be responsible for any federal or state taxes applicable to the payments under this agreement. *ESCI* is not currently employed by Client and will not be under the direct control of Client. Because *ESCI* is an independent contractor, Client will not be liable for any tax withholding, social security payments, state workers' compensation insurance, unemployment insurance, retirement system payments, or other similar expenses normally payable on behalf of employees of Client.

10. Indemnification. *ESCI* agrees to indemnify, defend, and hold harmless Client and its officers, agents and employees, from and against any and all claims, losses, actions, or judgments for damages or injury to persons or property arising out of or in connection with the acts and/or any performances or activities of *ESCI*, *ESCI*'s agents, employees, or representatives under this Agreement.

11. Attorney Fees. If suit, action, or arbitration is brought either directly or indirectly to enforce the terms of this agreement, the prevailing party shall recover, and the losing party hereby agrees to pay, reasonable attorney's fees incurred in such proceeding, in the trial and appellate courts, as well as costs and disbursements as ordered by a court of competent jurisdiction.

12. This agreement is an integrated writing, executed by the parties after negotiation and discussions of all material provisions. None of the parties to this agreement have relied upon inducements, concessions, or representations of fact, except as set forth in this agreement.

IN WITNESS WHEREOF, the parties hereto have executed, or caused to be executed by their duly authorized officials, the agreement in two (2) copies, each of which shall be deemed an original, on the first date written above.

Scope of Work | Community Risk Assessment: Standards of Cover

The intent of this project is to produce a Community Risk Assessment: Standards of Cover (CRA: SOC) document that is fully compliant with industry best practices in the field of deployment analysis. This evaluation and analysis of data will be based on nationally recognized guidelines and criteria, including recognized National Fire Protection Association (NFPA) standards, Insurance Services Office (ISO) schedules, any federal and state mandates relative to emergency services, and generally accepted best practices within emergency services. All methodology used in this Community Risk Assessment: Standards of Cover analysis of the department will follow the methodology described in the "Community Risk Assessment: Standards of Cover, 6th Edition," published by the Center for Public Safety Excellence (CPSE).

Phase I: Project Initiation

Task 1-A: Project Initiation & Development of Work Plan

ESCI will develop a project work plan based on the scope of work and converse with the community's project team to gain a comprehensive understanding of the organization's background, goals, and expectations for this project. This work plan will be developed identifying:

- Primary tasks to be performed
- Person(s) responsible for each task
- Time table for each task to be completed
- Method of evaluating results
- Resources to be utilized
- Possible obstacles or problem areas associated with the accomplishment of each task

This exchange will also help to establish working relationships, make logistical arrangements, determine an appropriate line of communications, and finalize contractual arrangements.

Task 1-B: Acquisition & Review of Background Information

ESCI will request pertinent information and data from the organization's assigned liaison. This data will be used extensively in the analysis and development of the CRA: SOC document. The documents and information relevant to this project will include, but not be limited to, the following:

- ESCI Information Request for CRA;SOC projects (Exhibit A)
- Department Standard Operating Guidelines (SOGs) and service delivery practices
- Current service delivery objectives and targets
- Facilities and apparatus inventories
- Target Hazard inventory

Phase II: Community Risk Assessment Development

ESCI will conduct an all-hazards analysis of the community based on the elements included in the following objectives. The purpose of this evaluation is to assess the community's hazards, threats, vulnerabilities, and risks in comparison to recognized standards and best practices, as well as to create benchmarks against which to compare future improvement.

Task 2-A: Description of Community Served

An overview of the organization will be developed to include:

- Community Characteristics, including general location, history, geography, topography, climate, local government type, jurisdictional area, and surrounding jurisdictions
- Demographic characteristics
- Transportation networks
- Physical assets protected
- Planning zones, or fire management (response) zones

An interpretation of available census and community development data will be provided indicating:

- Population history
- Census-based population and demographic information
- Community planning-based population information
- Transient population and demographic information (to the extent data is available)
- Population density
- Community land use regulations
- Occupancy types by land use designation
- Hazardous substances and processes
- Non-structural risk categorization

Task 2-B: Review of Community Expectations and Performance Goals

ESCI will examine and document the levels of service historically provided to the community. Within this analysis, the service area will be evaluated based on population density and fire management zones that will be used in the development of future performance objectives.

ESCI will use the fire management zone noted above combined with input from citizens, elected officials, and other stakeholders to determine the appropriate level of service.

Task 2-C: Community Risk Assessment

ESCI will conduct an analysis of community risks, and land uses and interpret their impact on emergency service planning and delivery. Land use, zoning classifications, parcel data, ISO fire flow data, economic value, building footprint densities, occupancy data, and demographic information may be used, along with specific target hazard information, to analyze and classify community risk by:

- Location
- Type
- Probability
- impact or consequences (economic, social, historic, cultural and environmental),
- speed of onset,
- duration, and
- effect on department response capabilities.

Task 2-D: Spatial Visualization of Data and Information

ESCI will use local planning/zoning data combined with available Geographic Information System (GIS) data to evaluate the physical risks of the community to include:

- Overall geospatial characteristics including political and growth boundaries, construction, and infrastructure limitations
- Topography including response barriers, elevation extremes, and open space/interface areas
- Transportation networks including roads, rail lines, airports, and waterways
- Evaluation of physical assets protected
- Risk Assessment Methodology
- Community-Wide Hazards, treats, vulnerabilities, and risks
- Risk Assessment Matrix
- Community Safety and Remediation Programs
- Community Fire Protection and Detection Systems
- Community Loss and Save Information
- Risk By Response Category: Fire, Emergency Medical, and Other Incidents
- Risk By Planning / Demand Zone
- Utilize three-axis or bar data visualization to include probability, consequence, and organization impact (resiliency)

Phase III. Standards of Cover Development

ESCI will conduct an organizational analysis of the department based on the elements included in the following objectives. The purpose of this evaluation is to assess the agency's operations in comparison to industry standards and best practices, as well as to create benchmarks against which to compare future improvement.

Task 3-A: Description of the Department

An overview of the organization will be developed evaluating:

- Service area general population and demographics
- Contributing factors
- History, formation, and general description of the agency community
- Governance and lines of authority
- Organizational design
- Operating budget, funding, fees, taxation, and financial resources

Task 3-B: Review of Services Provided

The services currently provided by the department will be evaluated. Areas to be considered include:

- Description of the current service delivery infrastructure
- Review of emergency response services by type
- Review and evaluate operational staffing levels, distribution, and assignment
- Review staff allocation to various emergency functions
- Review staff scheduling methodology

Task 3-C: Capital Facilities & Equipment

During this component, a review of current major capital assets (facilities and apparatus) will be completed relative to the existing condition of capital assets and their viability for continued use in future service delivery. This evaluation will include:

Facilities **–** Tour and make observations in areas critical of current station location and future station considerations. Items to be contained in the report include:

Design	Code compliance
Construction	Staff facilities
Safety	Efficiency
Environmental issues	Future viability

Apparatus/Vehicles **–** Review and make recommendations regarding inventory of apparatus and equipment. Items to be reviewed include:

Age, condition, and serviceability
Distribution and deployment

Task 3-D: Provision of Services Across The Jurisdiction

An overview of the provision of services across the jurisdiction will be developed evaluating:

- Deployment Considerations
  - Service Provision Methodology
  - Computer Aided Dispatch (CAD) System
  - Unit Types and Staffing
    - Response Levels
  - Resiliency
- Critical Task Analysis: Fire Suppression, Emergency Medical Incidents, Other Incidents

Baseline Performance

- Performance Monitoring Methodology
- Response Metrics: Population Categories, Hazard Types, Risk Levels
- System Wide
- By Planning Zone of Response Zone

Task 3-E: Review of Historical System Performance

Review and make observations in areas specifically involved in, or affecting, service levels and performance. Areas to be reviewed shall include, but not necessarily be limited to:

Resource Distribution Study

- Overview of the current facility and apparatus deployment strategy, analyzed through Geographical Information Systems software, with identification of service gaps and redundancies in initial unit arrival

Resource Concentration Study

- Analysis of response time capability to achieve full effective response force
- Analysis of company and staff distribution as related to effective response force assembly

Response Reliability Study (to the extent data is complete)

- Analysis of current workload, including unit hour utilization of individual companies
- Review of actual or estimated failure rates of individual companies
- Analysis of call concurrency and impact on effective response force assembly (resource drawdown)
- Analysis of call concurrency and impact on resource exhaustion

Historical Performance Summary

- Analysis of actual system reflex time performance, analyzed by individual components
- Mutual and Automatic Aid Systems

ESCI will evaluate the current workload of the department and relate that analysis to the previously described community risk. An analysis will be completed, and a matrix will be developed for the community's common and predictable risk types identifying staffing and resource needs. The matrix shall be developed with consideration to:

- Service Demand study that will analyze and geographically display current service demand by incident type and temporal variation
- Risk-specific staffing levels to meet the critical tasking analysis for the identified risks
- Apparatus assignments to accommodate the anticipated fire flows and other critical functions of the identified risks
- Time standards that will provide for effective initiation of critical tasks and functions
- Summary of current available resources in matrix format

Task 3-F: Establishment of Performance Objectives

The establishment of fire and EMS response time standards and targets is a primary responsibility of policy-makers, based on community risk, citizen expectations and the fire agency's capabilities. ESCI will provide data analysis and comparison against industry standards and will recommend response performance goals. ESCI will identify the current level of emergency services provided by the department and compare the department's performance against industry standards and best practices, such as the benchmarks described by the Insurance Services Office (ISO), consensus standards from the National Fire Protection Association (NFPA), recommended practices from the Center for Public Safety Excellence (CPSE), and other pertinent resources.

- All Programs
- Fire Suppression Services
- Emergency Medical Services
- Hazardous Materials Services
- Technical Rescue Services
- Airport Rescue and Firefighting

A review and discussion of existing response performance goals (if in place) or a discussion of existing response performance (if goals are not in place) will be provided matching the nature and type of risks identified in the previous report sections. ESCI will then recommend response performance goals as follows:

- Evaluation Of Performance
  - Benchmark Objective Tables
  - Evaluation Methodology
  - Factors to Consider
- Evaluation Findings
  - Response Time Performance – Each timed element of the response system, from receipt of call to first unit arrival
  - Resource Distribution – Initial attack (first due) resources for risk-specific intervention
  - Resource Concentration – Effective response force assembly (apparatus and personnel), of the initial resources necessary to stop the escalation of the emergency for each risk type

ESCI will also review and consider any current or draft performance goals, objectives, and measures in place by the agency to determine recommended levels of service.

Phase IV. Plan For Maintaining And Improving Response Capabilities

Task 4-A: Overview of Plan

ESCI will work with the department's management team to develop a methodology that will allow the department to continually measure future performance of the purpose of maintaining and improving response capabilities. This methodology will include, but not necessarily be limited to:

- Records Management Systems (RMS) usage policies
- Assignment of oversight responsibilities
- Schedule of assessments
- Review requirements

Task 4-B: Overall Evaluation, Conclusions, and Recommendations to Policy Makers

ESCI will develop and analyze various operational models for providing emergency services with the specific intent of identifying those options that can deliver the optimum levels of service identified in the previous task at the most efficient cost. Recommendations will be provided identifying the best long-range strategy for service delivery and the impact of initiating such a strategy. ESCI will develop one or more long-range options for resource deployment that will improve the region's level of service towards the identified performance objectives and targets. This may include, but is not necessarily limited to, specific recommendations regarding:

- Any relocation of existing facilities
- General locations of future necessary fire stations
- Selection and deployment of apparatus by type
- Deployment of operations personnel, special units, or resources

ESCI will evaluate and present in graphical and descriptive format for the deployment option(s):

- Degree of benefit to be gained through its implementation
- Extent to which it achieves established performance targets
- Potential negative consequences

Phase V: Development, Review, and Delivery of Final Report

Task 5-A: Develop and Review Draft Project Report

ESCI will develop and produce an electronic draft version of the written report for review by the client and client representatives. Client feedback is a critical part of this project and adequate opportunity will be provided for review and discussion of the draft report prior to finalization. Review of the draft will be performed through web-based video conferencing. The report will include:

- Narrative analysis of each report component structured in easy-to-read sections and accompanied by explanatory support to encourage understanding by both staff and civilian readers
- Clearly designated recommendations highlighted for easy reference and catalogued as necessary in a report appendix
- Supportive charts, graphs, and diagrams, where appropriate
- Supportive maps, utilizing GIS analysis, as necessary
- Appendices, exhibits, and attachments, as necessary
    - Appendix A: Correlation of CRA-SOC Document to CFAI Accreditation Model
    - Appendix B. Glossary and Acronyms
    - Appendix C. Commonly Used Abbreviations and Acronyms
    - Appendix D. References

Task 5-B: Delivery of Final Community Risk Assessment : Standards of Cover Document

ESCI will complete any necessary revisions of the draft and produce ten publication-quality bound, final versions of the written report. The final report will include an executive summary describing the nature of the report, the methods of analysis, the primary findings, and critical recommendations. A formal presentation of the project report will be made by ESCI project team member(s) to staff, elected officials, and/or the general public and will include the following:

- A summary of the nature of the report, the methods of analysis, the primary findings, and critical recommendations
- Supportive audio-visual presentation
- Explanation of primary supportive charts, graphs, diagrams, and maps, where appropriate
- Opportunity for questions and answers, as needed

Additional services

According to the grant narrative:

> *Phase V will consist of risk reduction planning and will include broad-based recommendations for the development of strategies and tactics necessary for a successful Community Risk Reduction plan. For each risk identified, we will meet with interested stakeholders to consider the 5 "E's" of prevention and risk mitigation: Education, Engineering, Enforcement, Emergency Response, and Economics. Additionally, the relative effectiveness of risk reduction strategies, including SWOT analysis, feasibility and implications, option ranking, and related tools will be included. Finally, the establishment of expectations, goals, SMART objectives, and performance measures will be identified.*

ESCI offers the following additional services beyond the CRA:SOC document to satisfy Phase V of the grant requirements as shown here:

Task 4-C: Risk Reduction Planning

ESCI will work with the department's management team to develop a methodology that will allow the department to understand and demonstrate how reduction in fire risk through risk-based inspection and related programs will match deployment of department resources with resultant fire risk and desired community outcomes in four important areas: civilian injury and death; firefighter injury and death; property loss; and environmental impact. Specifically, this task will assist department leaders and community officials in efforts to decide the resources needed to:

- Commit to risk assessment and risk management (prevention/pre-planning/preparation);
- Commit to response/mitigation/stabilization/growth; and
- Achieve the acceptable level of risk.

ESCI will provide broad-based recommendations for the development of strategies and tactics necessary for a successful Community Risk Reduction plan using a Risk-Based Inspection Model (RBI). ESCI will meet with interested stakeholders to consider:

- The 5 "E's" of prevention and risk mitigation: Education, Engineering, Enforcement, Emergency Response, and Economics
- The relative effectiveness of risk reduction strategies using a Risk-Based Inspection Model, including SWOT analysis, feasibility and implications, option ranking, and related tools
- The establishment of expectations, goals, SMART objectives, and performance measures
- Additional information designed to assist with the development of program applications to address FEMA requirements and peer assessment scoring dimensions:
    - Does the proposal clearly summarize the vulnerability the project will address?
    - Does the proposal describe the steps taken to determine the vulnerability and how the target population was identified?
    - Does the proposal include statistics that support their project and target audience?

Task 4-D: Implementing and Evaluating a Community Risk Strategy

ESCI will provide program-specific field support and guidance for the implementation of strategies and tactics necessary for a successful Community Risk Reduction (CRR) plan using a Risk-Based Inspection Model. ESCI will meet with and train department personnel and other interested stakeholders how to:

- Accept organizational responsibility for CRR and build community acceptance
- Implement the six steps in a successful CRR program
- Guide program champions in establishing buy-in, overcoming objectives, utilizing resources effectively and efficiently, and communicating program progress

In addition, ESCI will provide program-specific recommendations for the evaluation of CRR strategies and tactics, to include detailed findings and recommendations, including:

- Reasons to monitor the Plan
- How to use the four stages of evaluation to determine program status
- How to use data collection and statistical analysis to compare previous conditions with post-implementation results
- How to modify the plan to improve results

Intergovernmental Cooperative Purchasing Agreement

This Intergovernmental Agreement (Agreement) is by and between the Lead Contracting Agency ("Public Procurement Authority (PPA)") and participating government entities ("Participating Agencies") that agree to the terms and conditions of this Agreement. The Lead Contracting Agency and all Participating Agencies shall be considered as "parties" to this agreement.

WHEREAS, upon completion of a formal competitive solicitation and selection process, PPA has entered into a Master Price Agreement with one or more Vendors to provide goods and services, often based on national sales volume projections;

WHEREAS, the Master Price Agreement provides that Participating Agencies may purchase goods and services on the same terms, conditions and pricing as the PPA, subject to applicable local and state laws of the Participating Agencies;

WHEREAS, the parties agree to comply with the requirements of the Intergovernmental Cooperation Act as may be applicable to the local and state laws of the Participating Agencies;

WHEREAS, the parties desire to conserve and leverage resources, and to improve the efficiency and economy of the procurement process while reducing solicitation and procurement costs;

WHEREAS, the parties are authorized and eligible to contract with governmental bodies and Vendors to perform governmental functions and services, including the purchase of goods and services; and

WHEREAS, the parties desire to contract with Vendors under the terms of the Master Price Agreement;

NOW, THEREFORE, the parties agree as follows:

ARTICLE 1: LEGAL AUTHORITY

Each party represents and warrants that it is eligible to participate in this Agreement because it is a local government created and operated to provide one or more governmental functions and possesses adequate legal authority to enter into this Agreement.

ARTICLE 2: APPLICABLE LAWS

The procurement of goods and services subject to this Agreement shall be conducted in accordance with and subject to the relevant statutes, ordinances, rules, and regulations that govern each party's procurement policies. Competitive Solicitations are intended to meet the public contracting requirements of the PPA and may not be appropriate under, or satisfy

Participating Agencies' procurement laws. It is the responsibility of each party to ensure it has met all applicable solicitation and procurement requirements. Participating Agencies are urged to seek independent review by their legal counsel to ensure compliance with all local and state solicitation requirements.

ARTICLE 3: USE OF BID, PROPOSAL OR PRICE AGREEMENT

a. A "procuring party" is defined as the PPA or any Participating Agency that desires to purchase from the Master Price Agreement awarded by the PPA.

b. Each procuring party shall be solely responsible for their own purchase of goods and services under this Agreement. A non-procuring party shall not be liable in any fashion for any violation of law or contract by a procuring party, and the procuring party shall hold non-procuring parties and all unrelated procuring parties harmless from any liability that may arise from action or inaction of the procuring party.

c. The procuring party shall not use this agreement as a method for obtaining additional concessions or reduced prices for similar goods and services outside the scope of the Master Price Agreement.

d. The exercise of any rights or remedies by the procuring party shall be the exclusive obligation of such procuring party.

e. The cooperative use of bids, proposals or price agreements obtained by a party to this Agreement shall be in accordance with the terms and conditions of the bid, proposal or price agreement, except as modified where otherwise allowed or required by applicable law, and does not relieve the party of its other solicitation requirements under state law or local policies.

ARTICLE 4: PAYMENT OBLIGATIONS

The procuring party will make timely payments to Vendors for goods and services received in accordance with the terms and conditions of the procurement. Payment for goods and services, inspections and acceptance of goods and services ordered by the procuring party shall be the exclusive obligation of such procuring party. Disputes between procuring party and Vendor shall be resolved in accordance with the law and venue rules of the state of the procuring party.

ARTICLE 5: COMMENCEMENT DATE

This Agreement shall take effect after execution of the "Public Procurement Authority Endorsement and Authorization" or "Participating Agency Endorsement and Authorization," as applicable.

ARTICLE 6: TERMINATION OF AGREEMENT

This Agreement shall remain in effect until terminated by a party giving 30 days written notice to "PPA".

ARTICLE 7: ENTIRE AGREEMENT

This Agreement and any attachments, as provided herein, constitute the complete Agreement between the parties hereto, and supersede any and all oral and written agreements between the parties relating to matters herein.

ARTICLE 8: CHANGES AND AMENDMENTS

This Agreement may be amended only by a written amendment executed by all parties, except that any alterations, additions, or deletions of this Agreement which are required by changes in Federal and State law or regulations are automatically incorporated into this Agreement without written amendment hereto and shall become effective on the date designated by such law or regulation.

ARTICLE 9: SEVERABILITY

All parties agree that should any provision of this Agreement be determined to be invalid or unenforceable, such determination shall not affect any other term of this Agreement, which shall continue in full force and effect.

THIS INSTRUMENT HAS BEEN EXECUTED IN TWO OR MORE ORIGINALS BY EXECUTION AND ATTACHMENT OF "THE PUBLIC PROCUREMENT AUTHORITY ENDORSEMENT AND AUTHORIZATION" OR "PARTICIPATING AGENCY ENDORSEMENT AND AUTHORIZATION," AS APPLICABLE. ONCE EXECUTED, IT IS THE RESPONSIBILITY OF EACH PARTY TO FILE THIS AGREEMENT WITH THE PROPER AGENCY IF REQUIRED BY LOCAL OR STATE LAW.

PUBLIC PROCUREMENT AUTHORITY
ENDORSEMENT AND AUTHORIZATION

The undersigned acknowledges, on behalf of the Public Procurement Authority ("Lead Contracting Agency") that he/she has read and agrees to the general terms and conditions set forth in the enclosed Intergovernmental Cooperative Purchasing Agreement regulating use of the Master Price Agreements and purchase of goods and services that from time to time are made available by the Public Procurement Authority to Participating Agencies locally, regionally, and nationally. Copies of Master Price Agreements and any amendments thereto made available by the Public Procurement Authority will be provided to Participating Agencies to facilitate use by Participating Agencies.

The undersigned understands that the purchase of goods and services under the provisions of the Intergovernmental Cooperative Purchasing Agreement is at the absolute discretion of the Participating Agencies.

The undersigned affirms that he/she is an agent of the Public Procurement Authority and is duly authorized to sign this Public Procurement Authority Endorsement and Authorization.

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: **Richard Crowley, City Manager**

FROM: **Lea Ann Ewing, Purchasing Agent**

DATE: **October 18, 2018**

SUBJECT: **Purchase of 2019 Model Truck**

Approved in the General Fund, Streets and Drainage operating budget is $46,000 for a new one-ton service truck with utility body that will be funded with General Fund Reserves.

Total cost for the vehicle is $45,524. This vehicle is available from Caldwell Country Chevrolet through the Texas Association of School Board (Buy Board) cooperative purchasing contract #521-16. As a member and participant in this cooperative program, the City has met all formal bidding requirements pertaining to the purchase of the new truck.

For Council consideration are the bid award to Caldwell Country Chevrolet for $45,524 and authorize the City Manager to execute a purchase order.

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Amy Williams, P.E., Director of Public Works/City Engineer**

DATE: **October 23, 2018**

SUBJECT: **Highland Drive Phase 1 Reconstruction Project (Bedford Falls Lane to Driftwood Street) Construction Contract**

The Highland Drive Reconstruction Project is part of the 2018 Street Bond Program was approved by City Council to start engineering design services at the June 4, 2018 City Council meeting. The project has been broken up into two phases for construction but is being designed all together. Phase 1 is from Bedford Falls Lane to Driftwood Street and Phase 2 is from Driftwood Drive to Valley Drive. The project design and public involvement has been expedited in order to line up the reconstruction of Phase 1 with the RISD timeline of rebuilding Reinhardt Elementary with is currently underway.

The City hired Teague Nall and Perkins, Inc. to provide the engineering design and specifications for the Highland Drive Reconstruction Project. Eight (8) bids for construction were received for Phase 1 construction of Highland Drive and opened on October 16, 2018. The low bidder is Tiseo Paving Company with a total Base Bid of $1,060,427.10 and a total Alternate Base Bid of $1,095,983.25. The engineering consultants have verified Tiseo Paving Company references and provided a letter of recommendation. Funding will be provided through the Street Bond Fund and the Water / Sewer Fund.

Staff requests City Council consider approval the total alternate Base Bid of Highland Drive Phase 1 Reconstruction Project (Bedford Falls Lane to Driftwood Street) and authorize the City Manager to execute a contract with Tiseo Paving Company in an amount of $1,095,983.25, to be funded by Street Bond Fund and the Water / Sewer Fund, and take any action necessary.

RE: Recommendation of Award
Highland Drive Reconstruction, Phase I (Driftwood Street to Bedford Falls Lane), CIP-TR2018-001

Dear Mr. White,

On Tuesday, October 16, 2018, the City of Rockwall opened bids for the referenced project. Eight bids were received, as shown in the attached bid tabulation. The apparent low bidder was Tiseo Paving Company. We have completed our review of the bids, and have confirmed that Tiseo Paving Company is the low bidder, and has provided all of the required information.

Based upon our review of Tiseo's bid proposal and references, we recommend award of the construction contract to the low bidder, Tiseo Paving Company. Please don't hesitate to call me if you have any questions.

Sincerely,
tnp
teague nall & perkins

Michael G. DeMotte, P.E.
Director of Engineering Services – Allen Office

POA 2018

Form **W-9**
(Rev. November 2017)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

▶ Go to *www.irs.gov/FormW9* for instructions and the latest information.

Give Form to the requester. Do not send to the IRS.

Print or type. See Specific Instructions on page 3.

1 Name (as shown on your income tax return). Name is required on this line; do not leave this line blank.
Tiseo Paving Co.

2 Business name/disregarded entity name, if different from above

3 Check appropriate box for federal tax classification of the person whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor or single-member LLC ☐ C Corporation ☒ S Corporation ☐ Partnership ☐ Trust/estate

☐ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=Partnership) ▶ _____

Note: Check the appropriate box in the line above for the tax classification of the single-member owner. Do not check LLC if the LLC is classified as a single-member LLC that is disregarded from the owner unless the owner of the LLC is another LLC that is **not** disregarded from the owner for U.S. federal tax purposes. Otherwise, a single-member LLC that is disregarded from the owner should check the appropriate box for the tax classification of its owner.

☐ Other (see instructions) ▶

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any) _____

Exemption from FATCA reporting code (if any) _____

(Applies to accounts maintained outside the U.S.)

5 Address (number, street, and apt. or suite no.) See instructions.
419 US Highway 80 East

Requester's name and address (optional)

6 City, state, and ZIP code
Mesquite, TX 75150

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

Note: If the account is in more than one name, see the instructions for line 1. Also see *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number
___ - ___ - ____

or

Employer identification number
38-2209998

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here Signature of U.S. person ▶ _____, Sec-Treas Date ▶ October 16, 2018

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following.

- Form 1099-INT (interest earned or paid)
- Form 1099-DIV (dividends, including those from stocks or mutual funds)
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds)
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers)
- Form 1099-S (proceeds from real estate transactions)
- Form 1099-K (merchant card and third party network transactions)
- Form 1098 (home mortgage interest), 1098-E (student loan interest), 1098-T (tuition)
- Form 1099-C (canceled debt)
- Form 1099-A (acquisition or abandonment of secured property)

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

If you do not return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See What is backup withholding, *later.*

Non-Exclusion Affidavit - System for Award Management (SAM)

Federal, state, and local government agencies, not-profits, and other organizations that use federal money to fund all or part of any program or project are required to follow specific requirements regarding the use of such federal funds. One of these requirements is that no contract, subcontract, grant, financial assistance, or other forms of assistance provided using federal funds may be awarded to individuals or entities that have been suspended, debarred, or otherwise excluded from participation in federally funded programs.

The U.S. federal government maintains a Web site known as the "System for Award Management" (SAM) at www.sam.gov. One of the purposes of the SAM Web site is to provide a comprehensive list of all individuals, firms, and other entities that have been suspended, debarred, or otherwise excluded from participation in federally funded contracts, subcontracts, grants, etc. SAM provides a simple means of helping government, non-profit agencies, and other organizations ensure that they do not award federally-funded grants, contracts, subcontracts, or other financial or non-financial benefits to any individual, firm, or other entity that has been excluded by any agency from participation in such federally funded activities.

I, Louis Tiseo ***(Contractor Representative)***, hereby certify that neither I nor Tiseo Paving Co. ***(Name of the company or organization I represent)*** nor any subcontractors that I or said company may employ to work on any federally funded activity have been suspended, debarred, or otherwise excluded by any federal agency from participation in any federally funded activity. I further acknowledge my understanding that, before entering into a contract with me or with the company or organization I represent, City of Rockwall staff will perform a search on www.sam.gov to verify whether I, the organization I represent, or any subcontractors I may employ to work on any federally funded activity, have been excluded from participation in any federally funded activity.

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Amy Williams, P.E., Director of Public Works/City Engineer**

DATE: **October 23, 2018**

SUBJECT: **Highland Drive Phase 1 Reconstruction Project (Bedford Falls Lane to Driftwood Street) Construction Materials Testing**

City Engineering Standards of Design and Construction require that Construction Material Testing occur on all projects constructed by the City. Proper materials testing ensures that the City gets projects constructed that meets city standards and reduces maintenance and operation expense in the future after construction is complete.

Staff requests City Council consider approval of the Construction Materials Testing for Highland Drive Phase 1 Reconstruction Project and authorize the City Manager to execute a contract with Alliance Geotechnical Group for an amount of $16,484.00 to be funded by Street Bond Funds, and take any action necessary.

Engineering Inspection & Testing Services
AGG Proposal No: P18-1029C

Dear Mr. White:

Alliance Geotechnical Group (AGG) is pleased to confirm our firm's interest in providing materials inspection and testing services for the proposed project noted above. Our estimate for providing these services is **$16,484.00**. A schedule of unit fees for this project is attached. Actual charges will be based on the contractors/client scheduling.

After reviewing our fee schedule if you have any questions, please contact the undersigned at (972) 444-8889. If acceptable, please either sign below and return to our office, or issue a Purchase Order as our Authorization to Proceed. We look forward to the opportunity of working with you on this project.

Respectfully submitted,

ALLIANCE GEOTECHNICAL GROUP

Aaron J. Allen, P.E
CME Division Engineer

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Amy Williams, P.E., Director of Public Works/City Engineer**

DATE: **October 23, 2018**

SUBJECT: **Professional Engineering Services Contract**
Lakedale Drive (Lakeview Drive to Ridge Road),
South Lakeshore Drive (2000 Block), and
Woodpark Lane (Spring Creek to S. Alamo Drive)
Reconstruction Project

The Lakedale Drive (Lakeview Drive to Ridge Road), South Lakeshore Drive (2000 Block), and Woodpark Lane (Spring Creek to S. Alamo Drive) Reconstruction Project is one of the first roadway projects scheduled for engineering design on the 2018 Street Bond Program. The project, approximately 1,600 feet in length, will consist of roadway, sidewalk, water line, wastewater line improvements. The project will include a public input process where surveys will be sent out to adjacent property owners and public meeting will be held with schematics of the roadway and comments will be received.

Staff requested a proposal from BW2 Engineers, Inc. to provide the engineering design and specifications for this project. The engineering fee to reconstruct Lakedale Drive (Lakeview Drive to Ridge Road), South Lakeshore Drive (2000 Block), and Woodpark Lane (Spring Creek to S. Alamo Drive) is $184,300.00. The funding of this project will be provided through the sale of bonds approved by the voters in the 2018 Street Bond Election and water and wastewater funds. Staff recommends City Council consideration to approve a professional engineering services contract for BW2 Engineers, Inc. to perform the engineering design services and specifications for the Lakedale Drive (Lakeview Drive to Ridge Road), South Lakeshore Drive (2000 Block), and Woodpark Lane (Spring Creek to S. Alamo Drive) Reconstruction Project in an amount not to exceed $184,300.00 , to be paid for out of the 2018 Street Bond funds and water wastewater funds, and take any action necessary.

If you have any questions, please advise.

STATE OF TEXAS ♦

♦

COUNTY OF ROCKWALL ♦

PROFESSIONAL ENGINEERING SERVICES CONTRACT

This Agreement is made and entered into in Rockwall County, Texas, between City of Rockwall, Texas ("CITY"), a municipal corporation and political subdivision of the State of Texas, acting by and through its City Manager and BW2 Engineers, Inc., ("ENGINEER"), located at 1919 S. Shiloh Road, Garland, Texas, Engineers duly licensed and practicing under the laws of the State of Texas.

WHEREAS, CITY desires to engage Engineer as an independent contractor to render certain technical and professional services necessary for performing:

PROFESSIONAL ENGINEERING SERVICES for __Woodpark, Lakeshore and Lakedale Reconstruction Project__

NOW, THEREFORE, for and in consideration of the mutual covenants and agreements contained herein, the Parties hereby agree as follows:

1. Scope of Work

Engineer agrees to perform professional engineering services as specifically defined in this Contract as Attachment "A" and as authorized by CITY. Specifically, Engineer shall perform Professional services as requested by CITY and detailed in Attachment "A".

The Parties by mutual agreement through contract amendments may provide for additional technical and professional services to be performed under the basic general terms and conditions of this Contract. CITY reserves the right to enter into another agreement with other engineering firms to provide the same or similar professional services during the term of this Contract for different projects.

2. Compensation & Term of Agreement

Cost for such services will be an annual amount not to exceed one hundred eighty four thousand, three hundred dollars and zero cents ($184,300.00) and billed per the breakdown as provided in Attachment "B". Engineer is not authorized to perform any work beyond the limited not to exceed amount without authorized written approval by CITY.

The term of this Agreement shall commence upon execution of this agreement and follow the schedule described in Attachment "B". In the event of termination, Engineer will assist the CITY in arranging a smooth transition process. However, Engineer's obligation to provide services to the

CITY will cease upon the effective date of termination, unless otherwise agreed in writing.

3. Method of Payment

CITY shall pay Engineer its fees based on the presentation by Engineer to CITY of a correct monthly statement for all the amounts earned under the Contract together with reasonable supporting documentation verifying the accuracy of the fees and expenses. CITY shall then pay Engineer its fee within thirty (30) days after presentation of the accurate monthly statement by Engineer to CITY. CITY is a State sales and use tax exempt political subdivision of the State of Texas. All records supporting payment shall be kept in the offices of Engineer for a period of not less than three (3) years and shall be made available to CITY for inspection, audit or copying upon reasonable request.

4. Engineer's Standard of Care

Engineer shall provide its services under this Contract with the same degree of care, skill and diligence as is ordinarily provided by a professional Engineer under similar circumstances for a similar project. Engineer represents that it has the capability, experience, available personnel, and means required to perform the services contemplated by this Contract. Services will be performed using personnel and equipment qualified and/or suitable to perform the work requested by the CITY. CITY retains the right to report to Engineer any unsatisfactory performance of Engineer personnel for appropriate corrective action. Engineer shall comply with applicable federal, state, and local laws in connection with any work performed hereunder.

Engineer will seek written CITY approval to accept any contract or perform any services for any person, entity, or business working on this project. CITY may waive this potential conflict, but such waiver is at CITY's sole discretion and its decision shall be final.

5. Ownership of Documents

As part of the total compensation which CITY has agreed to pay Engineer for the professional services to be rendered under this Contract, Engineer agrees that hard copies of all finished and unfinished documents, data, studies, surveys, drawings, specifications, field notes, maps, models, photographs, preliminary reports, reports, bid packet/construction contract documents/advertisement for bids incorporating any CITY standard provisions provided by Engineer, will remain the property of the CITY. Engineer will furnish CITY with paper and electronic copies, to the extent they are available, of all of the foregoing to facilitate coordination, however, ownership of the underlying work product shall remain the intellectual property of the Engineer. Engineer shall have the right to use such work products for Engineer's purposes. However, such documents are not intended to be suitable for reuse by CITY or others on extension of the Project or on any other project. Any reuse without the express written consent of the Engineer will be at reuser's sole risk and without liability or legal exposure to the Engineer, and CITY to the extent allowed by law, shall hold harmless the Engineer from all claims, damages, losses, expenses, and costs, including attorneys' fees arising out of or resulting from the reuse of said documents without the Engineer's consent. The granting of such consent will entitle the Engineer to further

compensation at rates to be agreed upon by CITY and the Engineer. The above notwithstanding, Engineer shall retain all rights in its standard drawing details, designs, specifications, databases, computer software and any other proprietary and intellectual property information provided pursuant to this Contract, whether or not such proprietary information was modified during the course of providing the services.

6. Insurance

A. Engineer agrees to maintain Worker's Compensation and Employer's Liability Insurance to cover all of its own personnel engaged in performing services for CITY under this Contract in at least the following amounts:

Workmen's Compensation – Statutory
Employer's Liability – $100,000
Bodily Injury by Disease - $500,000 (policy limits)
Bodily Injury by Disease - $100,000 (each employee)

B. Engineer also agrees to maintain Commercial General Liability, Business Automobile Liability, and Umbrella Liability Insurance covering claims against Engineer for damages resulting from bodily injury, death or property damages from accidents arising in the course of work performed under this Contract in not less than the following amounts:

$2,000,000 General aggregate limit

$1,000,000 each occurrence sub-limit for all bodily injury or property damage incurred all in one occurrence

$1,000,000 each occurrence sub-limit for Personal Injury and Advertising

C. Engineer shall add CITY, its City Council members and employees, as an additional insureds on all required insurance policies, except worker's compensation, employer's liability and errors and omissions insurance. The Commercial General Liability Policy and Umbrella Liability Policy shall be of an "occurrence" type policy.

D. Engineer shall furnish CITY with an Insurance Certificate on the date this Contract is executed and accepted by CITY, which confirms that all above required insurance policies are in full force and effect.

E. Engineer agrees to maintain errors and omissions professional liability insurance in the amount of not less than one million dollars ($1,000,000) annual aggregate, on a claims made basis, as long as reasonably available under standard policies.

7. **INDEMNIFICATION**

ENGINEER SHALL INDEMNIFY AND SAVE HARMLESS THE CITY AND ITS

CITY COUNCIL MEMBERS AND EMPLOYEES FROM SUITS, ACTIONS, LOSSES, DAMAGES, CLAIMS, OR LIABILITY, INCLUDING WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, ALL EXPENSES OF LITIGATION, COURT COSTS, AND REASONABLE ATTORNEY'S FEES FOR INJURY OR DEATH TO ANY PERSON, OR INJURY TO ANY PROPERTY, RECEIVED OR SUSTAINED BY ANY PERSON OR PERSONS OR PROPERTY, TO THE EXTENT CAUSED BY THE NEGLIGENT ACTS OF ENGINEER OR ITS AGENTS OR EMPLOYEES, IN THE EXECUTION OF PERFORMANCE OF THIS CONTRACT.

ENGINEER'S TOTAL LIABILITY TO CITY FOR ANY LOSS OR DAMAGES FROM CLAIMS ARISING OUT OF, OR IN CONNECTION WITH, THIS CONTRACT FROM ANY CAUSE INCLUDING ENGINEER'S STRICT LIABILITY, BREACH OF CONTRACT, OR PROFESSIONAL NEGLIGENCE, ERRORS AND OMISSIONS SHALL NOT EXCEED ONE MILLION DOLLARS ($1,000,000). NEITHER PARTY TO THIS AGREEMENT SHALL BE LIABLE TO THE OTHER PARTY OR ANY THIRD PARTY CLAIMING THROUGH THE OTHER RESPECTIVE PARTY, FOR ANY SPECIAL, INCIDENTAL, INDIRECT, PUNITIVE, LIQUIDATED, DELAY OR CONSEQUENTIAL DAMAGES OF ANY KIND INCLUDING BUT NOT LIMITED TO LOST PROFITS OR USE OF PROPERTY, FACILITIES OR RESOURCES, THAT MAY RESULT FROM THIS AGREEMENT, OR OUT OF ANY GOODS OR SERVICES FURNISHED HEREUNDER.

8. Addresses for Notices and Communications

CITY
Amy Williams, P.E.
Director of Public Works/City Engineer
City of Rockwall
385 S. Goliad Street
Rockwall, Texas 75087

ENGINEER
Jim Waldbauer, P.E.
President
BW2 Engineers, Inc.
1919 S. Shiloh Road
Suite 500
Garland, Texas 75042

All notices and communications under this Contract shall be mailed or delivered to **CITY** and **Engineer** at the above addresses.

9. Successors and Assigns

CITY and Engineer each binds itself and its successors, executors, administrators and assigns to the other parties of this Contract and to the successors, executors, administrators and assigns of

such other parties, in respect to all covenants of this Contract. Except as noted in the first part of this Paragraph, neither CITY nor Engineer shall assign, sublet or transfer its interest in this Contract without the written consent of the other. Nothing herein shall be construed as creating any personal liability on the part of any officer, council member, employee or agent of any public body which is a party hereto.

10. Termination for Convenience of the Parties

Engineer and CITY may terminate this Contract for their convenience at any time by giving at least thirty (30) days notice in writing to each other. If the Contract is terminated by CITY and/or Engineer as provided herein, Engineer will be paid for the Work provided and expenses incurred up to the termination date, if such final compensation is approved by CITY, in its sole discretion. If this Contract is terminated due to the fault of Engineer, Paragraph 10 hereof, relative to Termination for Cause, shall apply.

11. Changes

CITY may, from time to time, request changes in the Scope of Work of **Engineer** to be performed hereunder. Such changes, including any increase or decrease in the amount of **Engineer's** compensation, or time for performance, which are mutually agreed upon by and between **CITY** and **Engineer**, shall be incorporated in written amendments to this Contract. Any subsequent contract amendments shall be executed by the City Manager or other authorized representative as designated by the City Manager or City Council.

Any alterations, additions or deletions to the terms of this Contract, including the scope of work, shall be by amendment **in writing** executed by both CITY and Engineer.

13. Reports and Information

Engineer, at such times and in such forms as **CITY** may reasonably require, and as specified in the Scope of Work or in additional Contract Amendments shall furnish **CITY** periodic reports pertaining to the Work or services undertaken pursuant to this Contract, the cost and obligations incurred, or to be incurred in connection therewith, and any other matter covered by this Contract.

14. Entire Agreement

This Contract and its Attachments and any future Contract Amendments constitute the entire agreement, and supersede all prior agreements and understandings between the parties concerning the subject matter of this Contract.

15. Waiver

The failure on the part of either party herein at any time to require the performance by the other party, of any portion of this Contract, shall not be deemed a waiver of, or in any way affect that

party's rights to enforce such provision, or any other provision. Any waiver by any party herein of any provision hereof, shall not be taken or held to be a waiver of any other provision hereof, or any other breach hereof.

16. Severability

The invalidity or unenforceability of any provision of this Contract shall not affect the validity or enforceability of any other provision of this Contract.

17. Survival

Any and all representations, conditions and warranties made by Engineer under this Contract are of the essence of this Contract and shall survive the execution, delivery and termination of it.

18. Governing Powers and Law

Both Parties agree and understand that the City does not waive or surrender any of its governmental powers by execution of this Agreement. To that end, the parties further understand that this agreement shall not be considered a contract for goods or services under Texas Local Government Code, Section 271.151 and Contractor waives any right or entitlement granted said provisions. This Contract is governed by the laws of the State of Texas and all obligations of the parties under this Contract are performable in Rockwall County, Texas.

19. Attorney's Fees

If it is necessary for either Party herein to file a cause of action at law or in equity against the other Party due to: (a) a breach of this Contract by the other Party and/or (b) any intentional and/or negligent act or omission by the other Party arising out of this Contract, the non-breaching or non-negligent Party shall be entitled to reasonable attorney's fees and costs, and any necessary disbursements, in addition to any other relief to which it is legally entitled.

20. State or Federal Laws

This Contract is subject to all applicable federal and state laws, statutes, codes, and any applicable permits, ordinances, rules, orders and regulations of any local, state or federal government authority having or asserting jurisdiction, but nothing contained herein shall be construed as a waiver of any right to question or contest any such law, ordinance, order, rule or regulation in any forum having jurisdiction.

EXECUTED in triplicate originals on this 23rd day of OCTOBER 2018.

ATTACHMENT "A"
WOODPARK, SOUTH LAKESHORE AND LAKEDALE RECONSTRUCTION PROJECT
for
City of Rockwall

SCOPE OF SERVICES

Project Understanding

The City of Rockwall (City) wishes to reconstruct Woodpark Lane (Spring Creek to S. Alamo Drive), South Lakeshore Drive (2000 Block), and Lakedale Drive (Lakeview Drive to Ridge Road), all of which are existing 27' wide residential roadways. These segments of roadways have the following approximate lengths; Woodpark (600'), South Lakeshore Drive (550'), and Lakedale Drive (450'). These roadways lie in the western area of the City of Rockwall, between I.H. 30 and S.H. 66. Reconstruction will be replacing the existing pavement with a standard residential roadway (29' B-B) with sidewalks. These improvements will be within the existing Right of Ways (ROW); however, the contract will include a provision for one (1) parcel take or easement in the event that they are required.

Additional design will include sanitary sewer and water improvements. Existing sanitary sewer lines and water lines in these roadway corridors have been determined to require replacement. Therefore, these existing lines will be replaced and upgraded in size, if necessary. Water lines will be evaluated to be place within the back of curb and the right-of-way line where possible.

BW2 Engineers, Inc. will provide plans, specifications, estimates, and permits for the project and will support the City of Rockwall's advertising/bidding and construction phase services.

BASIC SERVICES

1. Schematic Conceptual Design (30%)

1.1. Project Management

1.1.1. Conduct project kickoff meeting with entire project team and City Staff.

1.1.2. Prepare and send Project Status Update (PSU) to City's Project Manager on monthly basis. PSU will address work completed in previous period, work in progress and/or anticipated to be completed in next period, actions or information needed from City, and a schedule update.

1.1.3. Develop design criteria and design decisions tables.

1.2. Project stakeholder coordination

- Develop project stakeholder contact list including but not limited to franchise utilities, City's water and sewer department, traffic department, and other governmental entity stakeholders.
- Conduct progress meetings to monitor the development of the project. During this phase of the project, conduct up to two (2) meetings with the City staff regarding project status and coordination issues. The first meeting will be the project kick-off meeting, and the second meeting will be the conceptual design presentation and review.

1.3. Public Meetings and Public Input Surveys

1.3.1. Meetings

1.3.1.1. Attend two (2) public involvement meeting as directed by City staff. Provide exhibits suitable for public meeting use depicting street section, alignments etc. Support City

staff during meetings by providing technical information, responding to citizen questions, and recording citizen input.

1.3.1.1.1. First Public Meeting will be with adjacent property owners and residents.

- Mail out all first public meeting notification for the City.
- Revise 30% Schematics Roll Plots based on public input from first public meeting and City direction to be used in second public meeting.

1.3.1.1.2. Second Public Meeting will be with adjacent property owners and residents as well as the neighborhood.

- Mail out all second meeting public meeting notification for the City (Neighborhood to be at a typical 500ft buffer off the street)
- Revise 30% Schematics Roll Plots based on public input from second public meeting and City direction to be used in City Council presentation for schematic and typical section approval.

1.3.2. Public Input Surveys

- Work with City to develop Public Input Survey to be sent to adjacent property owners and residents.
- Mail out surveys to adjacent property owner and residents.
- Tally survey results and other received public input into presentable format to City Staff and City Council.

1.4. Schematic Roll Plot and Graphics (30%)

The following services will be provided as part of the Conceptual Design Phase (30%):

- Review and research previously prepared construction plans record documents, and other pertinent information related to proposed project.
- Review City master plans, design standards, specifications, construction details, and other pertinent information that may impact the design. Review of documents will include but not limited to:
  - City of Rockwall Master Thoroughfare Plan
  - City of Rockwall Water/Wastewater Master Plan
  - City of Rockwall Standards of Design and Construction
  - City of Rockwall Trail Master Plan
- Develop complete and accurate base map showing all existing Right-of-Way (ROW), easements, and utilities.
- Develop and evaluate typical sections (up to two (2)) to use for the project.
- Develop horizontal alignments for roadway,
- Develop and evaluate up to two (2) alignments for proposed water lines and wastewater lines.
- Develop vertical alignment for roadway and cut cross sections at critical points, at center of driveways, alley approaches, cross streets, lead walks, at alignment geometric points and at 25' intervals to evaluate the grading.
- Review City Master Trail Plan and incorporate hike and bike trails if necessary.
- Prepare 30% schematic paving plan and profile roll plots, produced at 1" =40' horizontal scale and 1" =5' vertical scale. The horizontal alignment of proposed water lines and sewer lines will be included in the roll plots.
- Prepare cross sections sheets.
- Meet with City staff and present concept paving plan and profile roll plots.
- Incorporate comments and feedback from City staff and other stakeholders prior to public meetings.

1.5. Drainage Analysis (30%)

The following services will be provided as part of the Conceptual Design Phase (30%):

- Review and research existing construction plans and record documents, historical flooding events and other pertinent information related to the existing drainage infrastructure along, upstream and downstream of the proposed project.
- Prepare a drainage area map for each street project and provide gutter capacity calculations to confirm street flow.

2. Construction Documents

2.1. Project Management

- Conduct progress meetings at each stage of the construction documents phase to monitor the development of the project regarding project status, coordination issues and go over City review comments of the plans.
- Coordinate with other utilities, (electric power, cable TV, phone, gas, optic fiber, etc.)
- Prepare and send Project Status Update (PSU) to City's Project Manager on monthly basis. PSU will address work completed in previous period, work in progress and/or anticipated to be completed in next period, actions or information needed from City, and a schedule update.
- Update project schedule and interim milestones (coordinate with City staff as necessary)
- Project site visits (up to three (3) trips)

2.2. Construction Plans, Specifications and Estimates (30%, 90%, 100%)

2.2.1. Submittals

BW2 Engineers, Inc. will submit 60%, 90% and 100% submittals for the City for review and comment. The following will be required for each submittal:

- Construction Plans
  - Two (2) Full Size copies – 22"x34"
  - Two (2) Half Size copies – 11"x17"
  - One (1) PDF copy
  - One (1) PDF copy– Scanned City comments previous submittal
- Engineers Opinion of Construction Cost
- Construction Contract Template/Specification Book

2.2.2. Construction Plans

Each plan sheet in the construction plans set will conform to the Engineering Drawing Requirements set forth in the City of Rockwall's Standards of Design and Construction. Plan sheets will also include any other additional documentation, notation, and clarification required by the City's Project Manager to prove design and constructability of the project. Each stage of the construction plan review process will incorporate any changes associated with City comments on previous submittals.

Below is a table of the required construction plan sheets and which submittals they are required.

Plan Sheets	**60%**	**90%**	**100%**
Cover Sheet	X	X	X
Legend Sheet	X	X	X
General Notes Sheet	X	X	X
Existing Condition Plan (1"=20' scale)	X	X	X

Horizontal/Vertical Control Sheet (1"=40' scale)	X	X	X
Typical Sections (Existing and Proposed)	X	X	X
Erosion Control Plan (1"=40' scale)		X	X
Demolition/Removals Plan (1"=20' scale)	X	X	X
Roadway Plan/Profiles (1"=20'H, 1'=5'V scale)	X	X	X
Alley and Driveway Plan/Profile (1"=20'H, 1'=5'V scale)		X	X
Intersection Grading Plan (Lakedale / Lakeshore intersection)		X	X
Drainage Area Map (Existing)	X	X	X
Drainage Calculations (Area, Gutter Capacities)		X	X
Water Plan/Profile (1"=20'H, 1'=5'V scale)	X	X	X
Sanitary Sewer Plan/Profile (1"=20'H, 1'=5'V scale)	X	X	X
Retaining Wall Plan/Profile (1"=20'H, 1'=5'V scale)	X	X	X
Construction Sequencing Phasing Narrative	X	X	X
Detour Plan (for each Phase)		X	X
Traffic Control Plan (for each phase & typ. sections) (1"=40' scale)		X	X
Roadway Cross-Sections (25' int. & crit. pts.) (1"=20'H, 1'=5'V scale)	X	X	X
Details (for each section of plans)		X	X

Each subsection below details out the services to be performed for each section of the construction plan set.

2.2.2.1. Roadway Design

- Incorporate the preliminary design submittal review comments
- Prepare plan / profile sheets (22"x34" plan sheets at a scale of 1"=20' horizontal, and 1"=5' vertical).
- Analyze all driveways within the project and develop driveway adjustment and crosswalk profiles as needed. Typically driveways will be defined vertically by profiles.
- Develop design cross-sections
    - Develop on 25' station intervals and other critical points.
    - Show pavement and subgrade, right-of-way limits, sides slopes, pavement cross slopes, curbs, and retaining walls (if applicable)
    - Cross-sections will be provided in the plan set.
- Prepare roadway details to clarify intent of design
- Modify standard details as needed and include

2.2.2.2. Utilities

2.2.2.2.1. Public (Water, Wastewater, Storm Drainage, etc.)

- Establish the location of existing public utilities based upon information provided by the City, SUE and field survey information

2.2.2.2.2. Franchise Utility Coordination

- Identify franchise utility contacts
- Send one set of plans to each franchise utility for their review will be submitted at each phase. Request each franchise utility to mark up the plans to show the size, type and location of their utilities.
- Notify the City if any relocations are required
- BW2 Engineers, Inc. shall assist the City in the coordination with the franchise utilities if any relocations are required.

- Attend City ran Franchise Utility Coordination Meetings (typically 2-4 meetings per year are held). BW2 Engineers, Inc. will give back ground on particular project and coordinate with franchise utility companies on foreseen conflicts and pass out current plan set.

2.2.2.2.3. Water

- Prepare all water plan and profiles.
- Check coverage of Fire Hydrants to meet City Standard.
- Prepare water details to clarify intent of design. Compile applicable City Standard details, modify standard details as needed.

2.2.2.2.4. Wastewater

- Prepare all wastewater plans and profiles.
- Prepare wastewater details to clarify intent of design. Compile applicable City Standard details, modify standard details as needed.

2.2.2.3. Traffic Control Plans, Detour Plans, Construction Sequencing/Phasing

- Develop construction sequence plan showing:
  - Construction area for each phase of construction and closure of existing travel lanes (if needed).
  - Temporary signing and striping, barricades, and other channelization device
  - Narrative of the sequence of work.
  - Detour Plan for each construction phase
  - Public utilities relocation phasing.
  - Pedestrian routing during construction.
- Develop typical cross section showing lane widths, edge conditions, channelization and proposed construction area.
- Develop typical driveway staging plans for similar driveways. Develop custom driveway staging layouts for special conditions.
- Prepare traffic control details to clarify intent of design.

2.2.3. Specifications/Construction Contracts

Prepare general notes, specification data, and final Bid Book in accordance with City of Rockwall requirements. Identify and prepare special specifications and/or special provisions applicable to the project. Prepare Bid-Tab sheets of applicable items for Contractor to fill/present bid prices.

- Contact documents, including the following:
  - City of Rockwall standard construction contract forms
  - Notice to bidders
  - Special instructions to bidders
  - Bid form (Bid-Tab) – Electronic for Bidding
  - Standard construction contract
  - Performance bond
  - Payment bond
  - Maintenance bond
  - Certificate of insurance
  - General conditions
  - Special conditions
  - Technical specifications
  - Permits (TXDOT, City of Dallas, etc.)
  - Geotechnical Report

2.2.4. Estimates

Compile an overall opinion of probable construction cost based on current market values. Cost shall be broken out in to separate schedules for each section of the job.

2.3. Agency Permitting/Coordination (City of Dallas, NTMWD, TDLR, etc.)

2.3.1. Accessibility Review (TDLR)

- Prepare a completed application for submittal to the Texas Department of Licensing and Regulation for review in accordance with the Elimination of Architectural Barriers Act.
- BW2 Engineers, Inc. to complete application and submit with set of plans to a Registered Accessibility Specialist (RAS) from review and TDLR project registration. All coordination and fees with TDLR compliance will be done by the BW2 Engineers, Inc.
- While we do not anticipate accessibility revisions to be required, we will address minor revisions to the plans based on review comments from the RAS.

SPECIAL SERVICES

3. Data Collection & Property Research / Topographic and Design Survey

3.1. Data Collection and Property Research

3.1.1. Gather existing plat information

3.1.2. Collect property owner and record information

3.1.3. Gather existing ROW and easement information; identify all easements through typical research methodologies (i.e. plats, court house filings, etc.).

3.2. Topographic and Design Survey

3.2.1. The limits of the survey shall include Woodpark Lane (Spring Creek to S. Alamo Drive), South Lakeshore Drive (2000 Block), and Lakedale Drive (Lakeview Drive to Ridge Road). The survey shall be from 20' outside the ROW lines (50 foot ROW) for an approximate survey width of 90'. Survey will include intersecting roadways extending 200 feet along each leg of the minor intersections.

3.2.2. Establish horizontal control points at 500' maximum spacing.

3.2.3. Establish a vertical control benchmark circuit as needed throughout the project. Use existing City established monument information for the City and tie survey into.

3.2.4. Set control points, which shall be based on NAD-83, on both sides of the roadway, as required to maintain horizontal control throughout the project limits.

3.2.5. Perform a field survey to identify and locate existing topographic elements within the roadway corridor. All identified topographic elements shall be tied down horizontally and vertically. The field survey shall not limited to the following:

- Property corner monumentation
- Existing pavement, curbs, sidewalks, barrier free ramps, etc.
- Roadway and lane striping
- Driveways
- Existing storm sewer inlets, manholes, junction boxes Headwalls (including culvert sizes and invert elevations)
- Outfalls, bridges and erosion control
- Existing driveway culverts and swales (flowlines, sizes, types, etc.)
- Guardrail
- Utility manholes, vaults, water valves, water meters, wastewater cleanouts, sprinkler heads, telephone poles, power poles, utility markers, other public utilities and franchise utilities

- Traffic Signal poles, cabinets, pull boxes and other signal equipment
- Signs (excluding temporary signs)
- Trees, including species and caliper (all sizes)
- Landscape planters, Shrubs, rocks and other features.
- Buildings and permanent structures
- Retaining walls
- Fencing walls
- Fence limits and material types (excluding temporary fences)
- Mailboxes (types – wood, birck, stone)
- Other applicable physical features that could impact design

3.2.6. Perform cross-sections throughout project limits at 25-foot intervals and at grade breaks and prepare cross-section field notes.

3.2.7. Prepare a final topographic drawing in digital format (including contours and breaklines) showing the features located in the field, an ASCII coordinate file of the points located in the field, and a hard copy of the coordinates and feature descriptions.

3.2.8. BW2 Engineers, Inc. will perform site visits for the purposes of reviewing the provided survey in the field and making notes for additional survey needs and design considerations.

4. Subsurface Utility Engineering (S.U.E.) Services

4.1. Provide S.U.E. Services for the purpose of locating horizontal and vertical locations of underground city and franchise utilities, in conjunction with and /or prior to the field survey.

- S.U.E. Level 'B' Services will be provided to determine horizontal location of utilities up to 3000 linear feet.
- S.U.E. Level 'A' Services will be provided as follows:
  - Up to five(5) test holes of 0-15 ft depth will be provided
  - Test holes in addition to those listed above will be provided at the rate per test hole agreed to by the City of Rockwall.

4.2. BW2 Engineers, Inc. shall arrange and make provisions for access to perform the services specified within this scope. The surveyor shall provide the City with the name and address of the property owners.

4.3. The City shall be responsible for the coordination of all ROW and easement acquisitions. BW2 Engineers, Inc. will provide survey information and easement/ROW documents (sketch and legal description) to the City. Additional ROW and easement documentation services are detailed below in Section 2.

5. Right-of-Way / Easement Instruments of Conveyance

5.1. Prepare ROW instruments (narrative and graphic exhibits of ROW takes) and setting new property corners (for new ROW only) in the field

5.1.1. Up to six (6) parcels

5.2. Prepare easement instruments (narrative and graphic exhibits of easements required for drainage, City utilities, temporary construction, etc.)

5.2.1. Up to six (6) parcels

5.3. Individual parcel exhibits shall be on 8"x11" paper and pdf copy shall be sealed, dated, and signed by a Registered Professional Land Surveyor and shall contain the following:

5.3.1. Parcel number

5.3.2. Area required

5.3.3. Area remaining

5.3.4. Legal description
5.3.5. Current owner
5.3.6. Any existing platted easements or easements filed by separate instrument including easements provided by utility companies
5.3.7. All physical features
5.3.8. Metes and bounds description of parcel to be acquired. The description shall be provided on a separate sheet from the exhibit. Each type of easement shall be described separately.

5.4. Upon written notification by the City of acceptance of the ROW exhibits and instruments, and as directed by the City, the surveyor shall set all corners and points of curvature for the proposed ROW and submit final sealed plans and exhibits, including location of the control points and their NAD-83 reference

5.5. BW2 Engineers, Inc. will provide the information listed in Section 2 to the City and/or their selected ROW and easement acquisition agent. This task will include the following:

5.5.1. Transmittal of survey and existing property information.

6. Geotechnical

6.1. Subsurface Exploration

6.1.1. Five (5) borings are planned for this project. The borings and report will be thru a subconsultant.

The locations are as follows:

- Two borings will be located within the Woodpark corridor.
- Two borings will be located within the Lakeshore corridor.
- One boring will be located within the Lakedale corridor.

6.1.2. Boring Services – Pavement borings will be sampled to 15 feet. A total of 45 feet for drilling is planned.

- Check samples for consistency with a hand penetrometer
- Stake the boring locations using normal taping procedures
- Backfill bore holes and plug at the surface

6.2. Laboratory Services

6.2.1. Considering the planned facilities, anticipated soil conditions, and geology, the following laboratory test will be required for classification purpose and to determine strength characteristics:

- Visual Classification
- Moisture content and soil identification
- Liquid and plastic limit determinations
- Unconfined compression
- Calibrated hand penetrometer tests
- Lime/ph series tests
- Soluble sulfate tests (to determine lime-induced heaving potential)

6.3. Engineering Services

6.3.1. Prepare an engineering report presenting the following:

- Sample boring location map
- Boring logs and laboratory results
- General soil and ground-water conditions
- Recommendations will be based on a 30 year design life.
- Subgrade design recommendations for lime treated and cement treated
- Pavement design recommendation for reinforced concrete, asphalt or combination of concrete and asphalt system (including pavement thickness, strength, reinforcement size and spacing, and joint spacing)

- Recommendations for retaining walls
- Earthwork recommendations

6.3.2. The geotechnical engineer's design recommendations shall be relied upon by the civil and structural engineers for their design.

6.3.3. Submit one (1) paper copy and one pdf file copy of the report to the City

7. Additional Services

Services not specifically identified in the Scope of Services above shall be considered additional and shall be performed on an individual basis upon authorization by the City of Rockwall. Such services shall include, but are not limited to the following:

7.1. Construction staking.

7.2. _____

-End of Scope of Service-

ATTACHMENT "B"

Payment Schedule

BW2 Engineers has prepared a preliminary Opinion of Probable Construction Cost for this project. The OPCC is $1,501,848. Compensation for Basic Services in Tasks 1-2 shall be on a lump sum basis. The tabulation below establishes the not to exceed amount for each category of contract service:

	Task	Fee
	BASIC SERVICES	
1.	Schematic Conceptual Design (30%)	$32,500.00
2.	Construction Documents	
2.1	60% Design	$52,000.00
2.2	90% Design	$32,500.00
2.3	100% Design	$13,000.00
	Basic Services Subtotal:	**$ 130,000.00**
Compensation for special services under Tasks 3-6 shall be a labor fee plus expense (reimbursable) basis with the max fee shown below.		
	SPECIAL SERVICES	
3.	Data Collection & Property Research / Topographic and Design Survey	$11,200.00
4.	Subsurface Utility Engineering (S.U.E.) Services	
4.1	Quality Level 'B' S.U.E. Services (assumes 3,000 LF)	$2,000.00
	Quality Level 'A' S.U.E. Services	$15,000.00
5.	Right-of-Way/Easement Instruments of Conveyance	$6,600.00
	(6 ROW documents are assumed @ $1,100/document)	
6.	Geotechnical	$6,500.00
	Special Services Subtotal*	**$ 41,300.00**
	ENGINEERING SERVICES CONTINGENCY (To be 10% of Services)**	**$ 13,000.00**
	***(This service is a miscellaneous amount to be used at the discretion of the City for additional Services outside of the scope of the contract. This item will be controlled by the City and will only be used if the City chooses. The Engineer has no right or guarantee to the use of this Contingency)*	
	Project Total*	**$ 184,300.00**

Fees that are Lump Sum for each task and will be invoiced monthly based upon the overall percentage of services performed.

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Amy Williams, P.E., Director of Public Works/City Engineer**

DATE: **November 2, 2018**

SUBJECT: **Professional Engineering Services Contract**
Ridge Road West (Shores Boulevard to N. Goliad Street)
Reconstruction Project

The Ridge Road West (Shores Boulevard to N. Goliad Street) Reconstruction Project is one of the first roadway projects scheduled for engineering design on the 2018 Street Bond Program. The project, approximately 4,100 feet in length, will consist of roadway, sidewalk, and storm drainage improvements. The project will include a public input process where surveys will be sent out to adjacent property owners and public meeting will be held with schematics of the roadway and comments will be received.

Staff requested a proposal from Dannenbaum Engineering Company – Dallas LLC. to provide the engineering design and specifications for this project. The engineering fee to reconstruct Ridge Road West (Shores Boulevard to N. Goliad Street) is $370,047.49. The funding of this project will be provided through the sale of bonds approved by the voters in the 2018 Street Bond Election funds. Staff recommends City Council consideration to approve a professional engineering services contract for Dannenbaum Engineering Company – Dallas LLC. to perform the engineering design services and specifications for the Ridge Road West (Shores Boulevard to N. Goliad Street) Reconstruction Project in an amount not to exceed $370,047.49, to be paid for out of the 2018 Street Bond funds, and take any action necessary.

If you have any questions, please advise.

RIDGE ROAD WEST (SHORES BLVD TO N. GOLIAD ST.)

STATE OF TEXAS ♦
♦
COUNTY OF ROCKWALL ♦

PROFESSIONAL ENGINEERING SERVICES CONTRACT

This Agreement is made and entered into in Rockwall County, Texas, between City of Rockwall, Texas ("CITY"), a municipal corporation and political subdivision of the State of Texas, acting by and through its City Manager and Dannenbaum Engineering Company – Dallas LLC.), ("ENGINEER"), located at 3030 Lyndon B. Johnson Fwy, STE 910, Dallas, Texas, Engineers duly licensed and practicing under the laws of the State of Texas.

WHEREAS, CITY desires to engage Engineer as an independent contractor to render certain technical and professional services necessary for performing:

PROFESSIONAL ENGINEERING SERVICES for Ridge Road West

NOW, THEREFORE, for and in consideration of the mutual covenants and agreements contained herein, the Parties hereby agree as follows:

1. Scope of Work

Engineer agrees to perform professional engineering services as specifically defined in this Contract as Attachment "A" and as authorized by CITY. Specifically, Engineer shall perform Professional services as requested by CITY and detailed in Attachment "A".

The Parties by mutual agreement through contract amendments may provide for additional technical and professional services to be performed under the basic general terms and conditions of this Contract. CITY reserves the right to enter into another agreement with other engineering firms to provide the same or similar professional services during the term of this Contract for different projects.

2. Compensation & Term of Agreement

Cost for such services will be an annual amount not to exceed THREE HUNDRED SEVENTY THOUSAND FOURTY SEVEN dollars and 49/100 ($370,047.49) and billed as a *lump sum* basis per rates provided in Attachment "B". Engineer is not authorized to perform any work beyond the limited not to exceed amount without authorized written approval by CITY.

The term of this Agreement shall commence upon execution of this agreement and follow the schedule described in Attachment "B". In the event of termination, Engineer will assist the CITY in arranging a smooth transition process. However, Engineer's obligation to provide services to the CITY will cease upon the effective date of termination, unless otherwise agreed in writing.

3. Method of Payment

CITY shall pay Engineer its fees based on the presentation by Engineer to CITY of a correct monthly statement for all the amounts earned under the Contract together with reasonable supporting documentation verifying the accuracy of the fees and expenses. CITY shall then pay Engineer its fee within thirty (30) days after presentation of the accurate monthly statement by Engineer to CITY. CITY is a State sales and use tax exempt political subdivision of the State of Texas. All records supporting payment shall be kept in the offices of Engineer for a period of not less than three (3) years and shall be made available to CITY for inspection, audit or copying upon reasonable request.

4. Engineer's Standard of Care

Engineer shall provide its services under this Contract with the same degree of care, skill and diligence as is ordinarily provided by a professional Engineer under similar circumstances for a similar project. Engineer represents that it has the capability, experience, available personnel, and means required to perform the services contemplated by this Contract. Services will be performed using personnel and equipment qualified and/or suitable to perform the work requested by the CITY. CITY retains the right to report to Engineer any unsatisfactory performance of Engineer personnel for appropriate corrective action. Engineer shall comply with applicable federal, state, and local laws in connection with any work performed hereunder.

Engineer will seek written CITY approval to accept any contract or perform any services for any person, entity, or business working on this project. CITY may waive this potential conflict, but such waiver is at CITY's sole discretion and its decision shall be final.

5. Ownership of Documents

As part of the total compensation which CITY has agreed to pay Engineer for the professional services to be rendered under this Contract, Engineer agrees that hard copies of all finished and unfinished documents, data, studies, surveys, drawings, specifications, field notes, maps, models, photographs, preliminary reports, reports, bid packet/construction contract documents/advertisement for bids incorporating any CITY standard provisions provided by Engineer, will remain the property of the CITY. Engineer will furnish CITY with paper and electronic copies, to the extent they are available, of all of the foregoing to facilitate coordination, however, ownership of the underlying work product shall remain the intellectual property of the Engineer. Engineer shall have the right to use such work products for Engineer's purposes. However, such documents are not intended to be suitable for reuse by CITY or others on extension of the Project or on any other project. Any reuse without the express written consent of the Engineer will be at reuser's sole risk and without liability or legal exposure to the Engineer, and CITY to the extent allowed by law, shall hold harmless the Engineer from all claims, damages, losses, expenses, and costs, including attorneys' fees arising out of or resulting from the reuse of said documents without the Engineer's consent. The granting of such consent will entitle the Engineer to further compensation at rates to be agreed upon by CITY and the Engineer. The above notwithstanding,

Engineer shall retain all rights in its standard drawing details, designs, specifications, databases, computer software and any other proprietary and intellectual property information provided pursuant to this Contract, whether or not such proprietary information was modified during the course of providing the services.

6. Insurance

A. Engineer agrees to maintain Worker's Compensation and Employer's Liability Insurance to cover all of its own personnel engaged in performing services for CITY under this Contract in at least the following amounts:

Workmen's Compensation – Statutory
Employer's Liability – $100,000
Bodily Injury by Disease - $500,000 (policy limits)
Bodily Injury by Disease - $100,000 (each employee)

B. Engineer also agrees to maintain Commercial General Liability, Business Automobile Liability, and Umbrella Liability Insurance covering claims against Engineer for damages resulting from bodily injury, death or property damages from accidents arising in the course of work performed under this Contract in not less than the following amounts:

$2,000,000 General aggregate limit

$1,000,000 each occurrence sub-limit for all bodily injury or property damage incurred all in one occurrence

$1,000,000 each occurrence sub-limit for Personal Injury and Advertising

C. Engineer shall add CITY, its City Council members and employees, as an additional insureds on all required insurance policies, except worker's compensation, employer's liability and errors and omissions insurance. The Commercial General Liability Policy and Umbrella Liability Policy shall be of an "occurrence" type policy.

D. Engineer shall furnish CITY with an Insurance Certificate on the date this Contract is executed and accepted by CITY, which confirms that all above required insurance policies are in full force and effect.

E. Engineer agrees to maintain errors and omissions professional liability insurance in the amount of not less than one million dollars ($1,000,000) annual aggregate, on a claims made basis, as long as reasonably available under standard policies.

7. **INDEMNIFICATION**

ENGINEER SHALL INDEMNIFY AND SAVE HARMLESS THE CITY AND ITS CITY COUNCIL MEMBERS AND EMPLOYEES FROM SUITS, ACTIONS, LOSSES,

DAMAGES, CLAIMS, OR LIABILITY, INCLUDING WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, ALL EXPENSES OF LITIGATION, COURT COSTS, AND REASONABLE ATTORNEY'S FEES FOR INJURY OR DEATH TO ANY PERSON, OR INJURY TO ANY PROPERTY, RECEIVED OR SUSTAINED BY ANY PERSON OR PERSONS OR PROPERTY, TO THE EXTENT CAUSED BY THE NEGLIGENT ACTS OF ENGINEER OR ITS AGENTS OR EMPLOYEES, IN THE EXECUTION OF PERFORMANCE OF THIS CONTRACT.

ENGINEER'S TOTAL LIABILITY TO CITY FOR ANY LOSS OR DAMAGES FROM CLAIMS ARISING OUT OF, OR IN CONNECTION WITH, THIS CONTRACT FROM ANY CAUSE INCLUDING ENGINEER'S STRICT LIABILITY, BREACH OF CONTRACT, OR PROFESSIONAL NEGLIGENCE, ERRORS AND OMISSIONS SHALL NOT EXCEED ONE MILLION DOLLARS ($1,000,000). NEITHER PARTY TO THIS AGREEMENT SHALL BE LIABLE TO THE OTHER PARTY OR ANY THIRD PARTY CLAIMING THROUGH THE OTHER RESPECTIVE PARTY, FOR ANY SPECIAL, INCIDENTAL, INDIRECT, PUNITIVE, LIQUIDATED, DELAY OR CONSEQUENTIAL DAMAGES OF ANY KIND INCLUDING BUT NOT LIMITED TO LOST PROFITS OR USE OF PROPERTY, FACILITIES OR RESOURCES, THAT MAY RESULT FROM THIS AGREEMENT, OR OUT OF ANY GOODS OR SERVICES FURNISHED HEREUNDER.

8. Addresses for Notices and Communications

CITY
Amy Williams, P.E.
Director of Public Works/City Engineer
City of Rockwall

Rockwall, Texas 75087

ENGINEER
Dannenbaum Engineering Company – Dallas, LLC
3030 Lyndon B. Johnson Fwy
STE 910
Attn: Daniel W. Everett, P.E.

All notices and communications under this Contract shall be mailed or delivered to **CITY** and **Engineer** at the above addresses.

9. Successors and Assigns

CITY and Engineer each binds itself and its successors, executors, administrators and assigns to the other parties of this Contract and to the successors, executors, administrators and assigns of such other parties, in respect to all covenants of this Contract. Except as noted in the first part of this Paragraph, neither CITY nor Engineer shall assign, sublet or transfer its interest in this Contract

without the written consent of the other. Nothing herein shall be construed as creating any personal liability on the part of any officer, council member, employee or agent of any public body which is a party hereto.

10. Termination for Convenience of the Parties

Engineer and CITY may terminate this Contract for their convenience at any time by giving at least thirty (30) days notice in writing to each other. If the Contract is terminated by CITY and/or Engineer as provided herein, Engineer will be paid for the Work provided and expenses incurred up to the termination date, if such final compensation is approved by CITY, in its sole discretion. If this Contract is terminated due to the fault of Engineer, Paragraph 10 hereof, relative to Termination for Cause, shall apply.

11. Changes

CITY may, from time to time, request changes in the Scope of Work of **Engineer** to be performed hereunder. Such changes, including any increase or decrease in the amount of **Engineer's** compensation, or time for performance, which are mutually agreed upon by and between **CITY** and **Engineer**, shall be incorporated in written amendments to this Contract. Any subsequent contract amendments shall be executed by the City Manager or other authorized representative as designated by the City Manager or City Council.

Any alterations, additions or deletions to the terms of this Contract, including the scope of work, shall be by amendment **in writing** executed by both CITY and Engineer.

13. Reports and Information

Engineer, at such times and in such forms as **CITY** may reasonably require, and as specified in the Scope of Work or in additional Contract Amendments shall furnish **CITY** periodic reports pertaining to the Work or services undertaken pursuant to this Contract, the cost and obligations incurred, or to be incurred in connection therewith, and any other matter covered by this Contract.

14. Entire Agreement

This Contract and its Attachments and any future Contract Amendments constitute the entire agreement, and supersede all prior agreements and understandings between the parties concerning the subject matter of this Contract.

15. Waiver

The failure on the part of either party herein at any time to require the performance by the other party, of any portion of this Contract, shall not be deemed a waiver of, or in any way affect that party's rights to enforce such provision, or any other provision. Any waiver by any party herein of any provision hereof, shall not be taken or held to be a waiver of any other provision hereof, or any

other breach hereof.

16. Severability

The invalidity or unenforceability of any provision of this Contract shall not affect the validity or enforceability of any other provision of this Contract.

17. Survival

Any and all representations, conditions and warranties made by Engineer under this Contract are of the essence of this Contract and shall survive the execution, delivery and termination of it.

18. Governing Powers and Law

Both Parties agree and understand that the City does not waive or surrender any of its governmental powers by execution of this Agreement. To that end, the parties further understand that this agreement shall not be considered a contract for goods or services under Texas Local Government Code, Section 271.151 and Contractor waives any right or entitlement granted said provisions. This Contract is governed by the laws of the State of Texas and all obligations of the parties under this Contract are performable in Rockwall County, Texas.

19. Attorney's Fees

If it is necessary for either Party herein to file a cause of action at law or in equity against the other Party due to: (a) a breach of this Contract by the other Party and/or (b) any intentional and/or negligent act or omission by the other Party arising out of this Contract, the non-breaching or non-negligent Party shall be entitled to reasonable attorney's fees and costs, and any necessary disbursements, in addition to any other relief to which it is legally entitled.

20. State or Federal Laws

This Contract is subject to all applicable federal and state laws, statutes, codes, and any applicable permits, ordinances, rules, orders and regulations of any local, state or federal government authority having or asserting jurisdiction, but nothing contained herein shall be construed as a waiver of any right to question or contest any such law, ordinance, order, rule or regulation in any forum having jurisdiction.

Attachment "A"
Ridge Road West Reconstruction Project (Shores Blvd. to SH 205)
For
City of Rockwall

Scope of Services

Project Understanding

The City of Rockwall (City) wishes to reconstruct Ridge Road West, an existing Two lane roadway, from Shores Blvd to SH 205 , approximately 4,100 feet in length. The roadway lies within an Single Family development area of the City of Rockwall. Reconstruction will be two lane divided: two vehicle lanes (41' B-B concrete curb and gutter) in each direction with 9' parking and 5 ft sidewalks on each side. These improvements will be with the existing 60' (GIS from City website measures 80') Right of Way (ROW); however, the contract will include a provision for 20 parcel takes or easements in the event that they are required.

The existing storm sewer will be analyzed using current City drainage criteria and improvements will be designed where the existing system is inadequate. Sanitary sewer And water lines will be adjusted as necessary to accommodate conflicts with the proposed paving and storm sewer/culvert improvements.

Other design components include coordinating with ONCOR for street lighting, utility coordination, TDLR compliance with ADA and traffic control plans.

Dannenbaum Engineering will provide plans, specifications, estimates, and permits for the project and will support the City of Rockwall's advertising/bidding.

BASIC SERVICES

1. Schematic Conceptual Design (30%)

1.1. Project Management

1.1.1. Conduct Dannenbaum Engineering internal project kickoff meeting with entire project team and City Staff.

1.1.2. Prepare and send Project Status Update (PSU) to City's Project Manager on monthly basis. PSU will address work completed in previous period, work in progress and/or anticipated to be completed in next period, actions or information needed from City, and a schedule update.

1.1.3. Develop design criteria and design decisions tables.

1.1.4. Prepare project correspondence and invoicing documents.

1.1.5. Prepare and submit project schedule to City staff and provide general project management activities.

1.1.6. Project Administration

- Prepare project correspondence and invoicing documents

1.2. Project stakeholder coordination

- Develop project stakeholder contact list including but not limited to franchise utilities, City's water and sewer department, traffic department, and other governmental entity stakeholders etc.
- Conduct progress meetings to monitor the development of the project. During this phase of the project, conduct up to two (2) meetings with the City staff regarding project status and

coordination issues. The first meeting will be the project kick-off meeting, and the second meeting will be the conceptual design presentation and review.

1.3. Public Meetings and Public Input Surveys

1.3.1. Meetings

1.3.1.1. Attend two (2) public involvement meeting as directed by City staff. Provide exhibits suitable for public meeting use depicting street section, alignments etc. Support City staff during meetings by providing technical information, responding to citizen questions, and recording citizen input.

1.3.1.1.1. First Public Meeting will be with adjacent property owners and residents.

- Mail out all first public meeting notification for the City.
- Revise 30% Schematics Roll Plots based on public input from first public meeting and City direction to be used in second public meeting.

1.3.1.1.2. Second Public Meeting will be with adjacent property owners and residents as well as the neighborhood.

- Mail out all second meeting public meeting notification for the City (Neighborhood to be at a typical 500ft buffer off the street)
- Revise 30% Schematics Roll Plots based on public input from second public meeting and City direction to be used in City Council presentation for schematic and typical section approval.

1.3.2. Public Input Surveys

- Work with City to develop Public Input Survey to be sent to adjacent property owners and residents.
- Mail out surveys to adjacent property owner and residents.
- Tally survey results and other received public input into presentable format to City Staff and City Council.

1.4. Schematic Roll Plot and Graphics (30%)

The following services will be provided as part of the Conceptual Design Phase (30%):

- Review and research previously prepared construction plans record documents, and other pertinent information related to proposed project.
- Review City master plans, design standards, specifications, construction details, and other pertinent information that may impact the design. Review of documents will include but not limited to:
  - City of Rockwall Master Thoroughfare Plan
  - City of Rockwall Water/Wastewater Master Plan
  - City of Rockwall Standards of Design and Construction
  - City of Rockwall Trail Master Plan
- Develop complete and accurate base map showing all existing Right-of-Way (ROW), easements, and utilities.
- Develop and evaluate typical sections (up to two (2)) to use for Ridge Road West and other intersecting streets with in the project limits.
- Develop drainage area maps and analyze street and inlet capacities.
- Develop horizontal alignments for roadway,
- Water lines and wastewater lines will remain in place but will be evaluated for conflicts.
- Develop vertical alignment for roadway and cut cross sections at critical points, at center of driveways, alley approaches, cross streets, lead walks, at alignment geometric points and at 25’ intervals to evaluate the grading.
- Review City Master Trail Plan and incorporate hike and bike trails if necessary.

- Prepare 30% schematic paving plan and profile roll plots, produced at 1" =40' horizontal scale and 1" =5' vertical scale. The horizontal alignment of proposed water lines and sewer lines will be included in the roll plots.
- Prepare cross sections sheets.
- Meet with City staff and present concept paving plan and profile roll plots.
- Incorporate comments and feedback from City staff and other stakeholders prior to public meetings.

1.5. Drainage Analysis (30%)

The following services will be provided as part of the Conceptual Design Phase (30%):

- Review and research existing construction plans and record documents, historical flooding events and other pertinent information related to the existing drainage infrastructure along, upstream and downstream of the proposed project.
- Prepare a hydrologic and hydraulic analysis of the existing drainage infrastructure and prepare a report in memo format signed and sealed. Analysis/report shall include the following.
    - Existing drainage infrastructure analysis
        - Drainage Area Map of existing conditions/infrastructure.
        - Analysis effect on existing system of proposed off-site development or infrastructure improvements currently being planned.
        - Drainage calculations – Drainage Area, Inlet, Storm Sewer, Culvert, etc. (to be in City Standard's tabular format)
        - Synopsis of hydraulic deficiencies in written and plan format, includes downstream off-site drainage infrastructure.
        - Synopsis of structural deficiencies of drainage system as a result of TV inspection in written and plan format.
    - Recommendation of improvements to existing drainage system to meet the City's current 100-year design storm criteria.
        - Drainage Area Map of proposed improvements
        - Proposed drainage calculations – Drainage Area, Inlet, Storm Sewer, Culvert, etc. (to be in City Standard's tabular format)
        - Summary of proposed improvement of drainage infrastructure in written and plan format to fix hydraulic and structural deficiencies in order to meet current City drainage criteria standards.

1.6. Existing Traffic Analysis and Recommendation (30%)

The following services will be provided as part of the Conceptual Design Phase (30%):

- City will conduct Traffic Counts, Speed Studies, and Accident Reports from Police Department along Ridge Road West.
- Consultant shall take the data provide by the City and analysis in order to provide a recommendation in memo format signed and sealed of proposed improvements along the corridor.

2. Construction Documents

2.1. Project Management

- Conduct progress meetings at each stage of the construction documents phase to monitor the development of the project regarding project status, coordination issues and go over City review comments of the plans.

- Coordinate with other utilities, (electric power, cable TV, phone, gas, optic fiber, etc.)
- Prepare and send Project Status Update (PSU) to City's Project Manager on monthly basis. PSU will address work completed in previous period, work in progress and/or anticipated to be completed in next period, actions or information needed from City, and a schedule update.
- Update project schedule and interim milestones (coordinate with City staff as necessary)
- Project site visits (up to three (3) trips)

2.2. Construction Plans, Specifications and Estimates (30%, 90%, 100%)

2.2.1. Submittals

Dannenbaum Engineering will be submit 60%, 90% and 100% submittals for the City for review and comment. The following will be required for each submittal:

- Construction Plans
  - Two (2) Full Size copies – 22"x34"
  - Two (2) Half Size copies – 11"x17"
  - One (1) PDF copy
  - One (1) PDF copy– Scanned City comments previous submittal
- Engineers Opinion of Construction Cost
- Construction Contract Template/Specification Book

2.2.2. Construction Plans

Each plan sheet in the construction plans set will conform to the Engineering Drawing Requirements set forth in the City of Rockwall's Standards of Design and Construction. Plan sheets will also include any other additional documentation, notation, and clarification required by the City's Project Manager to prove design and constructability of the project. Each stage of the construction plan review process will incorporate any changes associated with City comments on previous submittals.

Below is a table of the required construction plan sheets and which submittals they are required.

Plan Sheets	**60%**	**90%**	**100%**
Cover Sheet	X	X	X
Legend Sheet	X	X	X
General Notes Sheet	X	X	X
Existing Condition Plan (1"=20' scale)	X	X	X
Horizontal/Vertical Control Sheet (1"=40' scale)	X	X	X
Typical Sections (Existing and Proposed)	X	X	X
Erosion Control Plan (1"=40' scale)		X	X
Demolition/Removals Plan (1"=20' scale)	X	X	X
Roadway Plan/Profiles (1"=20'H, 1'=5'V scale)	X	X	X
Alley and Driveway Plan/Profile (1"=20'H, 1'=5'V scale)		X	X
Intersection Grading Plan (major and critical intersections)		X	X
Pavement Signage and Striping Plan (1"=20' scale)		X	X
Drainage Area Map (Existing and Proposed)	X	X	X
Drainage Calculations (Area, Inlet, Storm, Culvert)		X	X
Drainage Plan/Profile (Trunks and Laterals) (1"=20'H, 1'=5'V scale)	X	X	X
Retaining Wall Plan/Profile (1"=20'H, 1'=5'V scale)	X	X	X

Lighting/Illumination Plan		X	X
Traffic Signal Plans (Existing and Proposed)		X	X
Construction Sequencing Phasing Narrative	X	X	X
Detour Plan (for each Phase)		X	X
Traffic Control Plan (for each phase & typ. sections) (1"=40' scale)		X	X
Roadway Cross-Sections (25' int. & crit. pts.) (1"=20'H, 1'=5'V scale)	X	X	X
Structural Layout Sheets		X	X
Details (for each section of plans)		X	X

Each subsection below details out the services to be perform for each section of the construction plan set.

2.2.2.1. Roadway Design

- Incorporate the preliminary design submittal review comments
- Prepare plan / profile sheets (24"x36" plan sheets at a scale of 1"=20' horizontal, and 1"=5' vertical).
- Analyze all driveways within the project and develop driveway adjustment and crosswalk profiles as needed. Typically driveways will be defined vertically by profiles.
- Develop design cross-sections
    - Develop on 25' station intervals and other critical points.
    - Show pavement and subgrade, right-of-way limits, sides slopes, pavement cross slopes, curbs, and retaining walls (if applicable)
    - Cross-sections will be provided in the plan set.
- Prepare roadway details to clarify intent of design
- Modify standard details as needed and include

2.2.2.2. Drainage

- Create Drainage Area Maps (existing and proposed)
- Create Drainage Calculation Sheets (Tables to be formatted to match City Standard's tabular format)
- Identify the need for additional drainage easements to accommodate the proposed offsite drainage improvements (if required)
- Perform final storm sewer sizing and alignment design. Prepare final inlet design sheets and hydraulic design sheets for inclusion in the plans.
- Prepare storm sewer plan/profile sheets depicting storm sewer lines, inlets, junction boxes, connections, manholes, utility crossings and the hydraulic grade lines.
- Prepare profiles for all trunks and laterals (to be profiled along centerline of pipe)
- If drainage flow patterns/areas are changing due to proposed improvements then existing downstream and upstream systems will be analyses and included in plan set to prove that there are no adverse impacts as a result. Full Hydrologic and Hydraulic Calcs Sheets and storm sewer plan and profiles sheets for these existing upstream and downstream systems are to be included in the plan set.
- Prepare drainage details to clarify intent of design.
- Compile applicable City standard details. Modify standard details as needed.
- Prepare erosion control plan.

2.2.2.3. Utilities

2.2.2.3.1. Public (Water, Wastewater, Storm Drainage, etc.)

- Establish the location of existing public utilities based upon information provided by the City, SUE and field survey information

2.2.2.3.2. Franchise Utility Coordination

- Identify franchise utility contacts
- Send one set of plans to each franchise utility for their review will be submitted at each phase. Request each franchise utility to mark up the plans to show the size, type and location of their utilities.
- Notify the City if any relocations are required
- Dannenbaum Engineering shall perform the coordination with the franchise utilities if any relocations are required.
- Attend City ran Franchise Utility Coordination Meetings (typically 2-4 meetings per year are held). Dannenbaum Engineering will give back ground on particular project and coordinate with franchise utility companies on foreseen conflicts and pass out current plan set.
- .

2.2.2.4. Traffic

2.2.2.4.1. Pavement Marking and Signing Plans

- Determine potential conflicts with existing signs and propose sign relocations
- Prepare crosswalk pavement marking and signing layouts in accordance with City design standards and the Texas Manual on Uniform Traffic Control Devices (TMUTCD).
- Prepare details to clarify intent design
- Compile applicable City standard details. Modify standard details as needed.

2.2.2.5. Traffic Control Plans, Detour Plans, Construction Sequencing/Phasing

- Develop construction sequence plan showing:
  - Construction area for each phase of construction and closure of existing travel lanes (if needed).
  - Temporary signing and striping, barricades, and other channelization device
  - Narrative of the sequence of work.
  - Detour Plan for each construction phase
  - Storm sewer construction phasing.
  - Public utilities relocation phasing.
  - Pedestrian routing during construction.
- Develop typical cross section showing lane widths, edge conditions, channelization and proposed construction area.
- Develop typical driveway staging plans for similar driveways. Develop custom driveway staging layouts for special conditions.
- Prepare traffic control details to clarify intent of design.

2.2.3. Specifications/Construction Contracts

Prepare general notes, specification data, and final Bid Book in accordance with City of Rockwall requirements. Identify and prepare special specifications and/or special provisions applicable to the project. Prepare Bid-Tab sheets of applicable items for Contractor to fill/present bid prices.

- Contact documents, including the following:
  - City of Rockwall standard construction contract forms
  - Notice to bidders

- Special instructions to bidders
- Bid form (Bid-Tab) – Electronic for Bidding
- Standard construction contract
- Performance bond
- Payment bond
- Maintenance bond
- Certificate of insurance
- General conditions
- Special conditions
- Technical specifications
- Permits (TXDOT, City of Dallas, etc.)
- Geotechnical Report

2.2.4. Estimates

Compile an overall opinion of probable construction cost based on current market values. Cost shall be broken out in to separate schedules for each section of the job.

2.3. Agency Permitting/Coordination (City of Dallas, NTMWD, TDLR, etc.)

2.3.1. City of Dallas

- Dannenbaum Engineering to coordinate with the City of Dallas on items related to the project for work within the Lake Ray Hubbard Takeline. This shall include all coordination meetings, plan submittals, permit submittals, etc. in order to achieve acceptance of proposed improvements.

2.3.2. NTMWD

- Dannenbaum Engineering to coordinate with the NTMWD on items related to the project where any improvements cross any NTMWD line or facility. This shall include all coordination meetings, plan submittals, permit submittals, etc. in order to achieve acceptance of proposed improvements.

2.3.3. Accessibility Review (TDLR)

- Prepare a completed application for submittal to the Texas Department of Licensing and Regulation for review in accordance with the Elimination of Architectural Barriers Act.
- Dannenbaum Engineering to complete application and submit with set of plans to a Registered Accessibility Specialist (RAS) from review and TDLR project registration. All coordination and fees with TDLR compliance will be done by the Dannenbaum Engineering
- While we do not anticipate accessibility revisions to be required, we will address minor revisions to the plans based on review comments from the RAS.

SPECIAL SERVICES

3. Data Collection & Property Research / Topographic and Design Survey

3.1. Data Collection and Property Research

3.1.1. Gather existing plat information

3.1.2. Collect property owner and record information

3.1.3. Gather existing ROW and easement information, identify all easements through typical research methodologies (i.e. plats, court house filings, etc.).

3.2. Topographic and Design Survey

3.2.1. The limits of the survey shall be from the intersection of Ridge Road West and Shores Blvd to the intersection of Ridge Road West and SH 205. The survey shall be from ROW

line to ROW line (60 foot ROW) of Ridge Road West. Survey will include intersecting roadways extending 400 feet along each leg of the major intersections and 200 feet along each leg of the minor intersections.

3.2.2. Establish horizontal control points at 500' maximum spacing.

3.2.3. Establish a vertical control benchmark circuit as needed throughout the project. Use existing City established monument information for the City and tie survey into.

3.2.4. Set control points, which shall be based on NAD-83, on both sides of the roadway, as required to maintain horizontal control throughout the project limits.

3.2.5. Perform a field survey to identify and locate existing topographic elements within the roadway corridor. All identified topographic elements shall be tied down horizontally and vertically. The field survey shall not limited to the following:

- Property corner monumentation
- Existing pavement, curbs, sidewalks, barrier free ramps, etc.
- Roadway and lane striping
- Driveways
- Existing storm sewer inlets, manholes, junction boxes Headwalls (including culvert sizes and invert elevations)
- Outfalls, bridges and erosion control
- Existing driveway culverts and swales (flowlines, sizes, types, etc.)
- Guardrail
- Utility manholes, vaults, water valves, water meters, wastewater cleanouts, sprinkler heads, telephone poles, power poles, utility markers, other public utilities and franchise utilities
- Traffic Signal poles, cabinets, pull boxes and other signal equipment
- Signs (excluding temporary signs)
- Trees, including species and caliper (all sizes)
- Landscape planters, Shrubs, rocks and other features.
- Buildings and permanent structures
- Retaining walls
- Fencing walls
- Fence limits and material types (excluding temporary fences)
- Mailboxes (types – wood, birck, stone)
- Other applicable physical features that could impact design

3.2.6. Perform cross-sections throughout project limits at 25-foot intervals and at grade breaks and prepare cross-section field notes.

3.2.7. Prepare a final topographic drawing in digital format (including contours and breaklines) showing the features located in the field, an ASCII coordinate file of the points located in the field, and a hard copy of the coordinates and feature descriptions.

3.2.8. Dannenbaum Engineering will perform site visits for the purposes of reviewing the provided survey in the field and making notes for additional survey needs and design considerations.

4. Geotechnical

4.1. Subsurface Exploration

4.1.1. Eight (8) borings are planned for this project. The borings and report will be thru a subconsultant.
The locations are as follows:

- One boring will be located near the intersection with Shores Blvd.
- One boring will be located near the intersection with with Hidden Valley Road.
- One boring will be located near West intersection with Hidden Valley Road
- One boring will be located near intersection with Ridge Road Ct.
- One will be located near Lacebark Lane.
- One will be located near Lacebark Lane and Twin Creek Lane.
- One will be located near Twin Creek Lane.
- One boring will be located near intersection with N Goliad Street.

4.1.2. Boring Services – Proposed retaining walls will be sampled to 25 feet. Pavement borings will be sampled to 15 feet. A total of 105 feet for drilling is planned.

- Check samples for consistency with a hand penetrometer
- Stake the boring locations using normal taping procedures
- Backfill bore holes and plug at the surface

4.2. Laboratory Services

4.2.1. Considering the planned facilities, anticipated soil conditions, and geology, the following laboratory test will be required for classification purpose and to determine strength characteristics:

- Visual Classification
- Moisture content and soil identification
- Liquid and plastic limit determinations
- Unconfined compression
- Calibrated hand penetrometer tests
- Lime/ph series tests
- Soluble sulfate tests (to determine lime-induced heaving potential)

4.3. Engineering Services

4.3.1. Prepare an engineering report presenting the following:

- Sample boring location map
- Boring logs and laboratory results
- General soil and ground-water conditions
- Recommendations will be based on a 30 year design life.
- Subgrade design recommendations for lime treated and cement treated
- Pavement design recommendation for reinforced concrete, asphalt or combination of concrete and asphalt system (including pavement thickness, strength, reinforcement size and spacing, and joint spacing)
- Recommendations for retaining walls
- Earthwork recommendations

4.3.2. The geotechnical engineer's design recommendations shall be relied upon by the civil and structural engineers for their design.

4.3.3. Submit one (1) paper copy and one pdf file copy of the report to the City

5. Video Inspection (Storm Sewer)

5.1.1. Scope of Work:

5.1.2. CCTV of approx. 1,800' of sewer of various sizes located in Rockwall, TX.

5.1.3. DFW Infrastructure, Inc. will furnish:
All necessary materials, personal protective equipment, skilled labor and supervision to facilitate the safe and productive project scope listed above.

5.1.4. Owner will furnish:

Access to worksite and all asset numbering (pipe identifiers and pipe features).
Deliverable shall be videos files on DVD/thumb drive and reports of each section of pipe.

6. Additional Services

Services not specifically identified in the Scope of Services above shall be considered additional and shall be performed on an individual basis upon authorization by the City of Rockwall. Such services shall include, but are not limited to the following:

6.1. Contingency design items

-End of Scope of Service-

ATTACHMENT "B"

Payment Schedule

Compensation for Basic Services in Tasks 1-4 shall be on a lump sum basis. The tabulation below establishes the not to exceed amount for each category of contract service:

	Task	Fee
	BASIC SERVICES	
1.	Schematic Conceptual Design (30%)	$76,714.98
2.	Construction Documents	
2.1	60% Design	$99,794.27
2.2	90% Design	$54,788.40
2.3	100% Design	$54,788.40
	Basic Services Subtotal:	**$286,086.05**
Compensation for special services under Tasks 5-3 shall be a labor fee plus expense (reimbursable) basis with the max fee shown below.		
	SPECIAL SERVICES	
3.	Data Collection & Property Research / Topographic and Design Survey	$40,265.00
4.	Geotechnical	$11,285.00
7.	Video Inspection (Sanitary Sewer and Storm Sewer)	$4,050.00
	Special Services Subtotal*	**$55,600.00**
	ENGINEERING SERVICES CONTINGENCY**	**$ 28,361.44**
	***(This service is a miscellaneous amount to be used at the discretion of the City for additional Services outside of the scope of the contract. This item will be controlled by the City and will only be used if the City chooses. The Engineer has no right or guarantee to the use of this Contingency)*	
	Project Total*	**$370,047.49**

Fees that are Lump Sum for each task and will be invoiced monthly based upon the overall percentage of services performed.

ATTACHMENT "C"

Project Schedule

Project Schedule shall either be a Gantt/Bar Chart/or list Table of Critical Project Tasks and dates

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: Brad Griggs, Assistant City Manager

FROM: Andy Hesser, Director of Parks and Recreation

DATE: October 31, 2018

SUBJECT: DESIGN CONTRACT FOR HARBOR NEIGHBORHOOD PARK

The FY 2019 approved budget includes $484,000 to develop phase 1 of a neighborhood park in The Harbor area to provide amenities for the residents in Park District 17. Funding source is from developer fees paid into the Recreation Development Fund.

Staff requests that Council consider the approval of a contract with MHS Planning and Design in the amount of $51,600 to provide design services for the parcel of takeline land immediately north of The Harbor fountains. The contract includes topographic survey, facilitating the public input process, site plan, construction and bid documents, and construction administration.

Contingent on Council approval, the design process would begin immediately and the public input meeting is schedule for the December 5th Park Board meeting. The contract draft has been reviewed by the City Attorney and is attached for review as well as preliminary concept plan draft.

MHS
PLANNING & DESIGN, LLC

October 22nd, 2018

Andy Hesser
Director of Parks and Recreation
108 E. Washington
Rockwall, Texas 75087

RE: Rockwall Urban Beach Project:

Mr. Hesser,

It is my pleasure to submit this proposal for planning and engineering for the development of the urban beach park located near 201 E Interstate 30 in Rockwall, Texas. Our proposed scope of services are as follows:

1. **Topographic Survey - $7,980.00**
   a. Boundary Verification - MHS will verify, or cause to be verified, the boundary of the subject tract and plot all known easements, adjoining plat boundaries and locate all visible utilities.
   b. Topographic Survey - MHS will, perform or cause to be performed, a topographic survey of the subject property in sufficient detail to create an existing ground surface of 1-ft contour intervals, obtain the required data and site features for design purposes. Underground utilities will be located based on surface locations provided by Texas One-call (811).

2. **Public Input, Presentations, and Revised Site Plan - $13,480.00**
   a. Site Assessment and Public Input
      i. On-Site Analysis
      ii. Prepare digital map with available topographic and aerial imagery
      iii. Public Input Meetings – meet with general public and City staff
   b. Preliminary Layouts and Design Development
      i. Two Preliminary Hand-Drawn Layouts
      ii. Meeting to Review Layouts and Design Development Slideshow
   c. Final Layout and Renderings
      i. One Final Computer Drafted Layout incorporated into the boundary and topographic survey
      ii. Overall Site Rendering and 2 Perspectives from the Layout
      iii. Animated Fly Through of Site

212 W. 9th Street Tyler, TX 75701 903.597.6566 mhs@mhsplanning.com TBPE#F-14571

d. Engineer's Estimate of Anticipated Cost
   i. Start-Up and Erosion Control
   ii. Excavation and Demolition
   iii. Paving
   iv. Water and Sanitary Sewer
   v. Storm Drainage
   vi. Electrical
   vii. Landscaping and Irrigation
   viii. Hardscape and Signage

3. Construction Plans, Specification and Contract Documents - $19,820

a. Based on the approved preliminary design documents, coordinate and/or prepare detailed construction drawings and specifications for erosion control, grading, paving, drainage, utilities, landscaping, and irrigation for the Project. The construction drawings and specifications shall be prepared for the project but may be bid and awarded under multiple construction contracts.

b. Furnish to the Owner construction plans and specifications. These documents typically include the following sheets, but all may not be required for this project:
   i. Cover Sheet
   ii. Erosion Control Plan and Notes
   iii. Drainage Area Map and Calculations
   iv. Drainage Plan
   v. Paving Plan and Horizontal Control
   vi. Water Plan
   vii. Landscaping Plan
   viii. Irrigation Plan
   ix. Project Details

4. Construction Administration - $10,320

a. Benchmarks only will be set for the construction work.

b. Make periodic site visits when deemed appropriate by the Consultant and City Staff to observe the progress and quality of executed work.

c. Check samples, catalog data, review testing and other data which the Contractor is required to submit as well as pay applications.

d. Conduct, in company with Owner's representative, a final inspection of the project for conformance with the design concept for the project and compliance with the plans, specifications, and contract documents.

Based on this scope of services, our lump sum fee for the project is $51,600.00. Please note that this is just an overall summary of our services, for a complete breakdown please see the attached design contract. If our services are needed for any additional elements, we will bill you hourly based on the hourly work sheet attached once the additional work is approved. If you have any questions or need us to revise our proposal, please let me know.

Sincerely,

William H. Spencer

212 W. 9th Street Tyler, TX 75701 903.597.6566 mhs@mhsplanning.com TBPE#F-14571

MHS Planning & Design
Hourly Rates
Effective January 1, 2018

Managing Partner	$ 150.00 per hour
Professional Engineer	$ 130.00 per hour
Senior Planner	$ 100.00 per hour
Landscape Architect	$ 90.00 per hour
CADD Drafter	$ 80.00 per hour
Word Processing/Clerical	$ 45.00 per hour
Mileage	$ .56 per mile
Reproduction, & all other expenses & contracted services	Cost plus 15%

STATE OF TEXAS

COUNTY OF ROCKWALL

This contract entered into by and between the City of Rockwall, Rockwall County, Texas (hereinafter called "OWNER") acting herein by Rick Crowley, City Manager, hereunto duly authorized, and MHS Planning & Design, LLC of Tyler, Smith County, Texas (hereinafter called the "CONSULTANT").

SECTION 1. EMPLOYMENT OF THE CONSULTANT

A. The Owner hereby employs the "CONSULTANT", and the Consultant agrees to provide consulting services in connection with the construction of Rockwall Urban Beach herein after called the "PROJECT" as described in Exhibit "A".

B. Length of Contract: The services of the Consultant shall commence upon execution of this contract. All of the services required and performed hereunder shall be completed within three years of the date of this contract. The Consultant shall not be responsible for the failure of the Contractor to perform under the terms of any construction contracts awarded as a result of the Consultant's professional services hereunder. The Consultant shall not be responsible for the failure of the Owner to budget funds, acquire property, receive bids, or otherwise diligently prosecute the Owner's responsibilities set forth herein in Section 4 or meet other terms of the potential grant agreement with Texas Parks and Wildlife Department.

SECTION 2. BASIC SERVICES OF THE CONSULTANT

A. General:

1. The Consultant agrees to perform and/or provide services in connection with the Project as hereinafter stated and in accordance with the Scope of Services letter dated October 22, 2018.

2. The Consultant shall serve as the Owner's professional representative in all phases of the project and shall give consultation and advice to the Owner during the performance of his services.

B. Preliminary Report Phase: During the preliminary report phase, the Consultant shall:

1. Consult with the Owner to determine the requirements of the Project.

2. Meet with interested citizens, Park Board, and City Staff (planning, engineering, and parks) to receive input and review the final site plan.

3. Procure a topographic survey and any existing surveys of right-of-way and utilities for use in the design of the project to be completed 4 months after execution of this agreement. The development of a detailed flood study, wetlands delineation survey and pond/lake permits is specifically excluded from the basic services of the Consultant and is addressed in Section 3 - Additional Services.

4. Provide to the Owner preliminary cost estimates for the improvements contained in the project.

5. Prepare a revised and detailed site plan and sketches for the project based on findings above.

C. Design Phase: After authorization from the Owner to proceed with the final design phase, the Consultant shall:

1. On the basis of the approved preliminary design documents coordinate and/or prepare detailed construction drawings and specifications for the Project. The construction drawings and specifications shall be prepared for the project to be bid under a single construction contract and not multiple contracts.

2. Furnish to the Owner construction plans and specifications so that the Owner may secure approval from Texas Department of Licensing & Regulation and other governmental agencies.

3. Advise the Owner of any adjustment of the cost estimate for the Project caused by changes in scope, design requirements or construction costs, and furnish a revised cost estimate for the Project based on the completed drawings and specifications.

4. Prepare the proposal forms, notice to bidders, and contract documents for submission by the Owner to the Owner's legal counsel for approval as to content, form, and legality.

5. Furnish copies of the contract documents consisting of plans, specifications, bid and contract documents.

6. Assist the Owner in obtaining and evaluating bids and awarding contracts for the construction of the Project. The assistance by the Consultant shall include the provision of advertisement for bids and after reviewing the bids received, making a recommendation on the awarding of a construction contract.

D. Construction Phase: After award of construction contract by the Owner, the Consultant shall:

1. Be responsible for setting benchmarks only for the construction work. The contractor shall determine alignment and grade of work to be constructed from these reference marks.

2. Make periodic visits to the site when deemed appropriate by the Consultant in the exercise of his professional judgment to observe the progress and quality of the executed work and to determine in general if the work is proceeding in accordance with the plans, specifications, and contract documents; he will not be required to make exhaustive or continuous on-site inspections to check the quality or quantity of the work; he will not be responsible for having quality control testing done; he will not be responsible for the techniques and sequences of construction and he will not be responsible for the contractor's failure to perform the construction work and will endeavor to guard the Owner against defects and deficiencies in the work of the Contractors, and may disapprove work as failing to conform to the plans and specifications, and contract documents.

3. Check samples, catalog data, laboratory testing, shop drawings, mill tests of materials and equipment, and other data which the Contractor is required to submit, only for the conformance with the design concept of the Project and compliance with the information given by the plans, specifications, and contract documents; and accept or reject all such submittal data furnished by the Contractor, materials used, and work performed by the Contractor as either complying or not complying with the intent of the plans, specifications, and contract documents.

4. Consult and advise with the Owner, act as the Owner's representative at the Project site, issue all instructions of the Owner to the construction contractors that do not conflict with good construction practice, and prepare routine change orders as required.

5. Based on his on-site observations as an experienced and qualified design professional and on his review of the contractor's applications for payment, determine the amount owing to the contractors in such amounts; such approvals of payment to constitute a representation to the Owner, based on such observations and review and data comprising such applications, that the work has progressed to the point indicated and that, to the best of his knowledge, information, and belief, the quality the work is in accordance with the plans, specifications, and contract document subject to the results of subsequent testing called for in the specifications and contract documents and any qualifications stated in this approval.

6. Conduct, in company with the Owner's representative, a final inspection of the Project for conformance with the design concept of the Project and compliance with the plans, specifications, and contract documents, and recommend in writing final payment to the contractor.

7. Make an inspection of the Project prior to expiration of the guarantee period and report observed discrepancies under guarantees provided by the construction contract.

8. Furnish the Owner, a set of record prints of drawings and addendum drawings showing those changes made during the construction period, based upon the marked-up prints, drawings, and other data furnished by the Contractor to the Consultant and which Consultant considers to be the significant.

SECTION 3. ADDITIONAL SERVICES

A. **General**: In addition to the basic services to be furnished by the Consultant under this proposal for which the payment of the standard consulting fee shall be made, the Consultant shall furnish additional services of the following types, if AUTHORIZED BY THE OWNER IN WRITING and approved by the Governing Body of Owner, to be paid for by the Owner as set out in Section 5, Paragraph B.

1. Additional services due to significant changes in general scope of the project or its design including, but not limited to, changes in size, complexity, or character of construction when such changes are requested by the Owner.

2. Revising at Owner's request studies, reports, design documents, drawings or specifications which were previously approved by the Owner except the Owner shall not be obliged to pay when:

   a) The initial project bids exceed the revised cost estimate (Section 2, C3) and the changes are required to bring the project cost within previously Owner established limits, or

   b) The changes are required by regulating authorities or to bring the design into compliance with applicable codes or ordinances, or

   c) The changes are required as a result of some error or omission on the part of the Consultant.

3. Furnishing of additional copies (beyond the basic contract sets) of reports and additional prints of drawings, specifications, and contract documents.

4. Investigations involving detailed consideration of operation, maintenance, and overhead expenses; and the preparation of rate schedules, earnings and expense statements, feasibility studies, appraisals, and valuations; detailed quantity surveys of material and labor; and material audits or inventories required for certification of force account construction by the Owner.

5. Additional or extended services during the construction made necessary by (1) work damaged by fire, vandalism, or other similar causes not under the control of the Consultant, (2) prolongation of the construction contract time by more than 25 percent, (3) construction contract default due to delinquency or insolvency of the construction contractor.

6. The preparation of instruction manuals or of operation and maintenance beyond those furnished with fixture and equipment incorporated into the job.

7. Additional services and costs necessitated by out-of-town travel required by the Consultant other than visits to the Project and consultation in the Owner's office as required by Section 2.

8. Serving as expert witness or giving counsel for the Owner in any litigation, real or potential, or other legal proceeding involving the Project where the Consultant is not a party to the litigation.

9. Additional services in connection with the Project not otherwise provided for in this agreement.

10. If requested in writing by the Owner one or more full-time Resident-Project Representatives will be furnished and directed by the Consultant in order to provide more extensive representation at the project site during the construction phase. Such resident project representation will be paid for by the Owner as indicated in Section 5. This section however shall not restrict the Owner from employing other persons for the purpose of full or part time inspection of the project.

11. Preparation of geotechnical investigation, construction materials testing, wetland delineation survey, lake permitting, flood studies, TxDOT coordination, City of Dallas coordination, 3-Way contracts, plats, boundary survey, legal descriptions, or deeds, record search, abstracting of ownership or other related surveyor work.

SECTION 4. THE OWNER'S RESPONSIBILITIES

The Owner shall:

A. Provide full information as to his requirements for the Project.

B. Assist the Consultant by placing at his disposal all reasonably available information pertinent to the site of the Project including all previous reports, boundary surveys, results of geotechnical testing and any other data relative to design or construction of the Project.

C. Make all provisions for the Consultant to enter upon public and private lands as required for the Consultant to perform his work under this Agreement.

D. Examine all studies, reports, sketches, estimates, drawings, specifications, proposals, and other documents presented by the Consultant and shall render in writing decisions pertaining thereto within reasonable time so as not to delay the work of the Consultant.

E. Advertise for proposals from bidders, open the proposals at the appointed time and place, and pay for all costs incident thereto.

F. Provide such legal, accounting, and insurance counseling services as may be required for the Project.

G. Designate in writing a person to act as Owner's representative with respect to the work to be performed under this Agreement; and such person shall have complete authority to transmit instructions, receive information, interpret and define Owner's policies and decisions with respect to materials, equipment and systems pertinent to the work covered by this Agreement.

H. Give prompt written notice to the Consultant whenever the Owner observes or otherwise becomes aware of any defect in the Project.

I. Furnish or direct the Consultant to provide at the Owner's expense, necessary additional services as stipulated in Section 3 of this Agreement.

J. Obtain all easements, right-of-way, and fee simple lands for the construction of the project and bear all cost incident thereto.

K. Pay all fees imposed by local, State, or Federal regulatory agencies for the cost of review and approval of completed plans and specifications which must be submitted to those agencies.

SECTION 5. PAYMENT FOR CONSULTING SERVICES

A. Standard Consulting Fee:

1. The Owner hereby agrees to pay to the Consultant for the performance of all services as set out in Section 2 in an amount not to exceed: Fifty-One Thousand, Six Hundred and no/100ths ($51,600.00) plus reimbursable mileage, postage and reproduction. This fee shall include all personnel, non-reimbursable expenses, equipment and materials required to complete the work as outlined in Section 2. Owner agrees to pay Consultant upon the following timeline:

   a) Consultant shall receive $7,980.00 within ten days of completion of the

Topographic Survey.

b) Consultant shall receive $6,740 upon the initiation of the Public Input process and $6,740 within ten days of completion of the Public Input process.

c) Consultant shall receive $9,910 upon the initiation of the development of the Construction Plans and Specification documents and $9,910 within ten days of the City's acceptance of the Construction Plans and Specification documents.

d) Consultant shall receive $1,290 monthly based on an estimated 8 months of construction. The full $10,320 shall not be paid till project reaches Final Completion.

The fee of $51,600 is based on a total construction budget of Four Hundred and Thirty Thousand Dollars and no/100ths ($430,000.00). The standard consulting fee shall be adjusted pro rata in the event the total construction costs deviate substantially from the scheduled construction amount. Any adjustment to the construction costs shall be approved by Owner prior to any adjustment to consulting fee. Payment shall be made upon receipt of the Consultant's detailed monthly invoices.

2. If this Agreement is terminated during any phase of the work authorized by the Owner, the Consultant shall be paid for services performed or provided during such phase on the basis of his reasonable estimate of the portion of such phase completed prior to termination. In the event of any termination, the Consultant shall be paid all terminal expense resulting therefrom plus payment of any additional services then due. All previous payments to the Consultant shall be credited to any terminal payment due to the Consultant.

B. Payment for Additional Services: The Owner shall pay the Consultant for properly authorized additional services enumerated in Section 3 at the Consultant's normal hourly rates in effect at the time of the authorization for personnel involved and equipment except that such compensation shall not apply to any Project maximum fee shown in this contract.

C. Past Due Payments: In accordance with State Law the Owner shall automatically compute interest on payments past due and pay said interest in whole with the principal payment. Payments shall be considered due and payable upon receipt of the monthly invoice from the Consultant and past due 14 days after the due date.

D. Retainage: No part of the Consultant's compensation shall be withheld from him due to failure of the Contractor to perform; nor shall the Consultant's fees be reduced in the event the amounts owning under any Construction Contract are reduced by change order, settlement, or litigation.

E. Extended Service: Should the term of service required of the Consultant extend beyond the original term as shown in Section IB through no fault of the Consultant, the Consultant shall be paid the fixed fee set forth in Section 5A(1) plus he shall be compensated for the services of all personnel plus any reimbursable expenses necessary to complete the project. Compensation shall be at the hourly published rates in effect at the time of expiration of the original grant agreement.

SECTION 6. GENERAL CONSIDERATIONS

A. Termination: This Agreement may be terminated by either party by giving ten (10) days written notice to the other party. If this Agreement is so terminated the Consultant shall be paid for work completed plus reimbursable expenses. Reimbursable expenses include actual expense for subcontracted services, transportation, and subsistence of personnel when traveling in connection with the Project; reproduction of reports, drawings, specifications, and similar Project related items.

B. Project Documents: As part of the total compensation which Owner has agreed to pay Consultant for the consulting services to be rendered under this Agreement, Consultant agrees that hard copies of all finished and unfinished documents, surveys, preliminary reports, reports, provided by Consultant, and paid for by Owner are, and will remain, the property of the Owner. Consultant will furnish Owner with paper and electronic copies, to the extent they are available, of all of the foregoing to facilitate coordination, however; ownership of the underlying work product shall remain the intellectual property of the Consultant. Consultant shall have the right to use such work products for Consultant's purposes. Owner may not use the documents for any purpose not intended under this Agreement without the written authorization of the Consultant.

C. Estimates: Since the Consultant has no control over the cost of labor and materials, or other competitive bidding and market conditions, the estimates of construction are to be made on the basis of his experience and qualifications but the Consultant does not guarantee the accuracy of such estimates as compared to the Contractor's bid, or the final contract cost.

D. Successors and Assigns: The Owner and the Consultant each binds himself and his officers, successors, executors, administrators and assigns to the other party of this Agreement in respect to all covenants of this Agreement; except as above, neither the Owner nor the Consultant shall assign, or transfer his interest in this Agreement without the written consent of the other. Nothing herein shall be construed as creating any personal liability on the part of any office or agent of any public body which may be a part hereto.

E. Records and Audits: The Consultant shall maintain accounts and records, including personnel, property and financial records, adequate to identify and account for all costs

pertaining to the contract and other such records as may be deemed necessary by the City to assure proper accounting for all project funds.

F. Findings Confidential: All reports, information, and data prepared or assembled by the Consultant under this contract are confidential and the Consultant agrees that they shall not be made available to any individual or organization without the prior written approval of the Owner unless ordered to be released by court order or ruling by the Texas Attorney General.

G. Interest of Members of City: No member of the governing body of the City, and no officer, employee, or agent of the City who exercises any functions or responsibilities in connection with the planning and carrying out of the program, shall have any personal financial interest, direct or indirect, in this contract; and the Consultant shall take appropriate steps to assure compliance.

H. Interest in Other Local Public Officials: No member of the governing body of the locality and no other public official of such locality, who exercises any functions or responsibilities in connection with the planning and carrying out of the program, shall have any personal financial interest, direct or indirect, in this contract; and the Consultant shall take appropriate steps to assure compliance.

I. Interest of Consultant and Employees: The Consultant covenants that he presently has no interest and shall not acquire interest, direct or indirect, in the study area or any parcels therein or any other interest which would conflict in any manner or degree with the performance of his services hereunder. The Consultant further covenants that in the performance of this contract, no person having any such interest shall be employed.

J. Personnel: The Consultant represents that he has, or will secure at his own expense, all personnel required in performing the services under this contract. Such personnel shall not be employees of the City. The Consultant further represents that although his staff does not include full time registered architects, that all personnel engaged in the work shall be fully qualified and shall be authorized or permitted under the Texas Engineering Practice Act, State Law and local law to perform such services which may be a part hereto.

K. Third Party Beneficiaries: Nothing contained in this Agreement shall create a contractual relationship with, or a cause of action in favor of a third party against either the Owner or the Consultant. The Consultant's services under this Agreement are being performed solely for the Owner's benefit, and no other entity shall have any claim against the Consultant because of this Agreement or the performance or nonperformance of services hereunder. The Owner agrees to include a provision in all contracts with contractors and other entities involved in this project to carry out the intent of this paragraph.

L. Insurance: The CONSULTANT also agrees to maintain Workers Compensation, Commercial General Liability, Business Automobile Liability, and Umbrella Liability Insurance, covering

claims against the CONSULTANT for damages resulting from bodily injury, death, or property damage from accidents arising in the course of work performed under this Agreement, in the following amounts:

Workmen's Compensation: Statutory

Commercial General Liability Insurance: Personal injury and property damage -- $500,000.00 combined single each occurrence and $500,000.00 aggregate;

Business Automobile Liability for all vehicles: Bodily injury and property damage -- $500,000.00 combined single limit each occurrence;

Umbrella Liability: $1,000,000.00

M. Indemnification: Consultant agrees to indemnify and hold harmless the Owner, its officers, officials, and employees, from and against claims for damages or losses, including claims for property damage, damage to property rights, and claims for personal injury or death, including all such claims for injury or damage made by the employees of Consultant, its contractors, subcontractors, agents or suppliers, caused by the negligence or fault of the Consultant or its agents, employees, subcontractors or assigns, arising from or out of the performance or non-performance of the Agreement or its operation.

This Agreement shall be governed by and construed in accordance with the laws of the State of Texas, and all obligations of the parties created hereunder are performable in Rockwall County, Texas. Venue for any action arising under this Agreement shall lie in Rockwall County, Texas.

IN TESTIMONY WHEREOF, the parties have affixed their hands and seals this the ____ day of _____, 2018.

CITY OF ROCKWALL
CITY COUNCIL MEMO

AGENDA DATE: 11/05/2018

APPLICANT: First Christian Church Disciples of Christ

AGENDA ITEM: **P2018-031;** *Lot 2, Block A, First Christian Church Disciples of Christ Addition*

SUMMARY:

Consider a request by First Christian Church Disciples of Christ for the approval of a replat for Lot 2, Block A, First Christian Church Disciples of Christ Addition, being a 5.231-acre parcel of land currently identified as Lot 1, Block A, First Christian Church Disciples of Christ Addition, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 47 (PD-47) for Single Family 10 (SF-10) District land uses, situated within the Scenic Overlay (SOV) District, addressed as 3375 Ridge Road (FM-740), and take any action necessary.

PLAT INFORMATION:

- ☑ The objective of this request is to replat a 5.231-acre parcel of land (*i.e*. *Lot 1, Block A, First Christian Church Disciples of Christ Addition*) into one (1) parcel of land (*i.e*. *Lot 2, Block A, First Christian Church Disciples of Christ Addition*) for the purpose of abandoning two (2) drainage easements and establishing utility, drainage, and detention easements necessary for the adjacent property to development.
- ☑ The surveyor has completed the majority of the technical revisions requested by staff, and this plat, conforming to the requirements for replats as stated in the *Subdivision Ordinance* in the *Municipal Code of Ordinances*, is recommended for conditional approval pending the completion of final technical modifications and submittal requirements.
- ☑ Conditional approval of this plat by the City Council shall constitute approval subject to the conditions stipulated in the *Recommendation* section below.
- ☑ With the exception of the items listed in the *Recommendation* section of this case memo, this plat is in substantial compliance with the requirements of the *Subdivision Ordinance* in the *Municipal Code of Ordinances*.

RECOMMENDATIONS:

Should the City Council choose to approve the *replat* for *Lot 2, Block A, First Christian Church Disciples of Christ Addition,* staff would recommend the following conditions:

1) All technical comments from the Engineering, Planning and Fire Departments shall be addressed prior to the filing of this plat;
2) Any construction resulting from the approval of this *replat* shall conform to the requirements set forth by the Unified Development Code, the International Building Code, the Rockwall Municipal Code of Ordinances, city-adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION:

On October 30, 2018, the Planning and Zoning Commission's motion to recommend approval of the replat with staff recommendations pass by a vote of 5-0 with Commissioners Logan and Lyons absent.

Notes:

1. Bearings and grid coordinates are based on Texas State Plane Coordinates. Projection: State Plane NAD83 Texas North Central Zone 4202, Lambert Conformal Conic, Feet (TX83-NCF).
2. Unless otherwise noted, a 5/8" iron rod with a yellow cap stamped "RPLS 3963" will be set at all lot corners, whenever possible, after all construction for this subdivision is completed.
3. According to my interpretations of the Rockwall County, Texas and Incorporated Areas, Flood Insurance Rate Map Number 48397C0040L, dated September 26, 2008, the subject property lies within flood Zone "X" and is not shown to be within a Special Flood Hazard Area. This statement does not imply that the property and/or structures thereon will be free from flooding or flood damage. On rare occasions, greater floods can and will occur and flood heights may be increased by man-made or natural causes. This statement shall not create liability on the part of the surveyor.
4. The purpose of this replat is to create a 20' and 30' Utility Easement, to create a 20' Drainage Easement, to abandon a 30.44' Drainage Easement and to abandon the Drainage Easement at the southeast corner of this subdivision (hatched for reference) and create a Drainage and Detention Easement.
5. The Drainage and Detention Easement shall be owned, operated, maintained and replaced by property owner.

OWNER'S CERTIFICATE & DEDICATION

STATE OF TEXAS
COUNTY OF ROCKWALL

WHEREAS FIRST CHRISTIAN CHURCH OF ROCKWALL, TEXAS, BEING THE OWNER OF A TRACT OF land in the County of Rockwall, State of Texas, said tract being described as follows:

BEING a 5.231 acre tract of land situated in the Edward Teal Survey, Abstract No. 207, City of Rockwall, Rockwall County, Texas and being all of Lot 1, Block A, First Christian Church, Disciples of Christ, Rockwall, Texas Addition, recorded in Cabinet E, Slide 361, Plat Records of Rockwall County, Texas (PRRCT), said 5.231 acre tract being more particularly described as follows:

BEGINNING at a point for corner near the base of a plastic fence post at the southeast corner of a called 9.4769 acre tract of land described in deed to RRDC, Ltd., recorded in Instrument 20170000023557, Deed Records, Rockwall, County, Texas (DRRCT), common to the northeast corner of said Lot 1, said corner being in the west boundary line of a called 12 acre tract of land described in a deed to Craig R. Duhon and Donna L. Huhon, recorded in Volume 693, Page 228, (DRRCT), from which a 5/8–inch iron rod with a yellow plastic cap stamped RPLS 3963 found for reference bears South 61 degrees 46 minutes 53 seconds West, a distance of 37.56 feet;

THENCE South 00 degrees 07 minutes 41 seconds West, along the common line of said Lot 1 and said 12 acre tract, a distance of 353.00 feet to a 5/8–inch iron rod with a yellow plastic cap stamped RPLS 3963 set for the southeast corner of said Lot 1, said corner being in the north right–of–way line of White Road, a variable width right–of–way;

THENCE North 89 degrees 08 minutes 58 seconds West, along the common line of said Lot 1 and said White Road, a distance of 671.35 feet to a 5/8–inch iron rod with a yellow plastic cap stamped RPLS 3963 set for the southwest corner of said Lot 1, said corner being at the intersection of the north right–of–way line of said White Road and the east right–of–way line of Farm to Market Road 740 (Ridge Road), a variable width right–of–way at this point;

THENCE North 07 degrees 56 minutes 38 seconds East, along the common line of said Ridge Road and said Lot 1, a distance of 67.66 feet to a 5/8–inch iron rod with a yellow plastic cap stamped RPLS 3963 set for corner;

THENCE North 15 degrees 04 minutes 23 seconds East, continuing along the common line of said Ridge Road and said Lot 1, a distance of 50.66 feet to a TxDOT monument found for corner;

THENCE North 05 degrees 45 minutes 12 seconds East, continuing along the common line of said Ridge Road and said Lot 1, a distance of 237.59 feet to the northwest corner of said Lot 1 and the southwest corner of said 9.4769 acre tract, from which a TxDOT monument bears South 58 degrees 52 minutes 38 seconds West, a distance of 0.41 feet;

THENCE South 89 degrees 09 minutes 00 seconds East, along the common line of laid Lot 1 and said 9.4769 acre tract, a distance of 625.79 feet to the POINT OF BEGINNING and containing 227,854 square feet or 5.231 acres of land.

NOW, THEREFORE, KNOW ALL MEN BY THESE PRESENTS:

FIRST CHRISTIAN CHURCH OF ROCKWALL, TEXAS, (the "Owner") is the undersigned owner of the land shown on this plat, designated herein as FIRST CHRISTIAN CHURCH, DISCIPLES OF CHRIST, ROCKWALL, TEXAS ADDITION, LOT 1–R, BLOCK A, a subdivision to the City of Rockwall, Texas. RRDC, LTD, (the "Developer") is the developer of the adjacent tract and is arranging for the construction of the sewer line and storm drain on the land shown in this plat based on the design developed by the Project Engineer. Owner hereby dedicates to the use of the public forever all water courses, drains, and easements thereon shown on the plat for the purpose and consideration therein expressed. Owner further certifies that all other parties who have a mortgage or lien interest in the FIRST CHRISTIAN CHURCH, DISCIPLES OF CHRIST, ROCKWALL, TEXAS ADDITION, LOT 1–R, BLOCK A subdivision have been notified and signed this plat. Owner understands and does hereby reserve the easement shown on this plat for the purposes stated and for the mutual use and accommodation of all utilities desiring to use or using same. Owner also understands the following:

1. No buildings shall be constructed or placed upon, over, or across the utility easements as described herein.

2. Any public utility shall have the right to remove and keep removed all or part of any buildings, fences, trees, shrubs, or other growths or improvements which in any way endanger or interfere with construction, maintenance or efficiency of their respective systems on any of these easements and any public utility shall at all times have the right of ingress or egress to, from and upon the said easements for the purpose of construction, reconstruction, inspecting, patrolling, maintaining, and either adding to or removing all or part of their respective systems without the necessity of procuring the permission of anyone
.
3. The City of Rockwall will not be responsible for any claims of any nature resulting from or occasioned by the establishment of grade of street in the subdivision.

4. Developer and Project Engineer shall bear total responsibility for the storm drain and improvements.

5. Developer and Project Engineer shall design and implement the drainage patterns and drainage controls such that properties within the drainage area are not adversely affected by storm drainage from the Property.

6. No new structure shall be constructed on any portion of this addition by the Owner or other person until the Developer and/or Owner has complied with all requirements of the Subdivision Regulations of the City of Rockwall regarding improvements with respect to the entire plat, including the actual installation of streets with the required base and paving, curb and gutter, water and sewer drainage structures, storm structures, and storm sewers, according to the specifications of the City of Rockwall; or until an escrow deposit satisfactory to the City is made by the Owner and/or Developer.

7. Unless and until accepted by the City, the Developer shall be responsible for repair and replacement of storm drainage lines located in Easements on the Property beginning at the boundary line of the adjacent property and ending at the detention pond in the Easement. Owner shall be responsible for the maintenance of the detention pond after reconstruction is completed by Developer.

I further acknowledge that the dedications and/or exaction's made herein are proportional to the impact of the Subdivision upon the public services required in order that the development will comport with the present and future growth needs of the City; I, my successors and assigns hereby waive any claim, damage, or cause of action that I may have as a result of the dedication of exactions made herein.

CITY OF ROCKWALL
CITY COUNCIL MEMO

AGENDA DATE: 11/05/2018

APPLICANT: Dub Douphrate *of Douphrate & Associates, Inc.*

AGENDA ITEM: **P2018-034;** *Lot 1, Block A, Rustic Warehouse Addition and Lot 9, Block 1, First Methodist Church Addition*

SUMMARY:

Consider a request by Dub Douphrate of Douphrate & Associates, Inc. on behalf of Trevor Arterburn of Teasdale Investments, LLC for the approval of a conveyance plat for Lot 1, Block A, Rustic Warehouse & Town Center Addition and Lot 9, Block 1, First United Methodist Church Addition being an 11.774-acre tract of land currently identified as Lot 8, Block 1 First United Methodist Church Addition and Tract 2 of the B. J. T. Lewis Survey, Abstract No. 255, City of Rockwall, Rockwall County, Texas, zoned Commercial (C) District, situated within the SH-205 Overlay (SH-205 OV) District, generally located in between S. Goliad Street [*SH-205*] and T. L. Townsend Drive, north of E. Yellow Jacket Lane, and take any action necessary.

COMMENTS:

☑ The applicant is requesting approval of a final/conveyance plat for the purpose of incorporating a portion of Lot 8, Block 1, First United Methodist Church Addition into Tract 2 of the B.J. T. Lewis Survey, Abstract No. 225 and final platting the lot as Lot 1, Block A, Rustic Warehouse Addition and Lot 9, Block 1, First United Methodist Church Addition. Staff should note that the site will not be developed and no permits will be issued without first having an approved site plan, civil engineering plans, and a replat of the property in accordance with the development procedures outlined in the Municipal Code of Ordinances and the Unified Development Code (UDC).

☑ The surveyor has completed the majority of the technical revisions requested by staff, and this plat, conforming to the requirements for final plats as stated in the *Subdivision Ordinance* in the Municipal Code of Ordinances, is recommended for conditional approval pending the completion of final technical modifications and submittal requirements.

☑ Conditional approval of this plat by the City Council shall constitute approval subject to the conditions listed in the *Recommendations* section below.

☑ With the exception of the items listed in the *Recommendation* section of this case memo, this plat is in substantial compliance with the requirements of the *Subdivision Ordinance* in the Municipal Code of Ordinances.

RECOMMENDATIONS:

If the City Council chooses to approve the final plat for *Lot 1, Block A, Rustic Warehouse Addition and Lot 9, Block 1, First United Methodist Church Addition*, staff would recommend the following conditions of approval:

1) All staff comments provided by the Planning, Engineering and Fire Department must be addressed prior to the submittal of a building permit; and,

2) Any construction resulting from the approval of this replat shall conform to the requirements set forth by the Unified Development Code (UDC), the International Building Code, the Rockwall Municipal Code of Ordinances, City adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION RECOMMENDATION:

On October 30, 2018, the Planning and Zoning Commission's motion to approve the final/conveyance plat with staff conditions passed by a vote of 5 to 0, with Commissioners Lyons and Logan absent.

N:\ALL FILES\DOUPHRATE\RUSTIC WAREHOUSE\RUSTIC PLAT 2018-08-07.dwg, Layout1 (2), 9/6/2018 10:53:38 AM

BEING an 11.687 acre tract of land situated in the *B.J.T. LEWIS SURVEY* and being all of Lots 1 and 2 of the *First United Methodist Church Addition* and all of Lots 1 and 2 of the *Teasdale Investments, LLC* addition, and being more particularly described as follows:

BEGINNING at a 1/2" iron rod found for corner at the intersection of the northeast right-of-way line of Ridge Road (a variable width right-of-way) and the southeast right-of-way line of Clem Road (a variable width right-of-way), said point being the most westerly corner of said Lot 1 of the *First United Methodist Church Addition*;

THENCE along said northeast right-of-way line of Ridge Road, the following courses and distances:

NORTH 41°36'17" WEST a distance of 584.67 feet to a 1/2" iron rod found for corner;

THENCE SOUTH 46°57'51" WEST a distance of 290.65 feet to a 1/2" iron rod found for corner;

THENCE NORTH 43°02'09" WEST a distance of 64.09 feet to a 1/2" iron rod found for corner;

THENCE NORTH 50°19'19" EAST a distance of 24.80 feet to a 1/2" iron rod found for corner;

Continuing along said northeast right-of-way line of Ridge Road, the following courses and distances:

NORTH 43°08'38" WEST a distance of 243.29 feet to a 1/2" iron rod found for corner;

THENCE leaving said northeast right-of-way line of Ridge Road, the following courses and distances:

NORTH 47°57'52" EAST a distance of 1,103.03 feet to a 1/2" iron rod found for corner;

THENCE along said curve to the left, having a central angle of 48°23'43", a radius of 1,050.00 feet, a chord bearing and distance of **SOUTH 42°01'26" EAST** 861.00 feet, and an arc length of 887.09 feet to a 1/2" iron rod found for corner;

THENCE SOUTH 41°51'40" EAST a distance of 181.06 feet to a 1/2" iron rod found for corner;

THENCE SOUTH 48°23'43" WEST a distance of 839.37 feet to a 1/2" iron rod found for corner;

THENCE SOUTH 41°36'17" EAST a distance of 430.22 feet to a 1/2" iron rod found for corner;

THENCE along said curve to the left, having a central angle of 90°00'00", a radius of 25.00 feet, a chord bearing and distance of **SOUTH 48°23'43" WEST** 35.36 feet, and an arc length of 39.27 feet to a 1/2" iron rod found for corner;

THENCE SOUTH 48°23'43" WEST a distance of 265.18 feet to a 1/2" iron rod found for corner;

POINT OF BEGINNING

CONTAINING an area of 11.687 acres of land, more or less.

OWNER'S DEDICATION

STATE OF TEXAS
COUNTY OF ROCKWALL

WHEREAS TEASDALE INVESTMENTS LLC and TRUSTEES OF THE FIRST UNITED METHODIST CHURCH OF ROCKWALL, TEXAS are the owners of a tract of land situated in the B.J.T. LEWIS SURVEY, Abstract No. 137, Rockwall County, Texas, and being all of Lots 1 and 2 of the FIRST UNITED METHODIST CHURCH ADDITION, an addition to the City of Rockwall, Rockwall County, Texas, according to the plat thereof recorded in Cabinet A, Slide 354 of the Plat Records of Rockwall County, Texas (PRRCT), and being all of Lots 1 and 2 of the TEASDALE INVESTMENTS LLC addition, an addition to the City of Rockwall, Rockwall County, Texas, according to the plat thereof recorded in Cabinet H, Slide 360 of the PRRCT, and being all of that tract of land described in deed to TEASDALE INVESTMENTS LLC and TRUSTEES OF THE FIRST UNITED METHODIST CHURCH OF ROCKWALL, TEXAS recorded in Instrument No. 20180000015111 of the Official Public Records of Rockwall County, Texas (OPRRCT), and being all of that tract of land described in deed to RUSTIC WAREHOUSE & TOWN CENTER ADDITION recorded in Instrument No. 20180000015111 of the OPRRCT

CITY OF ROCKWALL
CITY COUNCIL MEMO

AGENDA DATE: 11/05/2018

APPLICANT: Priya Acharya, PE; *Weir & Associates*

AGENDA ITEM: **P2018-036;** *Lot 8, Block A, Lakeshore Commons Addition*

SUMMARY:

Consider a request by Priya Acharya, PE of Weir & Associates, Inc. on behalf of Getra Thomason-Sanders of Chick-Fil-A, Inc. for the approval of a replat for Lot 8, Block A, Lakeshore Commons Addition, being a 1.401-acre parcel of land currently identified as Lot 2, Block A, Lakeshore Commons Addition, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 65 (PD-65) for General Retail (GR) District land uses, situated within the North SH-205 Overlay (N. SH-205 OV) District, addressed as 1979 N. Goliad Street [SH-205], and take any action necessary.

PLAT INFORMATION:

- ☑ The objective of this request is to replat a 1.401-acre parcel of land (*i.e. Lot 2, Block A, Lakeshore Commons Addition*) into one (1) parcel of land (*i.e. Lot 8, Block A, Lakeshore Commons Addition*) for the purpose of abandoning and dedicating certain easements on Lot 2, Block A, Lakeshore Commons Addition for the construction of a restaurant (*i.e. Chick-Fil-A)*.

- ☑ On April 18 2016, the City Council approved a preliminary plat [*P2016-012*] for Lots 1-4, Block A, Lakeshore Commons Addition.

- ☑ On April 3 2017, the City Council approved a final plat [*P2017-012*] for Lots 1-4, Block A, Lakeshore Commons Addition.

- ☑ On June 18 2018 the City Council approved a Specific Use Permit (SUP) [*Z2018-024*] to allow a restaurant with a drive-through on the subject property.

- ☑ On August 14, 2018, the Planning and Zoning Commission approved a site plan with a drive-through [*SP2018-020*] for a restaurant (*i.e. Chick-Fil-A*) on Lot 8.

- ☑ The surveyor has completed the majority of the technical revisions requested by staff, and this plat, conforming to the requirements for replats as stated in the *Subdivision Ordinance* in the *Municipal Code of Ordinances*, is recommended for conditional approval pending the completion of final technical modifications and submittal requirements.

- ☑ Conditional approval of this plat by the City Council shall constitute approval subject to the conditions stipulated in the *Recommendation* section below.

- ☑ With the exception of the items listed in the *Recommendation* section of this case memo, this plat is in substantial compliance with the requirements of the *Subdivision Ordinance* in the *Municipal Code of Ordinances*.

RECOMMENDATIONS:

Should the City Council choose approve the *replat* for *Lot 8, Block A, Lakeshore Commons Addition,* staff would recommend the following conditions:

1) All technical comments from the Engineering, Planning and Fire Departments shall be addressed prior to the filing of this plat;

2) Any construction resulting from the approval of this *replat* shall conform to the requirements set forth by the Unified Development Code, the International Building Code, the Rockwall Municipal Code of Ordinances, city-adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION:

On October 30, 2018, the Planning and Zoning Commission's motion to recommend approval of the replat with staff recommendations passed by a vote of 5-0 with Commissioners Logan and Lyons absent.

OWNER'S CERTIFICATE

STATE OF TEXAS
COUNTY OF ROCKWALL

WHEREAS MOORE WORTH INVESTMENTS, LLC, BEING THE OWNER OF A TRACT OF LAND IN THE COUNTY OF ROCKWALL, STATE OF TEXAS, SAID TRACT BEING DESCRIBED AS FOLLOWS:

BEING A TRACT OF LAND LOCATED IN THE JOHN H.B. JONES SURVEY, ABSTRACT No. 124, ROCKWALL COUNTY, TEXAS, BEING ALL OF LOT 2, BLOCK A, LAKESHORE COMMONS, AN ADDITION TO THE CITY OF ROCKWALL, ROCKWALL COUNTY, TEXAS, ACCORDING TO THE PLAT RECORDED IN INSTRUMENT No. 20170000015245, OFFICIAL PUBLIC RECORDS, ROCKWALL COUNTY, TEXAS (O.P.R.R.C.T.), AND BEING MORE PARTICULARLY DESCRIBED BY METES AND BOUNDS AS FOLLOWS:

BEGINNING AT AN "X" CUT FOUND IN THE SOUTH RIGHT-OF-WAY LINE OF NORTH LAKESHORE DRIVE (A VARIABLE WIDTH RIGHT-OF-WAY), BEING THE NORTHWEST CORNER OF SAID LOT 2, AND THE NORTHEAST CORNER OF LOT 1 OF SAID BLOCK A, LAKESHORE COMMONS;

THENCE ALONG THE SOUTH RIGHT-OF-WAY LINE OF SAID NORTH LAKESHORE DRIVE AND THE NORTH LINE OF SAID LOT 2 AS FOLLOWS:

(1) N 86°58'24" E, 80.03 FEET TO A 5/8" IRON ROD FOUND WITH A CAP STAMPED "STOVALL & ASSOC", BEING THE BEGINNING OF A CURVE TO THE RIGHT;

(2) EASTERLY, AN ARC LENGTH OF 44.60 FEET ALONG SAID CURVE TO THE RIGHT, HAVING A RADIUS OF 240.00 FEET, A DELTA ANGLE OF 10°38'54" AND A CHORD BEARING OF S 87°42'09" E, 44.54 FEET TO A 1/2" IRON ROD SET WITH A CAP STAMPED "WIER & ASSOC INC" BEING THE BEGINNING OF A REVERSE CURVE TO THE LEFT;

(3) EASTERLY, AN ARC LENGTH OF 65.42 FEET ALONG SAID REVERSE CURVE TO THE LEFT, HAVING A RADIUS OF 260.00 FEET, A DELTA ANGLE OF 14°25'01" AND A CHORD BEARING OF S 89°35'12" E, 65.25 FEET TO A 5/8" IRON ROD FOUND WITH A CAP STAMPED "STOVALL & ASSOC", BEING THE BEGINNING OF A COMPOUND CURVE TO THE LEFT;

(4) EASTERLY, AN ARC LENGTH OF 21.09 FEET ALONG SAID COMPOUND CURVE TO THE LEFT, HAVING A RADIUS OF 902.50 FEET, A DELTA ANGLE OF 01°20'20" AND A CHORD BEARING OF N 82°32'06" E, 21.09 FEET TO A 5/8" IRON ROD FOUND WITH A CAP STAMPED "STOVALL & ASSOC", BEING THE MOST NORTHERLY NORTHEAST CORNER OF SAID LOT 2 AND THE BEGINNING OF A REVERSE CURVE TO THE RIGHT;

(5) SOUTHEASTERLY, AN ARC LENGTH OF 85.01 FEET ALONG SAID REVERSE CURVE TO THE RIGHT, HAVING A RADIUS OF 80.00 FEET, A DELTA ANGLE OF 60°53'00" AND A CHORD BEARING OF S 67°41'34" E, 81.07 FEET TO A 5/8" IRON ROD FOUND WITH A CAP STAMPED "STOVALL & ASSOC", IN THE WEST RIGHT-OF-WAY LINE OF NORTH GOLIAD STREET (A VARIABLE WIDTH RIGHT-OF-WAY), SAID IRON ROD BEING THE MOST EASTERLY NORTHEAST CORNER OF SAID LOT 2;

THENCE S 14°17'14" E, ALONG THE WEST RIGHT-OF-WAY LINE OF SAID NORTH GOLIAD STREET AND THE EAST LINE OF SAID LOT 2, 165.99 FEET TO A A 1/2" IRON ROD SET WITH A CAP STAMPED "WIER & ASSOC INC" BEING THE SOUTHEAST CORNER OF SAID LOT 2 AND THE NORTHEAST CORNER OF LOT 3 OF SAID BLOCK A, LAKESHORE COMMONS ADDITION;

THENCE ALONG THE SOUTH LINE OF SAID LOT 2 AND THE NORTH LINE OF SAID LOT 3 AS FOLLOWS:

(1) S 75°42'46" W, DEPARTING THE WEST RIGHT-OF-WAY LINE OF SAID NORTH GOLIAD STREET, 74.36 FEET TO AN "X" CUT SET;

(2) S 86°59'47" W, 154.50 FEET TO A 5/8" IRON ROD FOUND WITH A CAP STAMPED "STOVALL & ASSOC";

(3) S 42°07'52" W, 17.76 FEET TO A 5/8" IRON ROD FOUND WITH A CAP STAMPED "STOVALL & ASSOC";

(4) N 72°06'04" W, 46.17 FEET TO AN "X" CUT FOUND;

(5) N 47°04'05" W, AT A DISTANCE OF 22.78 FEET PASSING THE NORTHWEST CORNER OF SAID LOT 3 AND AN ELL CORNER OF SAID LOT 1, CONTINUING ALONG THE EAST LINE OF SAID LOT 1 IN ALL A TOTAL DISTANCE OF 33.07 FEET TO AND "X" CUT FOUND IN THE EAST LINE OF SAID LOT 1 AND THE WEST LINE OF SAID LOT 2;

THENCE ALONG THE EAST LINE OF SAID LOT 1 AND THE WEST LINE OF SAID LOT 2 AS FOLLOWS:

(1) N 03°01'36" W, 116.19 FEET TO AN "X" CUT FOUND, BEING THE BEGINNING OF A CURVE TO THE LEFT;

(2) NORTHWESTERLY, AN ARC LENGTH OF 27.09 FEET ALONG SAID CURVE TO THE LEFT, HAVING A RADIUS OF 35.00 FEET, A DELTA ANGLE OF 44°20'38" AND A CHORD BEARING OF N 25°28'00" W, 26.42 FEET TO AN "X" CUT FOUND;

(3) N 03°01'36" W, 50.01 FEET TO THE PLACE OF BEGINNING AND CONTAINING 1.401 ACRES (61,014 SQUARE FEET) OF LAND, MORE OR LESS.

SURVEYOR'S CERTIFICATION:

NOW, THEREFORE KNOW ALL MEN BY THESE PRESENTS:

THAT I, AARON L. STRINGFELLOW, DO HEREBY CERTIFY THAT I PREPARED THIS PLAT FROM AN ACTUAL AND ACCURATE SURVEY OF THE LAND, AND THAT THE CORNER MONUMENTS SHOWN THEREON WERE PROPERLY PLACED UNDER MY PERSONAL SUPERVISION.

"THIS DOCUMENT IS RELEASED FOR THE PURPOSE OF REVIEW UNDER THE AUTHORITY OF AARON L. STRINGFELLOW, RPLS. NO. 6373 ON October 10, 2018. STATE OF TEXAS NO. 6373
EMAIL: AaronLS@WIERASSOCIATES.COM

NOW, THEREFORE, KNOW ALL MEN BY THESE PRESENTS:

STATE OF TEXAS
COUNTY OF DALLAS

I THE UNDERSIGNED OWNER OF THE LAND SHOWN ON THIS PLAT, AND DESIGNATED HEREIN AS LOT 2R, BLOCK A, LAKESHORE COMMONS TO THE CITY OF ROCKWALL, TEXAS, AND WHOSE NAME IS SUBSCRIBED HERETO, HEREBY DEDICATE TO THE USE OF THE PUBLIC FOREVER ALL STREETS, ALLEYS, PARKS, WATER COURSES, DRAINS, EASEMENTS AND PUBLIC PLACES THEREON SHOWN FOR THE PURPOSE AND CONSIDERATION THEREIN EXPRESSED. I FURTHER CERTIFY THAT ALL OTHER PARTIES WHO HAVE A MORTGAGE OR LIEN INTEREST IN LOT 2R, BLOCK A, LAKESHORE COMMONS HAVE BEEN NOTIFIED AND SIGNED THIS PLAT.

I UNDERSTAND AND DO HEREBY RESERVE THE EASEMENT STRIPS SHOWN ON THIS PLAT FOR THE PURPOSES STATED AND FOR THE MUTUAL USE AND ACCOMMODATION OF ALL UTILITIES DESIRING TO USE OR USING SAME. I ALSO UNDERSTAND THE FOLLOWING;

1. NO BUILDINGS SHALL BE CONSTRUCTED OR PLACED UPON, OVER, OR ACROSS THE UTILITY EASEMENTS AS DESCRIBED HEREIN.

2. ANY PUBLIC UTILITY SHALL HAVE THE RIGHT TO REMOVE AND KEEP REMOVED ALL OR PART OF ANY BUILDINGS, FENCES, TREES, SHRUBS, OR OTHER GROWTHS OR IMPROVEMENTS WHICH IN ANY WAY ENDANGER OR INTERFERE WITH CONSTRUCTION, MAINTENANCE OR EFFICIENCY OF THEIR RESPECTIVE SYSTEM ON ANY OF THESE EASEMENT STRIPS; AND ANY PUBLIC UTILITY SHALL AT ALL TIMES HAVE THE RIGHT OF INGRESS OR EGRESS TO, FROM AND UPON THE SAID EASEMENT STRIPS FOR PURPOSE OF CONSTRUCTION, RECONSTRUCTION, INSPECTING, PATROLLING, MAINTAINING, AND EITHER ADDING TO OR REMOVING ALL OR PART OF THEIR RESPECTIVE SYSTEM WITHOUT THE NECESSITY OF, AT ANY TIME, PROCURING THE PERMISSION OF ANYONE.

3. THE CITY OF ROCKWALL WILL NOT BE RESPONSIBLE FOR ANY CLAIMS OF ANY NATURE RESULTING FROM OR OCCASIONED BY THE ESTABLISHMENT OF GRADE OF STREETS IN THE SUBDIVISION.

4. THE DEVELOPER AND ENGINEER SHALL BEAR TOTAL RESPONSIBILITY FOR STORM DRAIN IMPROVEMENTS.

5. THE DEVELOPER SHALL BE RESPONSIBLE FOR THE NECESSARY FACILITIES TO PROVIDE DRAINAGE PATTERNS AND DRAINAGE CONTROLS SUCH THAT PROPERTIES WITHIN THE DRAINAGE AREA ARE NOT ADVERSELY AFFECTED BY STORM DRAINAGE FROM THE DEVELOPMENT.

6. NO HOUSE DWELLING UNIT, OR OTHER STRUCTURE SHALL BE CONSTRUCTED ON ANY LOT IN THIS ADDITION BY THE OWNER OR ANY OTHER PERSON UNTIL THE DEVELOPER AND/OR OWNER HAS COMPLIED WITH ALL REQUIREMENTS OF THE SUBDIVISION REGULATIONS OF THE CITY OF ROCKWALL REGARDING IMPROVEMENTS WITH RESPECT TO THE ENTIRE BLOCK ON THE STREET OR STREETS ON WHICH PROPERTY ABUTS, INCLUDING THE ACTUAL INSTALLATION OF STREETS WITH THE REQUIRED BASE AND PAVING, CURB AND GUTTER, WATER AND SEWER, DRAINAGE STRUCTURES, STORM STRUCTURES, STORM SEWERS, AND ALLEYS, ALL ACCORDING TO THE SPECIFICATIONS OF THE CITY OF ROCKWALL; OR

UNTIL AN ESCROW DEPOSIT, SUFFICIENT TO PAY FOR THE COST OF SUCH IMPROVEMENTS, AS DETERMINED BY THE CITY'S ENGINEER AND/OR CITY ADMINISTRATOR, COMPUTED ON A PRIVATE COMMERCIAL RATE BASIS, HAS BEEN MADE WITH THE CITY SECRETARY, ACCOMPANIED BY AN AGREEMENT SIGNED BY THE DEVELOPER AND/OR OWNER, AUTHORIZING THE CITY TO MAKE SUCH IMPROVEMENTS AT PREVAILING PRIVATE COMMERCIAL RATES, OR HAVE THE SAME MADE BY A CONTRACTOR AND PAY FOR THE SAME OUT OF THE ESCROW DEPOSIT, SHOULD THE DEVELOPER AND/OR OWNER FAIL OR REFUSE TO INSTALL THE REQUIRED IMPROVEMENTS WITHIN THE TIME STATED IN SUCH WRITTEN AGREEMENT, BUT IN NO CASE SHALL THE CITY BE OBLIGATED TO MAKE SUCH IMPROVEMENTS ITSELF. SUCH DEPOSIT MAY BE USED BY THE OWNER AND/OR DEVELOPER AS PROGRESS PAYMENTS AS THE WORK PROGRESSES IN MAKING SUCH IMPROVEMENTS BY MAKING CERTIFIED REQUISITIONS TO THE CITY SECRETARY, SUPPORTED BY EVIDENCE OF WORK DONE; OR

UNTIL THE DEVELOPER AND/OR OWNER FILES A CORPORATE SURETY BOND WITH THE CITY SECRETARY IN A SUM EQUAL TO THE COST OF SUCH IMPROVEMENTS FOR THE DESIGNATED AREA, GUARANTEEING THE INSTALLATION THEREOF WITHIN THE TIME STATED IN THE BOND, WHICH TIME SHALL BE FIXED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL.

7. PROPERTY OWNER SHALL BE RESPONSIBLE FOR MAINTAINING, REPAIRING, AND REPLACING ANY DRAINAGE SYSTEMS IN EASEMENTS.

I FURTHER ACKNOWLEDGE THAT THE DEDICATIONS AND/OR EXACTION'S MADE HEREIN ARE PROPORTIONAL TO THE IMPACT OF THE SUBDIVISION UPON THE PUBLIC SERVICES REQUIRED IN ORDER THAT THE DEVELOPMENT WILL COMPORT WITH THE PRESENT AND FUTURE GROWTH NEEDS OF THE CITY; I, MY SUCCESSORS AND ASSIGNS HEREBY WAIVE ANY CLAIM, DAMAGE, OR CAUSE OF ACTION THAT I MAY HAVE AS A RESULT OF THE DEDICATION OF EXACTIONS MADE HEREIN.

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: Mayor and City Council

CC: Rick Crowley, *City Manager*
Brad Griggs, *Assistant City Manager*

FROM: Ryan Miller, *Director of Planning and Zoning*

DATE: November 5, 2018

SUBJECT: Z2018-032; *Zoning Change for Park Station (LI to PD)*

On September 17, 2018, the City Council approved a motion to continue the public hearing for *Case No. Z2018-032* to the October 15, 2018 City Council meeting, and directed staff to work with the applicant to resolve the SH-66 right-of-way issue prior to the City Council taking action on the proposed zoning change. In accordance with this direction, staff met with the applicant on October 2, 2018. Through this meeting, staff and the applicant came to a consensus concerning SH-66, which involved minor revisions to the schematic alignment of this roadway. In accordance with this agreement, the applicant has revised the concept plan to show the full dedication of right-of-way for SH-66, which will be landscaped and irrigated by the City -- *at the time of dedication* -- until the roadway is constructed. Due to the substantial changes to the concept plan that resulted from this meeting the City Council remanded the case back to the Planning and Zoning Commission for reconsideration in conformance with Section 17, *Procedure in Planning and Zoning Cases – Additional Information Submitted*, of Article 2, *Authority and Administrative Procedures*, of the Unified Development Code (UDC). On October 30, 2018, the Planning and Zoning Commission reviewed the changes and approved a motion to recommend approval of the zoning change by a vote of 6-0, with Chairman Lyons absent.

Staff has updated the case memo and ordinance to reflect the proposed changes and included the new exhibits in the attached packet. Should the City Council have any questions, staff and the applicant will be available at the *November 5, 2018* City Council meeting.

CITY OF ROCKWALL
CITY COUNCIL CASE MEMO

AGENDA DATE: 11/05/2018

APPLICANT: Bill Bricker, *Columbia Development Company, LLC*

AGENDA ITEM: **Z2018-032**; *Zoning Change for Park Station (LI to PD)*

SUMMARY:

Hold a public hearing to discuss and consider a request by Bill Bricker of Columbia Development Company, LLC for the approval of a zoning change from a Light Industrial (LI) District to a Planned Development District for commercial, light industrial and townhome land uses on a 16.26-acre tract of land identified as a portion of Lot 1, Block 1, Indalloy Addition (*7.409-acres*) and Tract 31 of the R. Ballard Survey, Abstract No. 29, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, addressed as 1100 & 1300 E. Washington Street, and take any action necessary.

PURPOSE & BACKGROUND:

The subject property is a 16.26-acre tract of land, located on the south side of E. Washington Street, which was annexed on February 6, 1961 by *Ordinance No. 60-01*. According to the City's historic zoning maps, the subject property has been zoned Light Industrial (LI) District since at least January 3, 1972. On July 14, 2000, a final plat for a portion of this property (*7.409-acres*) was incorporated into *Lot 1, Block 1, Indalloy Addition* by *Case No. PZ2000-055-01*. The subject property is currently vacant with the exception of a private driveway that connects the property south of the subject property to E. Washington Street.

On July 13, 2018, the applicant -- *Bill Bricker with Columbia Development Company, LLC* -- submitted an application requesting to establish a Planned Development District on the subject property. Specifically, the applicant was proposing to entitle the subject property for 12 townhomes on 2.38-acres, limited commercial land uses on 6.33-acres, and limited light industrial land uses on 6.22-acres. These areas would be subject to the requirements and land uses of the Single-Family 10 (SF-10), General Retail (GR), and Light Industrial (LI) Districts unless specifically indicated in the Planned Development District ordinance.

ADJACENT LAND USES AND ACCESS:

The land uses adjacent to the subject property are as follows:

North: Directly north of the subject property is E. Washington Street, which also delineates the future alignment of SH-66. This roadway is identified as a TXDOT4D (*i.e. four [4] lane, divided highway, owned by the Texas Department of Transportation*) on the City's Master Thoroughfare Plan. North of this thoroughfare is a 67.036-acre public park (*i.e. Harry Myers Park*), which is zoned Light Industrial (LI) District. Beyond this is a 17.861-acre vacant tract of land that was platted as a 78-lot subdivision (*i.e. Oak Creek*) in 1984. This property is zoned Two Family (2F) District. Adjacent to this residentially zoned area is a 21.326-acre tract of land that is zoned Light Industrial (LI) District. This property has a school and administrative offices (*i.e. Rockwall Quest Academy/RISD Administrative Offices*) situated on it.

South: Directly south of the subject property is an 8.197-acre tract of land and a 14.53-acre parcel of land (*i.e. Lot 1-01, Block 1, Indalloy Addition*). Both of these properties are zoned Light Industrial (LI) District. Situated on these properties is a large industrial building and various other improvements. Beyond this is the right-of-way for the *Union Pacific Dallas/Garland Northeast Railroad*.

East: Directly east of the subject property is a 2.093-acre parcel of land (*i.e. Lot 1, Block A, Soroptimist Rockwall Children's Home*), a vacant 7.97-acre tract of land, and a vacant 11.3736-acre tract of land. All of these properties are zoned Light Industrial (LI) District. Beyond this are E. Washington Street, Airport Road, and Industrial Boulevard. These roadways are all identified as an M4U (*i.e. minor collector, four [4] lane, roadway*) on the City's Master Thoroughfare Plan.

West: Directly west of the subject property is *Phases 2 & 3* of the *Park Place Subdivision*, which currently contains 94 single-family residential lots. This property is zoned Planned Development District 59 (PD-59) for Neighborhood Services (NS) and Single-Family 7 (SF-7) District land uses.

CHARACTERISTICS OF THE REQUEST:

The applicant has submitted a concept plan and development standards for the proposed development. According to the concept plan, the subject property will be broken down into five (5) tracts of land that will include commercial, light industrial and townhome land uses. The characteristics and development standards for each of these tracts are as follows:

Tract 1: Townhomes (2.38-Acres)

The proposed townhome land use will be situated on *Tract 1*, which is located directly adjacent to *Phase 2* of the *Park Place Subdivision*. More specifically, the concept plan shows that the townhomes will face west towards the existing amenity center and be accessible via driveways located at the rear of the property facing on to a proposed public right-of-way (*i.e. Street 'A' on the concept plan*). This public right-of-way will end in a cul-de-sac and only serve the proposed townhomes. The concept plan currently shows the provision of ten (10) townhomes; however, the applicant has requested the ability to provide up to 12 townhomes through the Planned Development District ordinance. The applicant has stated that these residential units will be incorporated into the existing Park Place Homeowner's Association (HOA). Staff has included a requirement that an HOA be established regardless if they are incorporated into the existing HOA or put into a separate HOA.

This tract is subject to the Single Family 10 (SF-10) District land uses with the added townhome use; however, any accessory buildings, portable buildings or guest quarters have been prohibited through the Planned Development District ordinance. A summary of the proposed density and dimensional requirements for *Tract 1* is as follows:

Ordinance Provisions	*Zoning District Standards*
Minimum Lot Width [1]	*28-Feet*
Minimum Lot Depth	*115-Feet*
Minimum Lot Area	*3,000 SF*
Minimum Front Yard Setback [2] & [4]	*20-Feet*
Minimum Side Yard Setback	*0-Feet*
Minimum Distance Between Buildings	*10-Feet*
Minimum Length of Driveway Pavement	*20-Feet*
Maximum Height [3]	*36-Feet*
Minimum Rear Yard Setback [4]	*10-Feet*
Minimum Area/Dwelling Unit (SF) [Air Conditioned Space]	*1,400 SF*
Garage Orientation	*Rear Entry*

Maximum Number of Attached Units Per Buildings	*5 Units*
Maximum Lot Coverage	*75%*

General Notes:
1: The minimum lot width shall be measured at the *Front Yard Building Setback*.
2: The location of the *Front Yard Building Setback* as measured from the front property line.
3: The *Maximum Height* shall be measured to the eave or top plate (*whichever is greater*) of the single-family home.
4: Porches, stoops, bay windows, balconies, eaves and similar architectural features may encroach beyond the *Front* and *Rear Yard Building Setbacks* by up to five (5) feet for any property; however, the encroachment shall not exceed three (3) feet on *Side Yard Setbacks* where appropriate for such use and shall not encroach into public right-of-way.

It should be noted that the applicant is proposing to match the design style of the Park Place Subdivision, which is constructed in a *Neo Traditional* architecture style (*e.g. the use of material blends heavy in cementitious siding, front porch elements, bay windows, etc.*). Due to this proposed design, the applicant is proposing to use up to 100% cementitious materials excluding stucco, which is prohibited. In addition, the townhomes will have varying front façades, and additional anti-monotony requirements are incorporated into the Planned Development District ordinance. An example of the type of design provided by the applicant has been included in the attached packet.

The applicant has stated that the purpose of the townhome land use is to provide a transition from the Park Place Subdivision to the limited light industrial land uses that are proposed on *Tracts 4 & 5*, which are located east of the subject property. Staff should point out that under the current zoning, light industrial land uses can be established in the area (i.e. *Tract 1*) without restriction.

Tracts 2 & 3: Limited General Retail (6.33-Acres)

Tracts 2 & 3 on the concept plan are dedicated for limited General Retail (GR) District land uses, and General Retail (GR) District density and dimensional requirements. A summary of the density and development requirements permitted in the General Retail (GR) District is as follows:

Ordinance Provisions	*Zoning District Standards*
Minimum Lot Area	*6,000 SF*
Minimum Lot Width	*60-Feet*
Minimum Lot Depth	*100-Feet*
Minimum Front Yard Setback (1)	*15-Feet*
Minimum Rear Yard Setback (2)	*10-Feet (0-Feet w/ Fire Rated Wall)*
Minimum Rear Yard Setback Adjacent to Residential (2)	*20-Feet + (½ Height Greater than 36-Feet)*
Minimum Side Yard Setback (2)	*10-Feet (0-Feet w/ Fire Rated Wall)*
Minimum Side Yard Setback Adjacent to Residential (2)	*20-Feet + (½ Height Greater than 36-Feet)*
Maximum Height	*60-Feet (Greater Than 36-Feet Requires SUP)*
Max Lot Coverage	*40%*
Minimum Masonry Requirement	*90%*
Maximum Building Size	*26,000 SF*
Minimum Landscaping Percentage	*15%*
Maximum Impervious Coverage	*85-90%*

Notes
1: *Parking should not be located between the front façade and the property line.*
2: *In no case shall the setback exceed more than 50-feet.*

The applicant has stated that the purpose of *Tracts 2 & 3* are to screen the limited light industrial land uses from E. Washington Street and Harry Myers Park. In addition, the applicant has stated a desire to establish a two (2) story mixed office/neighborhood services development of *Tract 2* that can take advantage of views towards Harry Myers Park to the north. It should be noted that staff has limited the uses permitted on these tracts to ensure compatibility with the proposed and existing residential land uses to the west of *Tract 2*.

Tracts 4 & 5: Limited Light Industrial (6.22-Acres)

The concept plan shows that *Tracts 4 & 5* will remain subject to the land uses and density and dimensional requirements of the Light Industrial (LI) District; however, the applicant has consented to limit the land uses to ensure that no uses that would be incompatible with the adjacent residential and limited commercial land uses would be established. Specifically, the applicant has prohibited the majority of land uses that incorporate outside storage or that would create incompatibility. In addition, the applicant has agreed to put a Specific Use Permit (SUP) requirement on automotive and mini-warehouse land uses. Staff should point out that under the current zoning the applicant could establish any of the land uses that are being limited by the proposed zoning ordinance.

A summary of the density and dimensional requirements is as follows:

Ordinance Provisions	*Zoning District Standards*
Minimum Lot Area	*12,500 SF*
Minimum Lot Width	*100-Feet*
Minimum Lot Depth	*125-Feet*
Minimum Front Yard Setback	*25-Feet*
Minimum Rear Yard Setback [1]	*10-feet (0-Feet w/ Fire Rated Wall)* [2]
Minimum Side Yard Setback [1]	*10-feet (0-Feet w/ Fire Rated Wall)* [2]
Maximum Height	*120-Feet (Greater Than 60-Feet Requires SUP)*
Max Lot Coverage	*60%*
Minimum Masonry Requirement	*90%*
Minimum Landscaping Percentage	*10%*
Maximum Impervious Coverage	*90-95%*

Notes
1: *In no case shall the setback exceed more than 50-feet.*
2: *When directly abutting a residentially zoned property the setback is 36-Feet + ½ Building Height Greater than 36-feet. This is not applicable in this case due to the separation of Tract 1 from Tract 4 by the roadway and detention pond.*

INFRASTRUCTURE:

Based on the applicant's submittal, staff is requiring an infrastructure study -- *at the applicant's expense* -- be performed to ensure that all water and wastewater improvements necessary to serve the proposed developments are incorporated. With regard to streets, the City's Master Thoroughfare Plan depicts E. Washington Street as the future alignment of SH-66. The proposed alignment of this roadway begins at the western boundary of the subject property, dips down into the front of the subject property approximately 105-feet, and extends northward at the approximate mid-point of the subject property. The total area of the subject property affected by the proposed alignment of SH-66 is estimated to be 1.18-acres. From the point that the alignment of the future SH-66 extends northward, the remainder of E. Washington Street is depicted as a M4U (*minor arterial, four [4] lane, undivided roadway*) according to the Master Thoroughfare Plan. The applicant has resubmitted a concept plan showing the dedication of SH-66. This revised concept plan was the result of the City Council's direction (*received on September 17, 2018*) to work with the applicant to identify a solution to the right-of-way dedication issue prior to the City Council taking action on the zoning case. The result of the meeting with the applicant and staff was the understanding that if the right-of-way for SH-66 was dedicated that the City would landscape and irrigate the dedicated land until such time that the Texas Department of Transportation (TXDOT) initiates the construction of this roadway. Based on this understanding staff has added this to the conditions of approval for this case. In addition, it was discussed that since the realignment of SH-66 will affect the future alignment of E. Washington Street adjacent to the subject property, that it would not be necessary for the applicant to upgrade this street to an M4U. Staff has no objection to the applicant's request, however, since it does constitute a change to the City's adopted Master Thoroughfare Plan it would be a discretionary decision for the City Council. A condition has been incorporated in to the attached draft ordinance that would accomplish this waiver should the City Council choose to grant the request.

CONFORMANCE WITH THE CODES:

While the proposed Planned Development District does conform to many of the City's code requirements, it should be noted that the development standards contained within the Planned Development District ordinance for *Tract 1* deviate from the requirements of the Unified Development Code (UDC), Municipal Code of Ordinances and the Engineering Department's *Standards of Design and Construction* Manual in the following ways:

- ☑ *Garages*. The proposed townhomes are intended to front towards the existing Park Place Subdivision, and the garages will front onto a public street (*i.e. Road 'A'*) at the rear of the property. Based on the current codes, it is debatable if this constitutes rear or front entry product; however, the current codes do not clarify this issue, and staff is of the opinion that this issue is best left up to the discretion of the Planning and Zoning Commission and City Council.

- ☑ *Sidewalks*. The Engineering Department's *Standards of Design and Construction* Manual and the Municipal Code of Ordinances require that a five (5) foot sidewalk be constructed adjacent to any public street. In this case, the applicant is proposing to run the sidewalk adjacent to *Road 'A'* from E. Washington Street southward, but break the adjacency to the roadway and run the sidewalk along the front side of the townhomes (*i.e. in between the townhome and the Park Place Subdivision*).

- ☑ *Masonry Requirements.* The minimum masonry requirement for residential properties stipulated by the UDC is 80% with a maximum of 50% of the masonry requirement being permitted to be cementaceous materials. In this case, the applicant is proposing to match the adjacent residential subdivision and is requesting to use up to 100% cementaceous materials. In addition, the applicant has stated that he will be using varying façades on the proposed townhomes and has prohibited the use of stucco.

- ☑ *Lot Size*. Currently, the Two Family (2F) and Downtown (DT) Districts are the only zoning district that allow townhomes in the City of Rockwall. In addition, there are no specific standards for townhomes contained in the UDC. This means that the City's smallest single-family lot size for a townhome is within the Two Family (2F) District and is 7,000 SF. This is not conducive to the development of a townhome product and the applicant is proposing a minimum lots size of 3,000 SF for *Tract 1*.

Tracts 2, 3, 4 & 5 conform to all applicable requirements of the Unified Development Code (UDC), Municipal Code of Ordinances and the Engineering Department's *Standards of Design and Construction* Manual. By approving the proposed Planned Development District, the City Council is waiving the standards for *Tract 1* as listed above.

CONFORMANCE WITH THE COMPREHENSIVE PLAN:

The Future Land Use Map contained in the Comprehensive Plan designates the subject property for *Commercial/Industrial* land uses. According to the *Land Use* section of the Comprehensive Plan the *Commercial/Industrial* land use designation is appropriate for areas, "…where more industrial activities may occur. It is largely buffered from residential by roads and open space." Staff should point out that the property directly west of the subject property is currently designated *Medium Density Residential* and is developed with a single-family subdivision (*i.e. Park Place*). Currently, these properties share a common property line, with no roadways or open space intervening. The adjacency of these two (2) land use designation poses the potential for conflicting development (*e.g. residential directly adjacent to industrial*).

The residential density for *Tract 1* (*i.e. 5.94 dwelling units per acre*) falls within the *High Density Residential* land use designation, which according to the Comprehensive Plan, "…should be used as a transitional use from commercial (*or existing retail*) use, or where it will serve as a logical extension

of an existing high density development." In this case, the applicant has stated that he would like to create a transition from the single-family subdivision to the west to the proposed limited light industrial land uses to the east. In addition, the applicant is proposing to screen the limited light industrial land uses from Harry Myer's Park -- *which is north of the subject property* -- with commercial/retail buildings that will be directly adjacent to E. Washington Street. This will necessitate that *Tracts 2 & 3* on the concept plan be changed to a *Commercial* designation. In accordance with the requirements of the Comprehensive Plan staff has requested that the applicant make the retail areas pedestrian-oriented and easily accessible to the adjacent residential neighborhood. Finally, *Tracts 4 & 5* will be designated for limited light industrial land uses, which is better suited under the *Technology/Light Industrial* designation as opposed to the projected *Commercial/Industrial* land use designation.

Considering these proposed changes, any deviations from the Future Land Use Map or the Comprehensive Plan are discretionary to the City Council. Should the City Council choose to approve the applicant's request staff has included a condition of approval that would amend the Future Land Use Map to reflect this change.

NOTIFICATION:

On August 1, 2018, staff mailed 40 notices to property owners and occupants within 500-feet of the subject property. Staff also notified the Park Place Homeowner's Associations (HOA), which is the only HOA/Neighborhood Organization that is within 1,500-feet of the subject property participating in the Neighborhood Notification Program. Additionally, staff posted a sign on the subject property as required by the UDC. At the time this report was drafted, staff had received seven (7) notices in support of the request, and one (1) in opposition.

RECOMMENDATIONS:

If the City Council chooses to approve the applicant's request to change the zoning of the subject property from a Light Industrial (LI) District to a Planned Development District for commercial, light industrial and townhome land uses, then staff would propose the following conditions of approval:

1) The applicant shall be responsible for maintaining compliance with the conditions contained within the *Planned Development District* ordinance;

2) An *Infrastructure Study* -- *at the applicant's expense* -- will be required to be submitted concurrently with the submission of a preliminary plat;

3) When the future right-of-way for SH-66 is dedicated to the City of Rockwall, the City shall provide landscaping and irrigation on the dedicated portion of right-of-way until such time that the development of SH-66 commences construction.

4) By approving this zoning change, the City Council will effectively be approving changes to the Comprehensive Plan and Future Land Use Map. Specifically, this will change the designation of portions of the subject property from a *Commercial/Industrial* designation to *High Density Residential*, *Commercial*, and *Technology/Light Industrial* designations; and,

5) Any construction resulting from the approval of this *zoning change* shall conform to the requirements set forth by the Unified Development Code (UDC), the International Building Code (IBC), the Rockwall Municipal Code of Ordinances, city adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION:

On August 14, 2018, the Planning and Zoning Commission approved a motion to grant the applicant's request to postpone the case to the August 28, 2018 Planning and Zoning Commission meeting. This motion passed by a vote of 6-0, with Commissioner Fishman absent.

On August 28, 2018, the Planning and Zoning Commission approved a motion to recommend denial of the applicant's request by a vote of 4-3, with Commissioners Welch, Womble and Fishman dissenting.

On October 31, 2018, the Planning and Zoning Commission approved a motion to recommend approval of the applicant's request by a vote of 6-0, with Chairman Lyons absent.

CITY COUNCIL:

On August 20, 2018, the City Council postponed the public hearing to September 4, 2018 in accordance with the Planning and Zoning Commission's action.

On September 4, 2018, the City Council approved a motion to continue the public hearing to September 17, 2018. This motion passed by a vote of 7-0.

On September 17, 2018, the City Council continued the public hearing and directed staff to meet with the applicant to discuss the dedication of the right-of-way for SH-66. This motion was carried by a vote of 6-0, with Council Member Hohenshelt absent.

On October 15, 2018, the City Council approved a motion to remand the zoning case back to the Planning and Zoning Commission due to changes in the concept plan. This motion was approved by a vote of 7-0.

To whom it may concern:

Per your participation in the Neighborhood Notification Program, you are receiving this notification to inform your organization and residents of a request for a zoning change that lies within 1,500 feet of the boundaries of your neighborhood or subdivision. As the primary contact for the organization, you are encouraged to share this information with the residents of your subdivision. Please find attached a map detailing the location of the subject property requesting the zoning change in relation to your subdivision boundaries. Additionally, below is a summary of the zoning request that was published in the Rockwall Herald Banner ***July 20, 2018***. The Planning and Zoning Commission will hold a public hearing on ***Tuesday 8/14/2018 at 6:00 p.m.***, and the City Council will hold a public hearing on ***Monday, 8/20/2018 at 6:00 p.m***. These hearings will be held in the City Council Chambers at City Hall, 385 S. Goliad Street. These hearings will be held in the City Council Chambers at City Hall, 385 S. Goliad Street. If you have any questions or comments regarding this request, the contact information for the Planning Department is listed below. Additional information can also be found at
https://sites.google.com/site/rockwallplanning/development/development-cases

Z2018-030- Hold a public hearing to discuss and consider a request by Pat Atkins of Saddlestar Land Development on behalf of the Stagliano Family Trust for the approval of a zoning change from an Agricultural (AG) District, Commercial (C) District and Heavy Commercial (HC) District to a Planned Development District for commercial/retail and single-family land uses on a 63.71-acre tract of land identified as Tract 3 of the W. H. Barnes Survey, Abstract No. 26, City of Rockwall, Rockwall County, Texas, zoned Agricultural (AG) District, Commercial (C) District and Heavy Commercial (HC) District, situated within the SH-205 Overlay (SH-205 OV) District, located at the northwest corner of S. Goliad Street [*SH-205*] and Mims Road, and take any action necessary.

If this email is reaching you in error, please forward it to your HOA or neighborhood group representative and update the contact information at http://www.rockwall.com/planning/hoa.asp.

Sincerely,

Laura Morales

To Whom It May Concern:

You are hereby notified that the City of Rockwall Planning and Zoning Commission and City Council will consider the following application:

Case No. Z2018-032: Park Station (LI to PD)

Hold a public hearing to discuss and consider a request by Bill Bricker of Columbia Development Company, LLC for the approval of a zoning change from a Light Industrial (LI) District to a Planned Development District for commercial, light industrial and townhome land uses on a 16.26-acre tract of land identified as Lot 1, Block 1, Indalloy Addition (7.409-acres) and Tract 31 of the R. Ballard Survey, Abstract No. 29, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, addressed as 1100 & 1300 E. Washington Street, and take any action necessary.

For the purpose of considering the effects of such a request, the Planning and Zoning Commission will hold a public hearing on **Tuesday, 8/14/2018 at 6:00 p.m.,** and the City Council will hold a public hearing on **Monday, 8/20/2018 at 6:00 p.m.** These hearings will be held in the City Council Chambers at City Hall, 385 S. Goliad Street.

As an interested property owner, you are invited to attend these meetings. If you prefer to express your thoughts in writing please return the form to:

Ryan Miller
Rockwall Planning and Zoning Dept.
385 S. Goliad Street
Rockwall, TX 75087

You may also email your comments to the Planning Department at planning@rockwall.com. If you choose to email the Planning Department please include your name and address for identification purposes.

Your comments must be received by **8/20/2018** to ensure they are included in the information provided to the City Council.

Sincerely,

Ryan Miller, AICP
Director of Planning & Zoning

To Whom It May Concern:

I am writing to say that I am opposed to the request for a zoning change because the proposed plan and build out do not closely resemble the current look and feel of the Park Place neighborhood. The plan also does not adequately minimize the flow of traffic from Harry Myers Park. I would like to see the plan changed to better resemble the the current neighborhood so that Park Place continues to be a community that draws people in and distinguishes Rockwall from other cities in the area.

Sincerely,
Jocelyn Sherman

From: John Wardell
To: Miller, Ryan
Subject: In Favor of Z2018-032 Columbia Development PD
Date: Wednesday, August 22, 2018 6:21:49 PM

Ryan – My name is John Wardell and my wife Julie and I have lived in the Park Place Subdivision for over 10 years. We are the most deeply invested residents having restored the Jordan Farm House that has been the anchor of this property since the early 1900's. We wanted to express our approval of
Z2018-032 submitted by Bill Bricker for Columbia Development. When we purchased our lot and invested two years of our lives moving and restoring our home we knew the adjacent property was zoned Light Industrial but chose to invest in the area anyway. We believed the land that is the subject of this rezoning request would be developed for a higher purpose because of its proximity to Old Town, the parks, and to achieve greater value for the developer.

We believe the Planned Development should be approved for the following reasons:

1. The proposed Planned Development offers the best possible option for the homeowners of Park Place to have a visual break from the commercial and light industrial formed by the town homes.
2. The retail strip along Washington gives a fresh retail option to this area that is needed to service the visitors to the Park and area residents.
3. The Light Industrial sites are concealed on the north by retail and on the west by the town homes and provide a needed small footprint option.
4. Bill Bricker and Columbia have proven to be responsible developers that have given Rockwall one of its premier neighborhoods in Park Place and we believe this new development will be no exception.
5. By adding the townhomes to our HOA our Architectural Review Committee has the opportunity to exercise guidance on the exterior finishes.
6. The PD will bring more taxable commercial and residential real estate to our tax base. It will also provide possible growth in sales tax and personal property tax.

Some of our neighborhood members will email you in fear of parking problems with future public events at Myers Park. We share their parking concerns but it is not the responsibility of Columbia to provide parking for public events. If the city is going to host these events then parking solutions will have to be found in the future by the city.

Allow us to communicate also our strong opposition to Washington becoming State Highway 66 and being widened and rerouted adjacent to our neighborhood. We expressed our opposition to this reroute when it was originally proposed and we still stand in opposition to this misguided solution.

If you have questions you may return email to this address.

Thank you for your service.

Subject:	Case # Z2018-032: Park Station
Date:	Thursday, August 23, 2018 4:32:03 PM

To Planning Commission and Mayor/ Council Members

I am in favor of the proposed Park Station development.

I have to raise concerns if the city does not prepare for all of the parking area that will be lost . During festivals such as Founders Day, disk golf championships, 4th of July, and other large events this land has generously been used to handle overflow Harry Meyers Parking.

We live in Park Place adjacent (WEST) to the proposed development and during these events we struggle to stop the multitude of non-resident cars in our neighbored. Some break the no parking rules, smoke/drink/ speed and basically cause hazards. In addition the foot traffic up and down Washington migrates to the middle of the street causing even more dangerous situations. There are no sidewalks adjacent to the Park and roadway.

The city needs to be pro-active to plan for these events and future lack of parking. Possibly city should prepare to shuttle overflow traffic to Harry Meyers from a remote location? (High School)? Post a police officer at our entrance to detour non-resident traffic. In addition, if you continue to project HWY 66 passing in front of the development the issue will only get worse.

What will the city do to protect Park Place owners when this property is developed?

Park Place is in the midst of a 2nd phase and the homes are beautiful. The Park Place development is a benchmark for other development both style and quality. If ever there was a role model to sell the Rockwall style for others to relocate—Park Place is it!!
Why tarnish it with these other issues. Please don't be short sighted in this decision.

Plan for the loss of this land.
Plan for possible negative effects of Hwy 66.

Maybe the city should purchase the land and extend the Harry Meyers Park facilities!!

Respectfully,

Michael and DeLila Rasmussen

From: Chris
To: Miller, Ryan
Subject: Z2018-032:Park Station (L1 to PD)
Date: Thursday, August 23, 2018 7:43:33 PM

We live in the Park Place neighborhood across from Harry Myers Park. We are writing with concern about the P & Z activity which addresses the development of the proposed Park Station by the Columbia Development LLC and the proposed route of Highway 66.
We are in a state of limbo not knowing how plat of land just north of the Aluminum plant will be developed. (with or without Hwy 66) We hope Columbia Development is granted their P & Z request. Rerouting Hwy 66 with a 4 lane divided highway along Harry Myers will absolutely ruin the aesthetics of the Park and interfere with the plan to develop the proposed Park Station.
Obviously, developing Park Station will have a huge impact on the loss of parking for events at Harry Myers . This will directly affect spectator parking encroaching and overflowing into our Park Place neighborhood. This is an issue the city at some point must address when the current vacant lot used for parking is no longer available.
Congestion in our neighborhood will be oppressive and possibly a hazard as far as ability for emergency vehicles accessing the interior of the Park Place neighborhood. The remedy for this could possibly be a shuttle system during major high volume events.
Harry Myers Park, a jewel in our city, should be protected from being marred by a 4 lane divided highway.
The area across the street (proposed Park Station) should be developed in a fluid pleasing manner that will allow our neighborhood to seamlessly blend with the adjacent property.
We would just like to know what we have to look forward to for our beautiful Park Place neighborhood. Please work with Columbia Development LLC in their vision to develop the plat of land in Z2018-032:Park Station (L1 to PD) We support it.

Respectfully
David and Christine David

Rockwall, TX 75087

Columbia Development is proposing to convert approximately 15.6 acres of Light Industrial property located at 1200 E Washington to Light Industrial planned development. This property has been zoned LI for many years and the expected use has been industrial based manufacturing, much as has been the case for the portion of the property located directly south of the subject property and now owned by Alvaplast US Development.

The City plan would reflect the future use of this property as LI. With the property rezoned to PD we would lessen the impact of the use on the surrounding area which is adjacent to Harry Myers Park and the Park Place West subdivision to the west. We feel that developing the land into several types of uses will buffer the industrial component of the property to adjacent uses.

We proposed to build approximately 10 townhouse units on the west property line facing the Park Place community center. This component would be annexed to the Park Place West HOA, be built to the same architectural standards as Park Place West and subject to the Park Place West ARC for approval of the facades. This would be an effective transition to the industrial buildings immediately to the east.

Along Washington we propose retail, commercial and restaurant space in buildings designed to convey a sense of Texas historic bus and rail stations. The first building is presented as a 22,000 sq ft two story structure with views of the park from all tenant spaces.

As the project develops additional buildings of various sizes and similar uses would be built as specs, leased space, build to suit or purchased for particular uses. These structures would be restricted to carrying forward the Park Station theme for all buildings facing Washington.

The interior of the project would remain based in LI uses with certain restrictions to limit uses that are not compatible with the surrounding townhomes, single family, and retail, restaurant and commercial activities.

Columbia feels this project will be appreciated by the City as one that removes the potential of large industrial use and provides a type of housing that is desirable for people who want a Park Place lifestyle with the convenience of a townhome. Additionally the retail/commercial aspect of the project will complement Harry Myers with uses that enjoy the view and proximity of the City's preeminent park. Limiting the potential for industrial and providing land for smaller businesses to lease or build their own space is a healthy benefit for the community.

CITY OF ROCKWALL

ORDINANCE NO. 18-XX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, SO AS TO CHANGE THE ZONING FROM A LIGHT INDUSTRIAL (LI) DISTRICT TO PLANNED DEVELOPMENT DISTRICT XX (PD-XX) FOR TOWNHOMES, COMMERCIAL/RETAIL, AND LIGHT INDUSTRIAL LAND USES ON THE SUBJECT PROPERTY, BEING A 16.26-ACRE TRACT OF LAND IDENTIFIED AS LOT 1, BLOCK 1, INDALLOY ADDITION AND TRACT 31 OF THE R. BALLARD SURVEY, ABSTRACT NO. 29, CITY OF ROCKWALL, ROCKWALL COUNTY, TEXAS AND MORE FULLY DESCRIBED HEREIN BY *EXHIBIT 'A'* AND DEPICTED HEREIN BY *EXHIBIT 'B'*; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City has received a request by the applicant Bill Bricker on behalf of the owner, Columbia Development Company, LLC, for the approval of a zoning change from a Light Industrial (LI) District to a Planned Development District for the purpose of establishing commercial/retail, light industrial, and townhome land uses on a 16.26-acre tract of land identified as Lot 1, Block 1, Indalloy Addition and Tract 31 of the R. Ballard Survey, Abstract No. 29, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, addressed as 1100 & 1300 E. Washington Street and more fully described in *Exhibit 'A'* and depicted in *Exhibit 'B'* of this ordinance, which hereinafter shall be referred to as the *Subject Property* and incorporated by reference herein; and

WHEREAS, the Planning and Zoning Commission of the City of Rockwall and the governing body of the City of Rockwall in compliance with the laws of the State of Texas and the ordinances of the City of Rockwall have given the requisite notices by publication and otherwise, and have held public hearings and afforded a full and fair hearing to all property owners generally and to all persons interested in and situated in the affected area, and in the vicinity thereof, and the governing body in the exercise of its legislative discretion, has concluded that the Unified Development Code [*Ordinance No. 04-38*] should be amended as follows:

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:

SECTION 1. That the *Subject Property* shall be used only in the manner and for the purposes authorized by this Planned Development District Ordinance and the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future;

SECTION 2. That development of the *Subject Property* shall be in accordance with the *Planned Development Concept Plan*, contained in *Exhibit 'D'* of this ordinance, attached hereto and incorporated herein by reference as *Exhibit 'D'*, which is deemed hereby to be a condition of approval of the amended zoning classification for the *Subject Property*;

SECTION 3. That development of the *Subject Property* shall be in accordance with the *Development Standards*, described in *Exhibit 'E'* of this ordinance, attached hereto and incorporated herein by reference as *Exhibit 'E'*, which is deemed hereby to be a condition of approval of the amended zoning classification for the *Subject Property*;

SECTION 4. That a preliminary plat for the entire *Subject Property -- as depicted in Exhibits 'C' & 'D' of this ordinance* -- shall be submitted prior to any other submittal for any portion of the *Subject Property*.

DRAFT ORDINANCE 10-15-2018

SECTION 5. That development of *Tract 1* of the *Subject Property -- as depicted in Exhibits 'C' & 'D' of this ordinance* -- shall be in conformance with the schedule listed below (*except as set forth below with regard to simultaneous processing and approvals*).

(a) The procedures set forth in the City's subdivision regulations on the date this ordinance is approved by the City, as amended by this ordinance [*including Subsections 5(b) through 5(d) below*], shall be the exclusive procedures applicable to the subdivision and platting of *Tract 1* as depicted in *Exhibits 'C' & 'D'* of this ordinance.

(b) The following plans and plats shall be required in the order listed below (*except as set forth below with regard to simultaneous processing and approvals*). If required, the City Council shall act on an application for an *Open Space Master Plan* in accordance with the time period specified in *Section 212.009* of the *Texas Local Government Code*.

(1) PD Site Plan
(2) Final Plat

(c) *PD Site Plan.* A *PD Site Plan* covering all of *Tract 1* as depicted in *Exhibit 'B'* of this ordinance shall be submitted and shall identify all site/landscape/hardscape plan(s) for all open space, neighborhood parks, trail systems, street buffers and entry features. A *PD Site Plan* application may be processed by the City concurrently with a *Final Plat Application* after engineering approval.

(d) *Final Plat.* Prior to the issuance of any building permits, a *Final Plat*, for all of *Tract 1* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be submitted for approval.

SECTION 6. That development of *Tracts 2, 3, 4 & 5* of the *Subject Property -- as depicted in Exhibits 'C' & 'D' of this ordinance* -- shall be in conformance with the procedures set forth in the Unified Development Code [*Ordinance No. 04-38*];

SECTION 7. That any person, firm, or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a penalty of fine not to exceed the sum of *Two Thousand Dollars* (*$2,000.00*) for each offense and each and every day such offense shall continue shall be deemed to constitute a separate offense;

SECTION 8. That if any section, paragraph, or provision of this ordinance or the application of that section, paragraph, or provision to any person, firm, corporation or situation is for any reason judged invalid, the adjudication shall not affect any other section, paragraph, or provision of this ordinance or the application of any other section, paragraph or provision to any other person, firm, corporation or situation, nor shall adjudication affect any other section, paragraph, or provision of the Unified Development Code, and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions for this ordinance are declared to be severable;

SECTION 9. The standards in this ordinance shall control in the event of a conflict between this ordinance and any provision of the Unified Development Code or any provision of the City Code, ordinance, resolution, rule, regulation, or procedure that provides a specific standard that is different from and inconsistent with this ordinance. References to zoning district regulations or other standards in the Unified Development Code (including references to the *Unified Development Code*), and references to overlay districts, in this ordinance or any of the Exhibits hereto are those in effect on the date this ordinance was passed and approved by the City Council of the City of Rockwall, Texas;

SECTION 10. That this ordinance shall take effect immediately from and after its passage;

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 4TH DAY OF SEPTEMBER, 2018.

DRAFT ORDINANCE 8.13.2018

Jim Pruitt, *Mayor*

PD Development Standards

Tracts 1-5 (16.26-Acres): Development Standards for all Tracts

(1) *Landscaping Standards.*

(i) *Landscape Requirements.* Landscaping shall be reviewed and approved with a *PD Site Plan*. All *Canopy/Shade Trees* planted within this development shall be a minimum of three (3) caliper inches in size and all *Accent/Ornamental/Under-Story Trees* shall be a minimum of four (4) feet in total height.

(ii) *Landscape Buffers (Streets A, B, & C and Other Streets).* A minimum of a ten (10) foot landscape buffer shall be provided along the frontage of *Streets A, B & C* as depicted in *Exhibit 'D'* of this ordinance, and shall incorporate a minimum of one (1) canopy tree per 50-feet of linear frontage unless otherwise specified in this ordinance. Any streets added to the subject property that are not depicted on the Concept Plan in *Exhibit 'D'* of this ordinance or referenced in *Exhibit 'E'* of this ordinance shall also be subject to this requirement.

(iii) *Landscape Buffer and Sidewalks (SH-66/SH-66 Right-of-Way)*. A minimum of a 20-foot landscape buffer shall be provided along the future right-of-way for SH-66 (*outside of and beyond any required right-of-way dedication*), and shall incorporate ground cover, a *built-up* berm and/or shrubbery or a combination thereof along the entire length of the frontage. Berms and/or shrubbery shall have a minimum height of 30-inches and a maximum height of 48-inches. In addition, two (2) canopy trees shall be planted per 100-feet of linear frontage.

(iv) *Landscape Buffer (Adjacent to Residential).* A minimum of a 20-foot landscape buffer shall be provided along the western boundary of *Tracts 2 & 4* (*i.e. areas adjacent to residential land uses*). The landscape buffer shall incorporate a combination of shrubbery and ground cover along the entire length of the adjacency for the purpose of screening the commercial areas from the residential areas without using a physical barrier. In addition, the landscape buffer shall incorporate canopy trees planted on 20-foot centers along the entire length of the adjacency. *Tract 4* shall also incorporate a minimum of a six (6) foot wrought iron fence in the required landscape buffer.

(v) *Irrigation Requirements.* Irrigation shall be installed for all required landscaping. Irrigation installed in these areas shall be designed by a Texas licensed irrigator or landscape architect.

(2) *Washington Street.* The applicant shall *not* be responsible for upgrading E. Washington Street to a M4U (*major collector, four [4] lane, undivided roadway*) as shown on the Master Thoroughfare Plan in the Comprehensive Plan.

(3) *Buried Utilities.* New transmission and distribution power-lines required to serve the *Subject Property* shall be placed underground, whether such lines are located internally or along the perimeter of the *Subject Property*, unless otherwise authorized by the City Council. The *Developer* shall not be required to re-locate existing overhead power-lines along the perimeter of the *Subject Property* as long as these lines remain in their current pre-developed state. Temporary power-lines constructed across undeveloped portions of the *Subject Property* to facilitate development phasing and looping may be allowed above ground, but shall not be considered existing lines at the time the area is developed, and if they are to become permanent facilities, such lines shall be placed underground pursuant to this paragraph. Franchise utilities shall be placed within a ten (10) foot public utility easement behind the sidewalk, between the home and the property line.

DRAFT ORDINANCE 4-16-2018

(4) *Variances.* The variance procedures and standards for approval that are set forth in the Unified Development Code [*Ordinance No. 04-38*] shall apply to any application for variances to any provisions of this ordinance.

Tract 1: Townhomes (2.38-Acres)

(1) *Permitted Uses.* Unless specifically provided by this Planned Development ordinance, *Tract 1* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the land uses permitted for the Single Family 10 (SF-10) District as stipulated by the *Permissible Use Charts* contained in Article IV, *Permissible Uses*, of the Unified Development Code (UDC) [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future; however, the following conditions shall apply:

The following land uses shall be permitted on the *Tract 1* in addition to the land uses permitted in the Single Family 10 (SF-10) District:

☑ Townhomes

However, the following land uses shall be expressly prohibited on *Tract 1*:

☑ Accessory Building
☑ Guest Quarters/Secondary Living Unit
☑ Portable Buildings
☑ Church/House of Worship
☑ Day Care
☑ Private or Public School
☑ Railroad Yard or Shop

(2) *Density and Dimensional Requirements.* Unless specifically provided by this Planned Development ordinance, *Tract 1* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the development standards for the Single Family 10 (SF-10) District as stipulated by Article V, *District Development Standards*, of the Unified Development Code [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future. The maximum permissible density for the *Subject Property* shall not exceed *5.10* dwelling units per gross acre of land; however, in no case should the proposed development exceed *12* dwelling units. All lots shall conform to the standards depicted in *Table 2*, which are as follows:

Table 2: Lot Dimensional Requirements

Minimum Lot Width [1]	28'
Minimum Lot Depth	115'
Minimum Lot Area	3,000 SF
Minimum Front Yard Setback [2] & [4]	20'
Minimum Side Yard Setback	0'
Minimum Distance Between Buildings	10'
Minimum Length of Driveway Pavement	20'
Maximum Height [3]	36'
Minimum Rear Yard Setback [4]	10'
Minimum Area/Dwelling Unit (SF) [Air Conditioned Space]	1,400 SF
Garage Orientation	*Rear Entry*
Maximum Number of Attached Units Per Buildings	5 Units
Maximum Lot Coverage	75%

General Notes:
[1]: The minimum lot width shall be measured at the *Front Yard Building Setback*.
[2]: The location of the *Front Yard Building Setback* as measured from the front property line.

DRAFT ORDINANCE 10.15.2018

[3]: The *Maximum Height* shall be measured to the eave or top plate (*whichever is greater*) of the single-family home.
[4]: Porches, stoops, bay windows, balconies, eaves and similar architectural features may encroach beyond the *Front* and *Rear Yard Building Setbacks* by up to five (5) feet for any property; however, the encroachment shall not exceed three (3) feet on *Side Yard Setbacks* where appropriate for such use and shall not encroach into public right-of-way.

(3) *Garage Orientation.* All garages are required to be rear entry (*i.e. access from Road 'A'*) and shall generally conform to the Concept Plan depicted in *Exhibit 'D'* of this ordinance (*i.e. the Townhomes will front towards the Park Place Subdivision*).

(4) *Building Standards.* The building elevations shall generally conform to the *Conceptual Building Elevations* depicted in *Exhibit 'F'* of this ordinance; however, all development shall adhere to the following building standards:

(i) *Masonry Requirements.* The minimum masonry requirement for the exterior façades of all buildings shall be 90%. For the purposes of this ordinance, the masonry requirement shall be limited to full width brick, natural stone, and cast stone. Cementaceous fiberboard horizontal lap-siding (*e.g. HardiBoard or Hardy Plank*) and/or similar cementaceous products may be used for up to *100%* of the exterior of the building pending conformance with the anti-monotony restrictions outlined in this ordinance. Stucco (*i.e. three [3] part stucco or similar*) shall be prohibited.

(ii) *Roof Design Requirements.* All buildings shall be designed such that no roof mounted mechanical equipment (*i.e. HVAC, satellite, vents, etc.*) shall be visible from any direction. *Note: Screening of mechanical equipment is necessary for all equipment regardless of location (i.e. roof mounted, ground mounted, or otherwise attached to the building and/or located on the site).*

(iii) *Architectural Requirements.* All units shall be architecturally finished on all sides of the building that are visible from a public right-of-way or open space with the same materials, detailing and features.

(5) *Anti-Monotony Restrictions.* The development shall generally conform to development scheme portrayed in the *Conceptual Building Elevations* depicted in *Exhibit 'F'* of this ordinance; however, all development shall adhere to the following anti-monotony restrictions:

(i) Identical brick blends and paint colors may not occur on adjacent (*i.e. side-by-side*) properties within the development without at least two (2) intervening townhomes of differing materials on the same side of the adjacent townhome beginning with the adjacent property.

(ii) Front building elevations shall not repeat along any block face without at least two (2) intervening homes of differing appearance on the same block face within the development.

(iii) The rear elevation of the homes, backing to the public right-of-way (*i.e. Street A*), shall not repeat without at least two (2) (*i.e. side-by-side*) intervening homes of differing appearance. Homes are considered to have a differing appearance if any of the following two (2) items deviate:

a) Front Encroachment (*i.e. Porch and/or Sunroom*) Type and Layout
b) Roof Type and Layout
c) Articulation of the Front Façade
d) Differing Primary Exterior Materials

(6) *Sidewalks.* The sidewalk adjacent to *Road 'A'* as depicted in *Exhibit 'D'* of this ordinance shall be constructed adjacent to the roadway with the exception of the area directly adjacent to the

DRAFT ORDINANCE 10-8-2018

townhomes. In this area the sidewalk may be deviated to run in between the western property line of the *Subject Property* and the front facades of the townhomes. Where the sidewalk is on private property it shall be in a *pedestrian access easement.*

(7) *Fence Standards.* All fences shall be required to be wrought iron or a tubular steel fence. Wrought iron/tubular steel fences shall be a minimum of four (4) feet in height; however, may not exceed a maximum of eight (8) feet in height.

(8) *Homeowner's Association (HOA).* A Homeowner's Association shall be created to enforce the restrictions established in accordance with the requirements of *Section 38-15* of the *Subdivision Regulations* contained within the *Municipal Code of Ordinances* of the City of Rockwall. As an alternative -- *and pending the approval of an adjacent HOA* --, this property can be incorporated into an existing HOA. The HOA shall also maintain all neighborhood parks, open space and common areas, irrigation, landscaping, screening fences and the private roadway, drive aisles and drive approaches for the subject property associated with this development.

Tracts 2 & 3: Commercial/Retail (6.33-Acres)

(1) *Permitted Uses.* Unless specifically provided by this Planned Development ordinance, *Tracts 2 & 3* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the land uses permitted for the General (GR) District as stipulated by the *Permissible Use Charts* contained in Article IV, *Permissible Uses*, of the Unified Development Code (UDC) [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future; however, the following conditions shall apply:

The following land uses shall be expressly prohibited on *Tracts 2 & 3*:

- ☑ Convent or Monastery
- ☑ Hotel or Motel
- ☑ Residence Hotel
- ☑ Cemetery/Mausoleum
- ☑ Church/House of Worship
- ☑ Convalescent Care Facility/Nursing Home
- ☑ Emergency Ambulance Services (*Ground*)
- ☑ Hospital
- ☑ Mortuary or Funeral Chapel
- ☑ Social Service Provider
- ☑ Billiard Parlor or Pool Hall
- ☑ Carnival, Circus, or Amusement Ride
- ☑ Commercial Amusement/Recreation (*Outside*)
- ☑ Golf Driving Range
- ☑ Astrologer, Hypnotist, or Psychic Art and Science
- ☑ Night Club, Discotheque, or Dance Hall
- ☑ Secondhand Dealer
- ☑ Auto Repair Garage (*Minor*)
- ☑ Car Wash/Auto Detail
- ☑ Car Wash (*Self Service*)
- ☑ Retail Store with Gasoline Product Sales (*Any Amount of Dispensers*)
- ☑ Service Station
- ☑ Mining and Extraction (*Sand, Gravel, Oil & Other*)
- ☑ Helipad
- ☑ Railroad Yard or Shop
- ☑ Transit Passenger Facility

(2) *Density and Dimensional Requirements.* Any development on *Tracts 2 & 3* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the development standards required for

DRAFT OF 11.19.2018

properties in a General Retail (GR) District as stipulated by Article V, *District Development Standards*, of the Unified Development Code [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future.

Tracts 4 & 5: Light Industrial (6.22-Acres)

(1) *Permitted Uses.* Unless specifically provided by this Planned Development ordinance, *Tracts 4 & 5* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the land uses permitted for the Light Industrial (LI) District as stipulated by the *Permissible Use Charts* contained in Article IV, *Permissible Uses*, of the Unified Development Code (UDC) [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future; however, the following conditions shall apply:

The following land uses shall be expressly prohibited on the *Tracts 4 & 5*:

- ☑ Animal Shelter
- ☑ Hotel or Motel
- ☑ Residence Hotel
- ☑ Cemetery/Mausoleum
- ☑ Church/House of Worship
- ☑ Crematorium (*Stand Alone*)
- ☑ Emergency Ambulance Services (*Ground*)
- ☑ Mortuary or Funeral Chapel
- ☑ Prison/Custodial Institution
- ☑ Rescue Mission or Shelter for the Homeless
- ☑ Social Service Provider
- ☑ Billiard Parlor or Pool Hall
- ☑ Carnival, Circus, or Amusement Ride
- ☑ Commercial Amusement/Recreation (*Outside*)
- ☑ Golf Driving Range
- ☑ Private Sports Arena, Stadium or Track
- ☑ Night Club, Discotheque, or Dance Hall
- ☑ Secondhand Dealer
- ☑ Car Wash (*Self Service*)
- ☑ Building & Landscape Material with Outside Storage
- ☑ Building & Landscape Material with Limited Outside Storage
- ☑ Building Maintenance, Service & Sales with Outside Storage
- ☑ Commercial Cleaners
- ☑ Food Processing
- ☑ Heavy Machinery & Equipment (Rental, Sales & Service)
- ☑ Motor Vehicle Dealership (*New or Used*)
- ☑ Recreation Vehicle Sales
- ☑ Service Station
- ☑ Towing & Impound Yard
- ☑ Truck Rental
- ☑ Truck Stop with Fuel and Accessory Services
- ☑ Asphalt or Concrete Batch Plant
- ☑ Environmentally Hazardous Materials
- ☑ Food Processing (*No Slaughtering*)
- ☑ Heavy Manufacturing
- ☑ Metal Plating/Electro Plating
- ☑ Mining and Extraction (*Sand, Gravel, Oil & Other*)
- ☑ Salvage or Reclamation of Products (*Indoors or Outdoors*)
- ☑ Heavy Construction Trade Yard
- ☑ Outside Storage and/or Outside Display
- ☑ Bus Charter Service & Service Facility

DRAFT ORDINANCE 10.19.2018

- ☑ Airport, Heliport or Landing Field
- ☑ Railroad Yard or Shop
- ☑ Transit Passenger Facility

The following land uses shall be permitted by Specific Use Permit (SUP) on the *Tracts 4 & 5*:

- ☑ Auto Repair Garage (*Minor*)
- ☑ Auto Repair Garage (*Major*)
- ☑ Mini-Warehouse

(2) *Density and Dimensional Requirements.* Any development on *Tracts 4 & 5* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the development standards required for properties in a Light Industrial (LI) District as stipulated by Article V, *District Development Standards*, of the Unified Development Code [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future.

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: Mayor and City Council

CC: Rick Crowley, *City Manager*
Brad Griggs, *Assistant City Manager*

FROM: Ryan Miller, *Director of Planning and Zoning*

DATE: November 5, 2018

SUBJECT: *Z2018-042; Amendment to Various Articles of the UDC*

On September 4, 2018, the City Council directed staff to initiate a text amendment that would address issues relating to the variance, waiver and exception approval process. Specifically, the City Council cited issues with the amount of variances, waivers and exceptions relating to articulation, roof design, materials, and other technical requirements -- *typically associated with development in an overlay district* -- and the approval process for these variances. In addition, the City Council expressed a desire to address the number of Specific Use Permits (SUP's) being approved for accessory buildings. Taking all of this into consideration, the Planning and Zoning Department has prepared a text amendment that incorporates three (3) strategies that the City Council could enact to reduce the number of variance cases on the City Council's agenda. These are to [1] change the approval process for variances relating to technical requirements, [2] clarify and modify the requirements for development (*e.g. overlay district requirements, accessory building standards, etc.*), [3] reduce the rhetoric contained within the code by simplifying language, removing antiqued sections, and removing duplicated requirements, and [*4*] fixing sections have contradictory or missing information. A comprehensive list of all changes being proposed with this text amendment is as follows:

1) Changing the approval process for variances, waivers and exceptions associated with technical requirements will reduce the caseload going to the City Council. Since the Planning and Zoning Commission is the body responsible for technical approvals (*i.e. approving site plans*), the City Council could choose to grant the Planning and Zoning Commission the ability to approve variances, waivers and exceptions to technical requirements for items like materials, articulation, roof design, architectural features, and other items not relating to land use. Under this scenario, the only time the City Council would see variances, exceptions and/or waivers would be if the Planning and Zoning Commission denies a request, and an applicant chooses to appeal the decision to the City Council. An example of the language proposed in the attached text amendment that would achieve this objective is as follows:

   SECTION 6.16, VARIANCES TO THE OVERLAY DISTRICT STANDARDS

   Unless otherwise specified in this section, an applicant may request the Planning and Zoning Commission grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the technical requirements of this section would create an undue hardship. If the Planning and Zoning Commission denies a variance request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the variance or variances being requested (i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements). Approval of any variance to the requirements of this section by the Planning and Zoning Commission or City Council shall require a supermajority vote

(i.e. a three-fourths vote of those members present), with a minimum of four (4) votes in the affirmative required for approval.

And,

SECTION 4.1, GENERAL COMMERCIAL DISTRICT STANDARDS

2. Exceptions. Exceptions to the material requirements may be permitted on a case-by-case basis by the Planning and Zoning Commission upon recommendation from the Architectural Review Board (ARB). The submission and approval of material samples and building elevations of the structure shall be required. If the Planning and Zoning Commission denies an exception request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the exception being requested (i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements).

2) The majority of the text in Article V, *District Development Standards*, of the UDC is the overlay district requirements, which are essentially the same development standards repeated for each individual overlay district. The length of this section can make it difficult for developers and citizens to find the exact requirements for a particular project. As a result, staff has drafted a single set of requirements for the majority of the City's Overlay Districts and removed the duplicated requirements in each overlay district section. This does not change the requirements for any of the Overlay Districts, but does consolidate them in an easier format that will assist staff, developers and citizens in finding and interpreting various sections of the code.

3) Currently, the Neighborhood Preservation Overlay (NPO) District, Mixed Use Overlay (MU OV) District and Research Technology (RT) District are antiquated or unused overlay and zoning districts. These sections of the code have been removed to make the section shorter and more succinct.

4) The density and dimensional standards for each zoning district have been consolidated into charts, which convey the same information as the sections but in an easier more concise format. This has been done successfully in many other cities surveyed by staff with the objective of shortening zoning ordinances and making codes clearer. Staff has removed the related requirements from each of the zoning districts to avoid duplication.

5) The accessory structure requirements are stated in both Article IV and Article V of the UDC. Some of these standards are contradictory or are duplicated in both sections. Staff has consolidated and reconciled these standards into a chart in Article V of the UDC to make them easier for citizens to understand, and removed all duplicated standards. In addition, staff has removed the Specific Use Permit (SUP) requirement, which means that accessory buildings will no longer be in the purview of the City Council. If approved the ordinance would allow accessory buildings not meeting the minimum masonry requirements to request a masonry exception through the Planning and Zoning Commission; however, any request exceeding the maximum size or height would be required to apply to the Board of Adjustments (BOA) for approval. This is the same process that someone not meeting the minimum housing requirements would be required to go through. The reason staff has put this approval into the purview of the Board of Adjustments (BOA) is to retain the public hearing process -- *which is currently required by the Specific Use Permit (SUP) process* --, and to continue to allow neighborhood participation in requests that do not meet the minimum zoning requirements.

6) The articulation requirements contained in Article V of the UDC were re-written and new illustrations were added to better convey the intent of these standards. As previously stated, the code was also changed to allow the Planning and Zoning Commission the ability to approve an exception pending a recommendation from the Architectural Review Board (ARB). The new standards make a distinction between a primary and secondary façade, and are more in-line with the variances that City Council has been approving.

7) The Open Space standards contained in the *General Standards* do not actually address any standards or guidelines. Staff has added references to the residential, commercial and industrial open space sections for reference. In addition, staff incorporated guidelines (*i.e. not requirements*) for open space in commercial/industrial districts. Previously, there was no direction for developers of commercial/industrial developments concerning open space.

8) The Single Family 1 (SF-1) District contains *Special District Standards* that relate to anti-monotony, fencing and open space. These standards are very similar to the standards that are approved in all of the City's Planned Development District ordinances, and would be better served being applied through the *General Residential District Standards*. By moving these standards to the *General Residential District Standards* the City Council can require all developments proposing a "straight" zoning district (*i.e. SF-1, SF-8.4, SF-7, ect.*) to conform to the same standards that would be applied to any other residential development in the City.

9) Finally, staff removed inconsistencies and clarified certain sections of the code to make them more concise. This also involved updating many of the technical drawings in the code to better convey the intent of the codes, and standardizing the purpose statements for each zoning district/overlay district.

Staff should point out that the text amendment can be scaled to exclude any of the above changes that the City Council does not feel will achieve the goal of reducing the number of variance cases going before the City Council. Staff should also note that if this text amendment is approved, other sections of the code may need to be adjusted in the future to ensure conformance to the requirements being put forth in this text amendment.

In accordance, with Section 4.2 of Article XI, *Zoning Related Applications*, of the UDC staff brought the proposed text amendment forward to the Planning and Zoning Commission for a recommendation to the City Council. On October 30, 2018, the Planning and Zoning Commission approved a motion to recommend approval of the proposed changes by a vote of 6-0, with Chairman Lyons absent. Attached to this case memo is a *clean* copy of the proposed amendment to the UDC and a draft ordinance that shows the proposed mark ups. Staff has sent out a 15-day notice to the Rockwall Herald Banner in accordance with all applicable state laws and Section 6.1 of Article II, *Authority and Administrative Procedures*, of the UDC. Should the City Council have any questions or further direction concerning this text amendment, staff will be available at the meeting on *November 5, 2018* to discuss.

ARTICLE II, AUTHORITY AND ADMINISTRATIVE PROCEDURES

SECTION 7: PLANNING AND ZONING COMMISSION AUTHORITY

SUBSECTION 7.1: APPROVAL AUTHORITY

The planning and zoning commission shall make decisions, or make recommendations to the city council, on the following matters:

A. Decisions on site plans, building elevations, lighting plans, landscape plans and tree preservation plans as may be required.
B. Recommendations to city council on plats as required by the subdivision ordinance, chapter 38 of part II, Code of Ordinances.
C. Recommendations to city council on replats, when such public hearing is required by the provisions of V.T.C.A., Local Government Code Chapter 212.
D. Recommendations to city council regarding text amendments to this Unified Development Code.
E. Recommendations to city council regarding zoning changes and map amendments, including reclassification of the zoning designations on land, specific use permits, and planned developments.
F. Decisions regarding variances and special exceptions to this Unified Development Code.
G. Recommendations to city council regarding amendments to the comprehensive plan.
H. Recommendations to city council regarding amendments to the master thoroughfare plan.
I. Recommendations to city council regarding amendments to a master open space plan.

SECTION 8: CITY COUNCIL AUTHORITY

SUBSECTION 8.1: AUTHORITY

The city council shall hold a meeting, conduct a public hearing -- *if required by this Unified Development Code* -- and make determinations on the following matters:

A. Text amendments to this Unified Development Code.
B. Zoning changes and map amendments, including reclassification of the zoning designations on land, specific use permits, and planned developments.
C. Appeals related to the Planning and Zoning Commission's decision on special exceptions, variances, or waivers related to site plans for development.
D. Amendments to the comprehensive plan.
E. Amendments to the master thoroughfare plan.
F. Amendments to the master open space plan.
G. Variances, special exceptions and appeals as set out in this Unified Development Code.

SECTION 2: ESTABLISHED ZONING DISTRICTS

SUBSECTION 2.01: ZONING DISTRICTS

The City of Rockwall is hereby divided into zones, or districts, as shown on the official zoning map which, together with all explanatory matter thereon, is hereby adopted by reference and declared a part of this [Unified Development Code]. The zones, or districts, hereby established are and shall be known and cited as:

RESIDENTIAL ZONING DISTRICTS

SECTION	DISTRICT REFERENCE	ABBREVIATION
06.02.01	Agricultural (AG) District	AG
06.03.02	Single Family Estate 1.5 (SFE-1.5) District	SFE-1.5
06.03.03	Single Family Estate 2.0 (SFE-2.0) District	SFE-2.0
06.03.04	Single Family Estate 4.0 (SFE-4.0) District	SFE-4.0
06.03.05	Singe Family 1 (SF-1) District	SF-1
06.03.06	Single Family 16 (SF-16) District	SF-16
06.03.07	Single Family 10 (SF-10) District	SF-10
06.03.08	Single Family 8.4 (SF-8.4) District	SF-8.4
06.03.09	Single Family 7 (SF-7) District	SF-7
06.03.10	Zero Lot Line (ZL-5) District	ZL-5
06.03.11	Two-Family (2F) District	2F
06.03.12	Multi-Family 14 (MF-14) District	MF-14

COMMERCIAL ZONING DISTRICTS

06.06.11	North SH-205 Overlay (N. SH-205 OV) District	N. SH-205 OV
06.06.12	East SH-66 Overlay (E. SH-66 OV) District	SH-66 OV
06.06.13	FM-549 Overlay (FM-549 OV) District	FM-549 OV
06.06.14	SH-276 Overlay (SH-276 OV) District	SH-276 OV
06.06.15	Lake Ray Hubbard Takeline Overlay (TL OV) District	TL OV

ARTICLE IV, PERMISSIBLE USES

Links/References: Blue, Underlined

SECTION 1.01: USE OF LAND AND BUILDINGS

Buildings, structures and land shall be used only in accordance with the uses permitted in the following "land use schedule," subject to all other applicable requirements of this [Unified Development Code], including article V, Zoning District Development Standards.

A. The symbol "P" shall mean that the use is permitted as a principal use in that zoning district by right.
B. The symbol "S" shall mean that the principal use is permitted in that zoning district only after first obtaining a "specific use permit" as set forth in this article.
C. The symbol "A" shall mean that this use is specifically permitted as an accessory use to a main use in the district. This does not exclude other land uses which are generally considered ancillary to the primary use.
D. The symbol "+" shall mean that this use is conditional and has special standards or requirements listed in this section, which it must meet in order to be allowed.
E. A blank square shall mean that the use is not allowed in that zoning district as a principal use.

Table 1. Land Use Tables (December 12, 2010)

SECTION 2.01.02: RESIDENTIAL AND LODGING USE CONDITIONS

Accessory Building (Accessory to Residential Use). See *Section 7.04, Accessory Structure Development Standards*.

Bed and Breakfast Operation.

1. Permitted in the Historic Overlay District by right, and in SF-7 by specific use permit, and must be located on an owner-occupied single-family lot.
2. One parking space per bedroom to be rented shall be provided above the single-family parking requirement
3. No outside advertising shall be allowed on the lot unless located in a nonresidential zoning district or permitted by an SUP.
4. A permanent wired smoke alarm system meeting all city codes shall be installed.
5. The premises shall pass a fire code inspection before opening and on an annual basis thereafter.
6. All applicable hotel/motel taxes shall be paid.
7. The maximum length of stay is limited to 14 consecutive days in any 30-day period.
8. Any bed and breakfast specific use permit (SUP) shall be reviewed after an initial six-month period and annually thereafter unless otherwise stipulated in the permit.

Carport (Residential). See *Section 7.04, Accessory Structure Development Standards*.

ARTICLE V, DISTRICT DEVELOPMENT STANDARDS, UDC

SECTION 1: GENERAL STANDARDS

SUBSECTION 1.01: OPEN SPACE

A. *Purpose.* The City of Rockwall is a rural and recreation-oriented community with open space that ties into a regional framework of open space, trails, and corridors. Open space corridors link all major areas of the city using primarily floodplain and drainage areas. Since open space and recreational amenities are vital to the City's commercial and residential developments, all projects must provide open space in accordance with the City's *Comprehensive Plan* and the *Parks, Recreation, and Open Space Master Plan*.

B. *Requirements.* All projects in the city must reserve, dedicate and/or develop public and private open spaces consistent with the requirements of the following sections:

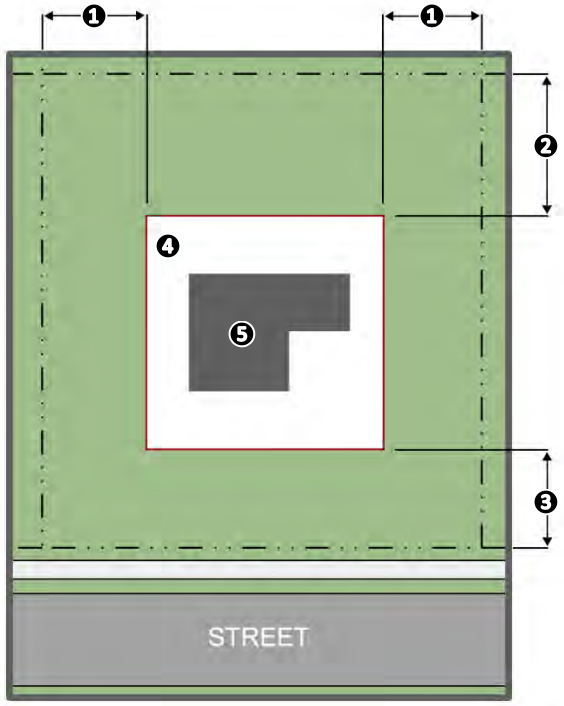
a. *Residential*. Subsection C, *Open Space,* of Section 3.01, *General Residential District Standards*
b. *Commercial*. Subsection D, *Open Space Guidelines,* of Section 4.01, *General Commercial District Standards*
c. *Industrial*. Subsection D, *Open Space Guidelines,* of Section 5.01, *General Industrial District Standards*

SUBSECTION 1.02: SITE PLANS

All development in the City of Rockwall -- *with the exception of single lot single-family and duplex developments* -- shall require the approval of a site plan in accordance with the requirements of Article XI, *Zoning Related Applications*.

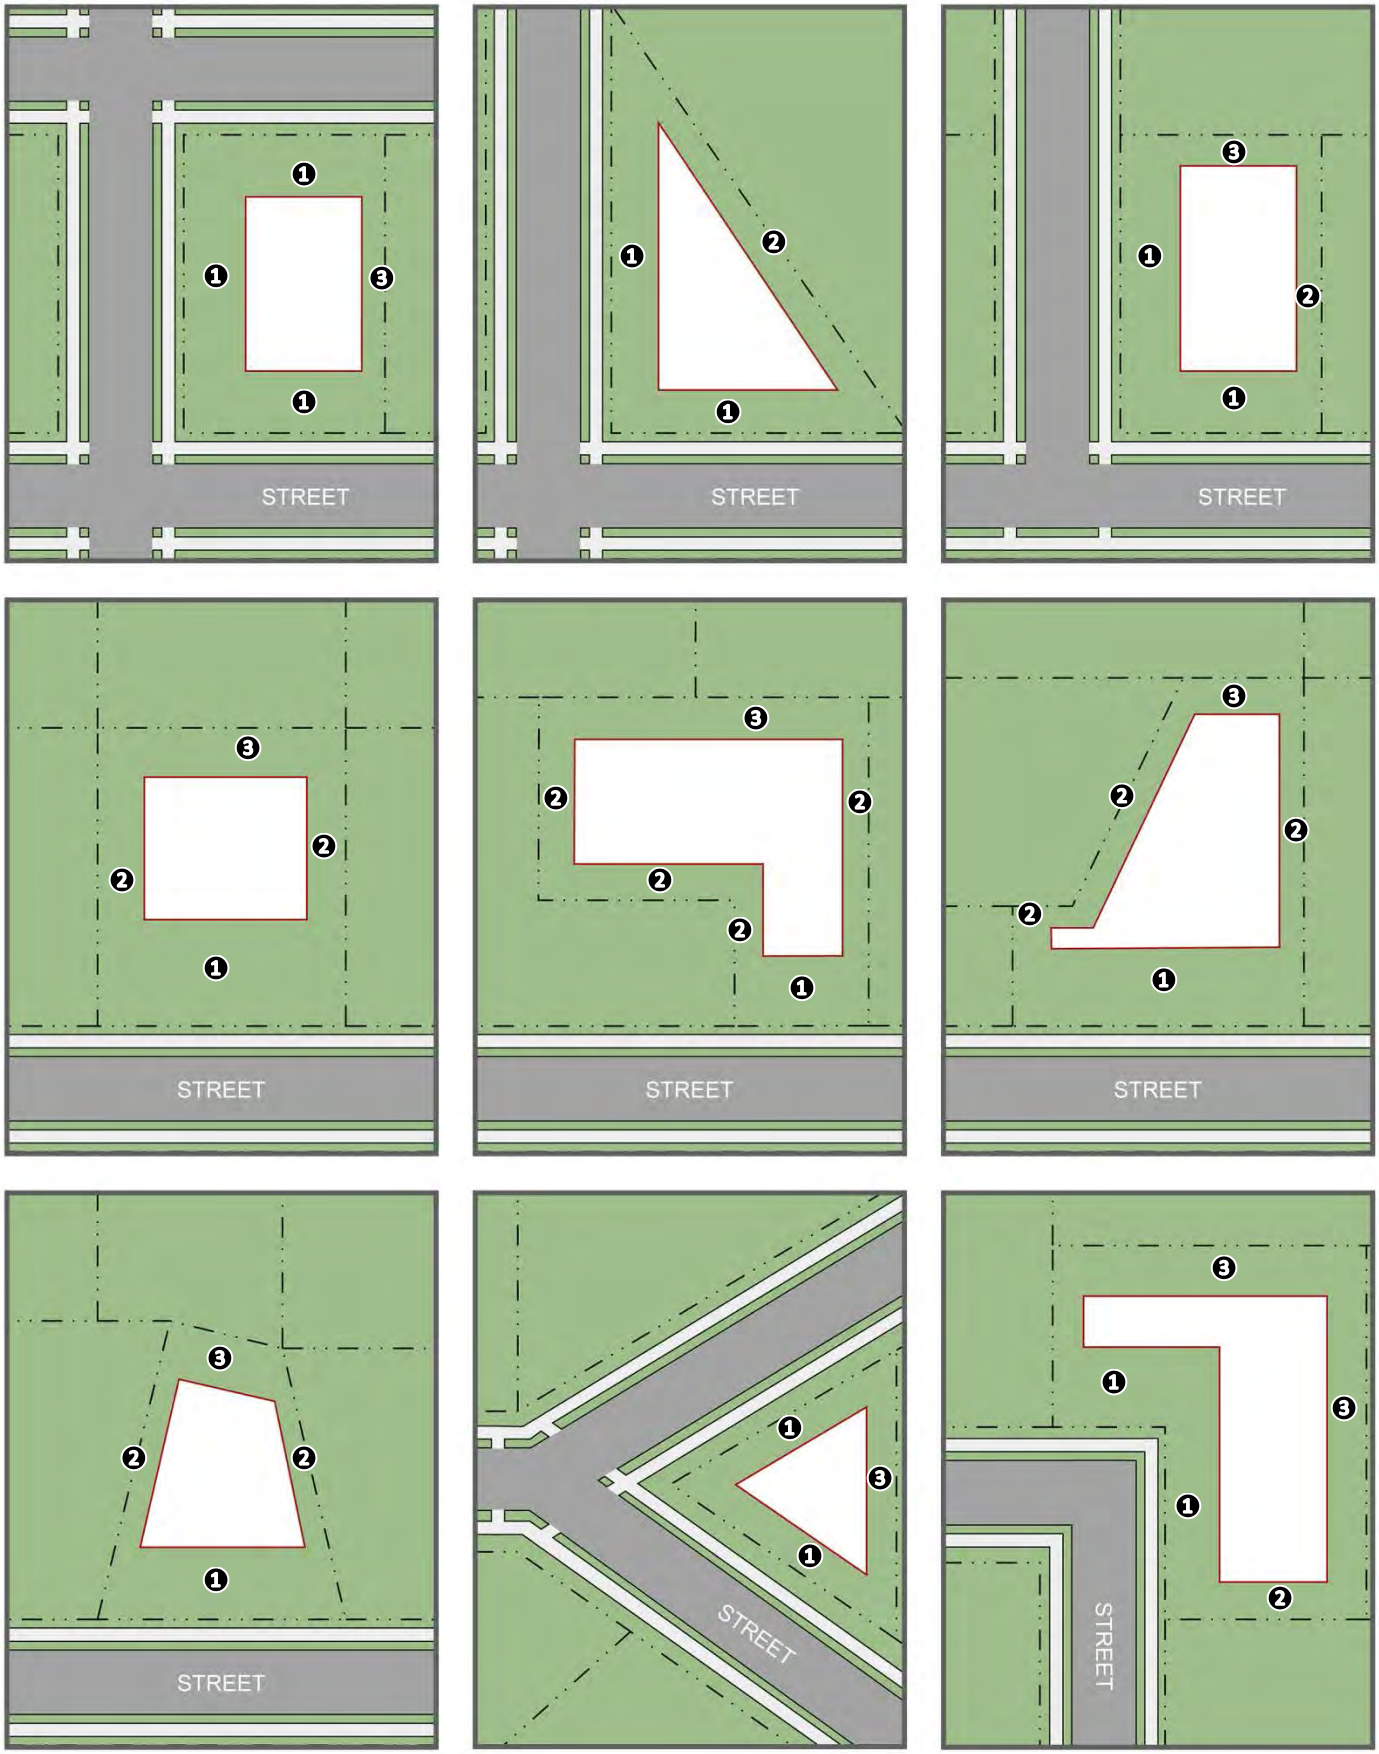
SUBSECTION 1.03: LOT CONFIGURATIONS

A. *Lots with a Single Street Frontage*. Where lots have a single street frontage, the required setbacks should generally adhere to the following diagram:



1: Required Side Yard Setback
2: Required Rear Yard Setback
3: Required Front Yard Setback
4: Buildable Area
5: Building Coverage

B. *Lots with Multiple Street Frontages*. Where lots have multiple street frontages on one (1) or more streets, the required setbacks should generally adhere to the following diagram:



❶: Front Yard; ❷: Side Yard; ❸: Rear Yard

223

SUBSECTION 1.04: CALCULATION OF DENSITY

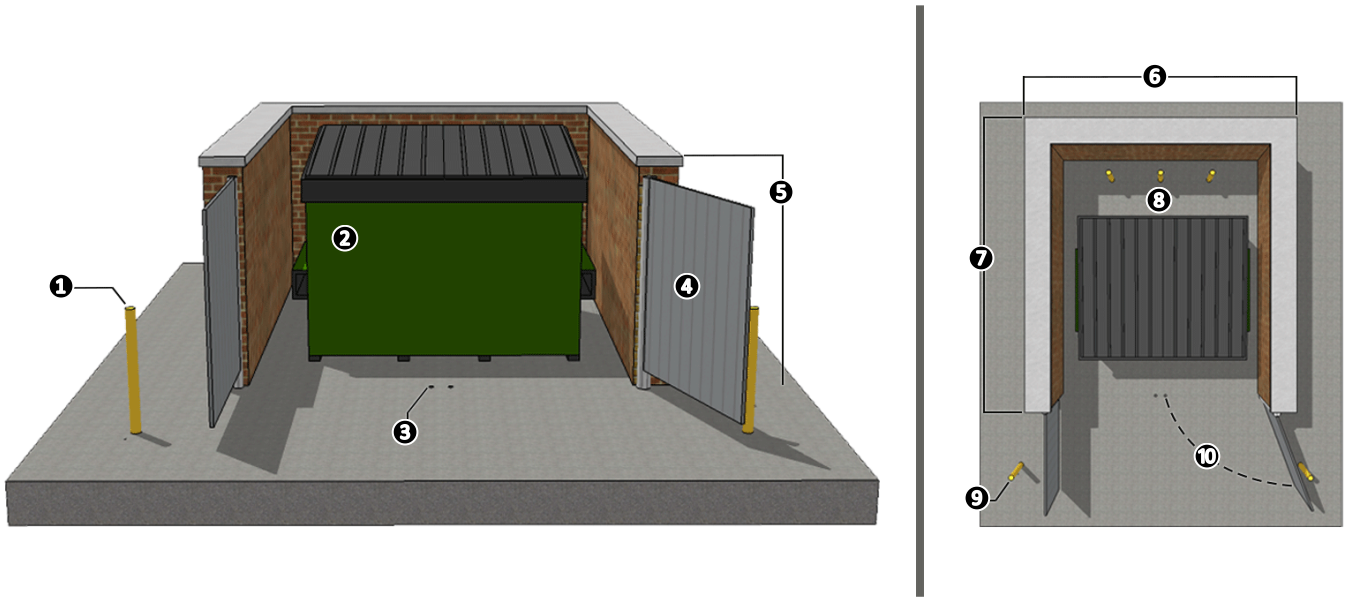
1. The calculation of the allowable density for residential developments shall be based on the gross site area including right-of-way, floodplain, open space and public/private parks that will be dedicated to the city or preserved and maintained by some other mechanism. Despite this calculation requirement, other provisions of this Unified Development Code may limit the actual density allowed on any given property.

SUBSECTION 1.05: SCREENING STANDARDS

All development shall adhere to the following screening standards:

1. *Loading Docks.* Off-street loading docks must be screened from all public streets and any residential zoning district or residentially used property that abuts or is directly across a public street or alley from the subject property. The screening must be at least six (6) feet in height and may be provided by using a masonry wall (excluding tilt wall or concrete masonry units [CMU] unless otherwise approved by the Planning and Zoning Commission), and/or berms and plantings.

2. *Trash/Recycling Enclosures*. Trash/Recycling enclosures shall be four (4) sided. These receptacles shall be screened by a minimum six (6) foot, solid masonry dumpster enclosure that utilizes the same masonry materials as the primary building and incorporates an opaque, self-latching gate. These enclosures shall be located to the side or rear of the primary building, and shall not front on to a public right-of-way. Every effort shall be made to reduce the visibility of these structures utilizing landscaping and/or the building. All trash/recycling enclosures shall be constructed in conformance to the diagram below, unless otherwise approved/required by the City and/or its contractor for trash services.



❶: Concrete Filled Steel Protected Pole
❷: Standard End Loading Container
❸: Deep Recesses for Gate Cane Bolts [*If Necessary*]
❹: Opaque Screening Gate
❺: Six (6) Feet in Height [*Eight (8) Feet in Overlay Districts*]
❻: Ten (10) Feet in Width
❼: 12-Feet in Length
❽: Three (3) Concrete Filled Steel Protected Poles
❾: Concrete Filled Steel Protected Pole
❿: 120 Degree Swing on Opaque Screening Gate

3. *Utility Equipment and Air Condition Units.* Pad or roof mounted utility equipment and air conditioning units shall be screened from view from any adjacent public street or property. Utility equipment and air conditioning units shall be screened utilizing plantings, berms, walls matching the main structure, or an architectural feature that is integral to the building's design.

4. *Aboveground Storage Tanks.* Aboveground storage tanks shall be screened utilizing plantings, berms, or walls matching the main structure. Screening plans for above ground storage tanks shall be approved by the Planning and Zoning Commission in conjunction with a site plan.

(Ord. No. 06-14, 4-17-2006)

SUBSECTION 1.06: RESIDENTIAL ADJACENCY STANDARDS

Subsection 1.06, *Residential Adjacency Standards*, is omitted from this ordinance change, but is retained in its entirety.

SUBSECTION 1.07: FENCES

All fences within the City shall conform to Article XI, *Fences*, of Chapter 10, *Building and Building Regulations*, of the Municipal Code of Ordinances, unless otherwise required by this Unified Development Code.

(Ord. No. 10-14, § 30, 7-6-2010)

SUBSECTION 1.08: PROJECTIONS INTO REQUIRED YARD OR COURT

A. Every part of a required yard within a building setback shall be unobstructed and open from its lowest point to the sky, except for the ordinary projections of sills, belt courses, cornices, chimneys, buttresses, ornamental features and eaves; provided, however, that none of the above projections shall extend into a court more than six (6) inches nor into a required yard by more than 30-inches; and provided existing open porches extending into the required yard shall not be enclosed.

   An open fire escape may project into a required yard by not more than half the width of the setback, but not more than four (4) feet from the building. Fire escapes, solid floored balconies and enclosed outside stairways may project into a rear yard by a maximum of four (4) feet.

B. Where a lot abuts a right-of-way line has been established for the future widening or opening of a street or highway, then the depth or width of a yard shall be measured from such right-of-way line to the required building setback.

   (Ord. No. 06-14, 4-17-2006)

SUBSECTION 1.09: PUBLIC RIGHT-OF-WAY VISIBILITY

A. *Street/drive intersection visibility obstruction triangles.* A landscape plan showing the plan of the street on both sides of each proposed drive/street to the proposed development with the grades, curb elevations, proposed street/drive locations, and all items (both natural and manmade) within the visibility triangles as prescribed below shall be provided with all site plans, if they are not on engineering plans that are submitted at the same time. this plan shall show no horizontal or vertical restrictions (either existing or future) within the areas defined below.

B. *Obstruction/interference triangles defined.* No fence, wall screen, billboard, sign face, tree or shrub foliage, berm, or any other item, either manmade or natural, shall be erected, planted, or maintained in such a position or place so as to obstruct or interfere within the following minimum standards; however, on non-residentially zoned lots, a single pole for mounting a sign may be placed within this area provided the pole does not exceed 12-inches in diameter, and provided every portion of the sign has a minimum height clearance of nine (9) feet:

   1. *Visibility Triangles*. Vision at all intersections which intersect at or near right angles shall be clear at elevations between 24-inches and nine (9) feet above the top of the curb elevation, within a triangular area formed by extending the two (2) curblines from their point of intersection, for the following minimum distances for the applicable intersection, and connecting these points with an

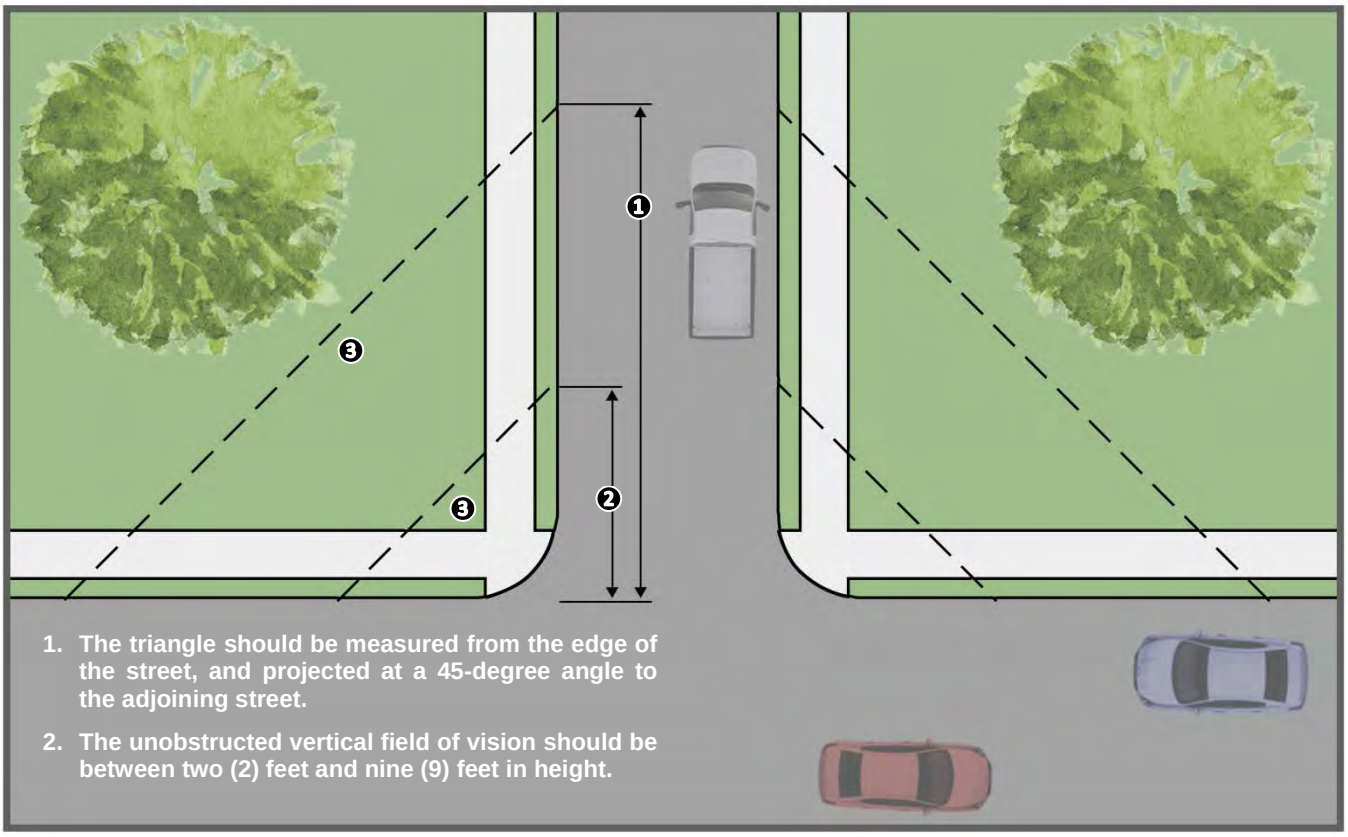
imaginary line, thereby making a triangle. If there are no curbs existing, the triangular area shall be formed by extending the property lines from their point of intersection for a distance as prescribed below, and connecting these points with an imaginary line, thereby making a triangle as shown below.

2. *Intersection of two (2) public streets*. The minimum required distance from the curb shall be 30-feet and the minimum distance from the property line on streets without a curb shall be 20-feet.

3. *Intersection of a public street and an alley*. The minimum required distance measured from the property line shall be 15-feet, or 25-feet from street curb.

4. *Intersection of private drive and public street*. The minimum required distance from the curb shall be 15-feet and the minimum distance from the property line on streets without a curb shall be ten (10) feet.

C. *Sight distance requirements.* The city hereby adopts the standards for both vertical and horizontal sight distance requirements set forth in the latest edition of AASHTO green book "a policy on geometric design of highways and streets" for the construction of both public street intersections and private drive intersections, unless otherwise approved by the city engineer. If, in the opinion of the city engineer, a proposed street or drive intersection does not meet these standards, additional engineering information exhibiting how the standards have been addressed may be required for submission and approval by the city's engineer.



❶: 30-Foot for Arterials and Collectors and 20-Foot for Residential Distance from Intersection for Streets
❷: 10-Foot Distance from Intersection for Alleyways
❸: Visibility Triangles

SECTION 2: AGRICULTURAL DISTRICTS

SUBSECTION 2.01: AGRICULTURAL (AG) DISTRICT

A. *Purpose*. The Agricultural (AG) District is a zoning designation used for land that is reserved for the anticipated future growth of the city. This district is intended to be used for raw land or land with agricultural land uses, and is intended to be held in these conditions as long as practical and reasonable to promote the orderly growth of the community. This zoning designation is suitable for areas where development is premature due to lack of utilities, capacity, or service. The Agricultural (AG) District is also used to protect areas that are unsuitable for development due to physical constraints or safety issues (*e.g. topography, floodplain, ecologically sensitive areas, etc.*), or to protect green belts, natural areas and/or open space that might otherwise be developed.

B. *Permitted Uses*. All land uses permitted within the Agricultural (AG) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements*. All development within an Agricultural (AG) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

SECTION 3: RESIDENTIAL DISTRICTS

SUBSECTION 3.01: GENERAL RESIDENTIAL DISTRICT STANDARDS

All residential development shall conform to the following standards:

A. *Construction Materials*.

1. *Materials and Masonry Composition*. All buildings with a building footprint of 120 square feet or greater that are over ten (10) feet in height shall consist of a minimum of 80% *Primary Materials* and/or a maximum of 20% *Secondary Materials* -- *excluding doors and windows* -- as defined below.

    a. *Primary Materials*. *Primary Materials* shall include stone, brick, and cementaceous materials. Specific requirements for *Primary Materials* are as follows:

        1. *Cementaceous Materials.* The use of cementaceous materials (*e.g. stucco, cementaceous lap siding, or similar materials approved by the Director of Planning or his/her designee*) shall be limited to 60% of the building's exterior façade.
        2. *Chimneys.* All new homes shall be required to incorporate a masonry chimney (*i.e. brick and stone only*).

    b. *Secondary Materials*. *Secondary Materials* are any material that is not deemed to be a *Primary Material* as defined above.

2. *Exceptions*. Exceptions to the material requirements -- *including exceptions for buildings for farm animals* -- may be permitted on a case-by-case basis by the Planning and Zoning Commission–upon submission and approval of material samples and building elevations of the structure. If the Planning and Zoning Commission denies an exception request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the exception being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*).

B. *Accessory Structures*.

1. *Accessory Structure Standards.* All accessory structures shall conform to the related standards listed within Section 7.04, *Accessory Structure Development Standards*.

C. *Open Space.* On all new subdivisions, ten (10) lots or greater, that are not infill projects (*i.e. projects going into an established area as determined by the Director of Planning and Zoning or his/her designee*) the following open space requirements shall be applied:

a. Unless otherwise provided by this Unified Development Code, a minimum of 20% of the gross land area within a residential subdivision that is five (5) acres or greater shall be devoted to open space. Where floodplain exists in a proposed subdivision, the floodplain may be used to meet the 20% requirement at a rate of ½-acre for every one (1) acre of floodplain dedicated to open space. Open space requirements for subdivisions may be satisfied by public open space/parkland, or by a combination of public and private open space. Public open space/parkland shall be dedicated to the city, and shall be approved by the Parks and Recreation Board and the City Council during the platting process. Open space requirements specified in this subsection are in addition to requirements for site landscaping and buffering.

b. To encourage the provision of open space, the minimum lot sizes in a residential subdivision may be reduced by up to 20% in order to preserve additional public and/or private open space, provided that the lots being reduced face onto a single loaded street (*i.e. a street with open space and/or a public park on one side of the street and lots on the other side of the street*). This requirement shall be approved by the City Council at the time of preliminary plat, final plat, or site plan whichever comes first.

D. *Anti-Monotony.* The front elevation of a home shall not repeat along any block face without at least four (4) intervening homes of differing appearance on the same side of the street and two (2) intervening homes of differing appearance on the opposite side of the street. The rear elevation of homes backing to open spaces or thoroughfares shall not repeat without at least two (2) intervening homes of differing appearance. Identical brick blends may not occur on adjacent (*side-by-side*) properties. Homes are considered to differ in appearance if any two (2) of the following elements are different:

a. The number of stories of the home.
b. The garage location/orientation on the home.
c. The roof type and layout of the home.
d. The articulation of the front façade of the home.

E. *Fencing.*

a. Solid fencing shall be cedar standard fencing material that is a minimum ½-inch in thickness or more. Spruce fencing is prohibited. All cedar pickets shall be placed on the *public side* (*i.e. facing out*) facing a street or alleyway. All posts and framing shall be placed on the *private side* (*i.e. facing towards the home*) of the fence. Other types of solid fencing (*e.g. vinyl*) may be considered on a *case-by-case basis* by the Planning and Zoning Commission at the time of preliminary plat, final plat, or site plan whichever comes first.
b. Tubular steel or wrought-iron type fencing shall be allowed.
c. Tubular steel or wrought-iron type fencing shall be required on all lots located adjacent to perimeter roadways, open spaces, greenbelts and/or parks.
d. Split rail fencing shall be allowed on lots containing 20,000 SF or more.
e. Fencing on corner lots constructed adjacent to the street shall provide masonry columns at 45-feet off-center spacing that begins at the rear property line corner and terminates at least 15-feet behind the front yard building setback line. A maximum six (6) foot tall, solid board-on-board, panel cedar fencing or wrought-iron type fencing shall be allowed between the masonry columns along the side and/or rear yard adjacent to a street.

1. On corner lots that have rear lot lines adjacent to alleyways or other rear lot lines, fences may be constructed along the side yard adjacent to the street, subject to a minimum five (5) foot setback from the right-of-way. The property owner shall maintain that portion of the property outside of the fence.

2. On corner lots that have rear lot lines adjacent to a side lot line of an adjoining lot(s), only tubular steel or wrought-iron type fences not exceeding 42-inches in height may be constructed beyond the building line. Fences constructed on or behind the building line shall comply with the material requirements detailed above.

f. All common areas and perimeter fencing shall be maintained by a Homeowners Association (HOA) as specified in the City's subdivision regulations. Perimeter fencing shall be constructed of six (6) foot tall tubular steel or wrought-iron type fencing with masonry columns and entry features. The Planning and Zoning Commission may consider alternative perimeter screening such as earthen berms with landscaping at the time of preliminary plat, final plat, or site plan whichever comes first.

SUBSECTION 3.02: SINGLE-FAMILY ESTATE 1.5 (SFE-1.5) DISTRICT

A. *Purpose*. The Single-Family Estate 1.5 (SFE-1.5) District is the proper zoning classification for rural, estate lots that are a minimum of 1½-acres in size. These lots are typically in areas that are located in the City's hinterland, away from higher density residential developments and non-residential development. While these properties are on the City's periphery, they should still be provided with access to public roadways, water, wastewater, and drainage.

B. *Permitted Uses*. All land uses permitted within the Single-Family Estate 1.5 (SFE-1.5) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements.* All development within a Single-Family Estate 1.5 (SFE-1.5) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

SUBSECTION 3.03: SINGLE FAMILY ESTATE 2.0 (SFE-2.0) DISTRICT

A. *Purpose*. The Single-Family Estate 2.0 (SFE-2.0) District is the proper zoning classification for rural, estate lots that are a minimum of two (2) acres in size. These lots are typically in areas that are located in the City's hinterland, away from higher density residential developments and non-residential development. While these properties are on the City's periphery, they should still be provided with access to public roadways, water, wastewater, and drainage.

B. *Permitted Uses*. All land uses permitted within the Single-Family Estate 2.0 (SFE-2.0) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements.* All development within a Single-Family Estate 2.0 (SFE-2.0) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

SUBSECTION 3.04: SINGLE FAMILY ESTATE 4.0 (SFE-4.0) DISTRICT

A. *Purpose*. The Single-Family Estate 4.0 (SFE-4.0) District is the proper zoning classification for rural, estate lots that are a minimum of four (4) acres in size. These lots are typically in areas that are located in the City's hinterland, away from higher density residential developments and non-residential development. While these properties are on the City's periphery, they should still be provided with access to public roadways, water, wastewater, and drainage. Developers wishing to restrict their subdivision to a lot size greater than four (4) acres shall be required to use restrictive covenants.

B. *Permitted Uses*. All land uses permitted within the Single-Family Estate 4.0 (SFE-4.0) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements.* All development within a Single-Family Estate 4.0 (SFE-4.0) District shall conform to the related standards listed within Section 7.01, *Residential District Development Standards*.

SUBSECTION 3.05: SINGLE-FAMILY 1 (SF-1) DISTRICT

A. *Purpose*. The Single-Family 1 (SF-1) District is the proper zoning classification for larger, single-family lots that are a minimum of one (1) acre in size or clustered developments that have a gross density of one (1) dwelling unit per acre. Cluster developments should conserve open space, floodplains, tree groupings, natural slopes and wildlife habitats to achieve the desired density. The Single-Family 1 (SF-1) District is also intended to be used for developments that incorporate public/private parks, denominational and private schools, and churches that are essential in creating the basic neighborhood unit. These developments are typically in the City's hinterland, away from higher density residential developments and non-residential developments; however, they may be used in areas closer to the periphery of the City's developed areas, where they will serve as a logical transition to an estate or rural area. These developments should provide access to public roadways, water, wastewater, and drainage.

B. *Permitted Uses*. All land uses permitted within the Single-Family 1 (SF-1) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements*. All development within a Single-Family 1 (SF-1) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

SUBSECTION 3.06: SINGLE-FAMILY 16 (SF-16) DISTRICT

A. *Purpose*. The Single-Family 16 (SF-16) District is the proper zoning classification for larger lot, single-family developments. This zoning district also accommodates public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas buffered from non-residential land uses, and where they will serve as a logical transition from higher to lower density residential zoning districts. These developments should provide access to public roadways, water, wastewater, and drainage.

B. *Permitted Uses*. All land uses permitted within the Single-Family 16 (SF-16) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements*. All development within a Single-Family 16 (SF-16) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

SUBSECTION 3.07: SINGLE-FAMILY 10 (SF-10) DISTRICT

A. *Purpose*. The Single-Family 10 (SF-10) District is the proper zoning classification for the majority of the City's existing single-family residential development, and is the appropriate zoning classification for single-family developments with medium sized lots. This zoning district also accommodates public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas buffered from non-residential land uses, and where they will serve as a logical transition from higher to lower density residential zoning districts. These developments should provide access to public roadways, water, wastewater, and drainage.

B. *Permitted Uses*. All land uses permitted within the Single-Family 10 (SF-10) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements*. All development within a Single-Family 10 (SF-10) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

SUBSECTION 3.08: SINGLE-FAMILY 8.4 (SF-8.4) DISTRICT

A. *Purpose*. The Single-Family 8.4 (SF-8.4) District is the proper zoning classification for areas of undeveloped land remaining in the City deemed appropriate for medium sized, single-family lots. This zoning district also accommodates public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas buffered from non-residential land uses, and where they will serve as a logical transition from higher to lower density residential zoning districts. These developments should provide access to public roadways, water, wastewater, and drainage.

B. *Permitted Uses*. All land uses permitted within the Single-Family 8.4 (SF-8.4) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements*. All development within a Single-Family 8.4 (SF-8.4) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

SUBSECTION 3.09: SINGLE-FAMILY 7 (SF-7) DISTRICT

A. *Purpose*. The Single-Family 7 (SF-7) District is the proper zoning classification for single-family developments with smaller lots. This zoning district also accommodates public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas adjacent to low intensity non-residential land uses, in and around the Old Town Rockwall (OTR) Historic District, and/or where they will serve as a logical transition from higher to lower density residential zoning districts. These developments should provide access to public roadways, water, wastewater, and drainage.

B. *Permitted Uses*. All land uses permitted within the Single-Family 7 (SF-7) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements*. All development within a Single-Family 7 (SF-7) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

SUBSECTION 3.10: ZERO LOT LINE (ZL-5) DISTRICT

D. *Purpose*. The Zero Lot Line (ZL-5) District is the proper zoning classification for medium-density residential developments that are on separate lots (*i.e. single-family*), and are typically owner occupied. This zoning district also accommodates public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas buffered from non-residential land uses, adjacent to low intensity non-residential land uses, and/or where they will serve as a logical transition from higher to lower density residential zoning districts. These developments have increased requirements for public roadways, water, wastewater, and drainage due to their density.

A. *Permitted Uses*. All land uses permitted within the Zero Lot Line (ZL-5) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

B. *Area Requirements*. All development within a Zero Lot Line (ZL-5) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

SUBSECTION 3.11: TWO-FAMILY (2F) DISTRICT

A. *Purpose*. The Two-Family (2F) District is the proper zoning classification for medium-density, duplex developments (*i.e. two [2] dwelling units per lot*). This zoning district accommodates low to medium-density developments and allows public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas buffered from non-residential land uses, but may be located directly adjacent to low

intensity non-residential land uses. These areas are also located where they will serve as a logical transition from higher to lower density residential zoning districts. These developments have increased requirements for public roadways, water, wastewater, drainage, open space and fire protection due to their density.

B. *Permitted Uses*. All land uses permitted within the Two-Family (2F) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements*. All development within a Two-Family (2F) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

SUBSECTION 3.12: MULTI-FAMILY 14 (MF-14) DISTRICT

A. *Purpose*. The Multi-Family 14 (MF-14) District is the proper zoning classification for higher density developments. This zoning district should be located within 1,200-feet of retail and other services, and should not contain more than 500-units within one (1) mile of another multi-family development. These standards are intended to create a strong market for multi-family units, and provide for the ongoing reinvestment in these types developments while helping to ensure that inappropriate concentrations of higher density residential developments are not created. The downtown area shall be exempted from the spacing requirements.

The Multi-Family 14 (MF-14) District allows high density developments that are extremely amenitized, and that necessitate additional requirements for public roadways, water, wastewater, drainage, open space and fire protection. These types of developments should not run traffic through single-family neighborhoods, and should be located close to an arterial or collector street that is capable of carrying the additional traffic.

B. *Permitted Uses*. All land uses permitted within the Multi-Family 14 (MF-14) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements*. All development within a Multi-Family 14 (MF-14) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.02, *Multi-Family District Development Standards*.

SECTION 4: COMMERCIAL DISTRICTS

SUBSECTION 4.01: GENERAL COMMERCIAL DISTRICT STANDARDS

All commercial development shall conform to the following standards:

A. *Construction Materials.*

1. *Materials and Masonry Composition*. Each exterior wall of a building's façade shall consist of a minimum of 90% *Primary Materials* and/or a maximum of 10% *Secondary Materials* -- *excluding doors and windows* -- as defined below.

   a. *Primary Materials*. *Primary Materials* shall include stone, brick, glass curtain wall, glass block, tile, and custom Concrete Masonry Units (CMU) (*i.e. CMUs that have been sandblasted, burnished or that have a split face -- light weight block or smooth faced CMU shall be prohibited*). Specific requirements for *Primary Materials* are as follows:

      1. *Stone.* A minimum of 20% stone (*i.e. natural or synthetic/cultured*) is required on all building façades.
      2. *Cementaceous Materials.* The use of cementaceous materials (*e.g. stucco, cementaceous lap siding, or similar materials approved by the Director of Planning or his/her designee*)

shall be limited to 50% of the building's exterior façade; however, stucco shall not be used within the first four (4) feet from grade on a building's façade.

3. *Accent Brick and Stone.* Each building shall incorporate accent brick or stone, or brick and stone patterns and materials that create contrast through color, shape, size, and/or texture to the planes of the primary brick or stone materials used on each building elevation.

b. *Secondary Materials*. *Secondary Materials* are any material that is not deemed to be a *Primary Material* as defined above. This includes materials like aluminum composite materials, metal panels, acrylic products (*i.e. EIFS products*), cast stone, or other materials identified by the Director of Planning and Zoning or his/her designee.

2. *Exceptions.* Exceptions to the material requirements may be permitted on a case-by-case basis by the Planning and Zoning Commission upon recommendation from the Architectural Review Board (ARB). The submission and approval of material samples and building elevations of the structure shall be required. If the Planning and Zoning Commission denies an exception request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the exception being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*).

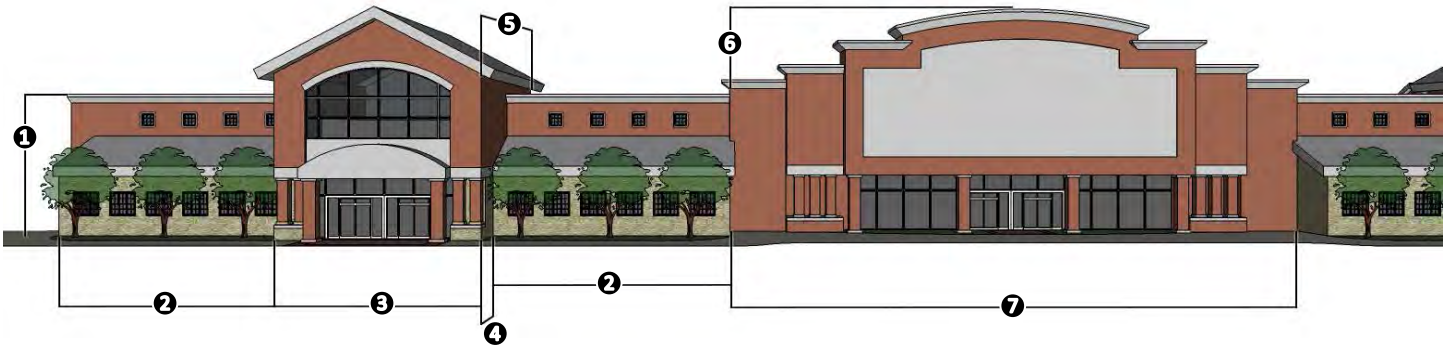
B. *Maximum Building Height*.

1. *Setback Exceptions for Building Height in Commercial Districts*. All structures shall conform to the height requirements specified for the zoning district of the subject property as stipulated by Section 7.03, *Non-Residential District Development Standards*; however, the following features may be constructed 12-feet higher than the maximum height requirement if they [*1*] are not more than 33% of the total roof area, and [*2*] are setback from the edge of the roof a minimum of two (2) feet for every one (1) foot that the feature extends above the surface of the roof:

a. Chimneys, Church Spires, Elevator Shafts, and similar appendages not intended as places of occupancy and/or storage.
b. Flag Poles.
c. Solar Collectors and/or Similar Equipment, Fixtures, and Devices.

C. *Building Articulation.*

1. *Primary Building Façades.* A primary building façade is any building façade that has a primary entryway for a business or that has an adjacency to a public right-of-way, open space/green space, public/private park, and/or a residential zoning district or residentially used property. All commercial buildings shall meet the following standards for articulation on primary building façades:



❶: *Wall Height*. The wall height shall be measured from grade to the top of the wall.
❷: *Wall Length*. The maximum wall length shall not exceed three (3) times the wall height (*i.e. 3 x* ❶ ≥ ❷).
❸: *Secondary Entryway/Architectural Element Length*. The minimum length of the secondary

entryway or projecting architectural element shall be 25% of the wall length *(i.e. 25% x ❷ ≤ ❸)*.

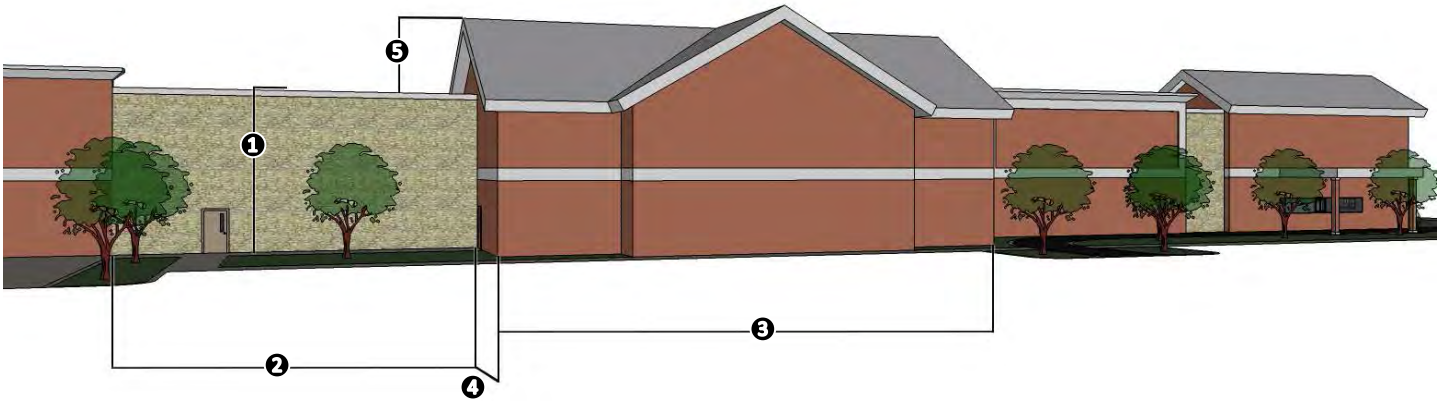
❹: *Wall Projection*. The minimum wall projection for a primary and/or secondary entryway/architectural element shall be 25% of the wall height (*i.e. 25% x ❶ ≤ ❹*).

❺: *Primary and/or Secondary Entryway/Architectural Element Width*. The minimum width of the primary and/or secondary entryway/architectural element shall extend for twice the required wall projection (*i.e. 2 x ❹ ≥ ❺*).

❻: *Projection Height*. The primary and secondary entryways/architectural element shall extend a minimum of 25% of the wall height above the top of the wall (*i.e. 25% x ❶ ≤ ❻*).

❼: *Primary Entryway/Architectural Element Length*. The primary entryway/architectural element shall meet all of the same projections as the secondary entryway/architectural element, but shall extend for a minimum of twice the length of the secondary element (*i.e. 2 x ❸ ≥ ❼*).

2. *Secondary Building Façade.* A secondary building façade is any building façade that does not have a primary entryway or an adjacency to a public right-of-way, open space/green space, public/private park, and/or a residential zoning district or residentially used property. All commercial buildings shall meet the following standards for articulation on secondary building façades:



❶: *Wall Height*. The wall height shall be measured from grade to the top of the wall.

❷: *Wall Length*. The maximum wall length shall not exceed three (3) times the wall height (*i.e. 3 x ❶ ≥ ❷*).

❸: *Secondary Entryway/Architectural Element Length*. The minimum length of the secondary entryway or projecting architectural element shall be 15% of the wall length *(i.e. 15% x ❷ ≤ ❸)*.

❹: *Secondary Entryway/Architectural Element Width*. The minimum wall projection for a secondary entryway/architectural element shall be 15% of the wall height (*i.e. 15% x ❶ ≤ ❹*).

❺: *Projection Height*. The secondary entryway/architectural element shall extend a minimum of 15% of the wall height above the top of the wall (*i.e. 15% x ❶ ≤ ❺*).

3. *Exceptions*. Exceptions to the building articulation requirements may be permitted on a case-by-case basis by the Planning and Zoning Commission pending a recommendation from the Architectural Review Board (ARB). In determining if an exception to the building articulation requirements is appropriate the Planning and Zoning Commission should determine if the proposed request is [*1*] in conformance with the spirit and intent of the building articulation requirements, and [*2*] if granting the exception will substantially weaken the City's ability to enforce the general purpose of the building articulation requirements in the future. If the Planning and Zoning Commission denies an exception request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the exception being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*).

D. *Open Space Guidelines.* Commercial land uses should be designed to be integrated with adjacent land uses, as opposed to separating land uses using physical barriers or screening walls (*unless necessary*). This should be achieved by making commercial developments pedestrian-oriented and easily accessible

234

to adjacent developments through the use of natural buffers, open space and trails. This involves creating trails that connect commercial and residential developments, using landscape buffers that incorporate berms and landscaping to separate residential and non-residential land uses, and utilizing building design to create compatibility with surrounding land uses.

E. *Commercial Buildings 25,000 SF or Greater*.

1. *Applicability.* These criteria shall apply to new retail/commercial building construction in all commercial zoning districts. This criteria shall not be applied to the use, re-use, modification or consolidation of existing retail and/or commercial space developed on or before April 2, 2001, or to the expansion of retail space in existence on or before April 2, 2001, that is being expanded by less than ten (10%) percent of the existing floor area.

2. *Exterior Building Materials.* The area of all exterior facades shall consist of 90% brick, stone, cast stone, custom Concrete Masonry Units (CMUs) (*i.e. CMUs that have been sandblasted, burnished or that have a split face -- light weight block or smooth faced CMU shall be prohibited*), stucco or a combination of these materials. Each facade shall not contain more than 75% of any single material.

3. *Loading Docks.* Loading docks shall not be oriented towards a residential zoning district or residentially used property. Where loading areas are located parallel to a residential zoning district or residentially used property, they must be screened by an architecturally integrated masonry screening wall that is a minimum 14-foot in height and that runs the entire length of the loading space. As an alternative, the Planning and Zoning Commission may approve the use of a berm in conjunction with landscape screening if it is determined that this screening method will [*1*] provide a suitable substitute to a masonry wall, and [*2*] if the screening method will completely screen the proposed loading docks.

4. *On-Site Circulation Guidelines*.

    a. On-site circulation standards should try to minimize the conflict between pedestrians and vehicles by placing driveways and service areas in locations that reduce the chance of interrupting on-site vehicle movement.
    b. Buildings should be placed in a manner that screens the drive-through lane and creates pedestrian pathways and spaces.
    c. In order to maintain on-site circulation, each drive-through lane is to be separate from pump islands and from routes necessary for entering and exiting the property.

5. *Residential Adjacency Standards*. Where the property immediately abuts a residential zoning district or residentially used property -- *unless separated by an M4D (major collector, four [4] lane, divided roadway) or larger thoroughfare* -- a minimum ten (10) foot wide landscaped buffer must be installed for buildings with a building footprint of 25,000 SF to 49,999 SF in area, a minimum 15-foot wide landscaped buffer for buildings with a building footprint of 50,000 SF to 79,999 SF in area, and a minimum 30-foot wide landscaped buffer for buildings with a building footprint of 80,000 SF and greater in area. This shall be in addition to the screening required by the landscape regulations of the City of Rockwall for all aforementioned building sizes. The landscaped buffer must include a combination of berms, evergreen shrubs, and a mix of evergreen and deciduous trees (*minimum four [4] inch caliper*) placed at a minimum 25-feet on center. Planting may be grouped if approved by the Planning and Zoning Commission.

6. *Outside Storage*. Open storage areas shall be connected to the building and screened with a wall that is constructed of the same building materials as the remainder of the primary structure.

7. *Adaptive Reuse Standards*. For those buildings over 80,000 SF in area, the applicant must demonstrate that the building can be subdivided in a reasonable manner by submitting a plan indicating potential entrances and exits and loading areas for multiple tenants. This plan will need to be submitted at the time of site plan.

(Ord. No. 14-52, § 1, 12-1-2014)

SUBSECTION 4.02: RESIDENTIAL-OFFICE (RO) DISTRICT

A. *Purpose*. The Residential-Office (RO) District is a zoning district intended to recognize the existence of older residential areas of the city, where larger houses have been or can be converted from single-family and multi-family residences to low-intensity office uses in order to extend the economic life of these structures, and to allow the owners to justify the expenditures for repairs and modernization. The intent of this district is to allow for low intensity office development providing professional, medical and other office services and limited retail businesses to residents in adjacent neighborhoods. The Residential-Office (RO) District shall have principle access to major or secondary thoroughfares, and may serve as an area of transition between residential and high-intensity, non-residential uses or busy arterial thoroughfares.

B. *Permitted Uses*. All land uses permitted within the Residential-Office (RO) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements*. All development within a Residential-Office (RO) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

SUBSECTION 4.03: NEIGHBORHOOD SERVICES (NS) DISTRICT

A. *Purpose*. The Neighborhood Services (NS) District is a zoning district intended to provide limited retail land uses near neighborhoods for the purpose of supplying the *day-to-day* retail and personal service needs of residents. The Neighborhood Services (NS) District is typically located at limited corner locations on arterials in existing developments, and is intended to serve small service areas. The average site is from ½-acre to a maximum of two (2) acres. Since these sites are typically small and surrounded by residential development they can appear to be spot zones; however, the Comprehensive Plan acknowledges the need to create neighborhood units, which involve the need for limited retail and service uses in close proximity to neighborhoods. These convenience centers should be constructed to a residential scale, and be visually and dimensionally compatible to adjacent residential developments. The Neighborhood Services (NS) District should not contain uses that create excessive amounts of traffic, noise, litter or that would not be conducive to residential adjacency. Due to the residential adjacency of this zoning district, increased landscaping and buffering requirements are necessary.

B. *Permitted Uses*. All land uses permitted within the Neighborhood Services (NS) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements*. All development within a Neighborhood Services (NS) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

SUBSECTION 4.04: GENERAL RETAIL (GR) DISTRICT

A. *Purpose.* The General Retail (GR) District is a zoning district intended to provide limited retail and service uses for one (1) or more neighborhoods. The land uses specified in this district include most types of retail and office activity, and are typically located on/at the intersections of major thoroughfares. This district does ***not*** include strip commercial/retail centers, large shopping centers, wholesaling operations, lumberyards, contractor yards, and/or warehouses with high volumes of commercial truck traffic. The General Retail (GR) District is not a major commercial/retail district, and should try to avoid intensive commercial land uses that carry large volumes of retail traffic. The noise, traffic, litter, late night hours, and other influences that could be harmful to residential areas require adequate buffering and screening from residential areas. Traffic from land uses in this district should not pass through residential areas, except on arterial or major collectors. There are restrictions on access to prevent traffic congestion or an adverse effect on major thoroughfares adjacent to residential

areas. Areas should not be zoned General Retail (GR) District unless they are located on or close to an arterial or major collector that is capable of carrying increased traffic. Since the General Retail (GR) District will be located close to residential areas, the development standards are stringent and require high standards of development similar to the Residential-Office (RO) and Neighborhood Services (NS) Districts.

B. *Permitted Uses.* All land uses permitted within the General Retail (GR) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements*. All development within a General Retail (GR) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

SUBSECTION 4.05: COMMERCIAL (C) DISTRICT

A. *Purpose*. The Commercial (C) District is the proper zoning classification for most types of commercial development (*e.g. larger shopping centers at major intersections, commercial strips along arterial roadways, etc.*). The land uses specified for the Commercial (C) District include most types of office and retail activity with some special provisions for wholesale land uses. This district mostly excludes land uses that are not compatible with retail shopping (*e.g. lumberyards, contractor yards, warehousing, or other land uses with high volumes of truck traffic and low volumes of retail traffic*). The noise, traffic, litter, late night hours, and other influences that could be harmful to neighborhoods require adequate buffering and mitigating factors when locating adjacent to residential areas. Areas should not be zoned to Commercial (C) District unless they are located on or close to an arterial or major collector that is capable of carrying the additional traffic generated by land uses in this district. In addition, these areas may require increased water, fire protection, wastewater and drainage capacity. The Commercial (C) District is a general business zone, and is intended to service most commercial land uses, with the exception of land uses that would fall into the Heavy Commercial (HC) District. Since the Commercial (C) District is general in nature, the development standards are less stringent and do not require as high of standards of development as the Residential-Office (RO), Neighborhood Services (NS) and General Retail (GR) Districts.

B. *Permitted Uses*. All land uses permitted within the Commercial (C) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements*. All development within a Commercial (C) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

D. *Special District Requirements.*

1. *Business Operations and Storage*. All business operations including storage shall be conducted within a completely enclosed building unless specifically authorized for the use as stipulated in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. This excludes off-street parking and loading, incidental display of retail items for sale, retail outlets where gasoline products are sold and drive-in businesses.

SUBSECTION 4.06: HEAVY COMMERCIAL (HC) DISTRICT

A. *Purpose*. The Heavy Commercial (HC) District is the proper zoning classification for commercial establishments that may involve uses that would not be suitable in the other commercial zoning districts. Included in this district are commercial uses that involve large volumes of commercial truck traffic, outside operations, outside storage of materials and equipment, excessive noise from heavy service operations, and/or any other possibly adverse operations. The Heavy Commercial (HC) District is commercial in nature, but has some aspects that are similar to industrial land uses. The zoning district allows noise, traffic, litter, late night hours, outside storage of materials and equipment, and other influences that could be harmful if directly adjacent to residential areas, and will require adequate

buffering and other mitigating factors if such an adjacency exists. Areas should not be zoned to Heavy Commercial (HC) District unless they are located on or close to an arterial that is capable of carrying large volumes of commercial truck traffic. Businesses locating in the Heavy Commercial (HC) District should work with the City to ensure that water, wastewater, and drainage capacity is adequate before locating on a particular property, and that streets in and adjacent to this district are of a size and strength to accommodate commercial truck traffic.

B. *Permitted Uses*. All land uses permitted within the Heavy Commercial (HC) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements*. All development within a Commercial (C) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

D. *Special District Requirements.*

1. *Outside Storage*.

a. All outside storage shall be placed behind the front facade of the main structure. This does not apply to uses that allow incidental display, in which case only the amount of goods necessary for display purposes shall be exempt from this requirement.
b. All outside storage shall be screened from streets and public areas.

SUBSECTION 4.07: DOWNTOWN (DT) DISTRICT

Subsection 4.07, *Downtown (DT) District*, is omitted from this ordinance change, but is retained in its entirety.

SECTION 5: INDUSTRIAL DISTRICTS

SUBSECTION 5.01: GENERAL INDUSTRIAL DISTRICT STANDARDS

All industrial development shall conform to the following standards:

A. *Construction Materials*.

1. *Materials and Masonry Composition*. Each exterior wall of a building's façade shall consist of a minimum of 90% *Primary Materials* and/or a maximum of 10% *Secondary Materials -- excluding doors and windows* -- as defined below.

a. *Primary Materials*. *Primary Materials* shall include stone, brick, glass curtain wall, glass block, tile, and custom Concrete Masonry Units (CMU) (*i.e. CMUs that have been sandblasted, burnished or that have a split face -- light weight block or smooth faced CMU shall be prohibited*). Specific requirements for *Primary Materials* are as follows:

1. *Stone.* A minimum of 20% stone (*i.e. natural or synthetic/cultured*) is required on all building façades.
2. *Cementaceous Materials.* The use of cementaceous materials (*e.g. stucco, cementaceous lap siding, or similar materials approved by the Director of Planning or his/her designee*) shall be limited to 50% of the building's exterior façade; however, stucco shall not be used within the first four (4) feet from grade on a building's façade. The use of concrete tilt-up walls may be permitted on a case-by-case basis in accordance with the exception requirements outlined below.
3. *Accent Brick and Stone.* Each building shall incorporate accent brick or stone, or brick and stone patterns and materials that create contrast through color, shape, size, and/or texture to the planes of the primary brick or stone materials used on each building elevation.

b. *Secondary Materials*. *Secondary Materials* are any material that is not deemed to be a *Primary Material* as defined above. This includes materials like aluminum composite materials, metal panels, acrylic products (*i.e. EIFS products*) cast stone, or other materials identified by the Director of Planning and Zoning or his/her designee.

2. *Exceptions*. Exceptions to the material requirements may be permitted on a case-by-case basis by the Planning and Zoning Commission upon recommendation from the Architectural Review Board (ARB). The submission and approval of material samples and building elevations of the structure shall be required. If the Planning and Zoning Commission denies an exception request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the exception being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*).

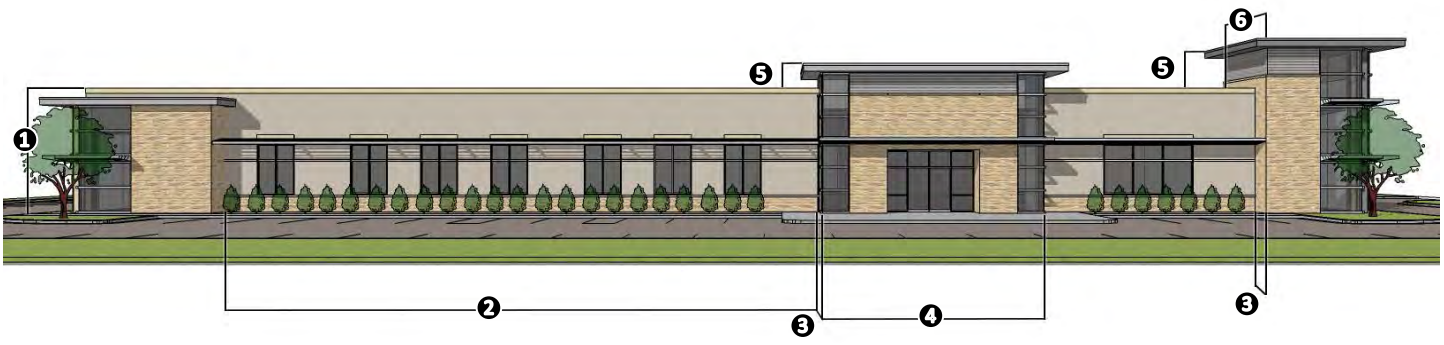
B. *Maximum Building Height.*

1. *Setback Exceptions for Building Height in Industrial Districts*. All structures shall conform to the height requirements specified for the zoning district of the subject property as stipulated by Section 7.03, *Non-Residential District Development Standards*; however, the following features may be constructed 12-feet higher than the maximum height requirement if they [*1*] are not more than 33% of the total roof area, and [*2*] are setback from the edge of the roof a minimum of two (2) feet for every one (1) foot that the feature extends above the surface of the roof:

a. Chimneys, Church Spires, Elevator Shafts, and similar appendages not intended as places of occupancy and/or storage.
b. Flag Poles.
c. Solar Collectors and/or Similar Equipment, Fixtures, and Devices.

C. *Building Articulation*.

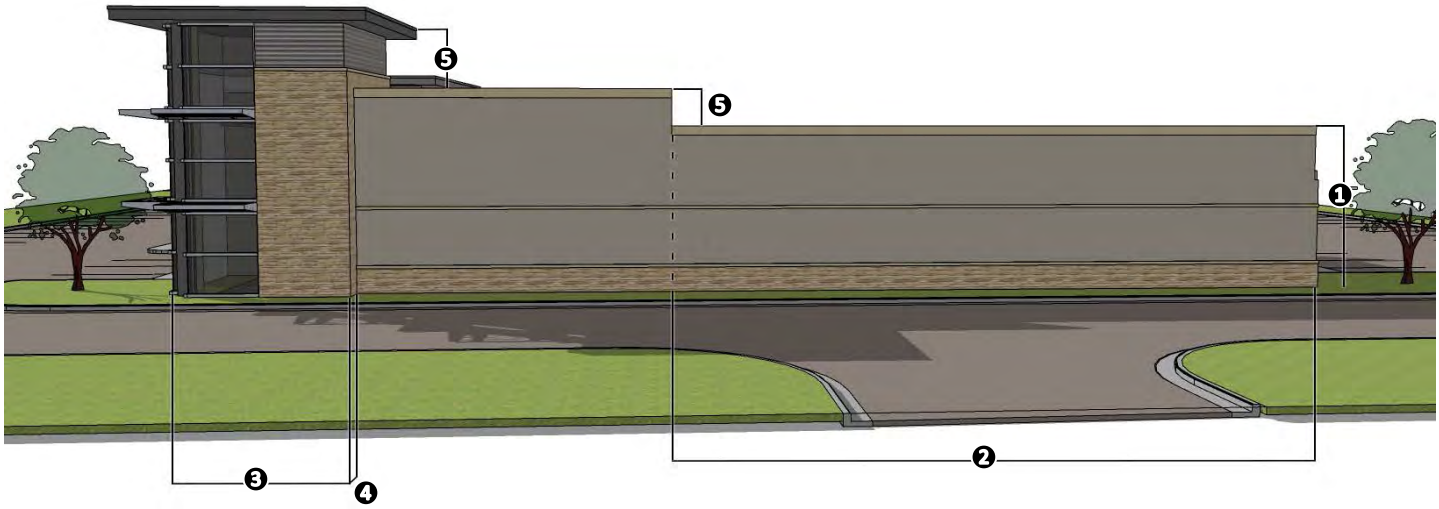
1. *Primary Building Façades.* A primary building façade is any building façade that has a primary entryway for a business or that has an adjacency to a public right-of-way, open space/green space, public/private park, and/or a residential zoning district or residentially used property. All industrial buildings shall meet the following standards for articulation on primary building façades:



❶: *Wall Height*. The wall height shall be measured from grade to the top of the wall.
❷: *Wall Length*. The maximum wall length shall not exceed four (4) times the wall height (*i.e. 4 x* ❶ ≥ ❷).
❸: *Wall Projection*. The minimum wall projection for an entryway/architectural element shall be 25% of the wall height (*i.e. 25% x* ❶ ≤ ❸).
❹: *Entryway/Architectural Element Length*. The minimum entryway/architectural element length shall be 33% of the wall height (*i.e. 33% x* ❷ ≥ ❹).
❺: *Projection Height*. The entryways/architectural elements shall extend a minimum of 25% of the wall height above the top of the wall (*i.e. 25% x* ❶ ≤ ❺).
❻: *Entryway/Architectural Element Width*. The minimum width of the entryway/architectural element

shall extend for twice the required wall projection (*i.e. 2 x* ❸ ≥ ❻).

2. *Secondary Building Façade.* A secondary building façade is any building façade that does not have a primary entryway or an adjacency to a public right-of-way, open space/green space, public/private park, and/or a residentially zoned district or residentially used property. All industrial buildings shall meet the following standards for articulation on secondary building façades:



❶: *Wall Height*. The wall height shall be measured from grade to the top of the wall.
❷: *Wall Length*. The maximum wall length shall not exceed three (3) times the wall height (*i.e. 3 x* ❶ ≥ ❷).
❸: *Secondary Entryway/Architectural Element Length*. The minimum length of the secondary entryway or projecting architectural element shall be 15% of the wall length *(i.e. 15% x* ❷ ≤ ❸).
❹: *Secondary Entryway/Architectural Element Width*. The minimum wall projection for a secondary entryway/architectural element shall be 15% of the wall height (*i.e. 15% x* ❶ ≤ ❹).
❺: *Projection Height*. The secondary entryways/architectural elements shall extend a minimum of 15% of the wall height above the top of the wall (*i.e. 15% x* ❶ ≤ ❺).

3. *Exceptions.* Exceptions to the building articulation requirements may be permitted on a case-by-case basis by the Planning and Zoning Commission pending a recommendation from the Architectural Review Board (ARB). In determining if an exception to the building articulation requirements is appropriate the Planning and Zoning Commission should determine if the proposed request is [1] in conformance with the spirit and intent of the building articulation requirements, and [2] if granting the exception will substantially weaken the City's ability to enforce the general purpose of the building articulation requirements in the future. If the Planning and Zoning Commission denies an exception request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the exception being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*).

D. *Open Space Guidelines*. Industrial land uses should be designed to be integrated with adjacent land uses, as opposed to separating land uses using physical barriers or screening walls (*unless necessary*). This should be achieved by making industrial developments pedestrian-oriented and easily accessible to adjacent developments through the use of natural buffers, open space and trails. This involves creating trails that connect commercial and residential developments, using landscape buffers that incorporate berms and landscaping to separate residential and non-residential land uses, and utilizing building design to create compatibility with surrounding land uses.

A. *Purpose*. The Light Industrial (LI) District is a zoning district intended to create a limited industrial zone that provides for modern types of industrial land uses. With the exception of hazardous materials/manufacturing, this zone allows the same uses as the Heavy Industrial (HI) District. Limitations have been placed on the uses in this district to significantly restrict outside activities and the storage of materials, noise, vibration, smoke, pollution, fire and explosive hazards, glare and any other potentially adverse externalities. The Light Industrial (LI) District is intended for industrial parks and larger, cleaner types of industries. The manufacturing uses should be conducted within a totally enclosed building, and any activities conducted outside should be screened and buffered to ensure no external effects (*e.g. excessive noise or odor*) extend beyond the property lines. The locations for these types of industrial land uses are typically a minimum of two (2) acres and average of five (5) to ten (10) acres. These types of development also incorporate open space and significant amounts of land dedicated to landscaping.

Since this zoning district accommodates limited industrial activities that require substantial screening and buffering requirements, the Light Industrial (LI) District is a suitable zoning designation for high visibility locations (*e.g. IH-30 and SH-276*) or within a reasonable distance of residential areas as long as they are separated by an appropriate amount of open space. Residential uses should be discouraged from locating directly adjacent to or near the Light Industrial (LI) District to protect these types of businesses from excessive complaints about performance standards. Areas should not be zoned to Light Industrial (LI) District unless they are located on or close to an arterial capable of carrying commercial truck traffic. In industrial parks, internal streets should be of a size and strength to accommodate commercial truck traffic. Businesses locating in the Light Industrial (LI) District should work with the City to ensure that water, wastewater, and drainage capacity is adequate before locating on a particular property.

B. *Permitted Uses*. All land uses permitted within the Light Industrial (LI) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements*. All development within a Light Industrial (LI) District shall conform to Section 4.01, *General Industrial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

D. *Special District Requirements.*

1. *Manufacturing Operations and Storage*. All business and manufacturing operations including storage shall be conducted within a completely enclosed building unless specifically authorized for the use as listed in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

SUBSECTION 5.03: HEAVY INDUSTRIAL (HI) DISTRICT

A. *Purpose*. The City of Rockwall recognizes that some industrial uses cannot be conducted within a totally enclosed building, are not visually attractive, may involve hazardous materials, and could have adverse impacts to adjacent land uses due to noise, odor, pollution, and truck traffic. The Heavy Industrial (HI) District is intended to provide adequate space and site diversification for these types of developments. The development standards in the Heavy Industrial (HI) District are minimal, and allow both large and small industrial uses either on separate small lots or as part of a larger industrial park. Some screening is required, but because of the potential for hazardous or possibly adverse uses, this district should not be located close to residential areas of any type. Areas should not be zoned Heavy Industrial (HI) District unless they are located on or close to an arterial roadway capable of carrying commercial truck traffic. Internal streets in the Heavy Industrial (HI) District should be of a size and strength to accommodate commercial truck traffic. Businesses locating in the Heavy Industrial (HI) District should work with the City to ensure that water, wastewater, and drainage capacity is adequate before locating on a particular property.

B. *Permitted Uses*. All land uses permitted within the Heavy Industrial (HI) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements*. All development within a Heavy Industrial (HI) District shall conform to Section 4.01, *General Industrial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

SECTION 6: OVERLAY DISTRICTS

SUBSECTION 6.01: OVERLAY DISTRICTS

Overlay districts are applied to land that has a traditional zoning district designation already applied to it. It establishes additional uses and standards, which may be either more or less restrictive than the underlying zoning district. The overlay district governs in all cases where it sets out a particular use or standard that conflicts with other sections of this Unified Development Code (UDC). In cases where the overlay district does not specifically address a standard or requirement, the underlying zoning district will govern.

SUBSECTION 6.02: GENERAL OVERLAY DISTRICT STANDARDS

A. *Applicability*. The *General Overlay District Standards* shall be applied to the following overlay districts:

- ☑ IH-30 Overlay (IH-30 OV) District
- ☑ SH-205 Overlay (SH-205 OV) District
- ☑ Scenic Overlay (SOV) District
- ☑ SH-66 Overlay (SH-66 OV) District
- ☑ SH-205 By-Pass Overlay (SH-205 BY OV) District
- ☑ North SH-205 Overlay (N. SH-205 OV) District
- ☑ East SH-66 Overlay (E. SH-66 OV) District
- ☑ FM-549 Overlay (FM-549 OV) District
- ☑ SH-276 Overlay (SH-276 OV) District

All other overlay district standards are detailed in Sections 6.03 – 6.15.

B. *Special Use Standards.* Development within the Scenic Overlay (SOV) District and the SH-66 Overlay (SH-66 OV) District shall comply with the *Land Use Schedule* contained in Article IV, *Permissible Uses*, of this Unified Development Code (UDC); however, the following land uses may be considered on a case-by-case basis through a Specific Use Permit:

a. Retail Store with Gasoline Sales (*Any Amount of Dispensers or Vehicles*)
b. Car Wash (*Any Type*)
c. Structures Over 36-Feet in Height

C. *Architectural Standards.*

1. *Materials and Masonry Composition*. Each exterior wall of a building's façade shall consist of a minimum of 90% *Primary Materials* and/or a maximum of 10% *Secondary Materials* -- *excluding doors and windows* -- as defined below.

c. *Primary Materials*. *Primary Materials* shall include stone, brick, glass curtain wall, glass block, tile, and custom Concrete Masonry Units (CMU) (*i.e. CMUs that have been sandblasted, burnished or that have a split face -- light weight block or smooth faced CMU shall be prohibited*). Specific requirements for *Primary Materials* are as follows:

1. *Stone.* A minimum of 20% natural or quarried stone is required on all building façades; however, the Planning and Zoning Commission, upon recommendation from the Architectural Review Board (ARB), may grant the use of a high quality manufactured or cultured stone in lieu of natural or quarried stone if it is determined that the application of the manufactured or cultured stone will be complimentary and integral to the design of

the building. In making this determination, both the Architectural Review Board (ARB) and the Planning and Zoning Commission should consider the shape, texture, size, quality and warranty of the product being proposed.

2. *Cementaceous Materials.* The use of cementaceous materials (*e.g. stucco, cementaceous lap siding, or similar materials approved by the Director of Planning or his/her designee*) shall be limited to 50% of the building's exterior façade; however, stucco shall not be used within the first four (4) feet from grade on a building's façade.
3. *Accent Brick and Stone.* Each building shall incorporate accent brick or stone, or brick and stone patterns and materials that create contrast through color, shape, size, and/or texture to the planes of primary brick or stone materials in an elevation.

d. *Secondary Materials*. *Secondary Materials* are any material that is not deemed to be a *Primary Material* as defined above. This includes materials like aluminum composite materials, metal panels, acrylic products (*i.e. EIFS products*) cast stone, cultured stone or other materials identified by the Director of Planning and Zoning or his/her designee.

2. *Roof Design Standards*. All structures that have a building footprint of less than 6,000 SF shall be constructed with a pitched roof. Those structures having a footprint 6,000 SF or greater shall have the option of being constructed with either a pitched, parapet, or mansard roof system as long as the roof system is enclosed on all sides. Standing seam metal roofs shall be constructed of a factory-treated, non-metallic, matte finish to avoid glare. Metal roofs with lapped seam construction, bituminous built-up roofs, and/or flat membrane-type roofs that are visible from adjacent public right-of-way shall be prohibited.

3. *Mechanical Equipment Screening*. All buildings shall be designed so that no HVAC, satellite dishes, appurtenances and/or any other mechanical equipment visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.

a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances shall be accomplished by either the construction of [*1*] a roof system described in the *Roof Design Standards* above, or [*2*] an architectural feature that is integral to the building's design and ensures that such rooftop mechanical equipment is not visible from any direction. Fencing or the enclosing of individual mechanical units shall not be permitted.

b. All rooftop mechanical equipment or architectural features shall be shown on the required building elevations and submitted along with the site plan for review by City Staff, the Architectural Review Board (ARB), and the Planning and Zoning Commission.

4. *Required Architectural Elements.* All buildings that are less than 50,000 SF shall be designed to incorporate a minimum of four (4) architectural elements, buildings over 50,000 SF shall include a minimum of six (6) architectural elements, and buildings over 100,000 SF shall include a minimum of seven (7) architectural elements. The accepted architectural elements for all buildings are as follows:

- ☑ Canopies, Awnings, or Porticos
- ☑ Recesses/Projections
- ☑ Arcades
- ☑ Peaked Roof Forms
- ☑ Arches
- ☑ Outdoor Patios
- ☑ Display Windows
- ☑ Architectural Details (*e.g. Tile Work and Moldings*) Integrated into the Building's Facade
- ☑ Articulated Ground Floor Levels or Bases
- ☑ Articulated Cornice Line
- ☑ Integrated Planters or Wing Walls that Incorporate Landscape and Sitting Areas
- ☑ Offsets, Reveals or Projecting Rib Expressing Architectural or Structural Bays

- ☑ Varied Roof Heights

NOTE: Other architectural features maybe approved by the Director of Planning and Zoning or his/her designee.

5. *Four (4) Sided Architecture.* All buildings shall be architecturally finished on all four (4) sides utilizing the same materials, detailing, articulation and features. In addition, a minimum of one (1) row of trees (*i.e. four [4] or more accent or canopy trees*) shall be planted along perimeter of the subject property to the rear of the building.

6. *Windows.* The color of all windows shall be reviewed by the Architectural Review Board (ARB), and shall have a maximum visible exterior reflectivity of 20%.

7. *Office Parks, Shopping Centers and Mixed Use Centers.* All buildings within a common retail, commercial or office development shall incorporate complementary architectural styles, materials, and colors. Staff may require a conceptual façade plan and/or sample boards for these types of developments to ensure consistency and compatibility for all buildings within a proposed development. Conceptual façade plans will be used only to ensure compliance to the minimum standards.

8. *Corporate Identity.* A company's building corporate identity that conflicts with the *General Overlay District Standards* shall be reviewed case-by-case basis as a variance in accordance with the requirements of Section 6.16, *Variances to the General Overlay District Standards*.

D. *Site Design Guidelines and Standards.*

1. *Building Setbacks*. The building setbacks adjacent to the *Primary Roadway* (*i.e. IH-30, SH-205, FM-740, SH-66, FM-549, John King Boulevard and SH-276*) shall be as follows:

(1) Scenic Overlay (SOV) District: 15-feet
(2) SH-66 Overlay (SH-66 OV) District: 15-feet
(3) IH-30 Overlay (IH-30 OV) District: 25-feet
(4) SH-205 Overlay (SH-205 OV) District: 25-feet
(5) North SH-205 Overlay (N. SH-205 OV) District: 25-feet
(6) SH-205 By-Pass Overlay (SH-205 BY OV) District:

- ☑ Residential Land Uses: *See Section 6.3.5, SH-205 By-Pass Overlay (SH-205 BY OV) District*
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

(7) East SH-66 Overlay (E. SH-66 OV) District:

- ☑ Residential Land Uses: 25-feet
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

(8) FM-549 Overlay (FM-549 OV) District:

- ☑ Residential Land Uses: 25-feet
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

(9) SH-276 Overlay (SH-276 OV) District:

- ☑ Residential Land Uses: 25-feet
- ☑ Retail/Commercial Land Uses: 15-feet

- ☑ Industrial/Office/Technology Land Uses: 50-feet

All other building setback regulations shall be the same as set forth in the underlying zoning district.

2. *Parking Restrictions*. No more than one (1) full row of parking (*i.e. two rows of parking with a drive aisle*) shall be allowed between the primary building façade and the right-of-way of the *Primary Roadway* (*i.e. IH-30, SH-205, FM-740, SH-66, FM-549, John King Boulevard and SH-276*).

3. *Access/Ingress/Egress*. In an effort to minimize potential vehicular and pedestrian conflicts, special attention must be given to the location of median breaks along major thoroughfares, the number and location of driveways providing ingress/egress, the design of driveways providing ingress/egress in relation to the parking areas and sight/visibility distances. Taking this into consideration it is important to review all site plans for the following guidelines:

   a. Driveways should be spaced a minimum of 100-feet from the intersection of any major thoroughfare.
   b. The ingress/egress driveways shall have a minimum radius of 30-feet;
   c. Driveways should maintain an appropriate visibility triangle at ingress/egress driveways.
   d. Main entrances should generally be located at median breaks that provide left turn access into the site.
   e. Main entrances should connect to a *straightaway* aisle that does not dead end or require an immediate turn to approach the main building.
   f. Aisles intersecting with entrance drives should be spaced at a minimum of 20-feet from the property line to provide for smooth turning movements.

4. *Cross Access*. *Cross Access Easements* may be required by the Planning and Zoning Commission at the time of site plan approval to ensure access to future median breaks and to reduce the number of curb cuts needed along roadways.

5. *Shared Parking.* In all office parks, shopping centers and mixed use centers cross access and shared parking agreements may be required by the City Council along with final plat approval.

6. *Loading and Service Areas*. All loading and service areas shall be located on the rear and side of buildings where possible. In the event that a loading or service area faces towards the *Primary Roadway* (*i.e. IH-30, SH-205, FM-740, SH-66, FM-549, John King Boulevard and SH-276*), additional screening of the loading and service area may be required by the Architectural Review Board (ARB) and Planning and Zoning Commission. A minimum of a ten (10) foot masonry screening wall shall be required to screen the view of loading docks and loading spaces intended for tractor/semi-trailer delivery from any public right-of-way. This ten (10) foot masonry screening wall must screen the entire loading dock or loading space. Screening materials shall utilize similar masonry materials as the front façade of the primary building. The accommodation of adequate access for service delivery trucks shall be evaluated to determine the extent of screening required.

7. *Trash/Recycling Receptacles and Dumpster Enclosures*. Trash/Recycling Enclosures shall be four (4) sided. These receptacles shall be screened by a minimum eight (8) foot, solid masonry dumpster enclosure that utilizes the same masonry materials as the primary building and incorporates an opaque, self-latching gate. These enclosures shall be located to the side or rear of the primary building, and shall not front on to a public right-of-way. Every effort shall be made to reduce the visibility of these structures utilizing landscaping and/or the building.

8. *Play Structures*. Play structures shall not be placed between the primary building façade and a public right-of-way.

9. *Plan Review*. In addition to the other processes and factors established by this Unified Development Code (UDC), all concept plans, development plans and site plans for property situated within an established overlay district shall be reviewed for the following:

a. The conformance of the proposed site plan to the site design guidelines and standards.
b. The conformance of the proposed landscape plan to the intent of the landscaping and screening requirements.
c. The conformance of the building elevations to the intent of the architectural standards.
d. The provision of sufficient cross access and circulation on the site plan.
e. The provision of sufficient visibility triangles to avoid congestion at ingress/egress driveways.

E. *Landscape Standards*.

1. *Landscape Buffers*. The minimum landscape buffer adjacent to *Primary Roadways* (*i.e. IH-30, SH-205, FM-740, SH-66, FM-549, John King Boulevard and SH-276*) [*outside of and beyond any required right-of-way dedication*] shall be as follows:

(1) Scenic Overlay (SOV) District: 20-feet
(2) SH-66 Overlay (SH-66 OV) District: 20-feet
(3) IH-30 Overlay (IH-30 OV) District: 20-feet
(4) SH-205 Overlay (SH-205 OV) District: 20-feet
(5) North SH-205 Overlay (N. SH-205 OV) District: 20-feet
(6) SH-205 By-Pass Overlay (SH-205 BY OV) District:

- ☑ Residential Land Uses: 50-feet
- ☑ Retail/Commercial Land Uses: 25-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

(7) East SH-66 Overlay (E. SH-66 OV) District:

- ☑ Residential Land Uses: 25-feet
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

(8) FM-549 Overlay (FM-549 OV) District:

- ☑ Residential Land Uses: 25-feet
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

(9) SH-276 Overlay (SH-276 OV) District:

- ☑ Residential Land Uses: 25-feet
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

All landscape buffers shall incorporate ground cover, a *built-up* berm and/or shrubbery or a combination thereof along the entire length of the frontage. Berms and/or shrubbery shall have a minimum height of 30-inches and a maximum height of 48-inches. In addition, two (2) canopy trees and four (4) accent trees shall be planted per 100-feet of linear frontage along the *Primary Roadway*. In the E. SH-66 Overlay (E SH-66 OV), FM-549 Overlay (FM-549 OV), and SH-205 By-Pass Overlay (SH-205 BY OV) Districts the required landscape buffer shall incorporate one (1) additional cedar tree per 100-feet of linear of frontage along the *Primary Roadway*.

2. *Plant Material Sizes and Selection*. All canopy trees, accent trees, shrubs and ground cover proposed to be planted in any overlay district shall be in conformance to the tables depicted in Appendix F, *Landscaping Guidelines and Requirements*, of this Unified Development Code (UDC) and shall be subject to the following sizes:

a. *Canopy Trees* shall be a minimum of four (4) caliper inches at DBH.

246

b. *Accent Trees* shall be a minimum of four (4) feet in total height.
c. *Deciduous Shrubs* shall be a minimum of two (2) gallons in size.
d. *Evergreen Shrubs* shall be a minimum of two (2) gallons in size.

3. *Erosion Control/Retaining Walls.* Any slope embankments or retaining walls within the public right-of-way or within the required landscape buffer must be terraced every four (4) feet in height (maximum) with a minimum of a two (2) foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material, which matches the masonry materials used on the primary structure. The planting area must incorporate shrubs, ground cover and grasses.

F. *Signs.* All signage requirements and variances to these requirements shall conform to Chapter 32, *Signs*, of the Municipal Code of Ordinances; however, approval of any variance to the sign standards for property situated within an established overlay district shall require approval by the City Council by a supermajority vote (*i.e. a three-fourths vote of those members present*), with a minimum of four (4) votes in the affirmative required for approval.

G. *Lighting Standards.* No light standard, light fixture, light pole, pole base or combination thereof shall exceed 20-feet in total height in any overlay district with the exception of the IH-30 Overlay (IH-30 OV) District, which shall be limited to a maximum height of 30-feet.

H. *Utility Placement.* All overhead utilities within any overlay district shall be placed underground.

I. *Residential Standards.* No screening walls shall be erected adjacent to the *Primary Roadway* (*i.e. IH-30, SH-205, FM-740, SH-66, FM-549, John King Boulevard and SH-276*) in conjunction with any residential development. In addition, *eyebrow drives* with clusters of lots (*i.e. 5 – 12 homes*) shall be utilized along the *Primary Roadway* for residential developments. In lieu of *eyebrow drives,* a 50-foot landscape buffer may be utilized as an alternative. Farm fencing, including wood rail type and metal pipe and cable fencing, is allowed within the 50-foot landscape buffer. For residential developments within the SH-205 By-Pass Overlay (SH-205 BY OV) District, see *Section 6.3.5, SH-205 By-Pass Overlay (SH-205 BY OV) District*.

SUBSECTION 6.03: HISTORIC OVERLAY (HO) DISTRICT

Subsection 6.03, *Historic Overlay (HO) District*, is omitted from this ordinance change, but is retained in its entirety.

SUBSECTION 6.04: NORTH GOLIAD CORRIDOR OVERLAY (NGC OV) DISTRICT

Subsection 6.04, *North Goliad Corridor Overlay (NGC OV) District*, is omitted from this ordinance change, but is retained in its entirety.

SUBSECTION 6.05: SOUTHSIDE RESIDENTIAL NEIGHBORHOOD OVERLAY (SRO) DISTRICT

Subsection 6.05, *Southside Residential Neighborhood Overlay (SRO) District*, is omitted from this ordinance change, but is retained in its entirety.

SUBSECTION 6.06: IH-30 OVERLAY (IH-30 OV) DISTRICT

A. *Purpose.* The intent of the IH-30 Overlay (IH-30 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and passing through the City of Rockwall. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, single-family land uses shall be excluded from these standards except as otherwise stated.

247

B. *Application and Boundaries.* The IH-30 Overlay (IH-30 OV) District includes the entirety of all properties which adjoin or are located within 500-feet of the future right-of-way of IH-30. The IH-30 Overlay (IH-30 OV) District spans east to west along IH-30 from the eastern city limits (approximately 3,600-feet east of FM 549), west to the western city limit line along Lake Ray Hubbard. The standards and regulations set forth in the IH-30 Overlay (IH-30 OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the IH-30 Overlay (IH-30 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

SUBSECTION 6.07: SH-205 OVERLAY (SH-205 OV) DISTRICT

A. *Purpose.* The intent of the SH-205 Overlay (SH-205 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and passing through the City of Rockwall. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, single-family land uses shall be excluded from these standards except as otherwise stated.

B. *Application and Boundaries.* The SH-205 Overlay (SH-205 OV) District includes the entirety of all properties which adjoin or are located within 200-feet of the future right-of-way of SH-205. The SH-205 Overlay (SH-205 OV) District spans north to south along SH-205 from the intersection point of SH-205 and FM 740, south to the southern city limits (*approximately 2,800-feet south of FM-1139*). The standards and regulations set forth in the SH-205 Overlay (SH-205 OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the SH-205 Overlay (SH-205 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

SUBSECTION 6.08: SCENIC OVERLAY (SRO) DISTRICT

A. *Purpose.* The Scenic Overlay (SOV) District is a specialized overlay district along FM-740 which has been identified in the Comprehensive Plan as a scenic thoroughfare. The identified scenic aspects of FM-740 include views of the lake, existing natural topography, and existing natural landscaping. The district has been established to protect scenic or historic qualities through the use of additional development criteria and by requiring uses compatible with both existing uses and with the visual environment. The development requirements for non-residential uses are more restrictive than in other commercial classifications in order to encourage development that will protect and enhance the existing views, topography, landscape and quality of development. This district is designed to be primarily an office and retail/commercial shopping district with an intensity of uses normally found along major thoroughfares; however, these uses may be located close to residential areas. The type of allowed uses and the more restrictive development requirements provide protection for residential areas. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the Architectural Review Board (ARB).

B. *Application and Boundaries.* The Scenic Overlay (SOV) District shall apply to all property located within the established boundary along FM-740 (*as set forth in Ordinance No. 87-64*). Property that has been zoned, platted and site planned at the time of adoption of the ordinance, from which this section is derived, shall be exempted from the provisions of this section unless and until an application for zoning, platting, or site planning is re-submitted on the property. All property developed within the Scenic Overlay (SOV) District must meet both the terms and requirements of the underlying zoning

classification applicable to the property and the provisions set forth in the Scenic Overlay (SOV) District. The most restrictive requirement applicable to the property shall apply.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the Scenic Overlay (SOV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

SUBSECTION 6.09: SH-66 OVERLAY (SH-66 OV) DISTRICT

A. Purpose. The SH-66 Overlay (SH-66 OV) District is a specialized overlay district along SH-66 and Washington Street between Lake Ray Hubbard and SH-205, which has been identified as one of the important entry points into the City of Rockwall. The identified important scenic aspects of this corridor include views of the lake, existing natural topography, and existing natural landscaping adjacent to residential neighborhoods. The district has been established to protect scenic or historic qualities through the use of additional development criteria, and by requiring uses compatible with both existing uses and with the visual environment. The development requirements for non-residential uses are more restrictive than in other commercial classifications in order to encourage development that will protect and enhance the existing views, topography, landscape and quality of development. This district is designed to be primarily an office and retail/commercial shopping district with an intensity of uses normally found along major thoroughfares; however, these uses may be located close to residential areas. The type of allowed uses and the more restrictive development requirements provide protection for residential areas. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the Architectural Review Board (ARB).

B. *Application and Boundaries.* The SH-66 Overlay (SH-66 OV) District shall apply to all property located within the established boundary along SH-66 and Washington Street, between Lake Ray Hubbard and SH-205 (*as set forth in Ordinance No. 01-18*). Property that has been zoned, platted and site planned at the time of adoption of the ordinance, from which this section is derived, shall be exempted from the provisions of this section unless an application for zoning, platting, or site planning is resubmitted on the property. All property developed within the SH-66 Overlay (SH-66 OV) District must meet both the terms and requirements of the underlying zoning classification applicable to the property and the provisions set forth in the SH-66 Overlay (SH-66 OV) District. The most restrictive requirement applicable to the property shall apply.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the SH-66 Overlay (SH-66 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

SUBSECTION 6.10: SH-205 BY-PASS OVERLAY (SH-205 BY OV) DISTRICT

A. *Purpose.* The intent of the SH-205 By-Pass Overlay (SH-205 BY OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and passing through the City of Rockwall. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility and plan review shall be conducted through the Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family uses only. All other residential uses shall be excluded from these standards except as otherwise stated.

B. *Application and Boundaries.* The SH-205 By-Pass Overlay (SH-205 BY OV) District includes the entirety of all properties which adjoin or are located within 500 feet of the current and future right-of-way of John King Boulevard. The SH-205 By-Pass Overlay (SH-205 BY OV) District ~~Zone~~ extends along the current and future right-of-way of John King Boulevard. to the existing city limits. The standards and regulations set forth in the SH-205 By-Pass Overlay (SH-205 BY OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

249

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the SH-205 By-Pass Overlay (SH-205 BY OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

D. *Special District Requirements*.

(1) *Residential Frontage Requirements*. To ensure proper separation of residential land uses from John King Boulevard all residential developments that have direct frontage on John King Boulevard shall utilize one (1) or a combination of the following design alternatives along the entire frontage of John King Boulevard:

a. *Increased Landscape Buffer*. A minimum of a 100-foot landscape buffer maybe substituted for the required landscape buffer as depicted in *Design Alternative #1*.

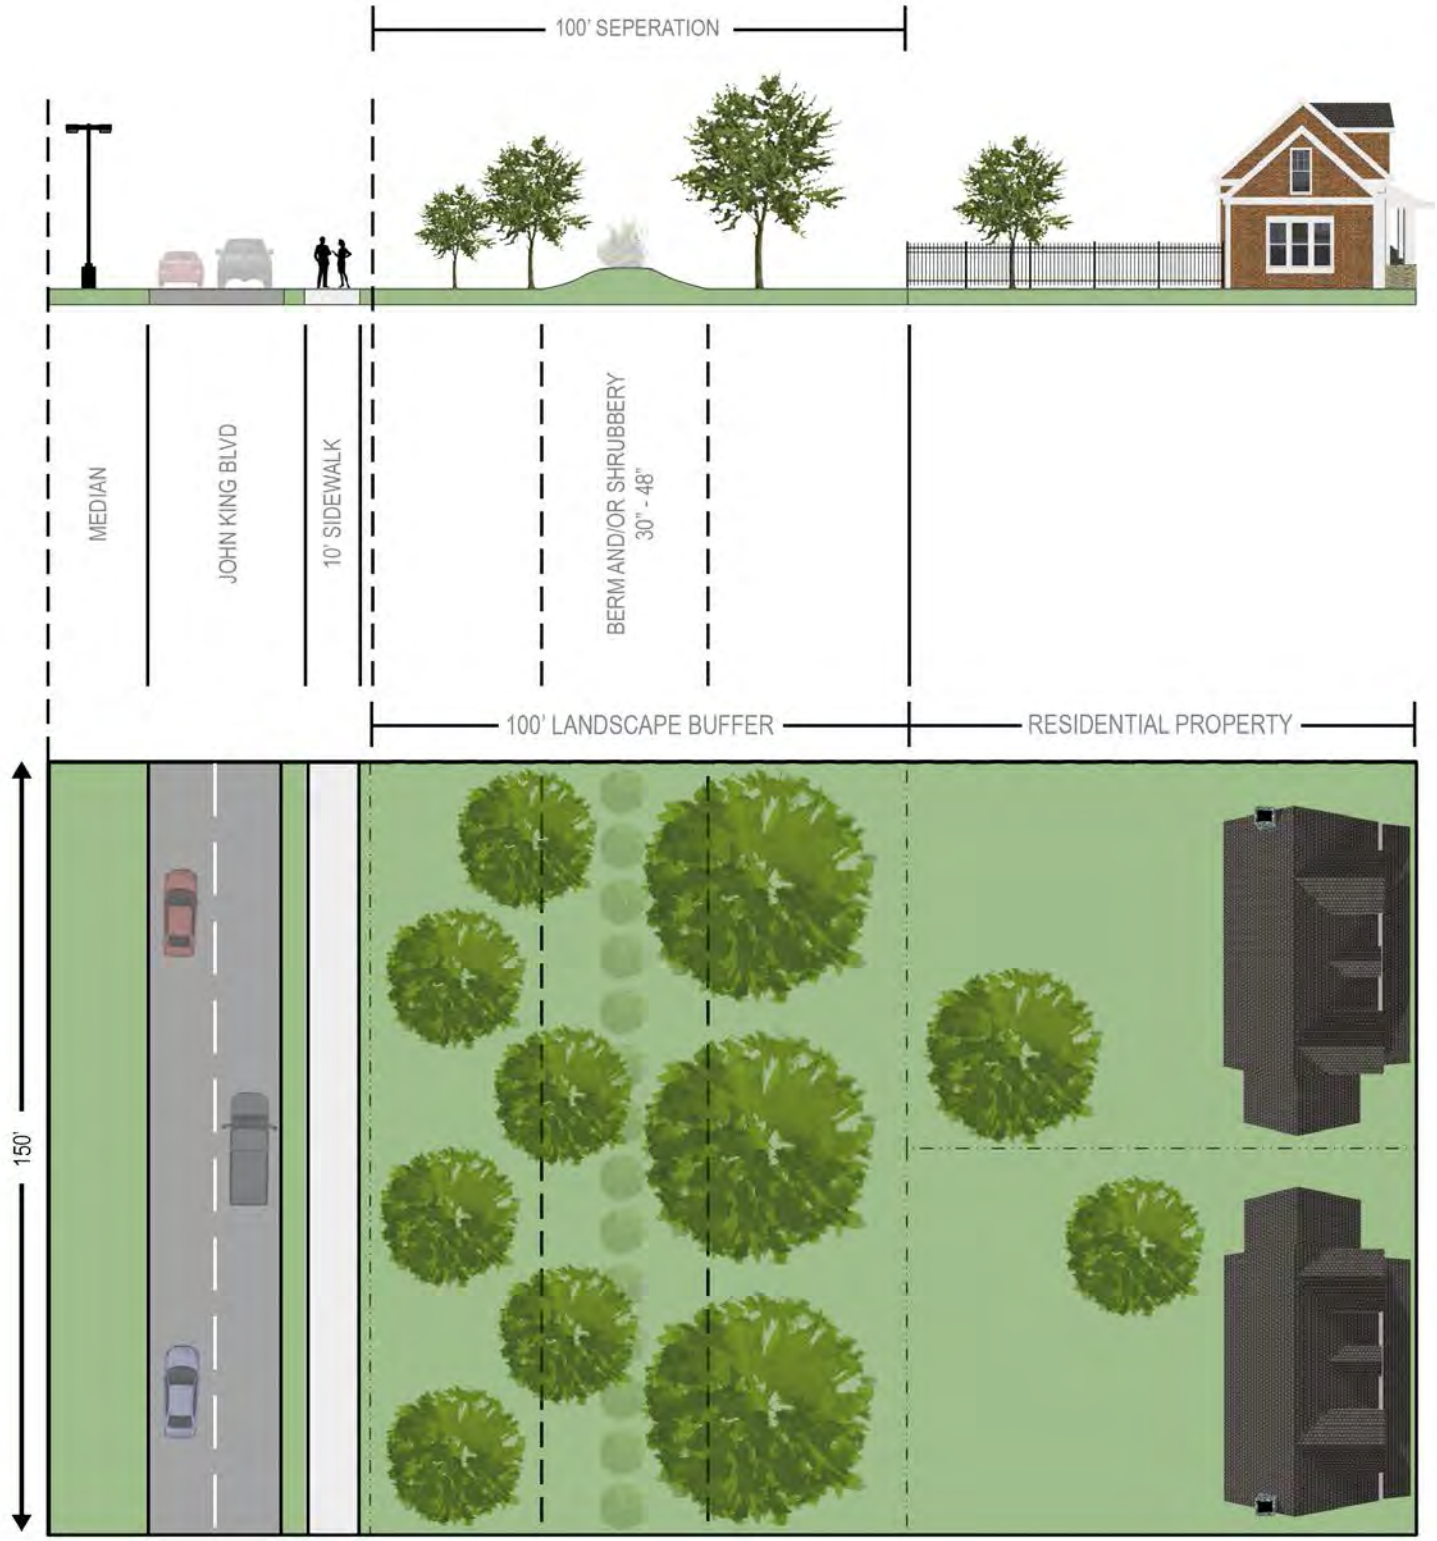
b. *Increased Rear Yard Building Setback*. A minimum of 50-foot rear yard building setback may be incorporated adjacent to the required landscape buffer as depicted in *Design Alternative #2.*

b. *Incorporation of a Slip Street*. A slip street -- *meeting the Engineering Department's requirements for right-of-way design* -- may be incorporated adjacent to and running parallel with the required landscape buffer. Homes are permitted to front or side to the slip street. Examples of this design alternative are depicted in *Design Alternative #3* and *Design Alternative #4.*

c. *Incorporation of an Eyebrow*. An eyebrow street meeting the -- *Engineering Department's requirements for right-of-way design* -- with a minimum cluster of five (5) homes and a maximum cluster of 12 homes can be incorporated with a 30-foot landscape buffer. All homes should front onto the eyebrow street and have a minimum of a 25-foot front yard building setback. An example of this design alternative is depicted *Design Alternative #5.*

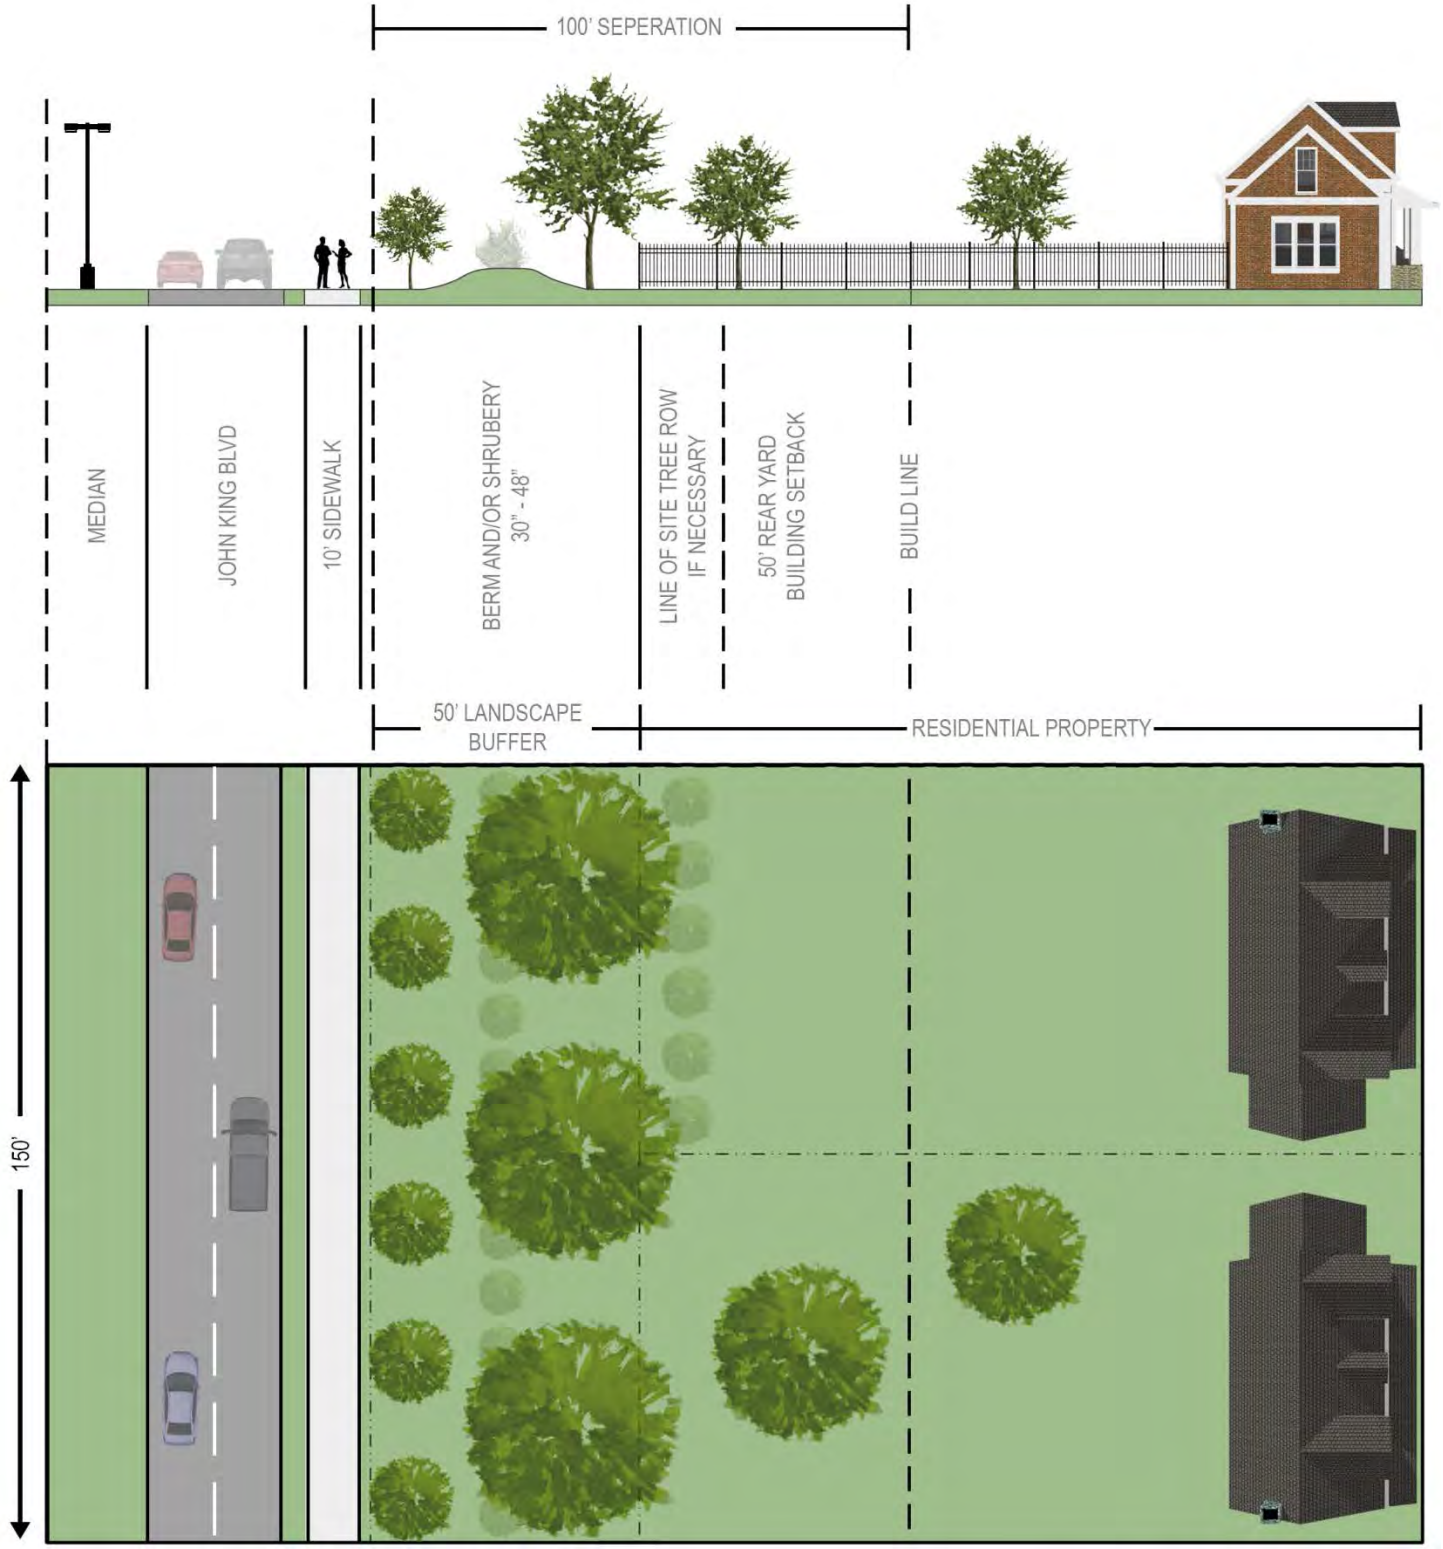
(2) *Design Alternatives.*

Design Alternative #1

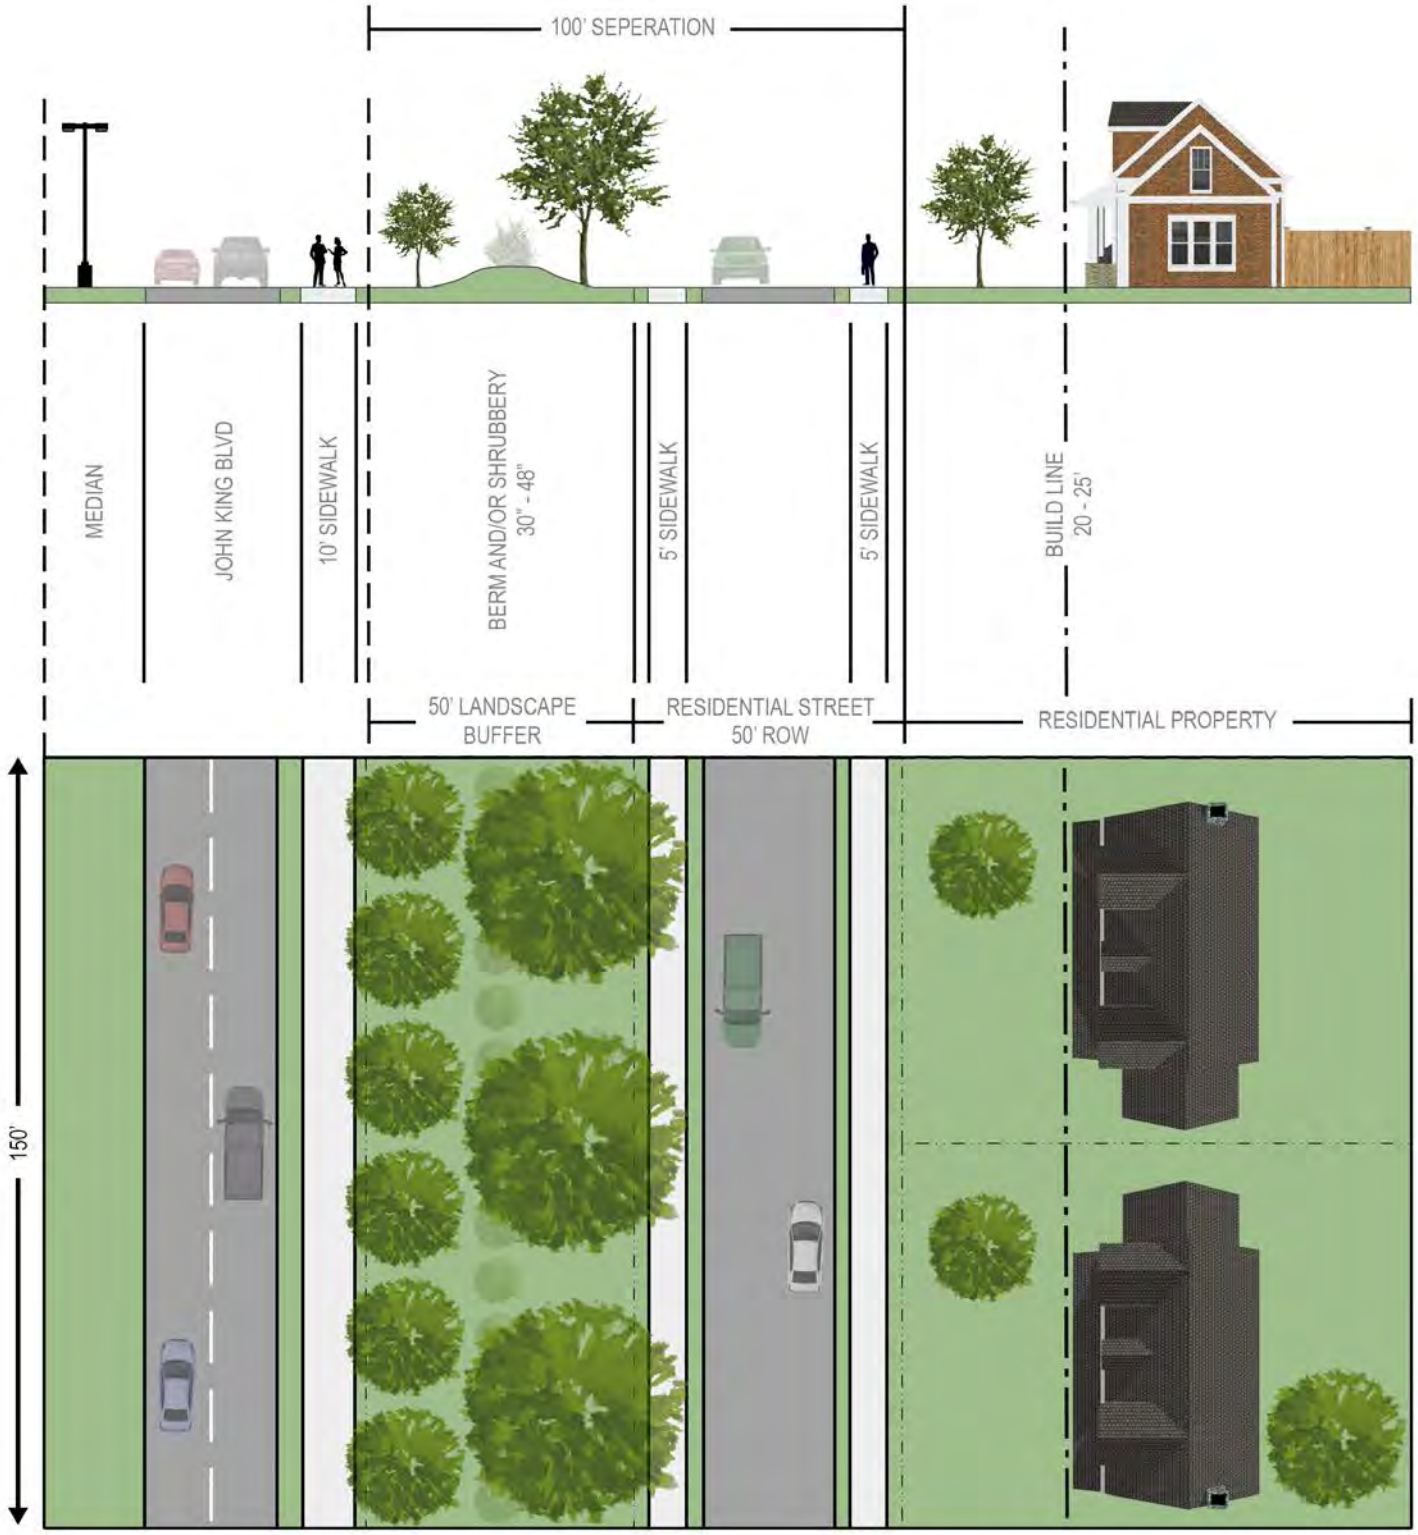


251

Design Alternative #2



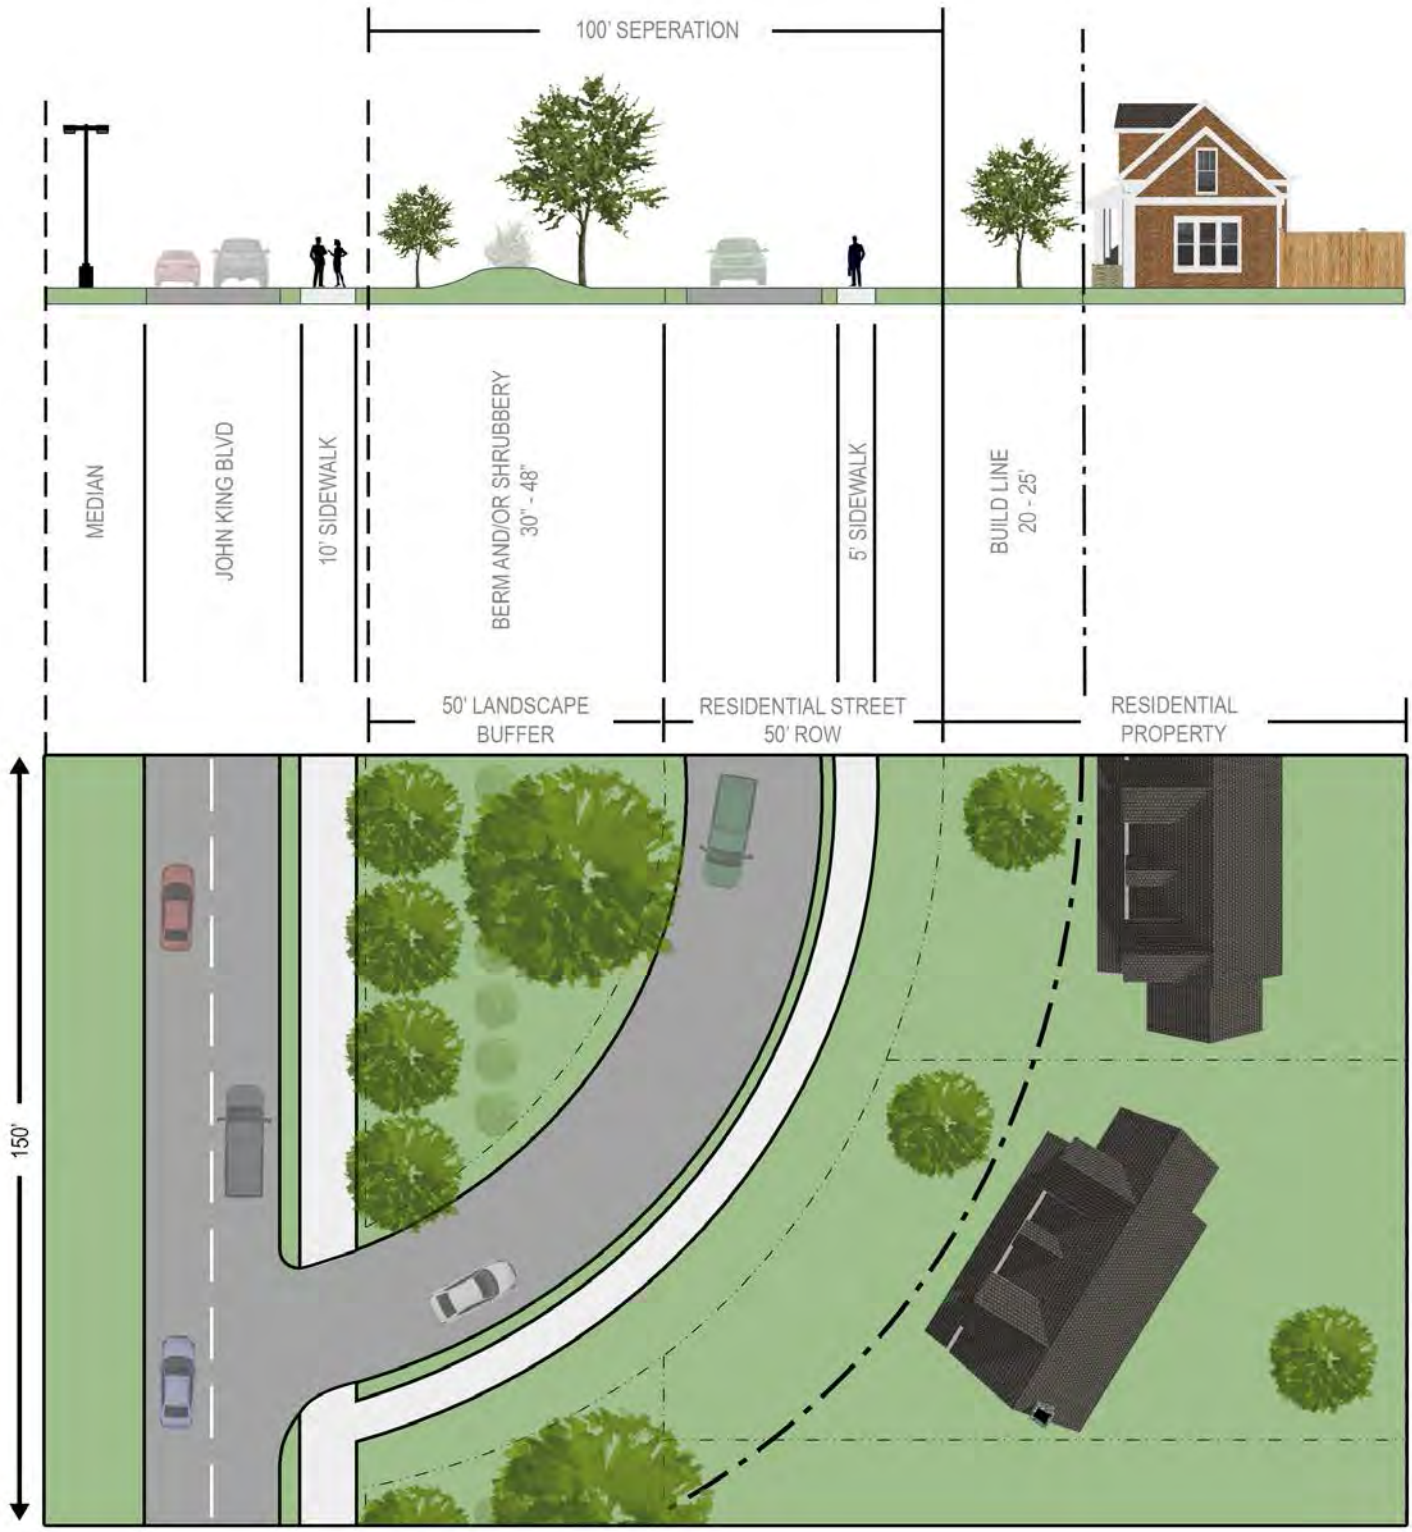
Design Alternative #3



Design Alternative #4

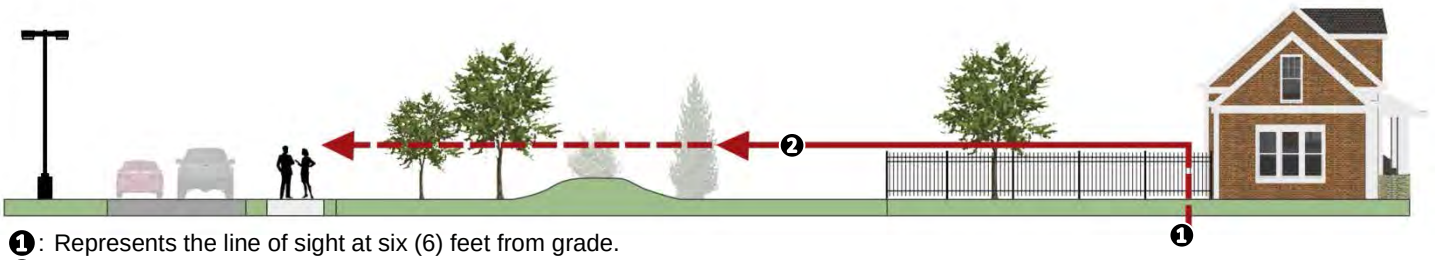
254

Design Alternative #5



255

(3) *Line of Sight Requirements*. Homes that back to a required landscape buffer should be built in such a manner where the required berm visually impairs visibility to John King Boulevard. In cases where a berm proves to be ineffective at screening traffic from John King Boulevard (*due to topography, height, etc.*) the developer shall be responsible for incorporating additional landscaping to provide sufficient screening in the required landscape buffer. This will be reviewed by the Planning and Zoning Commission at the time of site plan.



❶: Represents the line of sight at six (6) feet from grade.
❷: The solid red line shows that visibility is impaired from John King Boulevard by [*1*] a row of trees or [*2*] a berm and/or row of shrubbery.

SUBSECTION 6.11: NORTH SH-205 OVERLAY (N. SH-205 OV) DISTRICT

A. *Purpose.* The intent of the North SH-205 Overlay (N. SH-205 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and passing through the City of Rockwall. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, single-family land uses shall be excluded from these standards except as otherwise stated.

B. *Application and boundaries.* The North SH-205 Overlay (N. SH-205 OV) District includes the entirety of all properties which adjoin or are located within 500-feet of the current or future right-of-way of N. SH-205. The North SH-205 Overlay (N. SH-205 OV) District spans north to south along SH-205 from the northern city limits (approximately 4,200-feet north of FM-552), south to the intersection point of SH-205 and Heath Street. The standards and regulations set forth in the North SH-205 Overlay (N. SH-205 OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the North SH-205 Overlay (N. SH-205 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

SUBSECTION 6.12: EAST SH-66 OVERLAY (E. SH-66 OV) DISTRICT

A. *Purpose.* The intent of the East SH-66 Overlay (E. SH-66 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and passing through the City of Rockwall. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, single-family land uses shall be excluded from these standards except as otherwise stated.

B. *Application and boundaries.* The East SH-66 Overlay (E. SH-66 OV) District includes the entirety of all properties which adjoin or are located within 500-feet of the current or future right-of-way of E. SH-66. The East SH-66 Overlay (E. SH-66 OV) District extends from FM-1141 to the east approximately 2,700-feet, and on property that lies within 500-feet of the south right-of-way line of SH-66 beginning at a point

approximately 2,700-feet east of FM-1141 and then continuing east to FM-549. The standards and regulations set forth in the East SH-66 Overlay (E. SH-66 OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the East SH-66 Overlay (E. SH-66 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

SUBSECTION 6.13: FM-549 OVERLAY (FM-549 OV) DISTRICT

A. *Purpose.* The intent of the FM-549 Overlay (FM-549 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and passing through the City of Rockwall. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, single-family land uses shall be excluded from these standards except as otherwise stated.

B. *Application and boundaries.* The FM-549 Overlay (FM-549 OV) District includes the entirety of all properties which adjoin or are located within 500-feet of the current or future right-of-way of FM-549. The FM-549 Overlay (FM-549 OV) District extends from SH-276 to a point approximately 800-feet north of IH-30 and on property that lies within 500-feet of the west right-of-way line of FM-549 from a point approximately 800-feet north of IH-30 to SH-66. The standards and regulations set forth in the FM-549 Overlay (FM-549 OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the FM-549 Overlay (FM-549 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

SUBSECTION 6.14: SH-276 OVERLAY (SH-276 OV) DISTRICT

A. *Purpose.* The intent of the SH-276 Overlay (SH-276 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and passing through the City of Rockwall. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, single-family land uses shall be excluded from these standards except as otherwise stated.

B. *Application and boundaries.* The SH-276 Overlay (SH-276 OV) District includes the entirety of all properties which adjoin or are located within 500-feet of the current or future right-of-way of SH-276. The SH-276 Overlay (SH-276 OV) District extends from SH-205 east to the eastern city limits, as may be extended with future annexation(s). The standards and regulations set forth in the SH-276 Overlay (SH-276 OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the SH-276 Overlay (SH-276 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

SUBSECTION 6.15: LAKE RAY HUBBARD TAKELINE OVERLAY (TL OV) DISTRICT

Subsection 6.15, *Lake Ray Hubbard Takeline Overlay (TL OV) District*, is omitted from this ordinance change, but is retained in its entirety.

SUBSECTION 6.16: VARIANCES TO THE GENERAL OVERLAY DISTRICT STANDARDS

Unless otherwise specified in this section, an applicant may request the Planning and Zoning Commission grant a variance to any provision contained in *Section 6.02, General Overlay District Standards*, where unique or extraordinary conditions exist or where strict adherence to the technical requirements of this section would create an undue hardship. If the Planning and Zoning Commission denies a variance request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the variance or variances being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*). Approval of any variance to the requirements of this section by the Planning and Zoning Commission or City Council shall require a supermajority vote (*i.e. a three-fourths vote of those members present*), with a minimum of four (4) votes in the affirmative required for approval.

SECTION 7: DISTRICT DEVELOPMENT STANDARDS

Residential District Development Standards Zoning Districts → Development Standards ↓		Single-Family Estate 1.5 (SFE-1.5) District	Single Family Estate 2.0 (SFE-2.0) District	Single-Family Estate 4.0 (SFE-4.0) District	Single-Family 1 (SF-1) District	Single-Family 16 (SF-16) District	Single-Family 10 (SF-10) District	Single-Family 8.4 (SF-8.4) District	Single-Family 7 (SF-7) District	Zero Lot Line (ZL-5) District	Two-Family (2F) District	Agricultural (AG) District
Abbreviation		SFE-1.5	SFE-2.0	SFE-4.0	SF-1	SF-16	SF-10	SF-8.4	SF-7	ZL-5	2F	AG

	Width (Feet) [2]	150	150	200	70	90	80	70	60	50	60	100
	Depth (Feet)	250	250	250	100	100	100	100	100	90	100	200
Minimum Setbacks	Front (Feet)	50	50	50	20	25	20	20	20	20	20	40
	Rear (Feet)	10	10	10	10	10	10	10	10	10	10	10
	Side (Feet) [3]	25	25	25	6	8	6	6	6	0/10[4]	0[5]/6[6]	6
Between Buildings (Feet)		10	10	10	10	10	10	10	10	10	10	12
Building Height (Feet)		36	36	36	36	36	36	36	32	30	32	36
Minimum Masonry Content (%)		80	80	80	80	80	80	80	80	80	80	80
Maximum Lot Coverage (%)		35	35	35	45	45	45	45	45	50	45	*N/A*
Required Parking Spaces [7]		2[8]	2[8]	2[8]	2[8]	2[8]	2[8]	2[8]	2[8]	2[9]	2[10]	2[8]

ADDITIONAL REQUIREMENTS:

[1]: The Single Family 1 (SF-1) District allows for one (1) unit per gross acre.

[2]: Frontage on a Public Street

[3]: The side setback adjacent to a street is treated the same as a front yard building setback.

[4]: Minimum maintenance easement is ten (10) feet. Minimum maintenance easement on the non-zero lot line side, when adjacent to another lot in the same zoning district is five (5) feet (*this easement shall be maintained as an open space except upon a finding by the building official that the proposed improvements do not impede the use of said easement for maintenance of the adjoining structure*).

[5]: Abutting structures separated by fire retardant walls.

[6]: Townhouses separated by firewall meeting the requirements of the building code may build to the property line where such structures abut.

[7]: Minimum length of driveway pavement from public right-of-way for rear and side yard is 20-feet.

[8]: An enclosed garage shall not be considered in meeting the off-street parking requirements. For all other uses see Article VI, *Parking and Loading*.

[9]: A two (2) car garage is required.

[10]: Two (2) off-street parking spaces plus one (1) garage parking space for each dwelling unit is required.

[11]: A minimum lot size of ten (10) acres is required for the construction of any single-family dwelling.

Multi-Family District Development Standards Zoning Districts → Development Standards ↓		Multi-Family 14 (MF-14) District [1]
Abbreviation		MF-14
Dwelling Units/Acre		14.0[2]
Minimum Lot Requirements	Site Area (Square Feet)	10,000
	Lot Area (Square Feet)	2,000 (*Per Unit*)
	Width (Feet)[3]	60
	Depth (Feet)	100
Minimum Setbacks	Front (Feet)	25
	Rear (Feet) w/ Residential Adjacency (Feet)[3 & 8]	One Story = 25 Two Stories = 50 Three Stories = 75
	Rear (Feet)	10
	Side w/ Residential Adjacency (Feet)[4 & 8]	One Story = 25 Two Stories = 50 Three Stories = 75
	Side (Feet)	One Story = 10 Two or More Stories = 15
Between Buildings (Feet)		Main to Accessory = 10 Two Main Buildings w/ Doors or Windows in Facing Walls = 20 Two Main Buildings w/o Doors or Windows in Facing Walls = 15
Building Height (Feet)		36
Minimum Masonry Content (%)		100
Maximum Lot Coverage (%)		45[5]
Minimum Landscaping (%)[7]		25% of Total Lot Area w/ 30% of Total Required in the Front and Alongside Buildings w/ Street Frontage [6]
Required Parking Spaces		See Article VI, *Parking and Loading*

ADDITION REQUIREMENTS:

[1]: Duplexes shall meet the requirements of the Two-Family (2F) District, with only one (1) duplex per lot.

[2]: Density is calculated by gross acre.

[3]: Unenclosed carports may be built within five (5) feet of any property line that abuts an alley, but no closer than 20-feet from any street intersection.

[4]: Side on street is treated the same as a front yard building setback.

[5]: Each development containing over 100 dwelling units shall provide 300 SF of open space per two (2) and three (3) bedroom units, with at least one (1) open area with the minimum dimensions of 200-feet by 150-feet. Swimming pools, tennis courts and other recreational facilities can be counted toward the overall open space requirement, but not toward the required 200-feet by 150-feet area.

[6]: Any parking lot with more than two (2) rows of parking spaces shall have a minimum of two (2) percent of the interior of the parking lot landscaped. Such landscaping shall be counted toward the landscaping requirement.

[7]: All required landscaped areas shall be permanently maintained and shall have an irrigation system installed meeting all applicable city codes.

[8]: Lots with more than five (5) dwelling units that are contiguous to a residential zoning district, must be separated by a buffer as established in Article VIII, *Landscape Standards*.

261

ADDITIONAL REQUIREMENTS:

[1]: A maximum building size of 5,000 SF in area, unless otherwise approved through a Specific Use Permit (SUP) by the Planning and Zoning Commission and City Council.

[2]: A maximum building size of 25,000 SF in area, unless otherwise approved through a Specific Use Permit (SUP) by the Planning and Zoning Commission and City Council.

[3]: Maximum lot area is 43,560 SF.

[4]: From future right-of-way as shown on the adopted Master Thoroughfare Plan or as actually exists, whichever is greater.

[5]: Parking should not be located between the front façade and the property line.

[6]: Lots with non-residential uses that have a side or rear yard contiguous or separated only by an alley, easement, or street, from any residential district must be separated from such residential district by a buffer as defined in Article VIII, *Landscape Standards*, or as approved by the Planning and Zoning Commission.

[7]: Not to exceed 50-Feet.

[8]: Building height may be increased up to 60-feet if approved through a Specific Use Permit (SUP) by the Planning and Zoning Commission and City Council.

[9]: Building height may be increased up to 240-feet if approved through a Specific Use Permit (SUP) by the Planning and Zoning Commission and City Council.

[10]: (or) as approved by Planning and Zoning Commission.

[11]: A minimum of seven (7) percent of the interior of the parking lot -- *not including the setback and landscape buffer* -- shall be pervious land area with additional plantings to create an amenity open space.

[12]: Parking shall not be permitted in the required setback.

[13]: Building height may be increased up to 120-feet if approved through a Specific Use Permit (SUP) by the Planning and Zoning Commission and City Council.

SUBSECTION 7.04: ACCESSORY STRUCTURE DEVELOPMENT STANDARDS

Building Height (Feet)		15	15	15	15	10	10	15	15
Minimum Masonry Content (%) [3]		80[5]	80[5]	80[5]	80[5]	80[5]	0	80[5]	80[5]

ADDITIONAL REQUIREMENTS:

[1]: Accessory buildings and accessory structures shall be accessory to a residential use and located on the same lot. Unless stipulated above, only two (2) accessory structures are permitted per single-family lot; excluding carports that are integrated into the main accessory structure.

[2]: If more than one (1) accessory building is proposed or if an accessory building, 625 SF or less, is existing then the maximum accessory building that can be constructed is 625 SF. If there is an existing accessory building greater than 625 SF no additional accessory buildings or structures are permitted.

[3]: Greenhouses are exempt from the minimum masonry requirements.

[4]: If the accessory building does not have garage doors facing the alleyway the setback is the same as the base zoning district.

[5]: The exterior of the accessory building or structure shall be clad in the same materials in roughly the same proportions as the primary structure; however, accessory buildings or structures that are less than 120 SF and under ten (10) feet in height may be constructed with non-masonry materials, or may be all metal with a baked-on pre-painted surface.

[6]: Each property shall be permitted one (1) detached garage up to 900 SF and one (1) accessory building up to 225 SF.

[7]: In residential districts, carports must be open on at least two (2) sides, architecturally integrated into the primary structure, and be located 20-feet behind the corner of the front façade and meet the garage setback adjacent to an alley. Porte-cocheres are not considered carports, and are allowed, if they are attached and integral with the design of the house.

[8]: Accessory buildings and accessory structures not meeting the masonry requirements shall require the approval of an exception from the Planning and Zoning Commission.

[9]: Barns used for agricultural and/or farm animal purposes, on sites ten (10) acres or more that are zoned Agricultural (AG) District, are excluded from this masonry requirement.

APPENDIX F, LANDSCAPING GUIDELINES AND REQUIREMENTS

SECTION F.3: RESERVED

264

CITY OF ROCKWALL

ORDINANCE NO. 18-XX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, BY AMENDING ARTICLE II, *AUTHORITY AND ADMINISTRATIVE PROCEDURES*, ARTICLE III, *ZONING DISTRICTS AND MAPS*, ARTICLE IV, *PERMISSIBLE USES*, ARTICLE V, *DISTRICT DEVELOPMENT STANDARDS*, AND APPENDIX F, *LANDSCAPE GUIDELINES AND REQUIREMENTS*; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, an amendment to the City of Rockwall's Unified Development Code [*Ordinance No. 04-38*] has been initiated by the City Council of the City of Rockwall to amend Article II, *Authority and Administrative Procedures*; Article III, *Zoning Districts and Maps*; Article IV, *Permissible Uses*; Article V, *District Development Standards*; and, Appendix F, *Landscape Guidelines and Requirements,* of the Unified Development Code [*Ordinance No. 04-38*]; and,

WHEREAS, the Planning and Zoning Commission of the City of Rockwall and the governing body of the City of Rockwall in compliance with the laws of the State of Texas and the ordinances of the City of Rockwall have given the requisite notices by publication and otherwise, and have held public hearings and afforded a full and fair hearing to all property owners generally and to all persons interested in and situated in the city's corporate boundaries, and the governing body in the exercise of its legislative discretion, has concluded that the Unified Development Code [*Ordinance No. 04-38*] should be amended as follows:

NOW, THEREFORE, **BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:**

SECTION 1. That Article II, *Authority and Administrative Procedures,* of the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall, as heretofore amended, be and the same is hereby amended as specifically described in *Exhibit 'A'* of this ordinance.

SECTION 2. That Article III, *Zoning Districts and Maps,* of the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall, as heretofore amended, be and the same is hereby amended as specifically described in *Exhibit 'B'* of this ordinance.

SECTION 3. That Article IV, *Permissible Uses,* of the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall, as heretofore amended, be and the same is hereby amended as specifically described in *Exhibit 'C'* of this ordinance.

SECTION 4. That Article V, *District Development Standards,* of the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall, as heretofore amended, be and the same is hereby amended as specifically described in *Exhibit 'D'* of this ordinance.

SECTION 5. That Appendix F, *Landscape Guidelines and Requirements,* of the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall, as heretofore amended, be and the same is hereby amended as specifically described in *Exhibit 'E'* of this ordinance.

SECTION 6. That any person, firm, or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a penalty of fine not to exceed the sum of *Two Thousand Dollars ($2,000.00*) for each offense and each and every day such offense shall continue shall be deemed to constitute a separate offense;

DRAFT ORDINANCE 9.4.2018

SECTION 7. That if any section, paragraph, or provision of this ordinance or the application of that section, paragraph, or provision to any person, firm, corporation or situation is for any reason judged invalid, the adjudication shall not affect any other section, paragraph, or provision of this ordinance or the application of any other section, paragraph or provision to any other person, firm, corporation or situation, nor shall adjudication affect any other section, paragraph, or provision of the Unified Development Code [*Ordinance No. 04-38*], and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions for this ordinance are declared to be severable;

SECTION 8. That this ordinance shall take effect immediately from and after its passage.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 5TH DAY OF NOVEMBER, 2018.

_____
Jim Pruitt, *Mayor*

ATTEST:

_____
Kristy Cole, *City Secretary*

APPROVED AS TO FORM:

_____
Frank J. Garza, *City Attorney*

1st Reading: *November 5, 2018*

DRAFT ORDINANCE 11.19.2018

Additions: Highlighted
Deletions: ~~Highlighted, Strikeout~~

SECTION 7: PLANNING AND ZONING COMMISSION AUTHORITY

SUBSECTION 7.1: APPROVAL AUTHORITY

The planning and zoning commission shall make decisions, or make recommendations to the city council, on the following matters:

A. Decisions on site plans, building elevations, lighting plans, landscape plans and tree preservation plans as may be required.
B. Recommendations to city council on plats as required by the subdivision ordinance, chapter 38 of part II, Code of Ordinances.
C. Recommendations to city council on replats, when such public hearing is required by the provisions of V.T.C.A., Local Government Code Chapter 212.
D. Recommendations to city council regarding text amendments to this Unified Development Code.
E. Recommendations to city council regarding zoning changes and map amendments, including reclassification of the zoning designations on land, specific use permits, and planned developments.
F. ~~Recommendations to city council~~ Decisions regarding variances and special exceptions to this Unified Development Code.
G. Recommendations to city council regarding amendments to the comprehensive plan.
H. Recommendations to city council regarding amendments to the master thoroughfare plan.
I. Recommendations to city council regarding amendments to a master open space plan.

SECTION 8: CITY COUNCIL AUTHORITY

SUBSECTION 8.1: AUTHORITY

The city council shall hold a meeting, conduct a public hearing—if required by this Unified Development Code—and make determinations on the following matters:

A. Text amendments to this Unified Development Code.
B. Zoning changes and map amendments, including reclassification of the zoning designations on land, specific use permits, and planned developments.
C. Appeals related to the Planning and Zoning Commission's decision on ~~Special~~ special exceptions, variances, or waivers related to site plans for development.
D. Amendments to the comprehensive plan.
E. Amendments to the master thoroughfare plan.
F. Amendments to the master open space plan.
G. Variances, special exceptions and appeals as set out in this Unified Development Code.

SECTION 1: LAND USE SCHEDULE

SECTION 1.01: USE OF LAND AND BUILDINGS

Buildings, structures and land shall be used only in accordance with the uses permitted in the following "land use schedule," subject to all other applicable requirements of this [Unified Development Code], including article V, Zoning District Development Standards.

A. The symbol "P" shall mean that the use is permitted as a principal use in that zoning district by right.
B. The symbol "S" shall mean that the principal use is permitted in that zoning district only after first obtaining a "specific use permit" as set forth in this article.
C. The symbol "A" shall mean that this use is specifically permitted as an accessory use to a main use in the district. This does not exclude other land uses which are generally considered ancillary to the primary use.
D. The symbol "+" shall mean that this use is conditional and has special standards or requirements listed in this section, which it must meet in order to be allowed.
E. A blank square shall mean that the use is not allowed in that zoning district as a principal use.

SECTION 2.01.02: RESIDENTIAL AND LODGING USE CONDITIONS

Accessory Building (Accessory to Residential Use). See *Section 7.04, Accessory Structure Development Standards*.

~~1. The accessory building shall be accessory to a residential use and located on the same lot.~~
~~2. In all residential districts, one detached garage shall be allowed provided that it does not exceed 900 square feet in area or 15 feet in height, provided that it is located on the same lot as the residential use and that the exterior cladding contains the same materials, excluding glass, as found on the main structure and is generally in the same proportion.~~

DRAFT ORDINANCE

~~3. In SF-E: a. No more than two accessory buildings shall be allowed which are up to 625 square feet (each) in area and 15 feet or less in height; or b. In SF-E/1.5, a single building which is up to 1,250 square feet in area and 15 feet or less in height, provided the exterior cladding contains the same materials, excluding glass, as is found on the main structure and generally in the same proportion. In SF-E/2.0 the single accessory building may be up to 1,500 square feet, and in SF-E/4.0, up to 2,000 square feet in area.~~

~~4. In SF-7, SF-8.4, SF-10, SF-16, and SF-1, no more than two accessory buildings shall be allowed which are up to 225 square feet (each) in area and 15 feet or less in height, provided the exterior cladding contains only materials found on the main structure. (Greenhouses are exempt from the materials requirement.)~~

~~*(Ord. No. 07-18, 6-4-2007)*~~

~~5. In 2F, no more than two accessory buildings shall be allowed which is up to 100 square feet (each) in area and ten feet or less in height, provided the exterior cladding contains only materials found on the main structure. (Greenhouses are exempt from the materials requirement.) 6. Accessory buildings not meeting these standards shall require approval of an SUP.~~

Bed and Breakfast Operation.

1. Permitted in the Historic Overlay District by right, and in SF-7 by specific use permit, and must be located on an owner-occupied single-family lot.
2. One parking space per bedroom to be rented shall be provided above the single-family parking requirement
3. No outside advertising shall be allowed on the lot unless located in a nonresidential zoning district or permitted by an SUP.
4. A permanent wired smoke alarm system meeting all city codes shall be installed.
5. The premises shall pass a fire code inspection before opening and on an annual basis thereafter.
6. All applicable hotel/motel taxes shall be paid.
7. The maximum length of stay is limited to 14 consecutive days in any 30-day period.
8. Any bed and breakfast specific use permit (SUP) shall be reviewed after an initial six-month period and annually thereafter unless otherwise stipulated in the permit.

Carport (Residential). See *Section 7.04, Accessory Structure Development Standards*.

~~1. In residential districts, carports must be open on at least two sides and be located at least 20 feet behind the corner of the front facade and meet the garage setback adjacent to an alley. It must also meet the minimum required side yard setbacks for a detached garage.~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~2. Carports which are visible from a public street must be constructed of materials matching those of the primary residential structure.~~
~~3. Carports not meeting these standards must obtain an SUP.~~
~~4. Porte-cocheres are not considered carports, and are allowed, provided that they are attached and integral with the design of the house.~~

SECTION 1: GENERAL STANDARDS

SUBSECTION 1.01: OPEN SPACE

~~A. *Applicability*. This provision applies to all development in the city.~~

A. *Purpose*. The City of Rockwall is ~~planned to be~~ a rural and recreation-oriented community ~~with opportunity for both residents and workers, and it is intended to~~ with open space that ties into a regional framework of open space, trails, and corridors. Open space corridors link all major areas of the city using primarily floodplain ~~areas~~ and drainage areas. ~~Because of the importance of~~ Since open space and recreational amenities ~~to~~ are vital to the City's commercial and residential developments ~~vitality of the city~~, all projects must ~~contribute to the~~ provide open space ~~system as established~~ in accordance with the City's *Comprehensive Plan* and the *Parks, Recreation, and Open Space Master Plan*. ~~city's comprehensive plan, parks plan and thoroughfare plan.~~

B. *Requirements*. All projects in the city must reserve, dedicate and/or develop public and private open spaces consistent with the requirements of the following sections: ~~open space plan, subdivision standards and development agreements.~~

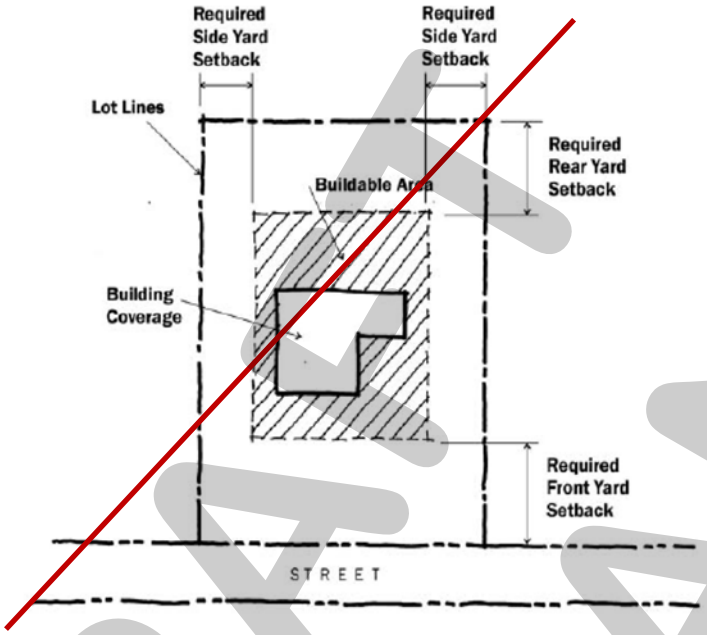
a. *Residential*. Subsection C, *Open Space*, of Section 3.01, *General Residential District Standards*
b. *Commercial*. Subsection D, *Open Space Guidelines*, of Section 4.01, *General Commercial District Standards*
c. *Industrial*. Subsection D, *Open Space Guidelines*, of Section 5.01, *General Industrial District Standards*

SUBSECTION 1.02: SITE PLANS

~~Approval of a site plan shall be required for all developments except individual single-family and duplex lots and shall be accompanied by a proposed development schedule. Any owner, builder, or developer of a tract or parcel of land shall obtain an approved site and building plan for the proposed development, prior to issuance of a building permit, from the director, providing for an appeal of denial to the planning and zoning commission. The contents of this site and building plan shall comply with the requirements as specified in article XI [of this Unified Development Code], Zoning Related Applications. Upon approval, such development shall comply with the approved plan.~~

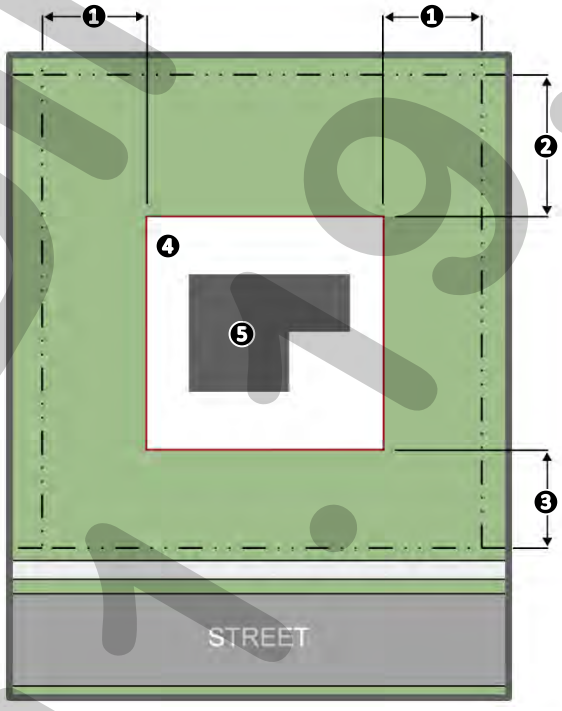
All development in the City of Rockwall -- *with the exception of single lot single-family and duplex developments* -- shall require the approval of a site plan in accordance with the requirements of Article XI, *Zoning Related Applications*.

DRAFT ORDINANCE 11-19-2018



SUBSECTION 1.03: LOTS ~~WITH MULTIPLE FRONTAGES~~ CONFIGURATIONS

A. *Lots with a Single Street Frontage*. Where lots have a single street frontage, the required setbacks should generally adhere to the following diagram:



❶: Required Side Yard Setback
❷: Required Rear Yard Setback
❸: Required Front Yard Setback
❹: Buildable Area
❺: Building Coverage

DRAFT ORDINANCE 9.6.2018

~~B.~~ *Lots with Multiple Street Frontages*. Where lots have multiple street frontages on one (1) or more streets, the required setbacks should generally adhere to the following diagram: ~~front yard shall be provided on each street.~~

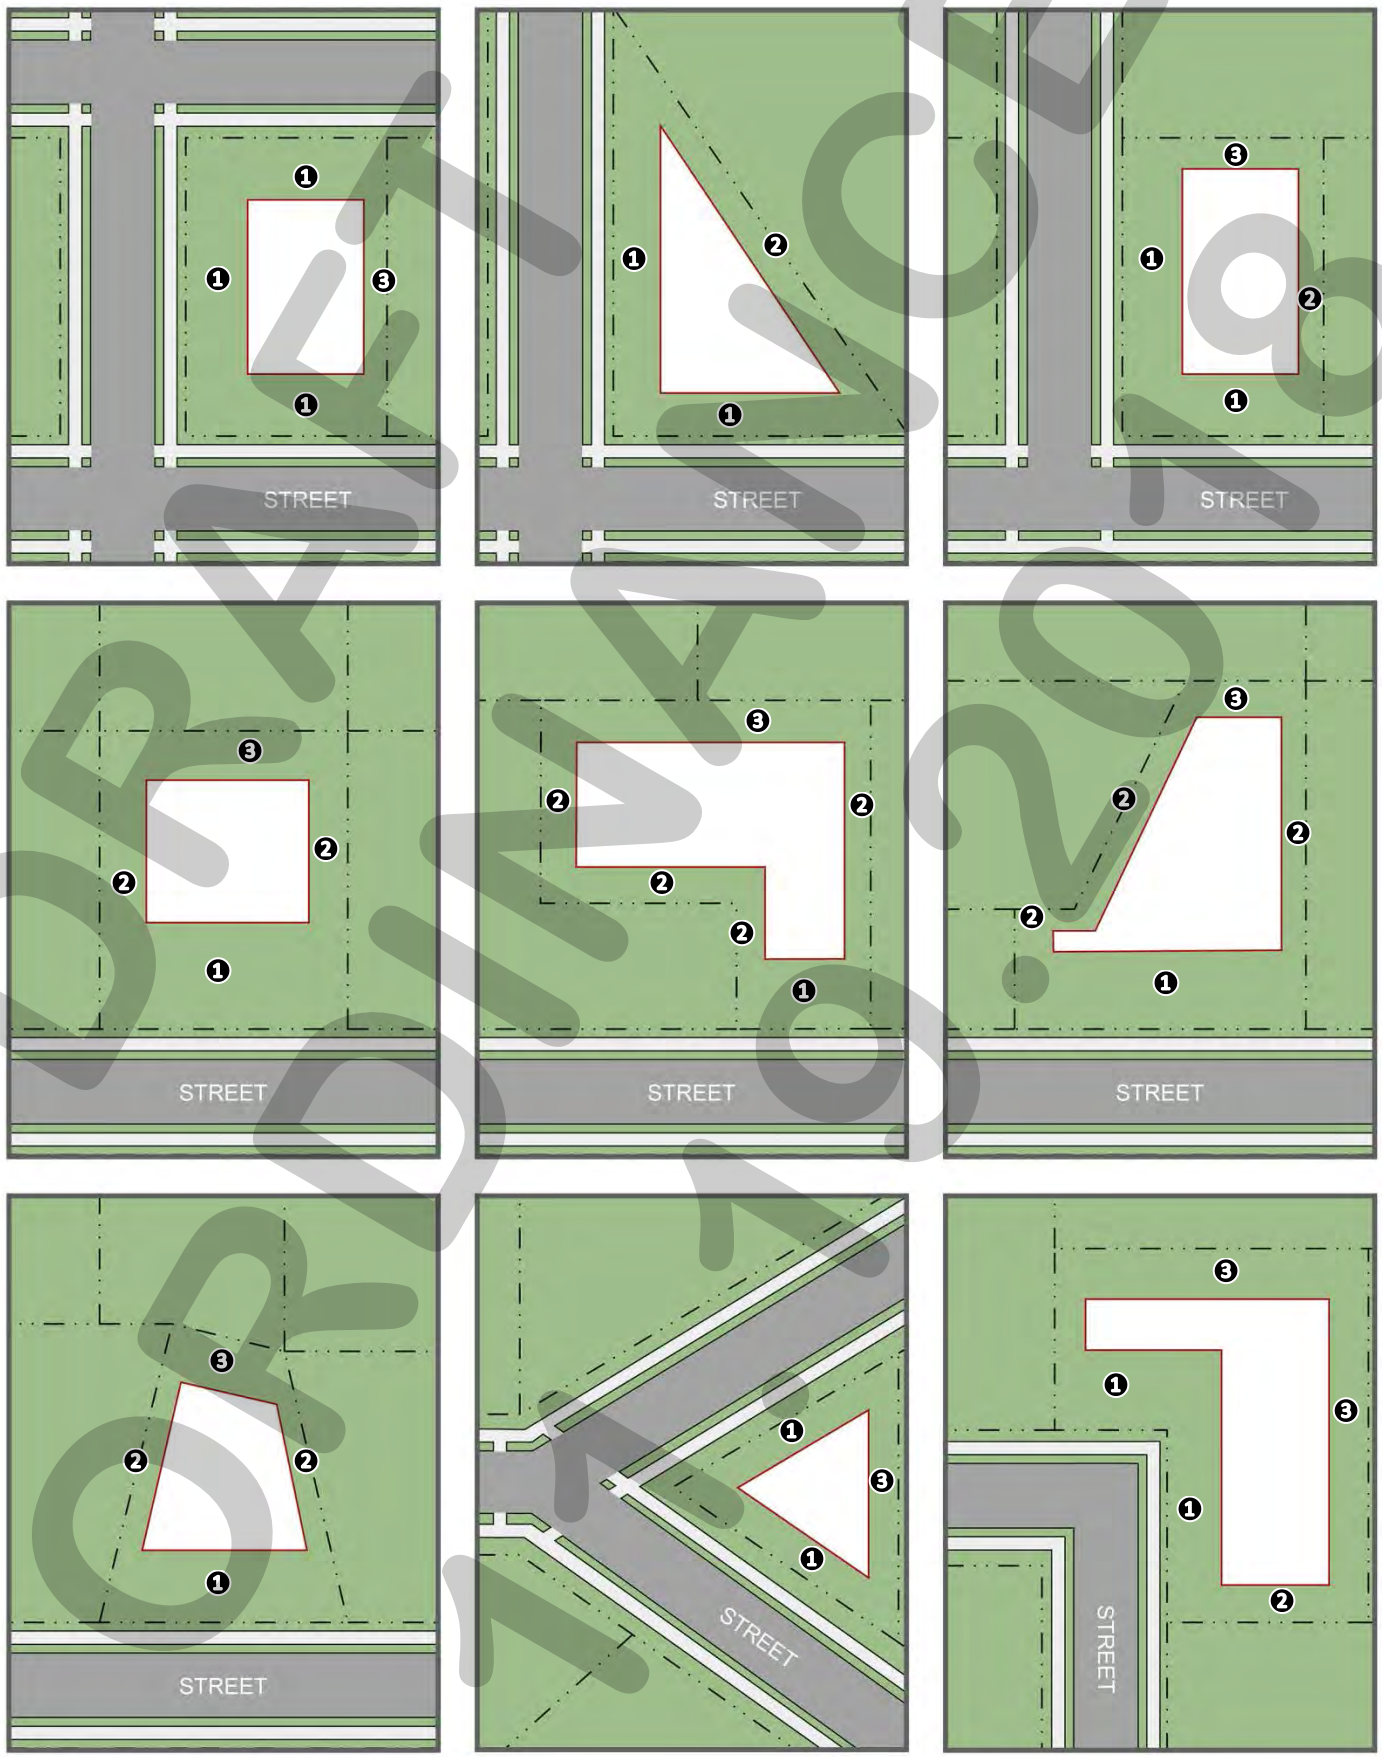
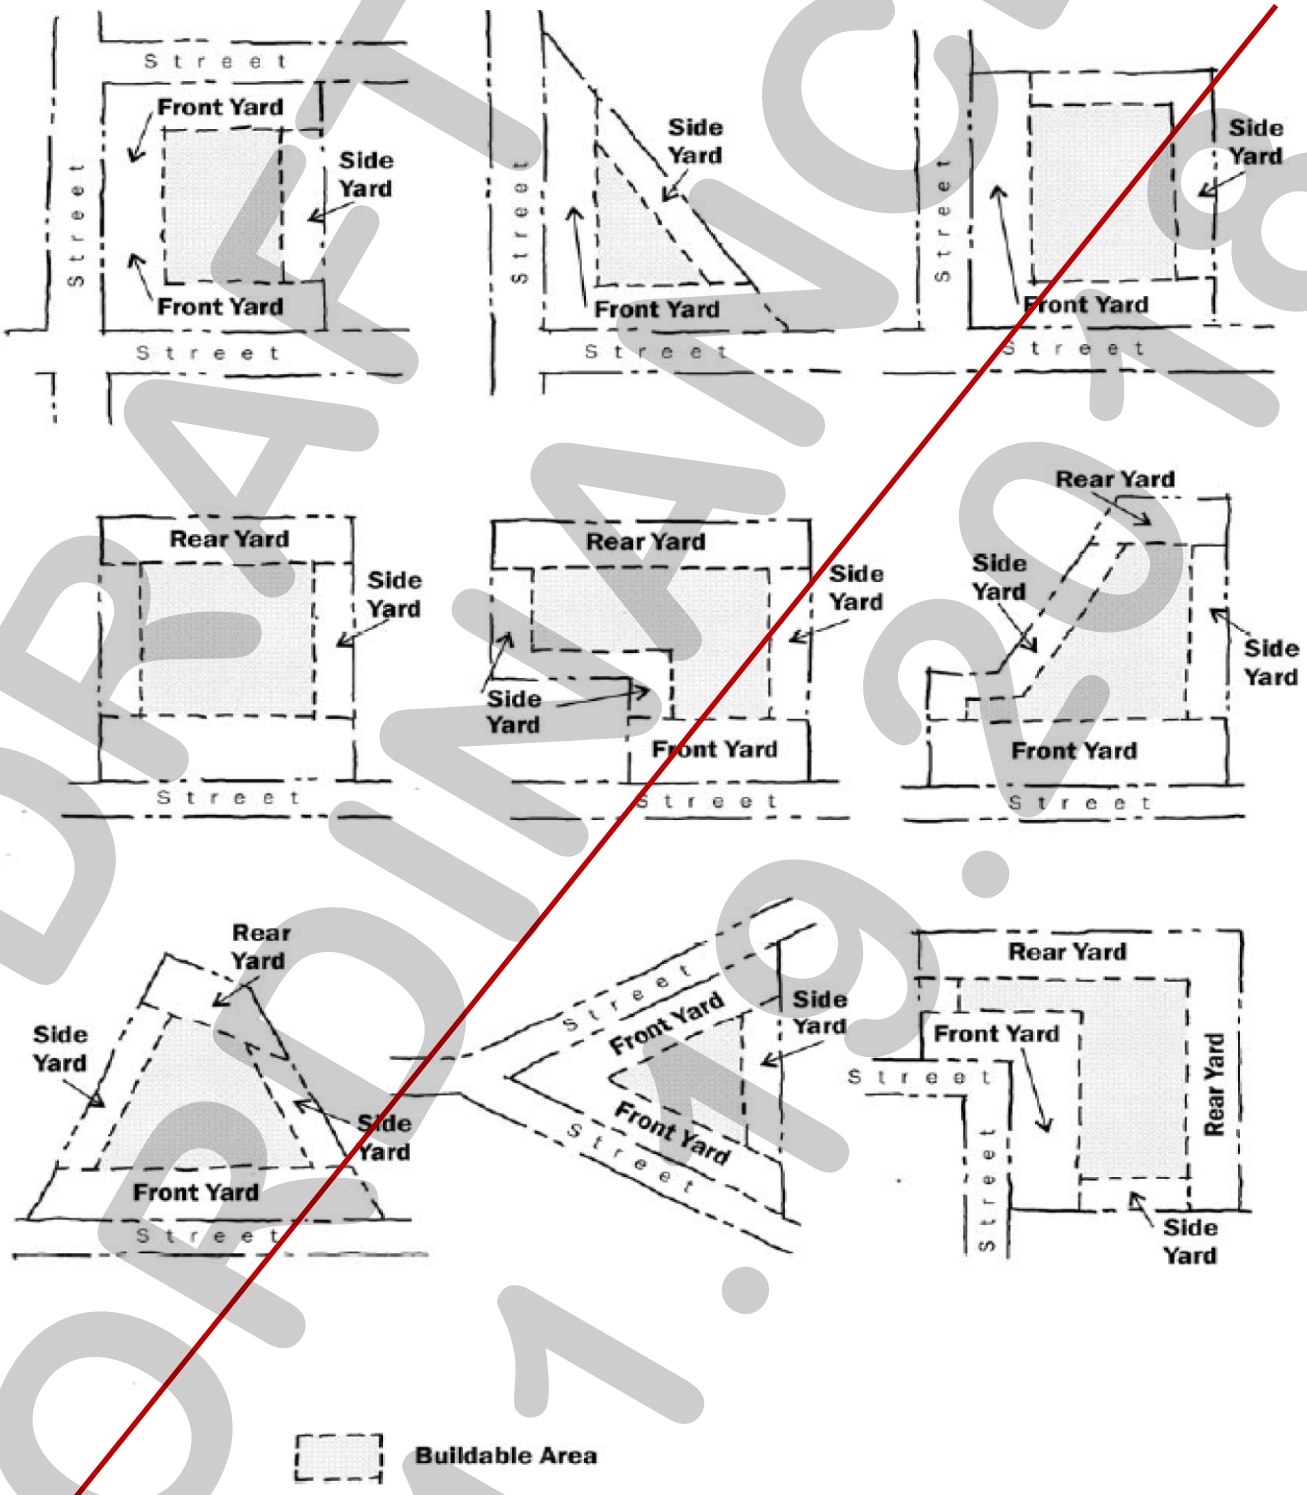
ORDINANCE
11.19.2018



❶: Front Yard; ❷: Side Yard; ❸: Rear Yard

DRAFT



YARD LOCATION IN DIFFERENT SHAPED LOTS

DRAFT ORDINANCE 11.19.2018

SUBSECTION 1.04: CALCULATION OF DENSITY

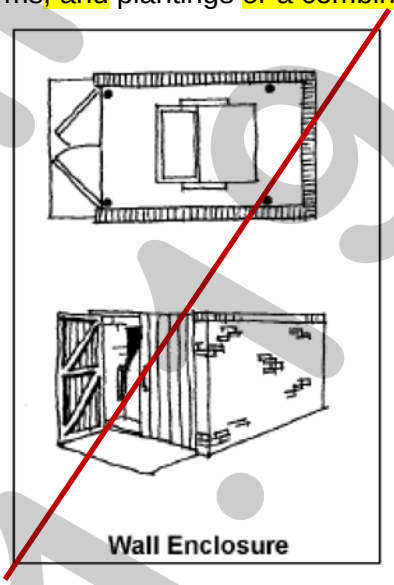
1. ~~*Calculation.* Calculation~~ The calculation of the allowable density for residential developments shall be based on the gross site area including ~~road~~ right-of-way, floodplain, open space and public/private parks ~~areas~~ that will be dedicated to the city or preserved and maintained by some other mechanism. ~~Notwithstanding the~~ Despite this calculation requirement, other provisions of this ~~[Unified Development] Code~~ Unified Development Code may limit the actual density allowed on any given ~~site~~ property.

2. ~~*Residential properties.* Minimum lot sizes in residential districts may be reduced up to 20 percent in order to preserve community or public open space, including trails, provided that the front of lots face, either directly or across a public street, over 75 percent of the edge of the open space within the project. If this standard cannot be met, then the planning and zoning commission may approve a site plan provided it concludes that the resulting development would be significantly better than strict application of the standards would provide.~~

SUBSECTION 1.05: SCREENING STANDARDS

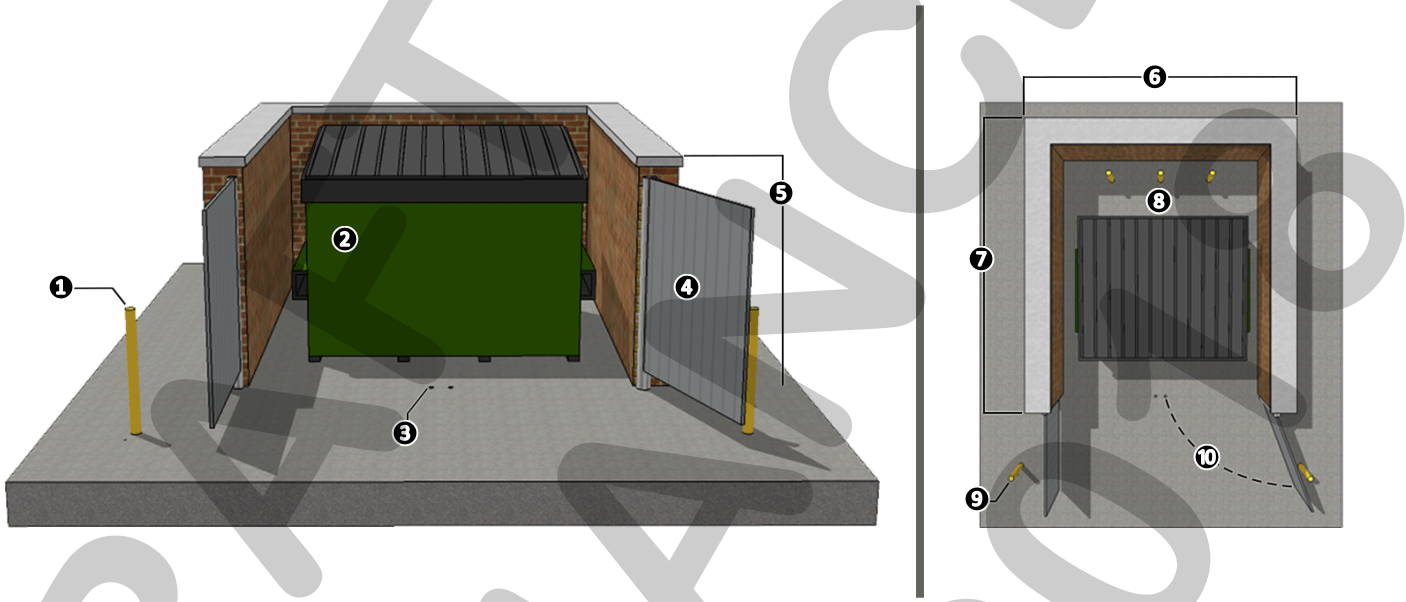
~~Unless otherwise approved by the planning and zoning commission and city council, the following items shall be screened as follows:~~ All development shall adhere to the following screening standards:

1. *Loading Docks.* Off-street loading docks must be screened from all public streets and any residential zoning district or residentially used property that abuts or is directly across a public street or alley from the ~~lot~~ subject property. The screening ~~required under this section~~ must be at least six (6) feet in height and may be provided by using a masonry wall ~~fence~~ (*excluding tilt wall or ~~concrete block~~ concrete masonry units [CMU] unless otherwise approved by the Planning and Zoning Commission ~~city council~~*), and/or berms~~,~~ and plantings ~~or a combination of the above~~.



2. *Trash/Recycling Enclosures*. Trash/Recycling enclosures shall be four (4) sided. These receptacles shall be screened by a minimum six (6) foot, solid masonry dumpster enclosure that utilizes the same masonry materials as the primary building and incorporates an opaque, self-latching gate. These enclosures shall be located to the side or rear of the primary building, and shall not front on to a public right-of-way. Every effort shall be made to reduce the visibility of these structures utilizing landscaping and/or the building. All trash/recycling enclosures shall be constructed in conformance to the diagram below, unless otherwise approved/required by the City and/or its contractor for trash services. ~~All refuse storage areas for trash dumpster shall be visually screened on three sides with an enclosure~~

~~matching the main structure not less than six feet in height. The access area shall be screened with an opaque gate and shall not face a public street unless otherwise approved during site plan approved.~~



❶: Concrete Filled Steel Protected Pole
❷: Standard End Loading Container
❸: Deep Recesses for Gate Cane Bolts [*If Necessary*]
❹: Opaque Screening Gate
❺: Six (6) Feet in Height [*Eight (8) Feet in Overlay Districts*]
❻: Ten (10) Feet in Width
❼: 12-Feet in Length
❽: Three (3) Concrete Filled Steel Protected Poles
❾: Concrete Filled Steel Protected Pole
❿: 120 Degree Swing on Opaque Screening Gate

~~Dumpster storage should be located to the rear of the buildings with proper access. Trash dumpster shall not be located in any required parking space and shall allow proper access by service trucks. The minimum enclosure area shall be 12 feet by ten feet, or as otherwise approved by the city and/or its contractor for trash service. Six-inch concrete filled steel protective poles shall be placed at possible impact areas. Dumpster pad sites shall be designed to city standards specified in the subdivision standards of design, as currently adopted or as may be amended in the future.~~

3. *Utility Equipment and Air Condition Units.* Pad or roof mounted utility equipment~~,~~ and air conditioning units~~, including roof mounted units,~~ shall be screened from ~~horizontal~~ view from any adjacent public street or ~~and from any adjacent~~ property. Utility equipment and air conditioning units shall be screened utilizing plantings, berms, ~~or~~ walls matching the main structure, or an architectural feature that is integral to the building's design.

4. *Aboveground Storage Tanks.* Aboveground storage tanks shall be screened utilizing plantings, berms, or walls matching the main structure. Screening plans for above ground storage tanks shall be approved by the Planning and Zoning Commission in conjunction with a site plan.

(Ord. No. 06-14, 4-17-2006)

SUBSECTION 1.06: RESIDENTIAL ADJACENCY STANDARDS

Subsection 1.06, *Residential Adjacency Standards*, is omitted from this ordinance change, but is retained in its entirety.

SUBSECTION 1.07: FENCES

All fences within the ~~city~~ City shall conform to Article XI, *Fences,* of Chapter 10, *Building and Building Regulations,* of the Municipal Code of Ordinances ~~chapter 10, article XI of the Code of Ordinances~~, unless otherwise required by this Unified Development Code. ~~noted in this [Unified Development] Code or an approved planned development district.~~

(Ord. No. 10-14, § 30, 7-6-2010)

SUBSECTION 1.08: PROJECTIONS INTO REQUIRED YARD OR COURT

A. Every part of a required yard within a building setback shall be unobstructed and open from its lowest point to the sky ~~unobstructed~~, except for the ordinary projections of sills, belt courses, cornices, chimneys, buttresses, ornamental features and eaves; provided, however, that none of the above projections shall extend into a court more than six (6) inches nor into a required yard by more than 30-inches; and provided existing open porches extending into the required yard shall not be enclosed.

An open fire escape may project into a required yard by not more than half the width of the setback ~~such yard~~, but not more than four (4) feet from the building. Fire escapes, solid floored balconies and enclosed outside stairways may project ~~not more than four feet~~ into a rear yard by a maximum of four (4) feet.

B. Where ~~an official~~ a lot abuts a right-of-way line has been established for the future widening or opening of a street or highway ~~upon which a lot abuts~~, then the depth or width of a yard shall be measured from such ~~official~~ right-of-way line to the ~~nearest~~ required building setback ~~line of the building~~.

(Ord. No. 06-14, 4-17-2006)

SUBSECTION 1.09: PUBLIC RIGHT-OF-WAY VISIBILITY

A. *Street/drive intersection visibility obstruction triangles.* A landscape plan showing the plan of the street on both sides of each proposed drive/street to the proposed development with the grades, curb elevations, proposed street/drive locations, and all items (*both natural and manmade*) within the visibility triangles as prescribed below shall be provided with all site plans, if they are not on engineering plans that are submitted at the same time. this plan shall show no horizontal or vertical restrictions (*either existing or future*) within the areas defined below.

B. *Obstruction/interference triangles defined.* No fence, wall screen, billboard, sign face, tree or shrub foliage, berm, or any other item, either manmade or natural, shall be erected, planted, or maintained in such a position or place so as to obstruct or interfere within the following minimum standards; however, on non-residentially zoned lots, a single pole for mounting a sign may be placed within this area provided the pole does not exceed 12-inches in diameter, and provided every portion of the sign has a minimum height clearance of nine (9) feet:

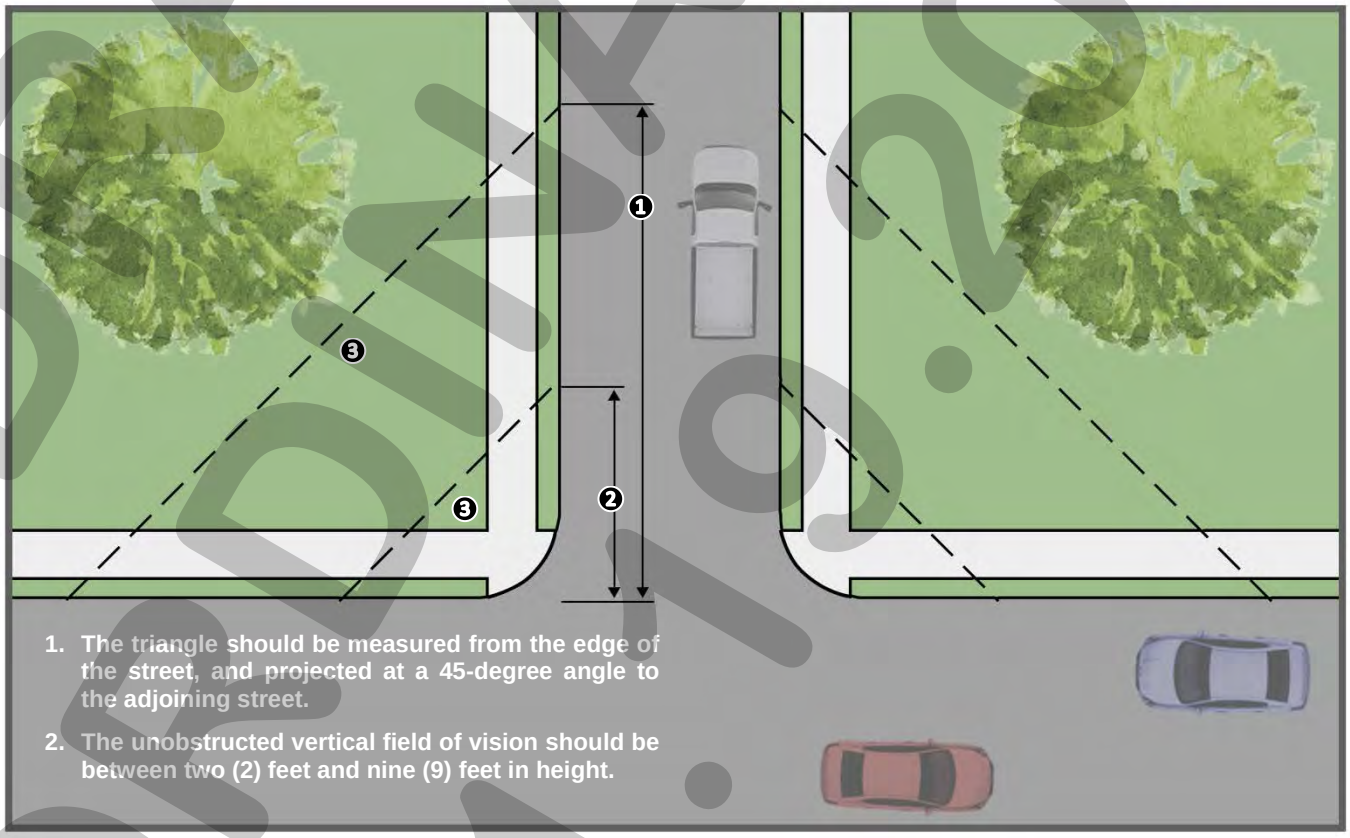
1. *Visibility Triangles*. Vision at all intersections which intersect at or near right angles shall be clear at elevations between 24-inches and nine (9) feet above the top of the curb elevation, within a triangular area formed by extending the two (2) curblines from their point of intersection, for the following minimum distances for the applicable intersection, and connecting these points with an imaginary line, thereby making a triangle. If there are no curbs existing, the triangular area shall be formed by extending the property lines from their point of intersection for a distance as prescribed below, and connecting these points with an imaginary line, thereby making a triangle as shown below.

2. *Intersection of two (2) public streets*. The minimum required distance from the curb shall be 30-feet and the minimum distance from the property line on streets without a curb shall be 20-feet.

3. *Intersection of a public street and an alley*. The minimum required distance measured from the property line shall be 15-feet, or 25-feet from street curb.

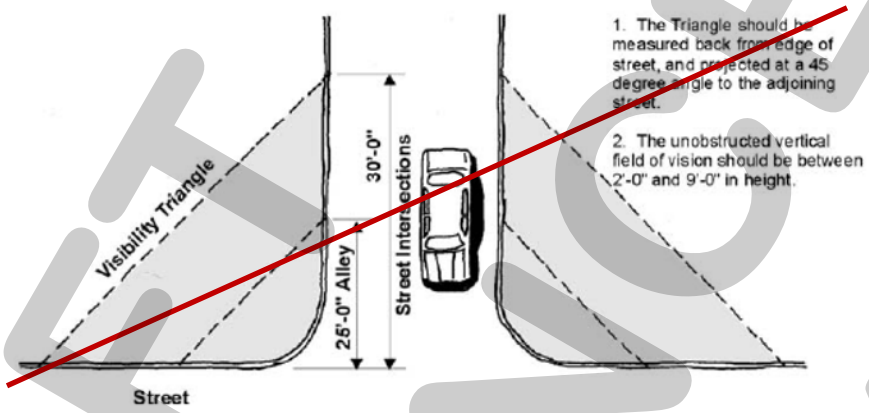
4. *Intersection of private drive and public street*. The minimum required distance from the curb shall be 15-feet and the minimum distance from the property line on streets without a curb shall be ten (10) feet.

C. *Sight distance requirements.* The city hereby adopts the standards for both vertical and horizontal sight distance requirements set forth in the latest edition of AASHTO green book "a policy on geometric design of highways and streets" for the construction of both public street intersections and private drive intersections, unless otherwise approved by the city engineer. If, in the opinion of the city engineer, a proposed street or drive intersection ~~may~~ does not meet these standards, additional engineering information exhibiting how the standards have been addressed may be required for submission and approval by the city's engineer.



❶: 30-Foot for Arterials and Collectors and 20-Foot for Residential Distance from Intersection for Streets
❷: 10-Foot Distance from Intersection for Alleyways
❸: Visibility Triangles

DRAFT ORDINANCE 1.19.2018



SECTION 2: AGRICULTURAL DISTRICTS

SUBSECTION 2.01: ~~AGRICULTURE~~ AGRICULTURAL (AG) DISTRICT

~~A. *Purpose*. The Agricultural (AG) District is a zoning designation used for land that is reserved for the anticipated future growth of the city. It is the intent of this district that agricultural land be held in that use for as long as is practical and reasonable to promote orderly growth. This zoning is suitable for areas where development is premature because of a lack of utilities, capacity, or service, or where the ultimate land use has not been determined. The zone is also to be used:~~

~~1. To protect those areas that are unsuitable for development because, of physical problems or potential health or safety hazards such as flooding. The use of the land would be permanently restricted to low intensity agricultural uses until such time as the property is proven to be suitable for development and is rezoned.~~
~~2. To provide a permanent greenbelt to preserve natural areas or open space buffer around uses that might otherwise be objectionable or pose environmental or health hazards.~~

Purpose. The Agricultural (AG) District is a zoning designation used for land that is reserved for the anticipated future growth of the city. This district is intended to be used for raw land or land with agricultural land uses, and is intended to be held in these conditions as long as practical and reasonable to promote the orderly growth of the community. This zoning designation is suitable for areas where development is premature due to lack of utilities, capacity, or service. The Agricultural (AG) District is also used to protect areas that are unsuitable for development due to physical constraints or safety issues (*e.g. topography, floodplain, ecologically sensitive areas, etc.*), or to protect green belts, natural areas and/or open space that might otherwise be developed.

B. *Permitted Uses*. All land uses permitted within the Agricultural (AG) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, farming and ranching-related activities and accessory uses, including the owner's single-family dwelling on more than ten acres, shall be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. All development within an Agricultural (AG) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

~~1. Minimum lot area: 43,560 square feet (one acre).~~

DRAFT OF ORD. NO. 18-XX

~~2. Minimum lot frontage on a public street: 100 feet.~~
~~3. Minimum square footage per dwelling unit: 1,600 square feet.~~
~~4. Minimum lot depth: 200 feet.~~
~~5. Minimum depth of front setback: 40 feet.~~
~~6. Minimum depth of rear setback: ten feet.~~
~~7. Minimum width of side setback. a. Internal lot: six feet.~~
~~8. Minimum distance between buildings on the same lot or parcel of land: 12 feet.~~
~~9. Minimum length of driveway pavement from the public right-of-way on a side or rear yard: 20 feet.~~
~~10. Maximum building coverage as a percentage of lot area: N/A.~~
~~11. Maximum height of structures: 36 feet.~~
~~12. Minimum number of off-street parking spaces required for:~~

~~a. One single-dwelling unit: two. An enclosed garage shall not be considered in meeting the off-street parking requirements.~~
~~b. All other uses: see article VI, Parking and Loading.~~

~~*(Ord. No. 06-14, 4-17-2006; Ord. No. 16-47, § 1, 9-6-2016)*~~

SECTION 3: RESIDENTIAL DISTRICTS

SUBSECTION 3.01: GENERAL RESIDENTIAL DISTRICT STANDARDS

All residential development shall conform to the following standards:

A. ~~*Exterior Wall*~~ *Construction Materials*.

(1) *Materials and Masonry Composition*. All buildings with a building footprint of 120 square feet or greater that are over ten (10) feet in height shall consist of a minimum of 80% *Primary Materials* and/or a maximum of 20% *Secondary Materials* -- *excluding doors and windows* -- as defined below.

(a) *Primary Materials*. *Primary Materials* shall include stone, brick, and cementaceous materials. Specific requirements for *Primary Materials* are as follows:

A. *Cementaceous Materials.* The use of cementaceous materials (*e.g. stucco, cementaceous lap siding, or similar materials approved by the Director of Planning or his/her designee*) shall be limited to 60% of the building's exterior façade.
B. *Chimneys.* All new homes shall be required to incorporate a masonry chimney (*i.e. brick and stone only*).

(b) *Secondary Materials*. *Secondary Materials* are any material that is not deemed to be a *Primary Material* as defined above.

~~1. *Exterior Wall Materials.* All buildings of 120 square feet or more and over ten feet tall shall have exterior walls constructed of masonry construction. Exterior walls for all buildings of 120 square feet or more and over ten feet tall, shall be constructed of at least 80 percent standard masonry construction, excluding windows and doors, unless the wall is on a porch, patio, courtyard, or breezeway, in which event, the wall may be of non-masonry construction. Hardy Plank or similar cementaceous material may be used for up to 50 percent of the masonry requirement. Buildings with less than 80 percent shall require approval of the planning and zoning commission.~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

DRAFT ORDINANCE 9.4.2018

2. ~~Buildings less than 120 square feet and under ten feet in height may be constructed with non-masonry materials, or may be all metal with a baked-on pre-painted surface.~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

2. ~~3.~~ *Exceptions*. Exceptions to these material requirements~~,~~ -- *including exceptions for buildings for farm animals*~~,~~ -- may be permitted on a case-by-case basis by the Planning and Zoning Commission~~—council~~ upon submission and approval of material samples and building elevations ~~drawings~~ of the ~~subject~~ structure~~, and material samples~~. If the Planning and Zoning Commission denies an exception request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the exception being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*).

3. ~~Barns used for agricultural or farm animal purposes on sites of ten acres or more are excluded from this masonry requirement.~~

~~B. Residential Garages. See article VI.4, Residential Parking for residential parking and garage standards.~~

B. *Accessory Structures*.

1. *Accessory Structure Standards.* All accessory structures shall conform to the related standards listed within Section 7.04, *Accessory Structure Development Standards*.

~~C. Residential Portable and Accessory Building Setbacks.~~

~~1. Portable buildings zero to 120 square feet and up to ten feet in height:~~

~~a. Rear setback: three feet.~~
~~b. Side setback: three feet.~~
~~c. Separation from other structures: three feet.~~

~~2. Accessory buildings 121 to 225 square feet and up to 15 feet in height:~~

~~a. Rear setback: three feet.~~
~~b. Side setback: required zoning district setback.~~
~~c. Separation from other structures: six feet.~~

~~3. Detached garages 226 to 900 square feet and up to 15 feet in height:~~

~~a. Rear setback:~~

~~With alley:~~
~~20 feet with garage doors facing alley;~~
~~Three feet without garage doors facing alley;~~

~~Without alley: ten feet.~~

~~b. Side setback: required zoning district setback.~~
~~c. Separation from other structures: ten feet.~~

~~4. Accessory buildings not meeting these standards shall require approval of an SUP.~~

DRAFT ORD. 18-XX

C. *Open Space.* On all new subdivisions, ten (10) lots or greater, that are not infill projects (*i.e. projects going into an established area as determined by the Director of Planning and Zoning or his/her designee*) the following open space requirements shall be applied:

a. Unless otherwise provided by this Unified Development Code, a minimum of 20% of the gross land area within a residential subdivision that is five (5) acres or greater shall be devoted to open space. Where floodplain exists in a proposed subdivision, the floodplain may be used to meet the 20% requirement at a rate of ½-acre for every one (1) acre of floodplain dedicated to open space. Open space requirements for subdivisions may be satisfied by public open space/parkland, or by a combination of public and private open space. Public open space/parkland shall be dedicated to the city, and shall be approved by the Parks and Recreation Board and the City Council during the platting process. Open space requirements specified in this subsection are in addition to requirements for site landscaping and buffering.

b. To encourage the provision of open space, the minimum lot sizes in a residential subdivision may be reduced by up to 20% in order to preserve additional public and/or private open space, provided that the lots being reduced face onto a single loaded street (*i.e. a street with open space and/or a public park on one side of the street and lots on the other side of the street*). This requirement shall be approved by the City Council at the time of preliminary plat, final plat, or site plan whichever comes first.

D. *Anti-Monotony.* The front elevation of a home shall not repeat along any block face without at least four (4) intervening homes of differing appearance on the same side of the street and two (2) intervening homes of differing appearance on the opposite side of the street. The rear elevation of homes backing to open spaces or thoroughfares shall not repeat without at least two (2) intervening homes of differing appearance. Identical brick blends may not occur on adjacent (*side-by-side*) properties. Homes are considered to differ in appearance if any two (2) of the following elements are different:

a. The number of stories of the home.
b. The garage location/orientation on the home.
c. The roof type and layout of the home.
d. The articulation of the front façade of the home.

E. *Fencing.*

a. Solid fencing shall be cedar standard fencing material that are a minimum ½-inch in thickness or more. Spruce fencing is prohibited. All cedar pickets shall be placed on the *public side* (*i.e. facing out*) facing a street or alleyway. All posts and framing shall be placed on the *private side* (*i.e. facing towards the home*) of the fence. Other types of solid fencing (*e.g. vinyl*) may be considered on a *case-by-case basis* by the Planning and Zoning Commission at the time of preliminary plat, final plat, or site plan whichever comes first.
b. Tubular steel or wrought-iron type fencing shall be allowed.
c. Tubular steel or wrought-iron type fencing shall be required on all lots located adjacent to perimeter roadways, open spaces, greenbelts and/or parks.
d. Split rail fencing shall be allowed on lots containing 20,000 SF or more.
e. Fencing on corner lots constructed adjacent to the street shall provide masonry columns at 45-feet off-center spacing that begins at the rear property line corner and terminates at least 15-feet behind the front yard building setback line. A maximum six (6) foot tall, solid board-on-board, panel cedar fencing or wrought-iron type fencing shall be allowed between the masonry columns along the side and/or rear yard adjacent to a street.

1. On corner lots that have rear lot lines adjacent to alleyways or other rear lot lines, fences may be constructed along the side yard adjacent to the street, subject to a minimum five (5) foot setback from the right-of-way. The property owner shall maintain that portion of the property outside of the fence.

2. On corner lots that have rear lot lines adjacent to a side lot line of an adjoining lot(s), only tubular steel or wrought-iron type fences not exceeding 42-inches in height may be constructed beyond the building line. Fences constructed on or behind the building line shall comply with the material requirements detailed above.

f. All common areas and perimeter fencing shall be maintained by a Homeowners Association (HOA) as specified in the City's subdivision regulations. Perimeter fencing shall be constructed of six (6) foot tall tubular steel or wrought-iron type fencing with masonry columns and entry features. The Planning and Zoning Commission may consider alternative perimeter screening, such as earthen berms with landscaping, at the time of preliminary plat, final plat, or site plan whichever comes first.

SUBSECTION 3.02: SINGLE-FAMILY ESTATE 1.5 (SFE-1.5) DISTRICT ~~SINGLE-FAMILY ESTATE (SF-E/1.5, 2.0, 4.0) DISTRICT~~

A. *Purpose*. The Single-Family Estate 1.5 (SFE-1.5) District is the proper zoning classification for rural, estate lots that are a minimum of 1½-acres in size. These lots are typically in areas that are located in the City's hinterland, away from higher density residential developments and non-residential development. While these properties are on the City's periphery, they should still be provided with access to public roadways, water, wastewater, and drainage.

~~1. This district is considered to be the proper zoning classification for large lot developments for single-family dwelling use in a rural setting.~~
~~2. Areas that are zoned for this use shall have or provide for water, wastewater, drainage and access to paved streets based on single-family use required by the allowed density.~~
~~3. It is intended for areas that are properly buffered from nonresidential uses, and protected from pollution and/or environmental hazards or from high volume of non-single-family traffic.~~
~~4. Developers wishing to restrict their subdivision to lot sizes in excess of what this [Unified Development Code] requires shall use restrictive covenants.~~

B. *Permitted Uses*. All land uses permitted within the Single-Family Estate 1.5 (SFE-1.5) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, large lot single-family uses shall be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. ~~Development standards.~~ *Area Requirements.* All development within a Single-Family Estate 1.5 (SFE-1.5) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

~~1. Minimum lot area:~~

~~SF-E/1.5 65,340 square feet (1.5 acres)~~
~~SF-E/2.0 87,120 square feet (2.0 acres)~~
~~SF-E/4.0 174,240 square feet (4.0 acres)~~

~~2. Maximum number of single-family detached dwellings units per lot: One.~~
~~3. Minimum square footage per dwelling unit:~~

~~SF-E/1.5 2,000 square feet~~
~~SF-E/2.0 2,200 square feet~~
~~SF-E/4.0 2,500 square feet~~

~~4. Minimum lot yard frontage on a public street:~~

~~SF-E/1.5 150 feet~~
~~SF-E/2.0 150 feet~~
~~SF-E/4.0 200 feet~~

~~5. Minimum lot depth: 250 feet.~~
~~6. Minimum depth of front setback: 50 feet.~~
~~7. Minimum depth of rear yard setback: ten feet.~~
~~8. Minimum width of side yard setback:~~
~~*(Ord. No. 06-14, 4-17-2006)*~~

~~a. Internal lot: 25 feet.~~

~~9. Minimum distance between separate buildings on the same lot or parcel of land: ten feet.~~
~~10. Minimum length of driveway pavement from public right-of-way for rear and side yard: 20 feet.~~
~~11. Maximum building coverage as a percentage of lot area: 35 percent.~~
~~12. Maximum building height: 36 feet.~~
~~13. Minimum number of paved off-street parking spaces required for:~~

~~a. One single-family dwelling unit: two spaces. An enclosed garage shall not be considered in meeting the off-street parking requirements.~~
~~b. All other uses: see article VI, Parking and Loading.~~

SUBSECTION 3.03: SINGLE FAMILY ESTATE 2.0 (SFE-2.0) DISTRICT

A. *Purpose*. The Single-Family Estate 2.0 (SFE-2.0) District is the proper zoning classification for rural, estate lots that are a minimum of two (2) acres in size. These lots are typically in areas that are located in the City's hinterland, away from higher density residential developments and non-residential development. While these properties are on the City's periphery, they should still be provided with access to public roadways, water, wastewater, and drainage.

B. *Permitted Uses*. All land uses permitted within the Single-Family Estate 2.0 (SFE-2.0) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements.* All development within a Single-Family Estate 2.0 (SFE-2.0) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

SUBSECTION 3.04: SINGLE FAMILY ESTATE 4.0 (SFE-4.0) DISTRICT

A. *Purpose*. The Single-Family Estate 4.0 (SFE-4.0) District is the proper zoning classification for rural, estate lots that are a minimum of four (4) acres in size. These lots are typically in areas that are located in the City's hinterland, away from higher density residential developments and non-residential development. While these properties are on the City's periphery, they should still be provided with access to public roadways, water, wastewater, and drainage. Developers wishing to restrict their subdivision to a lot size greater than four (4) acres shall be required to use restrictive covenants.

B. *Permitted Uses*. All land uses permitted within the Single-Family Estate 4.0 (SFE-4.0) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements.* All development within a Single-Family Estate 4.0 (SFE-4.0) District shall conform to the related standards listed within Section 7.01, *Residential District Development Standards*.

SUBSECTION 3.05 ~~3.03~~: SINGLE-FAMILY 1 (SF-1) DISTRICT ~~Single-Family One (SF-1) District~~

A. *Purpose*. The Single-Family 1 (SF-1) District is the proper zoning classification for larger, single-family lots that are a minimum of one (1) acre in size or clustered developments that have a gross density of one (1) dwelling unit per acre. Cluster developments should conserve open space, floodplains, tree groupings, natural slopes and wildlife habitats to achieve the desired density. The Single-Family 1 (SF-1) District is also intended to be used for developments that incorporate public/private parks, denominational and private schools, and churches that are essential in creating the basic neighborhood unit. These developments are typically in the City's hinterland, away from higher density residential developments and non-residential developments; however, they may be used in areas closer to the periphery of the City's developed areas, where they will serve as a logical transition to an estate or rural area. These developments should provide access to public roadways, water, wastewater, and drainage.

~~1. This district is considered the proper zoning classification for large lot developments for single-family dwelling use, as well as clustered development with an emphasis on conservation of open space, tree groupings, natural slopes and wildlife habitat. It is intended to be composed of single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units.~~
~~2. Areas that are zoned for this use shall have or provide for water, wastewater, drainage and access to paved streets based on single-family use required by the allowed density.~~
~~3. It is intended for areas that are properly buffered from nonresidential uses, and protected from pollution and/or environmental hazards or from high volume of non-single-family traffic.~~

B. *Permitted Uses*. All land uses permitted within the Single-Family 1 (SF-1) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Single-Family 1 (SF-1) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

~~1. Minimum lot area: 8,400 square feet.~~
~~2. Maximum number of single-family detached dwellings units per lot: one.~~
~~3. Minimum square footage per dwelling unit: 2,500 square feet.~~
~~4. Minimum lot frontage on a public street: 70 feet.~~
~~5. Minimum lot depth: 100 feet.~~
~~6. Minimum depth of front yard setback: 20 feet.~~
~~7. Minimum depth of rear yard setback: ten feet.~~
~~8. Minimum width of side yard setback: a. Internal lot: six feet.~~
~~9. Minimum distance between separate buildings on the same lot or parcel of land: ten feet.~~
~~10. Minimum length of driveway pavement from the public right-of-way for rear and side yard: 20 feet.~~
~~11. Maximum building coverage as a percentage of lot area: 45 percent.~~
~~12. Maximum building height: 36 feet.~~

13. Minimum number of paved off-street parking spaces required for:

a. One single-family dwelling unit: two. An enclosed garage shall not be considered in meeting the off-street parking requirements.
b. For all other uses: see article VI, Parking and Loading.

D. Other minimum development standards.

1. Density standards for residential use. The (SF-1) District shall allow a density of only one unit per gross acre with a minimum requirement of 20 percent open space.

E. Open space standards.

1. *Public and Private Open Space*. Unless otherwise provided by this [Unified Development Code], a minimum of 20 percent of the gross land area within the entire Single-Family One (SF-1) District over five acres shall be devoted to open space, except where floodplain exists in the proposed development in which case the dedicated floodplain shall count for up to 50 percent of the 20 percent open space requirement and shall be consistent with the open space requirements of the city's parks and open space plan. Open space requirements for SF-1 Districts may be satisfied by public open space, or by a combination of public and private open space. Public open space shall be dedicated to the city, and shall be approved by the parks board and city council during the platting process. Open space requirements specified in this subsection are in addition to requirements for site landscaping and buffering.

F. Anti-monotony standards.

2. *Exterior Materials.* Exterior wall materials must comply with section 3.1, *General Residential District Standards*, of article V of this [Unified Development] Code. Additionally, masonry chimneys shall be required on all homes.
3. *Anti-Monotony Standards.* Front elevations shall not repeat along any block face without at least four intervening homes of differing appearance on the same side of the street and two intervening homes of differing appearance on the opposite side of the street. The rear elevation of homes backing to open spaces or thoroughfares shall not repeat without at least two intervening homes of differing appearance. Identical brick blends may not occur on adjacent (side-by-side) properties. Homes may differ in appearance in any two of the following ways:

a. Number of stories.
b. Garage location.
c. Roof type and layout.
d. Articulation of the front facade.

G. Fencing standards.

4. *Fencing.*

a. Solid fencing shall be cedar standard fencing material (minimum one-half inch thickness or more). Spruce fencing will not be allowed. All cedar pickets shall be placed on the "public side" facing a street or an alley. All posts and framing shall be placed on the "private side" of the fence. Other types of solid fencing (such as vinyl) may be considered on a case-by-case basis by the planning and zoning commission at the time of final platting.
b. Tubular steel or wrought-iron type fencing shall also be allowed.

~~c. Tubular steel or wrought-iron type fencing shall be required on all lots located adjacent to perimeter roadways, open spaces, greenbelts and parks.~~

~~d. Split rail fencing shall be allowed on lots containing 20,000 square feet or more.~~

~~e. Fencing on corner lots constructed adjacent to the street shall provide masonry columns at 45 feet off-center spacing that begins at the rear property line corner and terminates at least 15 feet behind the front yard building setback line. A maximum six-foot-high, solid board-on-board "panel" cedar fencing or wrought iron-type fencing shall be allowed between the masonry columns along the side and/or rear yard adjacent to a street. a. On corner lots which have rear lot lines adjacent to alleys or other rear lot lines, fences may be constructed along the side yard adjacent to the street, subject to a minimum five feet setback from the right-of-way. The property owner shall maintain that portion of the property outside of the fence. b. On corner lots which have rear lot lines adjacent to a side lot line of an adjoining lot(s), only tubular steel or wrought iron-type fences not exceeding 42 inches in height may be constructed beyond the building line. Fences constructed on or behind the building line shall comply with the materials requirement in section G.5 above.~~

~~f. All common areas and perimeter fencing shall be maintained by a homeowners association as specified in the city's subdivision regulations. Perimeter fencing shall be constructed of six-foot-tall tubular steel or wrought iron type fencing with masonry columns and entry features. The planning and zoning commission may consider alternative perimeter screening such as earthen berms with landscaping at the time of platting.~~

~~*(Ord. No. 07-18, 6-4-2007)*~~

SUBSECTION 3.06 ~~3.04~~: SINGLE-FAMILY 16 (SF-16) DISTRICT ~~Single-Family Residential (SF-16) District~~

A. *Purpose*. The Single-Family 16 (SF-16) District is the proper zoning classification for larger lot, single-family developments. This zoning district also accommodates public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas buffered from non-residential land uses, and where they will serve as a logical transition from higher to lower density residential zoning districts. These developments should provide access to public roadways, water, wastewater, and drainage.

~~1. This district is considered to be the proper zoning classification for large lot developments for single-family dwelling use. It is intended to be composed of single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units.~~

~~2. Areas that are zoned for this use shall have or provide for water, wastewater, drainage and access to paved streets based on single-family use required by the allowed density.~~

~~3. It is intended for areas that are properly buffered from nonresidential uses, and protected from pollution and/or environmental hazards or from high volume of non-single-family traffic.~~

B. *Permitted Uses*. All land uses permitted within the Single-Family 16 (SF-16) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV [of this Unified Development Code], Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Single-Family 16 (SF-16) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

1. ~~Minimum lot area: 16,000 square feet.~~
2. ~~Maximum number of single-family detached dwellings units per lot: one.~~
3. ~~Minimum square footage per dwelling unit: 2,400 square feet.~~
4. ~~Minimum lot frontage on a public street: 90 feet.~~
5. ~~Minimum lot depth: 100 feet.~~
6. ~~Minimum depth of front yard setback: 25 feet.~~
7. ~~Minimum depth of rear yard setback: ten feet.~~
8. ~~Minimum width of side yard setback:~~

    a. ~~Internal lot: eight feet.~~

9. ~~Minimum distance between separate buildings on the same lot or parcel of land: ten feet.~~
10. ~~Minimum length of driveway pavement from the public right-of-way for rear and side yard: 20 feet.~~
11. ~~Maximum building coverage as a percentage of lot area: 45 percent.~~
12. ~~Maximum building height: 36 feet.~~
13. ~~Minimum number of paved off-street parking spaces required for:~~

    a. ~~One single-family dwelling unit: two. An enclosed garage shall not be considered in meeting the off-street parking requirements.~~
    b. ~~For all other uses: see article VI [of this Unified Development Code], Parking and Loading.~~

~~*(Ord. No. 06-14, 4-17-2006; Ord. No. 16-47, § 2, 9-6-2016)*~~

SUBSECTION 3.07 ~~3.05~~: SINGLE-FAMILY 10 (SF-10) DISTRICT ~~Single-Family Residential (SF-10) District~~

A. *Purpose*. The Single-Family 10 (SF-10) District is the proper zoning classification for the majority of the City's existing single-family residential development, and is the appropriate zoning classification for single-family developments with medium sized lots. This zoning district also accommodates public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas buffered from non-residential land uses, and where they will serve as a logical transition from higher to lower density residential zoning districts. These developments should provide access to public roadways, water, wastewater, and drainage.

1. ~~This district comprises a major portion of the existing single-family dwelling development of the city. It is intended to be composed of single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units.~~
2. ~~Areas that are zoned for this use shall have or provide for water, wastewater, drainage and transportation capacities based on single-family use required by the allowed density.~~
3. ~~It is intended for areas that are properly buffered from nonresidential uses, and protected from pollution and/or environmental hazards or from high volume of non-single-family traffic.~~

B. *Permitted Uses*. All land uses permitted within the Single-Family 10 (SF-10) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV [of this Unified Development Code], Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Single-Family 10 (SF-10) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

1. ~~Minimum lot area: 10,000 square feet.~~
2. ~~Maximum number of single-family detached dwellings units per lot: one.~~
3. ~~Minimum square footage per dwelling unit: 2,200 square feet.~~
4. ~~Minimum lot frontage on a public street: 80 feet.~~
5. ~~Minimum lot depth: 100 feet.~~
6. ~~Minimum depth of front yard setback: 20 feet.~~
7. ~~Minimum depth of rear yard setback: ten feet.~~
8. ~~Minimum width of side yard setback:~~

    a. ~~Internal lot: six feet.~~

9. ~~Minimum distance between separate buildings on the same lot or parcel of land: ten feet.~~
10. ~~Minimum length of driveway pavement from the public right-of-way for rear and side yard: 20 feet.~~
11. ~~Maximum building coverage as a percentage of lot area: 45 percent.~~
12. ~~Maximum building height: 36 feet.~~
13. ~~Minimum number of paved off-street parking spaces required for:~~

    a. ~~One single-family dwelling unit: two. An enclosed garage shall not be considered in meeting the off-street parking requirements.~~
    b. ~~For all other uses: see article VI [of this Unified Development Code], Parking and Loading.~~

~~*(Ord. No. 06-14, 4-17-2006; Ord. No. 16-47, § 3, 9-6-2016)*~~

SUBSECTION 3.08 ~~3.06~~: SINGLE-FAMILY 8.4 (SF-8.4) DISTRICT ~~Single-Family Residential (SF-8.4) District~~

A. *Purpose*. The Single-Family 8.4 (SF-8.4) District is the proper zoning classification for areas of undeveloped land remaining in the City deemed appropriate for medium sized, single-family lots. This zoning district also accommodates public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas buffered from non-residential land uses, and where they will serve as a logical transition from higher to lower density residential zoning districts. These developments should provide access to public roadways, water, wastewater, and drainage.

1. ~~This district is considered to be the proper zoning classification for areas of the undeveloped land remaining in the city appropriate for single-family dwelling use. It is intended to be composed of single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units.~~
2. ~~Areas that are zoned for this use shall have or provide for water, wastewater, drainage and transportation capacities based on single-family use required by the allowed density.~~
3. ~~It is intended for areas that are properly buffered from nonresidential uses, and protected from pollution and/or environmental hazards or from high volume of non-single-family traffic.~~

B. *Permitted Uses*. All land uses permitted within the Single-Family 8.4 (SF-8.4) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Single-Family 8.4 (SF-8.4) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

DRAFT ORDINANCE 2018

1. ~~Minimum lot area: 8,400 square feet.~~
2. ~~Maximum number of single-family detached dwellings units per lot: one.~~
3. ~~Minimum square footage per dwelling unit: 1,500 square feet.~~
4. ~~Minimum lot frontage on a public street: 70 feet.~~
5. ~~Minimum lot depth: 100 feet.~~
6. ~~Minimum depth of front yard setback: 20 feet.~~
7. ~~Minimum depth of rear yard setback: ten feet.~~
8. ~~Minimum width of side yard setback:~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~a. Internal lot: six feet.~~

9. ~~Minimum distance between separate buildings on the same lot or parcel of land: ten feet.~~
10. ~~Minimum length of driveway pavement from the public right-of-way for rear and side yard: 20 feet.~~
11. ~~Maximum building coverage as a percentage of lot area: 45 percent.~~
12. ~~Maximum building height: 36 feet.~~
13. ~~Minimum number of paved off-street parking spaces required for:~~

~~a. One single-family dwelling unit: two. An enclosed garage shall not be considered in meeting the off-street parking requirements.~~
~~b. For all other uses: see article VI, Parking and Loading.~~

SUBSECTION 3.09 ~~3.07~~: SINGLE-FAMILY 7 (SF-7) DISTRICT ~~Single-Family Residential (SF-7) District~~

A. *Purpose*. The Single-Family 7 (SF-7) District is the proper zoning classification for single-family developments with smaller lots. This zoning district also accommodates public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas adjacent to low intensity non-residential land uses, in and around the Old Town Rockwall (OTR) Historic District, and/or where they will serve as a logical transition from higher to lower density residential zoning districts. These developments should provide access to public roadways, water, wastewater, and drainage.

1. ~~This district is considered to be the proper zoning classification for smaller lot developments for a single-family dwelling use. It is intended to be composed of single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units.~~
2. ~~Areas that are zoned for this use shall have or provide for water, wastewater, drainage and transportation capacities based on single-family use required by the allowed density.~~
3. ~~It is intended for areas that are properly buffered from nonresidential uses, and protected from pollution and/or environmental hazards or from high volume of non-single-family traffic.~~

B. *Permitted Uses*. All land uses permitted within the Single-Family 7 (SF-7) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Single-Family 7 (SF-7) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

~~1. Minimum lot area: 7,000 square feet.~~
~~2. Maximum number of single-family detached dwellings units per lot: one.~~
~~3. Minimum square footage per dwelling unit: 1,100 square feet.~~
~~4. Minimum lot frontage on a public street: 60 feet.~~
~~5. Minimum lot depth: 100 feet.~~
~~6. Minimum depth of front yard setback: 20 feet.~~
~~7. Minimum depth of rear yard setback: ten feet.~~
~~8. Minimum width of side yard setback:~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~a. Internal lot: six feet.~~

~~9. Minimum distance between separate buildings on the same lot or parcel of land: ten feet.~~
~~10. Minimum length of driveway pavement from the public right-of-way for rear and side yard: 20 feet.~~
~~11. Maximum building coverage as a percentage of lot area: 45 percent.~~
~~12. Maximum building height: 32 feet.~~
~~13. Minimum number of paved off-street parking spaces required for:~~

~~a. One single-family dwelling unit: two. An enclosed garage shall not be considered in meeting the off-street parking requirements.~~
~~b. For all other uses: see article VI, Parking and Loading.~~

SUBSECTION 3.10 ~~3.08~~: ZERO LOT LINE (ZL-5) DISTRICT ~~Zero Lot Line Residential (ZL-5) District~~

D. *Purpose*. The Zero Lot Line (ZL-5) District is the proper zoning classification for medium-density residential developments that are on separate lots (*i.e. single-family*), and are typically owner occupied. This zoning district also accommodates public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas buffered from non-residential land uses, adjacent to low intensity non-residential land uses, and/or where they will serve as a logical transition from higher to lower density residential zoning districts. These developments have increased requirements for public roadways, water, wastewater, and drainage due to their density.

~~1. The Zero Lot Line Residential District is established to provide adequate space and site diversification for medium-density residential development that is single-family, on separate lots, and typically owner occupied.~~
~~2. Zero lot line development is a medium density use. The increased requirements for street, water and fire protection, wastewater, drainage, and adequate open space should be met or provided for before zoning to this district.~~
~~3. Zero lot line developments must be properly buffered from nonresidential uses, and protected from high volumes of non-single-family traffic, or from pollution and/or environmental hazards.~~

A. *Permitted Uses*. All land uses permitted within the Zero Lot Line (ZL-5) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic~~

DRAFT 08.13.2018

~~neighborhood units, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

B. *Area Requirements*. ~~Development standards.~~ All development within a Zero Lot Line (ZL-5) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

~~1. Minimum lot area: 5,000 square feet.~~
~~2. Maximum number of single-family dwellings units per lot: one.~~
~~3. Minimum square footage per dwelling unit: 1,000 square feet.~~
~~4. Minimum lot frontage on a public street: 50 feet.~~
~~5. Minimum lot depth: 90 feet.~~
~~6. Minimum front yard setback: 20 feet.~~
~~7. Minimum rear yard setback: ten feet.~~
~~8. Minimum width of side yard setback:~~

~~*(Ord. No. 06-14, 1-17-2006)*~~

~~a. Zero lot line side: zero feet.~~
~~b. Maintenance easement side: ten feet.~~

~~9. Minimum maintenance easement on the non-zero lot line side, when adjacent to another lot in the same zoning district: five feet (this easement shall be maintained as an open space except upon a finding by the building official that the proposed improvements do not impede the use of said easement for maintenance of the adjoining structure).~~
~~10. Minimum distance between buildings on the same lot or parcel of ground: ten feet.~~
~~11. Minimum length of driveway pavement from public right-of-way for rear and side yard: 20 feet.~~
~~12. Maximum building coverage as a percentage of lot area: 50 percent.~~
~~13. Maximum building height: 30 feet.~~
~~14. Minimum number of paved off-street parking spaces:~~

~~a. One single-family dwelling unit: two spaces plus a two-car garage.~~
~~b. For all other uses: see article VI, Parking and Loading.~~

SUBSECTION 3.11 ~~3.09~~: TWO-FAMILY (2F) DISTRICT ~~Duplex (Two-Family) Residential (2F) District~~

A. *Purpose*. The Two-Family (2F) District is the proper zoning classification for medium-density, duplex developments (*i.e. two [2] dwelling units per lot*). This zoning district accommodates low to medium-density developments and allows public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas buffered from non-residential land uses, but may be located directly adjacent to low intensity non-residential land uses. These areas are also located where they will serve as a logical transition from higher to lower density residential zoning districts. These developments have increased requirements for public roadways, water, wastewater, drainage, open space and fire protection due to their density.

~~1. The Duplex Residential District is established to provide adequate space and site diversification for medium-density, duplex type residential development with two dwelling units per lot, and at almost twice the density of a typical single-family development, and to adjust the development standards accordingly.~~

DRAFT ORDINANCE 2018

2. ~~Duplex type development is a low to medium density use, and additional requirements for streets, water and fire protection, wastewater, drainage, and adequate open space shall be met before development to such use.~~
3. ~~Duplex developments are not necessarily a buffer between single-family and commercial uses, and should be properly buffered from nonresidential uses, and protected from high volumes of nonresidential traffic, or from pollution and/or environmental hazards.~~

B. *Permitted Uses*. All land uses permitted within the Two-Family (2F) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, single-family and duplex dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Two-Family (2F) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

1. ~~Minimum lot area: 7,000 square feet.~~
2. ~~Maximum number of single-family attached dwellings units per lot: two.~~
3. ~~Minimum square footage per dwelling unit: 800 square feet.~~
4. ~~Minimum lot frontage on a public street: 60 feet.~~
5. ~~Minimum lot depth: 100 feet.~~
6. ~~Minimum depth of front yard setback: 20 feet.~~
7. ~~Minimum depth of rear yard setback: ten feet.~~
8. ~~Minimum width of side yard setback:~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~a. Abutting structures separated by fire retardant walls: zero feet.~~
~~b. Internal lot: six feet*.~~

~~*Townhouses separated by firewall meeting the requirements of the building code may build to the property line where such structures abut.~~

9. ~~Minimum distance between buildings on the same lot or parcel of ground: ten feet.~~
10. ~~Minimum length of driveway pavement from public right-of-way for rear and side yard: 20 feet.~~
11. ~~Maximum building coverage as a percentage of lot area: 45 percent.~~
12. ~~Maximum building height: 32 feet.~~
13. ~~Minimum number of paved off-street parking spaces:~~

~~a. Each residential dwelling unit: two off-street spaces plus one garage parking space for each dwelling unit.~~
~~b. For all other uses: see article VI, Parking and Loading.~~

SUBSECTION 3.12 ~~3.10~~: MULTI-FAMILY 14 (MF-14) DISTRICT ~~Multi-Family Residential (MF-14) District~~

A. *Purpose*. The Multi-Family 14 (MF-14) District is the proper zoning classification for higher density developments. This zoning district should be located within 1,200-feet of retail and other services, and should not contain more than 500-units within one (1) mile of another multi-family development. These standards are intended to create a strong market for multi-family units, and provide for the ongoing reinvestment in these types developments while helping to ensure that inappropriate concentrations of

higher density residential developments are not created. The downtown area shall be exempted from the spacing requirements.

The Multi-Family 14 (MF-14) District allows high density developments that are extremely amenitized, and that necessitate additional requirements for public roadways, water, wastewater, drainage, open space and fire protection. These types of developments should not run traffic through single-family neighborhoods, and should be located close to an arterial or collector street that is capable of carrying the additional traffic.

~~1. The Multi-Family 14 (MF-14) Residential District is established to provide adequate space and site diversification for medium density areas.~~
~~2. Multi-family districts should be located within 1,200 feet of retail and other services; and no more than 500 units should be located within one mile of each other. These standards will help support a strong market for the units, and consequently on-going reinvestment, while helping to make sure that inappropriate concentrations of multi-family units are not created. The downtown area is exempted from the spacing standard.~~
~~3. This zone allows medium density developments, and should be located where additional requirements for streets, water and fire protection, wastewater, drainage, and adequate open spaces are met. MF-14 uses should not run traffic through single-family neighborhoods, and should be located close to arterial or collectors capable of carrying the additional traffic.~~
~~4. Multi-family developments are not necessarily a buffer between single-family and commercial uses, and should be property buffered from nonresidential land uses and traffic, as well as from pollution and/or environmental hazards.~~

B. *Permitted Uses*. All land uses permitted within the Multi-Family 14 (MF-14) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, duplex and apartment dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Multi-Family 14 (MF-14) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.02, *Multi-Family District Development Standards*.

~~1. Duplexes shall meet the requirements of the 2-F District, with only one duplex per lot.~~
~~2. Minimum site area: 10,000 square feet.~~
~~3. Minimum lot area: 2,000 square feet of lot per unit.~~
~~4. Maximum density per gross acre: 14 units/acre.~~
~~5. Minimum lot frontage on a public street: 60 feet.~~
~~6. Minimum lot depth: 100 feet.~~
~~7. Minimum depth of front yard setback: 25 feet.~~
~~8. Minimum depth of rear yard setback*:~~

~~a. Abutting a single-family, townhouse, or duplex district:~~

~~One-story structure: 25 feet.~~
~~Two-story structure: 50 feet.~~
~~Three-story structure: 75 feet.~~

~~b. Abutting any other district: ten feet.~~

*Unenclosed carports may be built up to within five feet of any property line that abuts an alley and no closer than 20 feet from any street intersection.

9. Minimum width of side yard setback:

(Ord. No. 06-14, 4-17-2006)

a. Abutting a single-family, townhouse, or duplex district:

One story structure: 25 feet.
Two story structure: 50 feet.
Three story structure: 75 feet.

b. Internal lot: ten feet for a one story structure or 15 feet for structures two or more stories in height.

10. Minimum distance between buildings on the same lot or parcel of land:

a. Ten feet from main to accessory buildings.
b. 20 feet for two main buildings with doors or windows in facing walls.
c. 15 feet for two main buildings without doors or windows in facing walls.

11. Maximum building coverage as a percentage of lot area: 45 percent. Each development containing over 100 dwelling units shall provide 300 square feet of open space per two- and three-bedroom unit, with at least one open area with the minimum dimensions of 200 feet by 150 feet.

Swimming pools, tennis courts and other recreational facilities can be counted toward the overall open space requirement, but not toward the required 200 feet by 150 feet area.

12. Minimum amount of permanent, landscaped open space: 20 percent of total lot area, with 30 percent of total requirement located in front and alongside buildings along street frontages. See article VIII, section 5.12, Required Landscaping.

Any parking lot with more than two rows of spaces shall have a minimum of two percent of the interior of the parking lot in landscaping. Such landscaping shall be counted toward the 20 percent total landscaping requirement.

All required landscaped areas shall be permanently maintained and shall have an irrigation system installed meeting all applicable city codes, and approved by the building official.

Also, see article VIII, Landscape Standards.

13. Maximum building height: 36 feet.
14. For required off-street parking: see article VI, Parking and Loading.
15. Lots with more than five dwelling units that are contiguous to a single-family, townhouse, or duplex district, must be separated by a buffer as established in article VIII, Landscape Standards. The required buffer shall be reviewed and approved by city council.

(Ord. No. 09-23, 6-15-2009)

DRAFT ORDINANCE 2018

SECTION 4: COMMERCIAL DISTRICTS

SUBSECTION 4.01: GENERAL COMMERCIAL DISTRICT STANDARDS

All commercial development shall conform to the following standards:

A. *Construction Materials.*

1. *Materials and Masonry Composition*. Each exterior wall of a building's façade shall consist of a minimum of 90% *Primary Materials* and/or a maximum of 10% *Secondary Materials -- excluding doors and windows* -- as defined below.

   a. *Primary Materials*. *Primary Materials* shall include stone, brick, glass curtain wall, glass block, tile, and custom Concrete Masonry Units (CMU) (*i.e. CMUs that have been sandblasted, burnished or that have a split face -- light weight block or smooth faced CMU shall be prohibited*). Specific requirements for *Primary Materials* are as follows:

      1. *Stone.* A minimum of 20% stone (*i.e. natural or synthetic/cultured*) is required on all building façades.
      2. *Cementaceous Materials.* The use of cementaceous materials (*e.g. stucco, cementaceous lap siding, or similar materials approved by the Director of Planning or his/her designee*) shall be limited to 50% of the building's exterior façade; however, stucco shall not be used within the first four (4) feet from grade on a building's façade.
      3. *Accent Brick and Stone.* Each building shall incorporate accent brick or stone, or brick and stone patterns and materials that create contrast through color, shape, size, and/or texture to the planes of the primary brick or stone materials used on each building elevation.

   b. *Secondary Materials*. *Secondary Materials* are any material that is not deemed to be a *Primary Material* as defined above. This includes materials like aluminum composite materials, metal panels, acrylic products (*i.e. EIFS products*), cast stone, or other materials identified by the Director of Planning and Zoning or his/her designee.

~~1. *Exterior Walls.* Each exterior wall shall consist of 90 percent masonry materials as defined in article XIII, Definitions, excluding doors and windows, on walls which are visible from a public street or open space, including a minimum of 20 percent stone.~~

~~All buildings shall have exterior walls constructed of stone, brick, glass block, tile, cast metal, cast or cultured stone, or a combination of those materials. The use of other cementaceous products (e.g., stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the buildings exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area.~~

2. *Exceptions*. Exceptions to ~~this~~ the material requirements may be permitted on a case-by-case basis by the Planning and Zoning Commission ~~council~~ upon recommendation from the Architectural Review Board (ARB). The submission and approval of material samples and building elevations ~~drawings~~ of the ~~subject~~ structure shall be required~~, and material samples~~. If the Planning and Zoning Commission denies an exception request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the exception being requested (*i.e. detail the unique or extraordinary*

conditions that exist and/or the undue hardship created by strict adherence to the technical requirements).

B. *Maximum Building Height*.

1. ~~All districts. The height limit for all structures shall be as established in the districts governing the property on which the structures are located, and the exceptions to height setback standards below.~~
2. ~~Building height and~~ *Setback Exceptions for Building Height in Commercial Districts*. ~~*Exceptions*.~~ All structures shall conform to the height requirements specified for the zoning district of the subject property as stipulated by Section 7.03, *Non-Residential District Development Standards*; however, ~~The~~ the following features may be constructed 12-feet higher than the maximum height requirement ~~of the zoning district in which the structure is located~~ if they [*1*] are not more than 33% of the total roof area, and [*2*] are setback from the edge of the roof a minimum of two (2) feet for every one (1) foot that the feature extends above the surface of the roof:

   a. Chimneys, Church Spires, Elevator Shafts, and similar appendages not intended as places of occupancy and/or storage.~~;~~
   b. Flag Poles ~~and similar devices.~~;
   c. ~~Heating and air conditioning equipment~~, Solar Collectors and/or Similar Equipment, Fixtures, and Devices~~;~~.

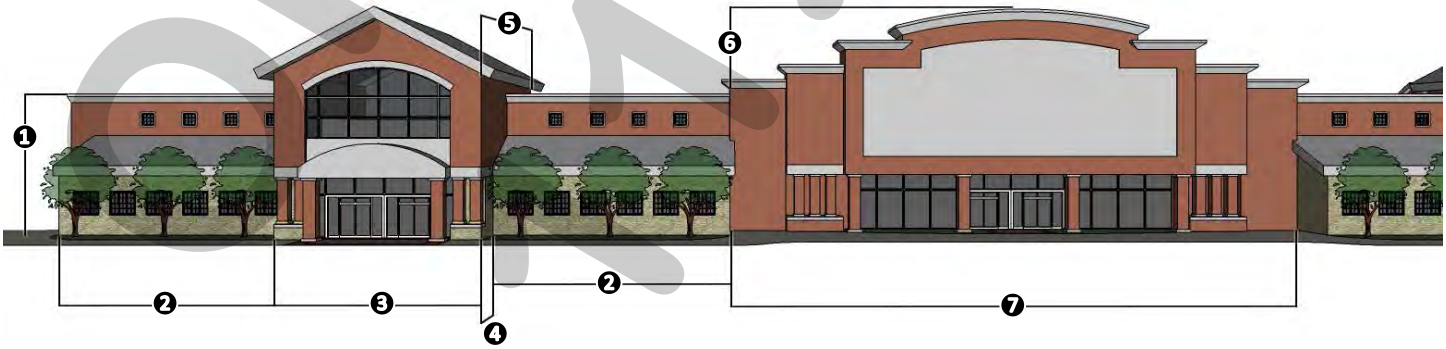
   ~~provided that they are:~~

   ~~a. Not more than one-third of the total roof area; and~~
   ~~b. Set back from the edge of the roof a minimum distance of two feet for every foot by which such features extend above the roof surface of the building to which they are attached.~~

C. *Building Articulation.*

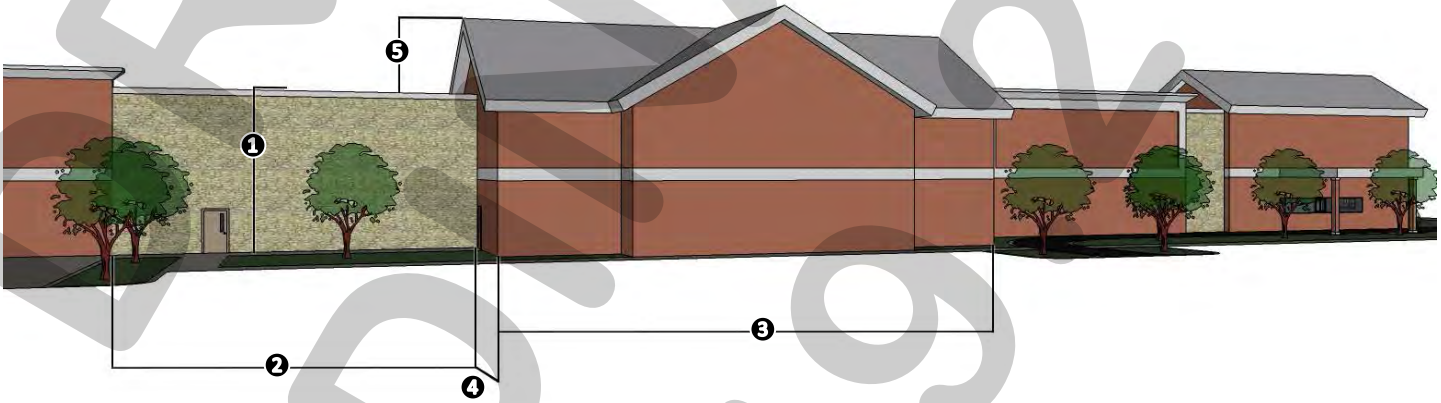
1. *Primary Building Façades.* A primary building façade is any building façade that has a primary entryway for a business or that has an adjacency to a public right-of-way, open space/green space, public/private park, and/or a residential zoning district or residentially used property. All commercial buildings ~~Facades~~ shall meet the following ~~minimum~~ standards for articulation on primary building façades:

~~a. Horizontal articulation. No building wall shall extend for a distance equal to three times the wall's height without having an offset of 25 percent of the wall's height, and that new plane shall extend for a distance equal to at least 25 percent of the maximum length of the first plane.~~
~~b. Vertical articulation. No horizontal wall shall extend for a distance greater than three times the height of the wall without changing height by a minimum of 25 percent of the wall's height.~~



❶: *Wall Height*. The wall height shall be measured from grade to the top of the wall.
❷: *Wall Length*. The maximum wall length shall not exceed three (3) times the wall height (*i.e. 3 x* ❶ ≥ ❷).
❸: *Secondary Entryway/Architectural Element Length*. The minimum length of the secondary entryway or projecting architectural element shall be 25% of the wall length *(i.e. 25% x* ❷ ≤ ❸).
❹: *Wall Projection*. The minimum wall projection for a primary and/or secondary entryway/architectural element shall be 25% of the wall height (*i.e. 25% x* ❶ ≤ ❹).
❺: *Primary and/or Secondary Entryway/Architectural Element Width*. The minimum width of the primary and/or secondary entryway/architectural element shall extend for twice the required wall projection (*i.e. 2 x* ❹ ≥ ❺).
❻: *Projection Height*. The primary and secondary entryways/architectural element shall extend a minimum of 25% of the wall height above the top of the wall (*i.e. 25% x* ❶ ≤ ❻).
❼: *Primary Entryway/Architectural Element Length*. The primary entryway/architectural element shall meet all of the same projections as the secondary entryway/architectural element, but shall extend for a minimum of twice the length of the secondary element (*i.e. 2 x* ❸ ≥ ❼).

2. *Secondary Building Façade.* A secondary building façade is any building façade that does not have a primary entryway or an adjacency to a public right-of-way, open space/green space, public/private park, and/or a residential zoning district or residentially used property. All commercial buildings shall meet the following standards for articulation on secondary building façades:

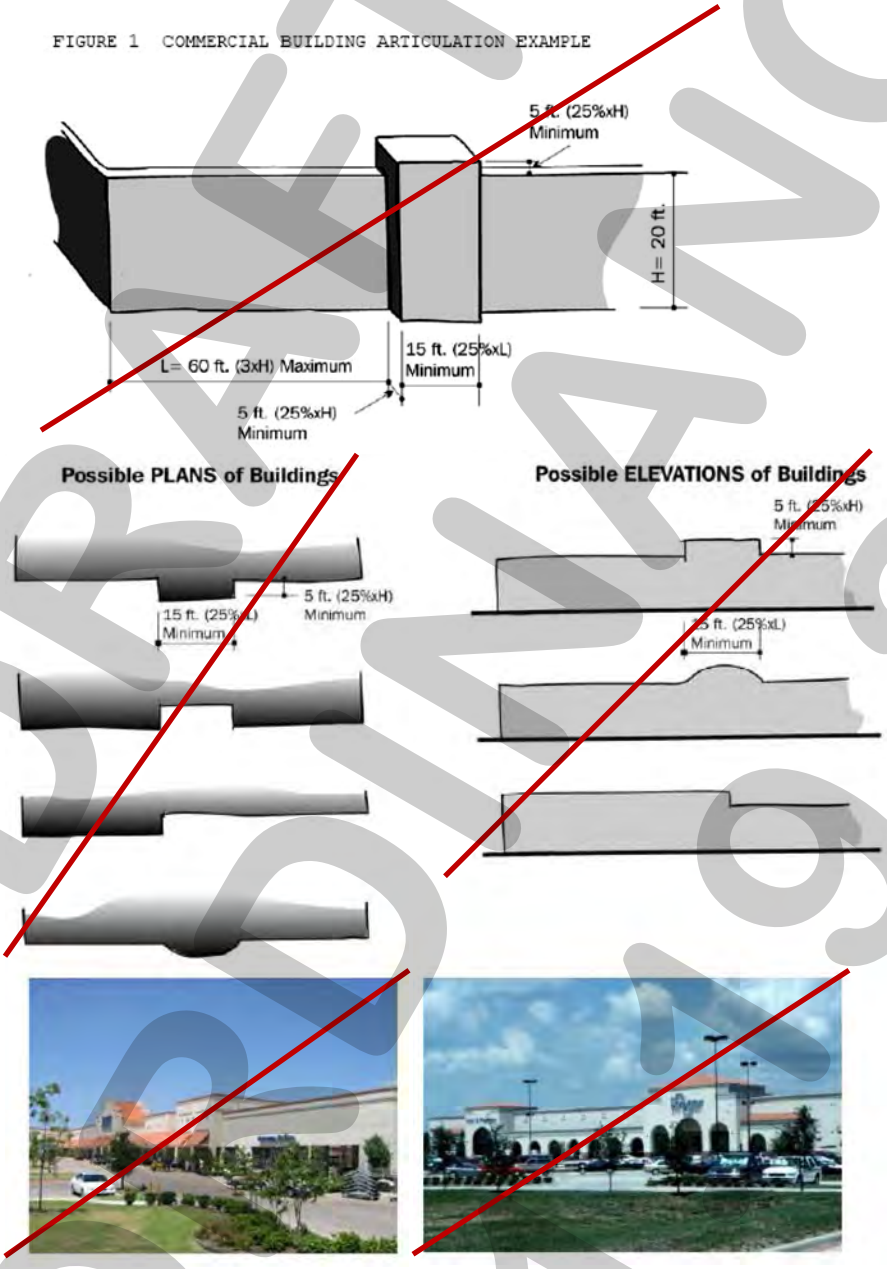


❶: *Wall Height*. The wall height shall be measured from grade to the top of the wall.
❷: *Wall Length*. The maximum wall length shall not exceed three (3) times the wall height (*i.e. 3 x* ❶ ≥ ❷).
❸: *Secondary Entryway/Architectural Element Length*. The minimum length of the secondary entryway or projecting architectural element shall be 15% of the wall length *(i.e. 15% x* ❷ ≤ ❸).
❹: *Secondary Entryway/Architectural Element Width*. The minimum wall projection for a secondary entryway/architectural element shall be 15% of the wall height (*i.e. 15% x* ❶ ≤ ❹).
❺: *Projection Height*. The secondary entryway/architectural element shall extend a minimum of 15% of the wall height above the top of the wall (*i.e. 15% x* ❶ ≤ ❺).

3. *Exceptions*. Exceptions to the building articulation requirements may be permitted on a case-by-case basis by the Planning and Zoning Commission pending a recommendation from the Architectural Review Board (ARB). In determining if an exception to the building articulation requirements is appropriate the Planning and Zoning Commission should determine if the proposed request is [*1*] in conformance with the spirit and intent of the building articulation requirements, and [*2*] if granting the exception will substantially weaken the City's ability to enforce the general

purpose of the building articulation requirements in the future. If the Planning and Zoning Commission denies an exception request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the exception being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*).

FIGURE 1 COMMERCIAL BUILDING ARTICULATION EXAMPLE



D. *Open Space Guidelines.* Commercial land uses should be designed to be integrated with adjacent land uses, as opposed to separating land uses using physical barriers or screening walls (*unless necessary*). This should be achieved by making commercial developments pedestrian-oriented and easily accessible to adjacent developments through the use of natural buffers, open space and trails. This involves creating trails that connect commercial and residential developments, using landscape buffers that incorporate berms and landscaping to separate residential and non-residential land uses, and utilizing building design to create compatibility with surrounding land uses.

DRAFT ORDINANCE 9.19.2018

E. *Commercial Buildings ~~Greater Than~~ 25,000 ~~square feet~~ SF or Greater*.

1. *Applicability.* These criteria shall apply to new retail/commercial building construction in ~~general retail and commercial districts only~~ all commercial zoning districts. This ~~These~~ criteria shall not be applied ~~apply~~ to the use, re-use, modification or consolidation of existing retail and/or commercial space developed ~~as of~~ on or before April 2, 2001, or to the expansion of ~~existing~~ retail space in existence ~~existing~~ ~~as of~~ on or before April 2, 2001, that is being expanded by ~~no greater~~ less than ten (10%) percent of the existing ~~ground~~ floor area.

2. *Exterior Building Materials.* ~~Ninety percent of the~~ The area of all exterior facades shall consist of 90% ~~clay-fired~~ brick, ~~native~~ stone, cast stone, custom Concrete Masonry Units (CMUs) (*i.e. CMUs that have been sandblasted, burnished or that have a split face -- light weight block or smooth faced CMU shall be prohibited*)~~integral-colored architectural split-faced concrete block, plaster~~, stucco or a combination of these materials. Each facade shall not contain more than 75% ~~percent~~ of any single material.

3. *Loading Docks.* Loading docks shall not be oriented towards a residential zoning district~~s~~ or residentially used property. Where loading areas are located parallel to a residential zoning district~~s~~ or residentially used property, they must be screened by an architecturally integrated masonry screening wall that is a minimum 14-foot ~~tall~~ in height and that runs ~~wall~~ the entire length of the loading space. As an alternative, the Planning and Zoning Commission may approve the use of a berm in conjunction with landscape screening if it is determined that this screening method will [*1*] provide a suitable substitute to a masonry wall, and [*2*] if the screening method will completely screen the proposed loading docks.

4. *On-Site Circulation Guidelines*.

   a. On-site circulation standards should try to minimize the conflict between pedestrians and vehicles by placing driveways and service areas in locations that reduce the chance of interrupting on-site vehicle movement.
   b. Buildings should be placed in a manner that screens the drive-through lane and creates pedestrian pathways and spaces.
   c. In order to maintain on-site circulation, each drive-through lane is to be separate from pump islands and from routes necessary for entering and exiting the property.

5. *Residential Adjacency Standards*. Where the property immediately abuts a residential zoning district or residentially used property~~,~~ -- *unless separated by an ~~MD~~4 M4D (major collector, four [4] lane, divided roadway) or larger thoroughfare*~~,~~ -- a minimum ~~ten-foot-wide~~ ten (10) foot wide landscaped ~~edge~~ buffer must be installed for buildings with a building footprint of 25,000 SF ~~square feet~~ to ~~50,000~~ 49,999 SF ~~square feet~~ in area, a minimum 15-foot wide landscaped ~~edge~~ buffer for buildings with a building footprint of ~~50,001~~ 50,000 SF ~~square feet~~ to 79,999 SF ~~square feet~~ in area, and a minimum 30-foot wide landscaped ~~edge~~ buffer for buildings with a building footprint of 80,000 SF ~~square feet~~ and greater in area. This shall be in addition to the screening required by the landscape regulations of the City of Rockwall for all aforementioned building sizes. The landscaped ~~edge~~ buffer must include a combination of berms, evergreen shrubs, and a mix of evergreen and deciduous trees (*minimum four [4] inch caliper*) placed at a minimum 25-feet on center. Planting may be grouped if approved by the Planning and Zoning Commission.

6. *Outside Storage*. Open storage areas shall be connected to the building and screened with a wall that is constructed of the same building materials as the remainder of the primary structure.

DRAFT ORDINANCE

7. *Adaptive Reuse Standards*. For those buildings over 80,000 SF ~~square feet~~ in area, the applicant must demonstrate that the building can be subdivided in a reasonable manner by submitting a plan indicating potential entrances and exits and loading areas for multiple tenants. This plan will need to be submitted at the time of site plan.

(Ord. No. 14-52, § 1, 12-1-2014)

SUBSECTION 4.02: RESIDENTIAL-OFFICE (RO) DISTRICT

A. *Purpose*. The Residential-Office (RO) ~~R-O~~ District is a zoning district intended to recognize~~s~~ the existence of older residential areas of the city, where larger houses have been or can be converted from single-family and multi-family ~~two-family~~ residences to low-intensity office uses in order to extend the economic life of these structures, and to allow the owners to justify the expenditures for repairs and modernization. The intent of this district is to allow for low intensity office development providing professional, medical and other office services and limited retail businesses to residents in adjacent neighborhoods. The Residential-Office (RO) ~~R-O~~ District shall have principle access to major or secondary thoroughfares, and may serve as an area of transition between residential and high-intensity, non-residential uses or busy arterial thoroughfares.

B. *Permitted Uses*. All land uses permitted within the Residential-Office (RO) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, low intensity office development providing professional, medical and other office services to residents in adjacent neighborhoods, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Residential-Office (RO) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

~~1. Minimum lot area: 6,000 square feet.~~
~~2. Maximum lot area: 43,560 square feet.~~
~~3. Minimum lot frontage on a public street: 60 feet.~~
~~4. Minimum lot depth: 100 feet.~~
~~5. Minimum depth of front yard setback: 25 feet (from future right-of-way as shown on the adopted thoroughfare plan or as actually exists, whichever is greater) in those instances where an existing structure is converted into an office use.~~
~~6. Minimum width of side yard setback: ten feet, except if the adjacent property is predominantly residentially zoned or residentially used, in which case the setback shall be 20 feet.~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~7. Minimum depth of rear yard setback: 30 feet.~~
~~8. Minimum distance between detached buildings on the same lot or parcel of land:~~

~~a. Without fire retardant wall: 15 feet.~~
~~b. With fire retardant wall: zero feet.~~

~~9. Minimum requirement for construction materials. For existing structures, no change to exterior walls shall be required. For new structures, each exterior wall shall consist of 90 percent masonry material excluding doors and windows.~~
~~10. Maximum building coverage as a percentage of lot area: 40 percent.~~
~~11. Maximum floor-area ratio (FAR): 0.33 FAR.~~
~~12. Maximum amount of impervious coverage as a percentage of lot area: 75 to 80 percent.~~

13. Minimum amount of landscaped areas: all development shall comply with article VIII, section 5.12, Required Landscaping.

    Amenity open space: seven percent of the interior of the parking lot, not including the setback and buffer development standards, shall be previous land area in association with plantings.

14. Maximum building height: 36 feet.
15. Minimum number of paved off-street parking spaces required: see article VI, Parking and Loading. Off-street parking shall not be permitted in the required setback in this district.
16. Maximum number of entrances and/or exits:

    a. Arterial streets: one per each 200 feet of street frontage per site, or as approved by the city council.
    b. Collector streets: one per each 100 feet of street frontage per site, or as approved by the city council.
    c. Local streets: one per each 50 feet of street frontage per site, or as approved by the city council.

17. Residential adjacency. Lots with nonresidential uses that have a side or rear contiguous or separated only by an alley, or easement or street, from any residential district must be separated from such residential district by a buffer as defined in article VIII, Landscape Standards, or as approved by the planning and zoning commission.
18. Building code. The building code may impose more restrictive development standards depending on the size, use and construction of the structures.

SUBSECTION 4.03: NEIGHBORHOOD SERVICES (NS) DISTRICT

A. *Purpose.* The Neighborhood Services (NS) District is a zoning district intended to provide limited retail land uses near neighborhoods for the purpose of supplying the *day-to-day* retail and personal service needs of residents. The Neighborhood Services (NS) District is typically located at limited corner locations on arterials in existing developments, and is intended to serve small service areas. The average site is from ½-acre to a maximum of two (2) acres. Since these sites are typically small and surrounded by residential development they can appear to be spot zones; however, the Comprehensive Plan acknowledges the need to create neighborhood units, which involve the need for limited retail and service uses in close proximity to neighborhoods. These convenience centers should be constructed to a residential scale, and be visually and dimensionally compatible to adjacent residential developments. The Neighborhood Services (NS) District should not contain uses that create excessive amounts of traffic, noise, litter or that would not be conducive to residential adjacency. Due to the residential adjacency of this zoning district, increased landscaping and buffering requirements are necessary.

1. The (NS) Neighborhood Service District is established as a limited retail category intended for use near neighborhood areas for the purpose of supplying day-to-day retail needs of the residents in the area, such as food, drugs and personal services.
2. The NS District occurs at limited corner locations on arterials in existing developments and is intended for small service areas in new developments. The average site is from one-half to one acre, up to two acres.
3. Since the site is typically small, and surrounded by residential type land uses, this zoning would have the appearance of a spot zone. It is not an illegal spot zone, however, if it is called for in the comprehensive plan, or if it serves a need in the neighborhood. A similar neighborhood convenience center within one-fourth mile of a proposed center would be an indication that the need for such a center is already being met.

4. ~~While the uses allowed in this district are intended to be located within or adjacent to residential areas, care must be taken to ensure that adjacent residential uses are protected. Uses with excessive amounts of traffic, noise, or litter are not intended for this district. Areas where two or more comers of an intersection are intended to have shopping facilities should be zoned a less restrictive district. The centers should be located at the intersection of collector type streets or larger that are capable of handling the additional traffic. The area, landscaping, and buffering requirements are more restrictive in this district in order to protect adjacent uses.~~

B. *Permitted Uses*. All land uses permitted within the Neighborhood Services (NS) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, retail businesses which supply day-to-day retail needs of the residents in adjacent neighborhoods, such as food, pharmaceuticals and personal services, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Neighborhood Services (NS) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

~~4. Minimum site size: 6,000 square feet.~~
~~5. Minimum site frontage on a public street: 60 feet.~~
~~6. Minimum site depth: 100 feet.~~
~~7. Minimum depth of front yard setback: 15 feet. Parking should not be located between the front facade and the property line.~~
~~8. Minimum width of side yard setback:~~

~~a. Without fire retardant wall: five feet.~~
~~b. With fire retardant wall: zero feet.~~
~~c. Abutting residentially zoned property: 20 feet.~~

~~9. Minimum depth of rear yard setback:~~

~~d. Abutting nonresidentially zoned property with fire retardant wall and alley separating: zero feet.~~
~~e. Without fire retardant wall or alley: 20 feet.~~
~~f. Abutting residentially zoned property: 20 feet.~~

~~10. Minimum distance between detached buildings on the same lot or parcel of land:~~

~~c. Without fire retardant wall: 15 feet.~~
~~d. With fire retardant wall: zero feet.~~

~~11. Maximum building size: 5,000 square feet in area, unless otherwise approved as a specific use permit (SUP) by the planning and zoning commission and city council.~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~12. Maximum building coverage as a percentage of lot area: 40 percent.~~
~~13. Maximum amount of impervious coverage as a percentage of lot area: 80 to 85 percent. See article VIII.5.12, Required Landscaping.~~
~~14. Minimum amount of landscaped area: all development shall comply with the landscaping regulations in article VIII, Landscape Standards.~~
~~15. Maximum building height: 36 feet.~~
~~16. Minimum number of paved off-street parking spaces required: see article VI, Parking and Loading.~~

~~17. Maximum number of entrances and/or exits:~~

~~a. Arterial streets: one per each 200 feet of street frontage per site, or as approved by the city council.~~
~~b. Collector streets: one per each 100 feet of street frontage per site, or as approved by the city council.~~
~~c. Local streets: one per each 50 feet of street frontage per site, or as approved by the city council.~~

~~18. Residential adjacency. Neighborhood service uses that have a side or rear contiguous or separated only by an alley, or easement or street, from any residential district must be separated from such residential district by a buffer as defined in article VIII, Landscape Standards, or as approved by the city council.~~
~~19. Building code. The building code may impose more restrictive development standards depending on the size, use and construction of the structures.~~

SUBSECTION 4.04: GENERAL RETAIL (GR) DISTRICT

A. Purpose. The General Retail (GR) District is a zoning district intended to provide limited retail and service uses for one (1) or more neighborhoods. The land uses specified in this district include most types of retail and office activity, and are typically located on/at the intersections of major thoroughfares. This district does ***not*** include strip commercial/retail centers, large shopping centers, wholesaling operations, lumberyards, contractor yards, and/or warehouses with high volumes of commercial truck traffic. The General Retail (GR) District is not a major commercial/retail district, and should try to avoid intensive commercial land uses that carry large volumes of retail traffic. The noise, traffic, litter, late night hours, and other influences that could be harmful to residential areas require adequate buffering and screening from residential areas. Traffic from land uses in this district should not pass through residential areas, except on arterial or major collectors. There are restrictions on access to prevent traffic congestion or an adverse effect on major thoroughfares adjacent to residential areas. Areas should not be zoned General Retail (GR) District unless they are located on or close to an arterial or major collector that is capable of carrying increased traffic. Since the General Retail (GR) District will be located close to residential areas, the development standards are stringent and require high standards of development similar to the Residential-Office (RO) and Neighborhood Services (NS) Districts.

~~1. The general retail district is established to provide limited retail and service uses for one or more neighborhoods. The uses specified in this district include most types of retail activity and are located on, or at the intersections of, major thoroughfares. This district does not include strip commercial, large shopping centers, wholesaling operations, lumber yards, contractor yards, and warehousing with high volumes of truck traffic and low volumes of retail type traffic.~~
~~2. This district will not be a major retail district, and will try to avoid intensive commercial uses and large volumes of retail traffic. The noise, traffic, litter, late night hours, and other influences that could be harmful to residential areas require adequate buffering from residential areas, and the traffic from such uses should not pass through residential areas, except on arterial or major collectors. There are restrictions on access to prevent traffic congestion or an adverse effect on major thoroughfares.~~
~~3. Areas should not be zoned to this use unless they are located on or close to arterial or major collectors capable of carrying the additional traffic they will generate, and in areas where there is increased water, fire protection, wastewater and drainage capacity.~~
~~4. This zone is a light retail zone, and it is intended that limited commercial uses fall in this district. Since the zone will be located close to residential areas, the development standards are stringent and require as high a standard of development as the RO and NS Districts.~~

B. *Permitted Uses.* All land uses permitted within the General Retail (GR) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, retail and service uses for one or more neighborhoods may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a General Retail (GR) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

~~1. Minimum site size: 6,000 square feet; one acre when adjacent to Interstate 30.~~
~~2. Minimum site frontage on a public street: 60 feet; 200 feet when adjacent to Interstate 30.~~
~~3. Minimum site depth: 100 feet; 200 feet when adjacent to Interstate 30.~~
~~4. Minimum depth of front yard setback: 15 feet from the future right-of-way as shown on the adopted thoroughfare plan or as actually exists, whichever is greater. Parking should not be located between the front facade and the property line.~~
~~5. Minimum width of side yard setback.~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~a. Without fire retardant wall: ten feet, or as required by building and/or fire codes.~~
~~b. With fire retardant wall: zero feet.~~
~~c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.~~
~~d. In no case shall more than a 50 foot setback be required.~~

~~6. Minimum depth of rear yard setback:~~

~~a. Abutting nonresidentially zoned property, with fire retardant wall and alley separating: zero feet.~~
~~b. Without fire retardant wall, or alley: ten feet, or as required by building and/or fire codes.~~
~~c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.~~
~~d. In no case shall more than a 50 foot setback be required.~~

~~7. Minimum distance between detached buildings on the same lot or parcel of land:~~
~~a. Without fire retardant wall: 15 feet.~~
~~b. With fire retardant wall: zero feet.~~

~~8. Maximum building size: 25,000 square feet in area, unless otherwise approved as a specific use permit (SUP) by the planning and zoning commission and city council.~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~9. Maximum building coverage as a percentage of lot area: 40 percent.~~
~~10. Maximum amount of impervious coverage as a percentage of lot area: 85 to 90 percent. See article VIII.5.12, Required Landscaping.~~
~~11. Minimum amount of landscaped area: all development shall comply with article VIII, Landscape Standards.~~
~~12. Maximum floor area ratio (FAR): 2:1 (FAR).~~
~~13. Maximum building height: 60 feet. Any structure over 36 feet shall require a specific use permit.~~
~~14. Minimum number of paved off-street parking spaces required: see article VI, Parking and Loading.~~
~~15. Maximum number of entrances and/or exits:~~

~~a. Arterial streets: one per each 200 feet of street frontage per site, or as approved by the city council.~~

b. ~~Collector streets: one per each 100 feet of street frontage per site, or as approved by the city council.~~

c. ~~Local streets: one per each 50 feet of street frontage per site, or as approved by the city council.~~

~~16. Residential adjacency. Lots with nonresidential uses that have a side or rear contiguous or separated only by an alley, or easement or street, from any residential district must be separated from such residential district by a buffer as defined in article VIII, Landscape Standards, or as approved by the city council.~~

~~17. Building code. The building code may impose more restrictive development standards depending on the size, use and construction of the structures.~~

SUBSECTION 4.05: COMMERCIAL (C) DISTRICT

A. *Purpose*. The Commercial (C) District is the proper zoning classification for most types of commercial development (*e.g. larger shopping centers at major intersections, commercial strips along arterial roadways, etc.*). The land uses specified for the Commercial (C) District include most types of office and retail activity with some special provisions for wholesale land uses. This district mostly excludes land uses that are not compatible with retail shopping (*e.g. lumberyards, contractor yards, warehousing, or other land uses with high volumes of truck traffic and low volumes of retail traffic*). The noise, traffic, litter, late night hours, and other influences that could be harmful to neighborhoods require adequate buffering and mitigating factors when locating adjacent to residential areas. Areas should not be zoned to Commercial (C) District unless they are located on or close to an arterial or major collector that is capable of carrying the additional traffic generated by land uses in this district. In addition, these areas may require increased water, fire protection, wastewater and drainage capacity. The Commercial (C) District is a general business zone, and is intended to service most commercial land uses, with the exception of land uses that would fall into the Heavy Commercial (HC) District. Since the Commercial (C) District is general in nature, the development standards are less stringent and do not require as high of standards of development as the Residential-Office (RO), Neighborhood Services (NS) and General Retail (GR) Districts.

~~1. The Commercial District is established to provide adequate space and site diversification for most types of commercial development in the City of Rockwall. Larger shopping centers and most of the existing commercial strips along major arterial roadways would be included in this district. The uses specified in this district include most types of retail activity and some wholesale with the exception of those uses which are not compatible with the retail shopping function. For example, lumberyards, contractor yards, and warehousing with high volumes of truck traffic and low volumes of retail type traffic are not included in this district.~~

~~2. This district will be the major retail district, with intensive commercial uses and large volumes of retail traffic. The noise, traffic, litter, late night hours, and other influences that could be harmful to residential areas require adequate buffering from residential areas, and the traffic from such uses should not pass through residential areas, except on arterial or major collectors.~~

~~3. Areas should not be zoned to this use unless they are located on or close to arterial or major collectors capable of carrying the additional traffic they will generate, and in areas where there is increased water, fire protection, wastewater and drainage capacity.~~

~~5. This zone is the general business zone, and it is intended that most commercial uses fall in this district, with the exception of the heavy commercial type uses. Since the zone is of a general nature, the development standards are less stringent and do not require as high a standard of development as the RO, NS and GR Districts.~~

B. *Permitted Uses*. All land uses permitted within the Commercial (C) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, any retail business, personal service, professional service, or business service conducted within a completely enclosed building, excluding~~

high truck traffic uses, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.

C. *Area Requirements*. Development standards. All development within a Commercial (C) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

1. Minimum site size: 10,000 square feet; one acre when adjacent to Interstate 30.
2. Minimum site frontage on a public street: 60 feet; 200 feet when adjacent to Interstate 30.
3. Minimum site depth: 100 feet; 200 feet when adjacent to Interstate 30.
4. Minimum depth of front yard setback: 15 feet from the future right-of-way as shown on the adopted thoroughfare plan or as actually exists, whichever is greater. Parking should not be located between the front facade and the property line.
6. Minimum width of side yard setback:

(Ord. No. 06-14, 4-17-2006)

a. Without fire retardant wall: ten feet, or as required by building and/or fire codes.
b. With fire retardant wall: zero feet.
c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.
d. In no case shall more than a 50 foot setback be required.

7. Minimum depth of rear yard setback:

a. Abutting nonresidentially zoned property, with fire retardant wall and alley separating: zero feet.
b. Without fire retardant wall, or alley: ten feet, or as required by building and/or fire codes.
c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.
d. In no case shall more than a 50 foot setback be required.

8. Minimum distance between detached buildings on the same lot or parcel of land:

a. Without fire retardant wall: 15 feet.
b. With fire retardant wall: zero feet.

9. Maximum building coverage as a percentage of lot area: 60 percent.
10. Maximum amount of impervious coverage as a percentage of lot area: 85 to 90 percent. See article VIII.5.12, Required Landscaping.
11. Minimum amount of landscaped area - all development shall comply with article VIII, Landscape Standards.
12. Maximum floor area ratio (FAR): 4:1 (FAR).
13. Maximum building height: 240 feet. Any structure over 60 feet shall require a specific use permit.
14. Minimum number of paved off-street parking spaces required: see article VI, Parking and Loading.
15. Maximum number of entrances and/or exits:

a. Arterial streets: one per each 200 feet of street frontage per site, or as approved by the city council.
b. Collector streets: one per each 100 feet of street frontage per site, or as approved by the city council.
c. Local streets: one per each 50 feet of street frontage per site, or as approved by the city council.

16. Residential adjacency. Lots with nonresidential uses that have a side or rear contiguous or separated only by an alley, or easement or street, from any residential district must be separated

DRAFT ORDINANCE 9.24.2018

~~from such residential district by a buffer as defined in article VIII, Landscape Standards, or as approved by the city council.~~

~~17. Building code. The building code may impose more restrictive development standards depending on the size, use and construction of the structures.~~

D. ~~*Special standards.*~~ *Special District Requirements.*

~~1. *Sale of Goods*. All business establishments other than those selling a service, shall be retail or wholesale service establishments dealing directly with customers. All goods produced on the premises shall be sold on premises where they are produced.~~

1. ~~2.~~ *Business Operations and Storage*. All business operations including storage shall be conducted within a completely enclosed building unless specifically authorized for the use as ~~listed~~ stipulated in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. This excludes off-street parking and loading, incidental display of retail items for sale, retail outlets where gasoline products are sold and drive-in businesses.

~~Sec. 4.6. - Reserved.~~

SUBSECTION 4.06 ~~4.7~~: HEAVY COMMERCIAL (HC) DISTRICT

A. *Purpose*. The Heavy Commercial (HC) District is the proper zoning classification for commercial establishments that may involve uses that would not be suitable in the other commercial zoning districts. Included in this district are commercial uses that involve large volumes of commercial truck traffic, outside operations, outside storage of materials and equipment, excessive noise from heavy service operations, and/or any other possibly adverse operations. The Heavy Commercial (HC) District is commercial in nature, but has some aspects that are similar to industrial land uses. The zoning district allows noise, traffic, litter, late night hours, outside storage of materials and equipment, and other influences that could be harmful if directly adjacent to residential areas, and will require adequate buffering and other mitigating factors if such an adjacency exists. Areas should not be zoned to Heavy Commercial (HC) District unless they are located on or close to an arterial that is capable of carrying large volumes of commercial truck traffic. Businesses locating in the Heavy Commercial (HC) District should work with the City to ensure that water, wastewater, and drainage capacity is adequate before locating on a particular property, and that streets in and adjacent to this district are of a size and strength to accommodate commercial truck traffic.

~~1. The Heavy Commercial District is established to provide adequate space and site diversification for commercial establishments may involve uses that would be objectionable in the other commercial districts or adjacent to residential districts. Included in this district are commercial uses that involve large volumes of truck traffic, outside operations and storage of materials and equipment, either for sale or as part of the business, excessive noise from heavy service operations, or any other possibly adverse influences.~~

~~2. This district is commercial in nature, but has some aspects that are similar to industrial uses. The noise, traffic, litter, late night hours, outside storage of materials and equipment, and other influences that could be harmful to residential areas require adequate buffering from residential areas, and the traffic from such uses should not pass through residential areas at all, if possible. These areas should not be located in close proximity to residential areas of any type.~~

~~3. Areas should not be zoned to this use unless they are located on or close to arterials capable of carrying commercial and truck traffic. They should be located close to major truck routes. Internal streets in such developments should be sized and strengthened to accommodate truck traffic. Fire protection should be adequate for large warehouse type operations, and the water, wastewater, and drainage systems should have enough existing capacity to support such development.~~

B. *Permitted Uses*. All land uses permitted within the Heavy Commercial (HC) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, any retail business, personal service, professional service, or business service conducted within a completely enclosed building, excluding high truck traffic uses, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Commercial (C) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

~~1. Minimum site size: 12,500 square feet; one-acre when adjacent to Interstate 30.~~
~~2. Minimum site frontage on a public street: 100 feet; 200 feet when adjacent to Interstate 30.~~
~~3. Minimum site depth: 125 feet; 200 feet when adjacent to Interstate 30.~~
~~4. Minimum depth of front yard setback: 25 feet from the future rights-of-way as shown on the adopted thoroughfare plan or as actually exists, whichever is greater.~~
~~5. Minimum width of side yard setback:~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~a. Without fire retardant wall: 15 feet plus one-half of the building height over 36 feet.~~
~~b. With fire retardant wall: zero feet plus one-half of the building height over 36 feet.~~
~~c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.~~
~~d. In no case shall more than a 50 foot setback be required.~~

~~6. Minimum depth of rear yard setback:~~

~~a. Abutting nonresidentially zoned property, with fire retardant wall and alley separating: zero feet plus one-half the building height over 36 feet.~~
~~b. Without fire retardant wall, or alley: 20 feet.~~
~~c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.~~
~~d. In no case shall more than a 50 foot setback be required.~~

~~7. Minimum distance between detached buildings on the same lot or parcel of land:~~

~~a. Without fire retardant wall: 15 feet plus one-half the building height over 36 feet.~~
~~b. With fire retardant wall: zero feet plus one-half the building height over 36 feet.~~
~~c. In no case shall more than a 50 foot setback be required.~~

~~8. Maximum building coverage as a percentage of lot area: 60 percent.~~
~~9. Maximum amount of impervious coverage as a percentage of lot area: 90 to 95 percent. See article VIII.5.12, Required Landscaping.~~
~~10. Minimum amount of landscaped area: all development shall comply with article VIII, Landscape Standards.~~
~~11. Maximum floor area ratio (FAR): 4:1 (FAR).~~
~~12. Maximum building height: 240 feet. Any structure over 60 feet shall require a specific use permit.~~
~~13. Minimum number of paved off-street parking spaces required: see article VI, Parking and Loading.~~
~~14. Maximum number of entrances and/or exits:~~

DRAFT ORDINANCE

~~a. Arterial streets: one per each 200 feet of street frontage per site, or as approved by the city council.~~
~~b. Collector streets: one per each 100 feet of street frontage per site, or as approved by the city council.~~
~~c. Local streets: one per each 50 feet of street frontage per site, or as approved by the city council.~~

~~15. Residential adjacency. Lots with nonresidential uses that have a side or rear contiguous or separated only by an alley, or easement or street, from any residential district must be separated from such residential district by a buffer as defined in article VIII, Landscape Standards, or as approved by the city council.~~
~~16. Building code. The building code may impose more restrictive development standards depending on the size, use and construction of the structures.~~
~~17. Outside storage.~~

~~d. All outside storage shall be placed behind the front facade of the main structure. This does not apply to uses that allow incidental display, in which case only the amount of goods necessary for display purposes shall be exempt from this requirement.~~
~~e. All outside storage shall be screened from streets and public areas.~~

D. *Special District Requirements.*

1. *Outside Storage*.

a. All outside storage shall be placed behind the front facade of the main structure. This does not apply to uses that allow incidental display, in which case only the amount of goods necessary for display purposes shall be exempt from this requirement.
b. All outside storage shall be screened from streets and public areas.

SUBSECTION 4.07 ~~4.8~~: DOWNTOWN (DT) DISTRICT

Subsection 4.07, *Downtown (DT) District*, is omitted from this ordinance change, but is retained in its entirety.

SECTION 5: INDUSTRIAL DISTRICTS

SUBSECTION 5.01: GENERAL INDUSTRIAL DISTRICT STANDARDS

All industrial development shall conform to the following standards:

A. *Construction Materials.*

1. *Materials and Masonry Composition*. Each exterior wall of a building's façade shall consist of a minimum of 90% *Primary Materials* and/or a maximum of 10% *Secondary Materials -- excluding doors and windows* -- as defined below.

a. *Primary Materials*. *Primary Materials* shall include stone, brick, glass curtain wall, glass block, tile, and custom Concrete Masonry Units (CMU) (*i.e. CMUs that have been sandblasted, burnished or that have a split face -- light weight block or smooth faced CMU shall be prohibited*). Specific requirements for *Primary Materials* are as follows:

1. *Stone*. A minimum of 20% stone (*i.e. natural or synthetic/cultured*) is required on all building façades.

2. *Cementaceous Materials.* The use of cementaceous materials (*e.g. stucco, cementaceous lap siding, or similar materials approved by the Director of Planning or his/her designee*) shall be limited to 50% of the building's exterior façade; however, stucco shall not be used within the first four (4) feet from grade on a building's façade. The use of concrete tilt-up walls may be permitted on a case-by-case basis in accordance with the exception requirements outlined below.
3. *Accent Brick and Stone.* Each building shall incorporate accent brick or stone, or brick and stone patterns and materials that create contrast through color, shape, size, and/or texture to the planes of the primary brick or stone materials used on each building elevation.

b. *Secondary Materials*. *Secondary Materials* are any material that is not deemed to be a *Primary Material* as defined above. This includes materials like aluminum composite materials, metal panels, acrylic products (*i.e. EIFS products*) cast stone, or other materials identified by the Director of Planning and Zoning or his/her designee.

~~1. *Exterior Walls.* Each exterior wall shall consist of 90 percent masonry materials as defined in article XIII, Definitions, excluding doors and windows, on walls which are visible from a public street or open space, including a minimum of 20 percent stone.~~

~~All buildings shall have exterior walls constructed of stone, brick, glass block, tile, cast metal, cast or cultured stone, or a combination of those materials. The use of other cementaceous products (e.g., stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the buildings exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area.~~

2. *Exceptions*. Exceptions to ~~this~~ the material requirements may be permitted on a case-by-case basis by the Planning and Zoning Commission ~~council~~ upon recommendation from the Architectural Review Board (ARB). The submission and approval of material samples and building elevations ~~drawings~~ of the ~~subject~~ structure shall be required~~, and material samples~~. If the Planning and Zoning Commission denies an exception request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the exception being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*).

B. *Maximum Building Height.*

~~1. All districts. The height limit for all structures shall be as established in the districts governing the property on which the structures are located, and the exceptions to height setback standards below.~~
~~2. Building height and~~ *Setback Exceptions for Building Height in Industrial Districts*. ~~*Exceptions.*~~ All structures shall conform to the height requirements specified for the zoning district of the subject property as stipulated by Section 7.03, *Non-Residential District Development Standards*; however, ~~The~~ the following features may be constructed 12-feet higher than the maximum height requirement ~~of the zoning district in which the structure is located~~ if they [*1*] are not more than 33% of the total roof area, and [*2*] are setback from the edge of the roof a minimum of two (2) feet for every one (1) foot that the feature extends above the surface of the roof:

a. Chimneys, Church Spires, Elevator Shafts, and similar appendages not intended as places of occupancy and/or storage~~.~~;

b. Flag Poles ~~and similar devices.~~;
c. ~~Heating and air conditioning equipment~~, Solar Collectors and/or Similar Equipment, Fixtures, and Devices~~;~~.

~~provided that they are:~~

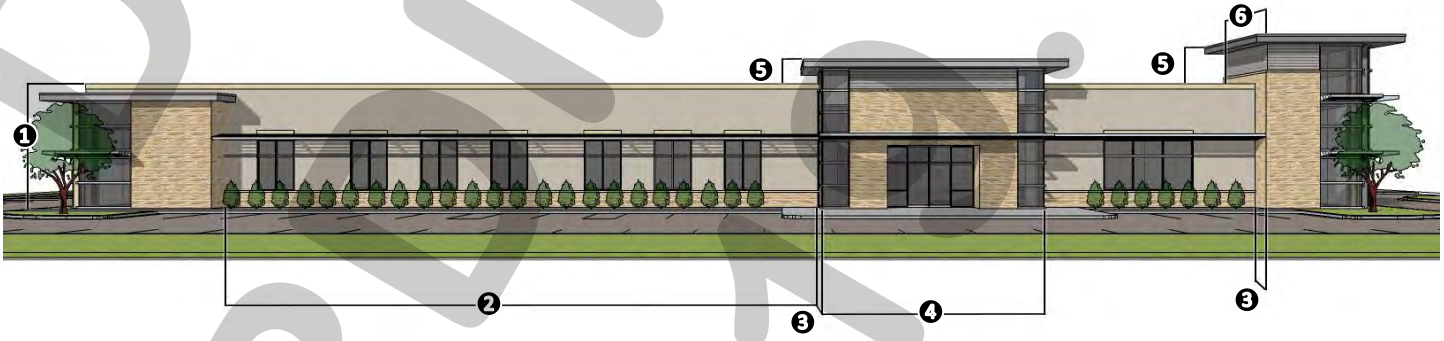
~~a. Not more than one-third of the total roof area; and~~
~~b. Set back from the edge of the roof a minimum distance of two feet for every foot by which such features extend above the roof surface of the building to which they are attached.~~

C. *Building Articulation*.

~~1. *Requirements*. Facades which face streets shall meet the following minimum standards for articulation:~~

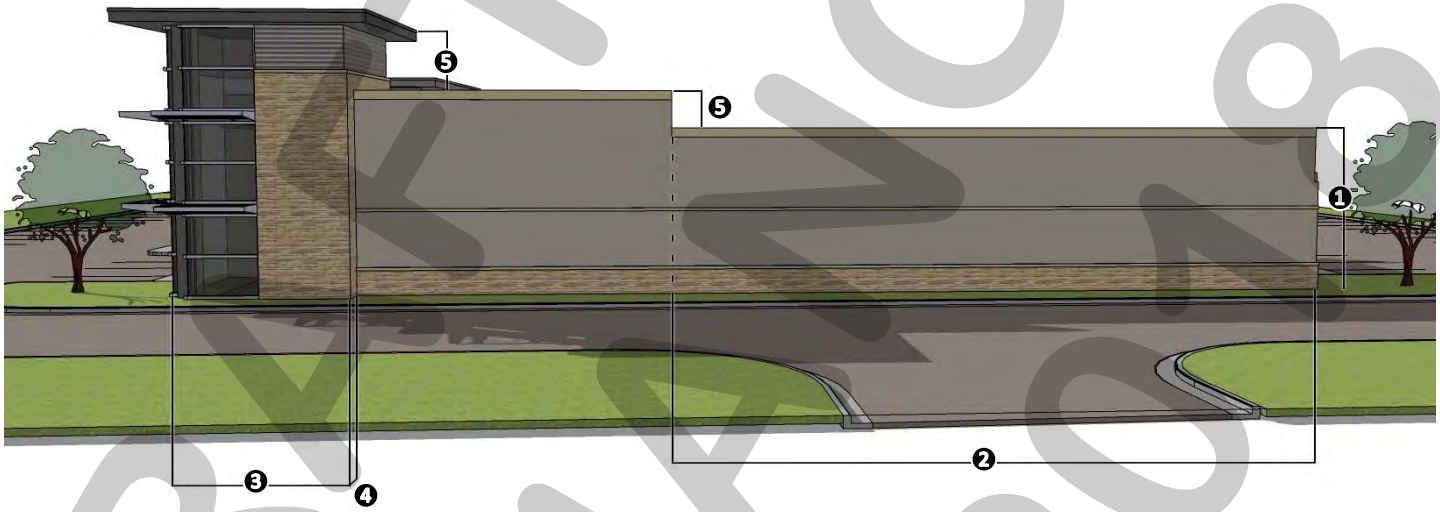
~~a. *Horizontal articulation*. No building wall shall extend for a distance equal to four times the wall's height without having an offset of 25 percent of the wall's height, and that new plane shall extend for a distance equal to at least 20 percent of the maximum length of the first plane.~~
~~b. *Vertical articulation*. No horizontal wall shall extend for a distance greater than four times the height of the wall without changing height by a minimum of 25 percent of the wall's height.~~

1. *Primary Building Façades.* A primary building façade is any building façade that has a primary entryway for a business or that has an adjacency to a public right-of-way, open space/green space, public/private park, and/or a residential zoning district or residentially used property. All industrial buildings shall meet the following standards for articulation on primary building façades:



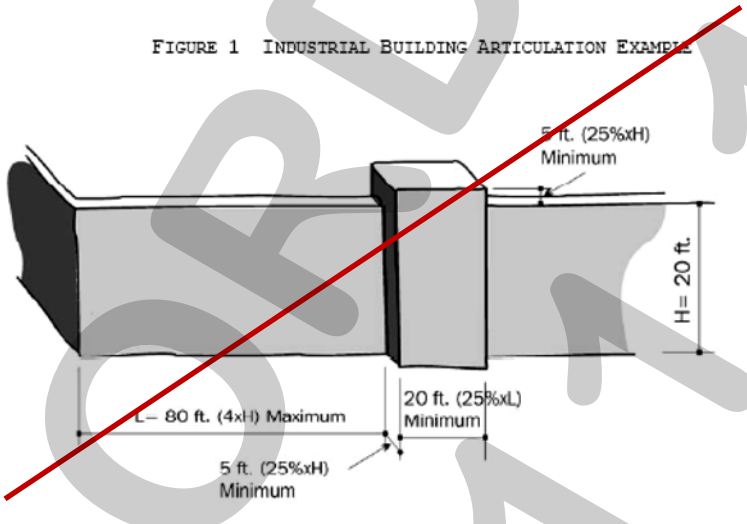
❶: *Wall Height*. The wall height shall be measured from grade to the top of the wall.
❷: *Wall Length*. The maximum wall length shall not exceed four (4) times the wall height (*i.e. 4 x* ❶ ≥ ❷).
❸: *Wall Projection*. The minimum wall projection for an entryway/architectural element shall be 25% of the wall height (*i.e. 25% x* ❶ ≤ ❸).
❹: *Entryway/Architectural Element Length*. The minimum entryway/architectural element length shall be 33% of the wall height (*i.e. 33% x* ❷ ≥ ❹).
❺: *Projection Height*. The entryways/architectural elements shall extend a minimum of 25% of the wall height above the top of the wall (*i.e. 25% x* ❶ ≤ ❺).
❻: *Entryway/Architectural Element Width*. The minimum width of the entryway/architectural element shall extend for twice the required wall projection (*i.e. 2 x* ❸ ≥ ❻).

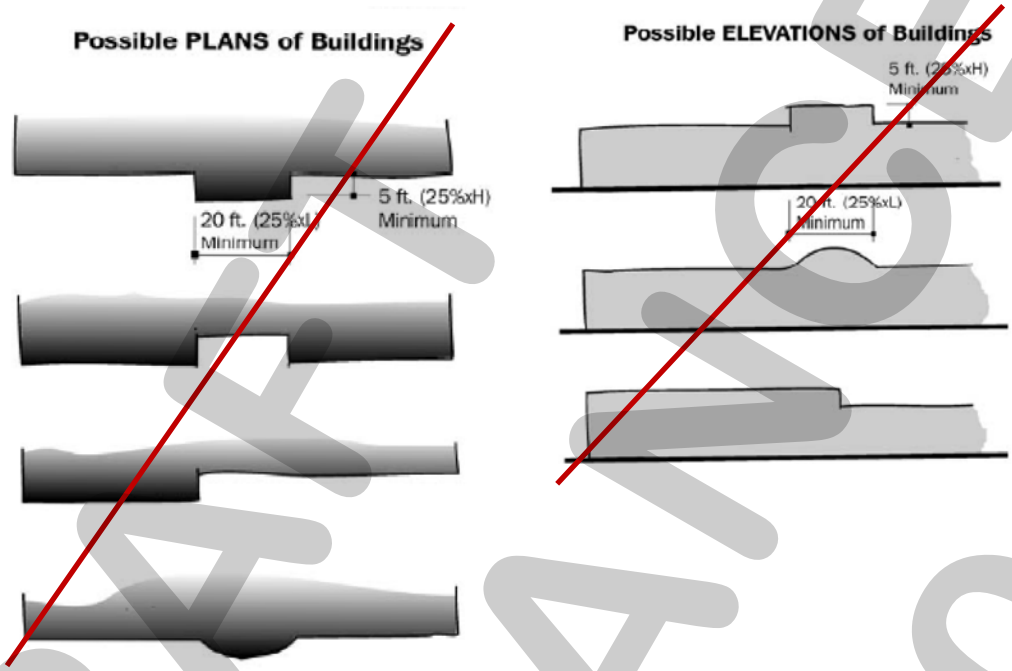
2. *Secondary Building Façade.* A secondary building façade is any building façade that does not have a primary entryway or an adjacency to a public right-of-way, open space/green space, public/private park, and/or a residentially zoned district or residentially used property. All industrial buildings shall meet the following standards for articulation on secondary building façades:



❶: *Wall Height*. The wall height shall be measured from grade to the top of the wall.
❷: *Wall Length*. The maximum wall length shall not exceed three (3) times the wall height (*i.e. 3 x* ❶ ≥ ❷).
❸: *Secondary Entryway/Architectural Element Length*. The minimum length of the secondary entryway or projecting architectural element shall be 15% of the wall length *(i.e. 15% x* ❷ ≤ ❸).
❹: *Secondary Entryway/Architectural Element Width*. The minimum wall projection for a secondary entryway/architectural element shall be 15% of the wall height (*i.e. 15% x* ❶ ≤ ❹).
❺: *Projection Height*. The secondary entryways/architectural elements shall extend a minimum of 15% of the wall height above the top of the wall (*i.e. 15% x* ❶ ≤ ❺).

FIGURE 1 INDUSTRIAL BUILDING ARTICULATION EXAMPLE





~~*(Ord. No. 14-52, § 1, 12-1-2014)*~~

3. *Exceptions.* Exceptions to the building articulation requirements may be permitted on a case-by-case basis by the Planning and Zoning Commission pending a recommendation from the Architectural Review Board (ARB). In determining if an exception to the building articulation requirements is appropriate the Planning and Zoning Commission should determine if the proposed request is [1] in conformance with the spirit and intent of the building articulation requirements, and [2] if granting the exception will substantially weaken the City's ability to enforce the general purpose of the building articulation requirements in the future. If the Planning and Zoning Commission denies an exception request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the exception being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*).

D. *Open Space Guidelines*. Industrial land uses should be designed to be integrated with adjacent land uses, as opposed to separating land uses using physical barriers or screening walls (*unless necessary*). This should be achieved by making industrial developments pedestrian-oriented and easily accessible to adjacent developments through the use of natural buffers, open space and trails. This involves creating trails that connect commercial and residential developments, using landscape buffers that incorporate berms and landscaping to separate residential and non-residential land uses, and utilizing building design to create compatibility with surrounding land uses.

~~*SUBSECTION 5.02: RESEARCH TECHNOLOGY (RT) DISTRICT*~~

~~E. Purpose.~~

~~2. The purpose of the research technology district is to create a light office/industrial zone that provides for the modern type of office and technology park development that would include research and development as well as light manufacturing and assembly. Limitations are placed on the uses in this district to significantly restrict the outside activities and storage of materials, noise,~~

DRAFT ORDINANCE 2018

vibration, smoke, pollution, fire and explosive hazard, glare and any other potentially adverse influences.

3. The light manufacturing and assembly uses should be conducted within a totally enclosed building. The sites for such uses are typically a minimum of two acres and average five to ten acres, with a significant amount of land dedicated to landscaping.
4. Because this is a light industrial zone with substantial screening and buffering requirements, these uses are suitable for high visibility locations such as along the freeway, or within a reasonable distance of residential areas. Residential uses should be discouraged from locating near the industrial district to protect the industries from residential complaints.

18. Though truck traffic should be minimal, areas zoned for this use should be located with access to arterials capable of accommodating some truck traffic. Each industry should work with the city to ensure the water pressure and capacity is adequate to provide fire protection for that particular industry before such industry is developed. Industries should also work with the city to ensure that the water, wastewater, and drainage capacity is adequate before the industry is developed.

F. Permitted uses. In general, office, research and development as well as light manufacturing and assembly uses are allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.

G. Development standards.

1. Minimum site size: 12,500 square feet; adjacent to IH-30: one acre.
2. Minimum site frontage on a public street: 100 feet; adjacent to IH-30: 200 feet.
3. Minimum site depth: 125 feet; adjacent to IH-30: 200 feet.
4. Minimum depth of front yard setback: 25 feet from the future rights-of-way as shown on the adopted thoroughfare plan or as actually exists, whichever is greater.

19. Minimum width of side yard setback:

(Ord. No. 06-14, 4-17-2006)

a. Without fire retardant wall: 15 feet plus one-half of the building height over 36 feet.
b. With fire retardant wall: zero feet plus one-half of the building height over 36 feet.
c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.
d. In no case shall more than a 50-foot setback be required.

20. Minimum depth of rear yard setback:

a. Abutting nonresidentially zoned property, with fire retardant wall and alley separating: zero feet plus one-half the building height over 36 feet.
b. Without fire retardant wall or alley; ten feet, or as required by building and/or fire codes.
c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.
d. In no case shall more than a 50-foot setback be required.

21. Minimum distance between detached buildings on the same lot or parcel of land:
a. Without fire retardant wall: 15 feet plus one-half the building height over 36 feet.
b. With fire retardant wall: zero feet plus one-half the building height over 36 feet.
c. In no case shall more than a 50-foot setback be required.

22. Maximum building coverage as a percentage of lot area: 60 percent.
23. Maximum amount of impervious coverage as a percentage of lot area: 80 to 85 percent. See article VIII.5.12, Required Landscaping.

~~24. Minimum amount of landscaped areas: all development shall comply with article VIII, Landscape Standards.~~
~~25. Maximum floor area ratio: 2:1 FAR.~~
~~26. Maximum building height: 120 feet. Any structure over 60 feet shall require a specific use permit.~~
~~27. Minimum number of paved off-street parking spaces required: See article VI, Parking and Loading.~~
~~28. Maximum number of entrances and/or exits:~~

~~a. Arterial streets: one per each 200 feet of street frontage per site, or as approved by the city council.~~
~~b. Collector streets: one per each 100 feet of street frontage per site, or as approved by the city council.~~
~~c. Local streets: one per each 50 feet of street frontage per site, or as approved by the city council.~~

~~29. Residential adjacency. Lots with nonresidential uses that have a side or rear contiguous or separated only by an alley, or easement or street, from any residential district must be separated from such residential district by a buffer as defined in article VIII [of this Unified Development Code], Landscape Standards, or as approved by the city council.~~
~~30. Building code. The building code may impose more restrictive development standards depending on the size, use and construction of the structures.~~

~~H. Special requirements.~~

~~1. Manufacturing operations and storage. All business and light assembly and manufacturing operations including storage shall be conducted within a completely enclosed building.~~

SUBSECTION 5.02 ~~5.03~~: LIGHT INDUSTRIAL (LI) DISTRICT

A. *Purpose*. The Light Industrial (LI) District is a zoning district intended to create a limited industrial zone that provides for modern types of industrial land uses. With the exception of hazardous materials/manufacturing, this zone allows the same uses as the Heavy Industrial (HI) District. Limitations have been placed on the uses in this district to significantly restrict outside activities and the storage of materials, noise, vibration, smoke, pollution, fire and explosive hazards, glare and any other potentially adverse externalities. The Light Industrial (LI) District is intended for industrial parks and larger, cleaner types of industries. The manufacturing uses should be conducted within a totally enclosed building, and any activities conducted outside should be screened and buffered to ensure no external effects (*e.g. excessive noise or odor*) extend beyond the property lines. The locations for these types of industrial land uses are typically a minimum of two (2) acres and average of five (5) to ten (10) acres. These types of development also incorporate open space and significant amounts of land dedicated to landscaping.

Since this zoning district accommodates limited industrial activities that require substantial screening and buffering requirements, the Light Industrial (LI) District is a suitable zoning designation for high visibility locations (*e.g. IH-30 and SH-276*) or within a reasonable distance of residential areas as long as they are separated by an appropriate amount of open space. Residential uses should be discouraged from locating directly adjacent to or near the Light Industrial (LI) District to protect these types of businesses from excessive complaints about performance standards. Areas should not be zoned to Light Industrial (LI) District unless they are located on or close to an arterial capable of carrying commercial truck traffic. In industrial parks, internal streets should be of a size and strength to accommodate commercial truck traffic. Businesses locating in the Light Industrial (LI) District should work with the City to ensure that water, wastewater, and drainage capacity is adequate before locating on a particular property.

1. The purpose of the Light Industrial district is to create a limited industrial zone that provides for the modern type of industrial uses or industrial park. With the exception of hazardous materials manufacture, this zone allows the same uses as the HI, Heavy Industrial District. Limitations are placed on the uses in this district to significantly restrict the outside activities and storage of materials, noise, vibration, smoke, pollution, fire and explosive hazard, glare and any other potentially adverse influences.
2. This zone is intended for industrial parks and larger, cleaner types of industries. The manufacturing uses should be conducted within a totally enclosed building. Any activities conducted outside should be screened and buffered, and no external effects such as excessive noise or odor should extend beyond the property lines. The sites for such uses are typically a minimum of two acres and average five to ten acres, with a significant amount of land dedicated to landscaping.
3. Because this is a limited industrial zone with substantial screening and buffering requirements, limited industrial uses are suitable for high visibility locations such as along the freeway, or within a reasonable distance of residential areas. Residential uses should be discouraged from locating near the industrial district to protect the industries from residential complaints.
4. Areas should not be zoned to this use unless they are located on or close to arterial capable of carrying commercial and truck traffic. They should be located close to major truck routes. Internal streets in such developments should be sized and strengthened to accommodate truck traffic. Each industry should work with the city to ensure the water pressure and capacity is adequate to provide fire protection for that particular industry before such industry is developed. Industries should also work with the city to ensure that the water, wastewater, and drainage capacity is adequate before the industry is developed.

B. *Permitted Uses*. All land uses permitted within the Light Industrial (LI) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. In general, industrial parks and larger, cleaner types of industrial uses are allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.

C. *Area Requirements*. Development standards. All development within a Light Industrial (LI) District shall conform to Section 4.01, *General Industrial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

1. Minimum site size: 12,500 square feet; adjacent to IH-30: one acre.
2. Minimum site frontage on a public street: 100 feet; adjacent to IH-30: 200 feet.
3. Minimum site depth: 125 feet; adjacent to IH-30: 200 feet.
4. Minimum depth of front yard setback: 25 feet from the future rights-of-way as shown on the adopted thoroughfare plan or as actually exists, whichever is greater.
5. Minimum width of side yard setback:

(Ord. No. 06-14, 4-17-2006)

a. Without fire retardant wall: 15 feet plus one-half of the building height over 36 feet.
b. With fire retardant wall: zero feet plus one-half of the building height over 36 feet.
c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.
d. In no case shall more than a 50 foot setback be required.

6. Minimum depth of rear yard setback:

a. Abutting nonresidentially zoned property, with fire retardant wall and alley separating: zero feet plus one-half the building height over 36 feet.
b. Without fire retardant wall, or alley: ten feet, or as required by building and/or fire codes.
c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.

~~d. In no case shall more than a 50-foot setback be required.~~

~~7. Minimum distance between detached buildings on the same lot or parcel of land:~~

~~a. Without fire retardant wall: 15 feet plus one-half the building height over 36 feet.~~
~~b. With fire retardant wall: zero feet plus one-half the building height over 36 feet.~~
~~c. In no case shall more than a 50-foot setback be required.~~

~~8. Maximum building coverage as a percentage of lot area: 60 percent.~~
~~9. Maximum amount of impervious coverage as a percentage of lot area: 90 to 95 percent. See article VIII.5.12, Required Landscaping.~~
~~10. Minimum amount of landscaped areas: all development shall comply with article VIII, Landscape Standards.~~
~~11. Maximum floor area ratio: 2:1 FAR.~~
~~12. Maximum building height: 120 feet. Any structure over 60 feet shall require a specific use permit.~~
~~13. Minimum number of paved off-street parking spaces required: See article VI, Parking and Loading.~~
~~14. Maximum number of entrances and/or exits:~~

~~a. Arterial streets: one per each 200 feet of street frontage per site, or as approved by the city council.~~
~~b. Collector streets: one per each 100 feet of street frontage per site, or as approved by the city council.~~
~~c. Local streets: one per each 50 feet of street frontage per site, or as approved by the city council.~~

~~15. Residential adjacency. Lots with nonresidential uses that have a side or rear contiguous or separated only by an alley, or easement or street, from any residential district must be separated from such residential district by a buffer as defined in article VIII, Landscape Standards, or as approved by the city council.~~
~~16. Building code. The building code may impose more restrictive development standards depending on the size, use and construction of the structures.~~

D. ~~Special requirements.~~ Special District Requirements.

1. *Manufacturing Operations and Storage*. All business and manufacturing operations including storage shall be conducted within a completely enclosed building unless specifically authorized for the use as listed in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

SUBSECTION 5.03 ~~5.04~~: HEAVY INDUSTRIAL (HI) DISTRICT

A. *Purpose*. The City of Rockwall recognizes that some industrial uses cannot be conducted within a totally enclosed building, are not visually attractive, may involve hazardous materials, and could have adverse impacts to adjacent land uses due to noise, odor, pollution, and truck traffic. The Heavy Industrial (HI) District is intended to provide adequate space and site diversification for these types of developments. The development standards in the Heavy Industrial (HI) District are minimal, and allow both large and small industrial uses either on separate small lots or as part of a larger industrial park. Some screening is required, but because of the potential for hazardous or possibly adverse uses, this district should not be located close to residential areas of any type. Areas should not be zoned Heavy Industrial (HI) District unless they are located on or close to an arterial roadway capable of carrying commercial truck traffic. Internal streets in the Heavy Industrial (HI) District should be of a size and strength to accommodate commercial truck traffic. Businesses locating in the Heavy Industrial (HI) District should work with the City to ensure that water, wastewater, and drainage capacity is adequate before locating on a particular property.

1. The City of Rockwall recognizes that some industrial uses including fabrication processes, cannot be conducted within a totally enclosed building, are not visually attractive, may involve hazardous materials, and could have adverse impacts due to noise, odor, pollution and truck traffic. The Heavy Industrial District is intended to provide adequate space and site diversification for such types of developments.
2. The development standards in this district are minimal, and will allow both large and small industrial uses either on separate small lots or as part of a park. Some screening is required, but because of the potential for hazardous or possibly adverse uses, this district should not be located close to residential areas of any type.
3. Areas should not be zoned to this use unless they are located on or close to arterial roadways capable of carrying commercial and truck traffic. They should be located close to major truck routes. Internal streets in such developments should be sized and strengthened to accommodate truck traffic. Each industry should work with the city to ensure the water pressure and capacity is adequate to provide fire protection for that particular industry before such industry is developed.

B. *Permitted Uses*. All land uses permitted within the Heavy Industrial (HI) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. In general, industrial uses which cannot be conducted within an enclosed building, and which may involve hazardous materials, and could have adverse impacts due to noise, odor, pollution and truck traffic, are allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.

C. *Area Requirements*. Development standards. All development within a Heavy Industrial (HI) District shall conform to Section 4.01, *General Industrial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

1. Minimum site size: two acres.
2. Minimum site frontage on a public street: 200 feet.
3. Minimum site depth: 350 feet.
4. Minimum depth of front yard setback: 25 feet plus one-half the building height over 36 feet, but in no case shall more than a 50-foot front yard setback be required.

    a. Adjacent to IH-30: 50 feet from the future width of right-if-way as shown on the adopted thoroughfare plan or as actually exists, whichever is greater.

5. Minimum width of side yard setback:

    (Ord. No. 06-14, 4-17-2006)

    a. Without fire retardant wall: 15 feet plus one-half of the building height over 36 feet.
    b. With fire retardant wall: eight feet plus one-half of the building height over 36 feet.
    c. Abutting residentially zoned property: 50 feet.
    d. In no case shall more than a 50-foot setback be required.

6. Minimum depth of rear yard setback:

    a. Abutting nonresidentially zoned property, with fire retardant wall and alley separating: eight feet plus one-half the building height over 36 feet.
    b. Without fire retardant wall or alley: 20 feet plus one-half the building height over 36 feet.
    c. Abutting residentially zoned property: 50 feet plus one-half the building height over 36 feet.
    d. In no case shall more than a 50-foot setback be required.

~~7. Minimum distance between detached buildings on the same lot or parcel of land:~~

~~a. Without fire retardant wall: 25 feet plus one-half the building height over 36 feet.~~
~~b. With fire retardant wall: 16 feet plus one-half the building height over 36 feet.~~
~~c. In no case shall more than a 50-foot setback be required.~~

~~8. Maximum building coverage as a percentage of lot area: 85 percent.~~
~~9. Maximum amount of impervious coverage as a percentage of lot area: 90 to 95 percent. See article VIII.5.12, Required Landscaping.~~
~~10. Minimum amount of landscaped areas: all development shall comply with article VIII, Landscape Standards.~~
~~11. Required screening: all outside storage shall be screened as herein defined from all public streets and neighboring zoning districts.~~
~~12. Maximum floor area ratio: 4:1 FAR.~~
~~13. Maximum building height: 120 feet. Any structure over 60 feet shall require a specific use permit.~~
~~14. Minimum number of paved off-street parking spaces required: see article VI, Parking and Loading.~~
~~15. Maximum number of entrances and/or exits:~~

~~a. Arterial streets: one per each 200 feet of street frontage per site, or as approved by the city council.~~
~~b. Collector streets: one per each 100 feet of street frontage per site, or as approved by the city council.~~
~~c. Local streets: one per each 50 feet of street frontage per site, or as approved by the city council.~~

~~16. Residential adjacency. Lots with nonresidential uses that have a side or rear contiguous or separated only by an alley, or easement or street, from any residential district must be separated from such residential district by a buffer as defined in article VIII, Landscape Standards, or as approved by the city council.~~
~~17. Building code. The building code may impose more restrictive development standards depending on the size, use and construction of the structures.~~

SECTION 6: OVERLAY DISTRICTS

SUBSECTION 6.01: ~~GENERAL OVERLAY DISTRICT STANDARDS~~ OVERLAY DISTRICTS

~~A. *Applicability*. Overlay districts are applied to land which has a traditional district already applied. It establishes additional uses and standards which may be either more or less restrictive than the underlying zoning district. The overlay district governs in all cases where it sets out a particular use or standard. Otherwise, standards and uses in the underlying district will govern.~~

Overlay districts are applied to land that has a traditional zoning district designation already applied to it. It establishes additional uses and standards, which may be either more or less restrictive than the underlying zoning district. The overlay district governs in all cases where it sets out a particular use or standard that conflicts with other sections of this Unified Development Code (UDC). In cases where the overlay district does not specifically address a standard or requirement, the underlying zoning district will govern.

SUBSECTION 6.02: GENERAL OVERLAY DISTRICT STANDARDS

A. *Applicability*. The *General Overlay District Standards* shall be applied to the following overlay districts:

- ☑ IH-30 Overlay (IH-30 OV) District
- ☑ SH-205 Overlay (SH-205 OV) District
- ☑ Scenic Overlay (SOV) District
- ☑ SH-66 Overlay (SH-66 OV) District
- ☑ SH-205 By-Pass Overlay (SH-205 BY OV) District
- ☑ North SH-205 Overlay (N. SH-205 OV) District
- ☑ East SH-66 Overlay (E. SH-66 OV) District
- ☑ FM-549 Overlay (FM-549 OV) District
- ☑ SH-276 Overlay (SH-276 OV) District

All other overlay district standards are detailed in Sections 6.03 – 6.15.

B. *Special Use Standards.* Development within the Scenic Overlay (SOV) District and the SH-66 Overlay (SH-66 OV) District shall comply with the *Land Use Schedule* contained in Article IV, *Permissible Uses*, of this Unified Development Code (UDC); however, the following land uses may be considered on a case-by-case basis through a Specific Use Permit:

a. Retail Store with Gasoline Sales (*Any Amount of Dispensers or Vehicles*)
b. Car Wash (*Any Type*)
c. Structures Over 36-Feet in Height

C. *Architectural Standards.*

1. *Materials and Masonry Composition*. Each exterior wall of a building's façade shall consist of a minimum of 90% *Primary Materials* and/or a maximum of 10% *Secondary Materials* -- *excluding doors and windows* -- as defined below.

c. *Primary Materials*. *Primary Materials* shall include stone, brick, glass curtain wall, glass block, tile, and custom Concrete Masonry Units (CMU) (*i.e. CMUs that have been sandblasted, burnished or that have a split face -- light weight block or smooth faced CMU shall be prohibited*). Specific requirements for *Primary Materials* are as follows:

1. *Stone.* A minimum of 20% natural or quarried stone is required on all building façades; however, the Planning and Zoning Commission, upon recommendation from the Architectural Review Board (ARB), may grant the use of a high quality manufactured or cultured stone in lieu of natural or quarried stone if it is determined that the application of the manufactured or cultured stone will be complimentary and integral to the design of the building. In making this determination, both the Architectural Review Board (ARB) and the Planning and Zoning Commission should consider the shape, texture, size, quality and warranty of the product being proposed.
2. *Cementaceous Materials.* The use of cementaceous materials (*e.g. stucco, cementaceous lap siding, or similar materials approved by the Director of Planning or his/her designee*) shall be limited to 50% of the building's exterior façade; however, stucco shall not be used within the first four (4) feet from grade on a building's façade.
3. *Accent Brick and Stone*. Each building shall incorporate accent brick or stone, or brick and stone patterns and materials that create contrast through color, shape, size, and/or texture to the planes of primary brick or stone materials in an elevation.

d. *Secondary Materials*. *Secondary Materials* are any material that is not deemed to be a *Primary Material* as defined above. This includes materials like aluminum composite materials, metal panels, acrylic products (*i.e. EIFS products*) cast stone, cultured stone or other materials identified by the Director of Planning and Zoning or his/her designee.

DRAFT ORDINANCE 2018

2. *Roof Design Standards*. All structures that have a building footprint of less than 6,000 SF shall be constructed with a pitched roof. Those structures having a footprint 6,000 SF or greater shall have the option of being constructed with either a pitched, parapet, or mansard roof system as long as the roof system is enclosed on all sides. Standing seam metal roofs shall be constructed of a factory-treated, non-metallic, matte finish to avoid glare. Metal roofs with lapped seam construction, bituminous built-up roofs, and/or flat membrane-type roofs that are visible from adjacent public right-of-way shall be prohibited.

3. *Mechanical Equipment Screening*. All buildings shall be designed so that no HVAC, satellite dishes, appurtenances and/or any other mechanical equipment visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.

    a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances shall be accomplished by either the construction of [*1*] a roof system described in the *Roof Design Standards* above, or [*2*] an architectural feature that is integral to the building's design and ensures that such rooftop mechanical equipment is not visible from any direction. Fencing or the enclosing of individual mechanical units shall not be permitted.

    b. All rooftop mechanical equipment or architectural features shall be shown on the required building elevations and submitted along with the site plan for review by City Staff, the Architectural Review Board (ARB), and the Planning and Zoning Commission.

4. *Required Architectural Elements.* All buildings that are less than 50,000 SF shall be designed to incorporate a minimum of four (4) architectural elements, buildings over 50,000 SF shall include a minimum of six (6) architectural elements, and buildings over 100,000 SF shall include a minimum of seven (7) architectural elements. The accepted architectural elements for all buildings are as follows:

    - ☑ Canopies, Awnings, or Porticos
    - ☑ Recesses/Projections
    - ☑ Arcades
    - ☑ Peaked Roof Forms
    - ☑ Arches
    - ☑ Outdoor Patios
    - ☑ Display Windows
    - ☑ Architectural Details (*e.g. Tile Work and Moldings*) Integrated into the Building's Facade
    - ☑ Articulated Ground Floor Levels or Bases
    - ☑ Articulated Cornice Line
    - ☑ Integrated Planters or Wing Walls that Incorporate Landscape and Sitting Areas
    - ☑ Offsets, Reveals or Projecting Rib Expressing Architectural or Structural Bays
    - ☑ Varied Roof Heights

    NOTE: Other architectural features maybe approved by the Director of Planning and Zoning or his/her designee.

5. *Four (4) Sided Architecture*. All buildings shall be architecturally finished on all four (4) sides utilizing the same materials, detailing, articulation and features. In addition, a minimum of one (1) row of trees (*i.e. four [4] or more accent or canopy trees*) shall be planted along perimeter of the subject property to the rear of the building.

6. *Windows.* The color of all windows shall be reviewed by the Architectural Review Board (ARB), and shall have a maximum visible exterior reflectivity of 20%.

7. *Office Parks, Shopping Centers and Mixed Use Centers.* All buildings within a common retail, commercial or office development shall incorporate complementary architectural styles, materials, and colors. Staff may require a conceptual façade plan and/or sample boards for these types of developments to ensure consistency and compatibility for all buildings within a proposed development. Conceptual façade plans will be used only to ensure compliance to the minimum standards.

8. *Corporate Identity.* A company's building corporate identity that conflicts with the *General Overlay District Standards* shall be reviewed case-by-case basis as a variance in accordance with the requirements of Section 6.16, *Variances to the General Overlay District Standards*.

D. *Site Design Guidelines and Standards.*

1. *Building Setbacks*. The building setbacks adjacent to the *Primary Roadway* (*i.e. IH-30, SH-205, FM-740, SH-66, FM-549, John King Boulevard and SH-276*) shall be as follows:

(1) Scenic Overlay (SOV) District: 15-feet
(2) SH-66 Overlay (SH-66 OV) District: 15-feet
(3) IH-30 Overlay (IH-30 OV) District: 25-feet
(4) SH-205 Overlay (SH-205 OV) District: 25-feet
(5) North SH-205 Overlay (N. SH-205 OV) District: 25-feet
(6) SH-205 By-Pass Overlay (SH-205 BY OV) District:

- ☑ Residential Land Uses: *See Section 6.3.5, SH-205 By-Pass Overlay (SH-205 BY OV) District*
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

(7) East SH-66 Overlay (E. SH-66 OV) District:

- ☑ Residential Land Uses: 25-feet
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

(8) FM-549 Overlay (FM-549 OV) District:

- ☑ Residential Land Uses: 25-feet
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

(9) SH-276 Overlay (SH-276 OV) District:

- ☑ Residential Land Uses: 25-feet
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

All other building setback regulations shall be the same as set forth in the underlying zoning district.

2. *Parking Restrictions*. No more than one (1) full row of parking (*i.e. two rows of parking with a drive aisle*) shall be allowed between the primary building façade and the right-of-way of the *Primary Roadway* (*i.e. IH-30, SH-205, FM-740, SH-66, FM-549, John King Boulevard and SH-276*).

3. *Access/Ingress/Egress*. In an effort to minimize potential vehicular and pedestrian conflicts, special attention must be given to the location of median breaks along major thoroughfares, the number and location of driveways providing ingress/egress, the design of driveways providing ingress/egress in relation to the parking areas and sight/visibility distances. Taking this into consideration it is important to review all site plans for the following guidelines:

   (a) Driveways should be spaced a minimum of 100-feet from the intersection of any major thoroughfare.
   (b) The ingress/egress driveways shall have a minimum radius of 30-feet;
   (c) Driveways should maintain an appropriate visibility triangle at ingress/egress driveways.
   (d) Main entrances should generally be located at median breaks that provide left turn access into the site.
   (e) Main entrances should connect to a *straightaway* aisle that does not dead end or require an immediate turn to approach the main building.
   (f) Aisles intersecting with entrance drives should be spaced at a minimum of 20-feet from the property line to provide for smooth turning movements.

4. *Cross Access*. *Cross Access Easements* may be required by the Planning and Zoning Commission at the time of site plan approval to ensure access to future median breaks and to reduce the number of curb cuts needed along roadways.

5. *Shared Parking.* In all office parks, shopping centers and mixed use centers cross access and shared parking agreements may be required by the City Council along with final plat approval.

6. *Loading and Service Areas*. All loading and service areas shall be located on the rear and side of buildings where possible. In the event that a loading or service area faces towards the *Primary Roadway* (*i.e. IH-30, SH-205, FM-740, SH-66, FM-549, John King Boulevard and SH-276*), additional screening of the loading and service area may be required by the Architectural Review Board (ARB) and Planning and Zoning Commission. A minimum of a ten (10) foot masonry screening wall shall be required to screen the view of loading docks and loading spaces intended for tractor/semi-trailer delivery from any public right-of-way. This ten (10) foot masonry screening wall must screen the entire loading dock or loading space. Screening materials shall utilize similar masonry materials as the front façade of the primary building. The accommodation of adequate access for service delivery trucks shall be evaluated to determine the extent of screening required.

7. *Trash/Recycling Receptacles and Dumpster Enclosures*. Trash/Recycling Enclosures shall be four (4) sided. These receptacles shall be screened by a minimum eight (8) foot, solid masonry dumpster enclosure that utilizes the same masonry materials as the primary building and incorporates an opaque, self-latching gate. These enclosures shall be located to the side or rear of the primary building, and shall not front on to a public right-of-way. Every effort shall be made to reduce the visibility of these structures utilizing landscaping and/or the building.

8. *Play Structures*. Play structures shall not be placed between the primary building façade and a public right-of-way.

9. *Plan Review*. In addition to the other processes and factors established by this Unified Development Code (UDC), all concept plans, development plans and site plans for property situated within an established overlay district shall be reviewed for the following:

   a. The conformance of the proposed site plan to the site design guidelines and standards.
   b. The conformance of the proposed landscape plan to the intent of the landscaping and screening requirements.
   c. The conformance of the building elevations to the intent of the architectural standards.
   d. The provision of sufficient cross access and circulation on the site plan.
   e. The provision of sufficient visibility triangles to avoid congestion at ingress/egress driveways.

E. *Landscape Standards*.

1. *Landscape Buffers*. The minimum landscape buffer adjacent to *Primary Roadways* (*i.e. IH-30, SH-205, FM-740, SH-66, FM-549, John King Boulevard and SH-276*) [*outside of and beyond any required right-of-way dedication*] shall be as follows:

   (1) Scenic Overlay (SOV) District: 20-feet
   (2) SH-66 Overlay (SH-66 OV) District: 20-feet
   (3) IH-30 Overlay (IH-30 OV) District: 20-feet
   (4) SH-205 Overlay (SH-205 OV) District: 20-feet
   (5) North SH-205 Overlay (N. SH-205 OV) District: 20-feet
   (6) SH-205 By-Pass Overlay (SH-205 BY OV) District:

   - ☑ Residential Land Uses: 50-feet
   - ☑ Retail/Commercial Land Uses: 25-feet
   - ☑ Industrial/Office/Technology Land Uses: 50-feet

   (7) East SH-66 Overlay (E. SH-66 OV) District:

   - ☑ Residential Land Uses: 25-feet
   - ☑ Retail/Commercial Land Uses: 15-feet
   - ☑ Industrial/Office/Technology Land Uses: 50-feet

   (8) FM-549 Overlay (FM-549 OV) District:

   - ☑ Residential Land Uses: 25-feet
   - ☑ Retail/Commercial Land Uses: 15-feet
   - ☑ Industrial/Office/Technology Land Uses: 50-feet

   (9) SH-276 Overlay (SH-276 OV) District:

   - ☑ Residential Land Uses: 25-feet
   - ☑ Retail/Commercial Land Uses: 15-feet
   - ☑ Industrial/Office/Technology Land Uses: 50-feet

   All landscape buffers shall incorporate ground cover, a *built-up* berm and/or shrubbery or a combination thereof along the entire length of the frontage. Berms and/or shrubbery shall have a minimum height of 30-inches and a maximum height of 48-inches. In addition, two (2) canopy trees and four (4) accent trees shall be planted per 100-feet of linear frontage along the *Primary Roadway*. In the E. SH-66 Overlay (E SH-66 OV), FM-549 Overlay (FM-549 OV), and SH-205 By-

DRAFT ORD. 19-2018

Pass Overlay (SH-205 BY OV) Districts the required landscape buffer shall incorporate one (1) additional cedar tree per 100-feet of linear of frontage along the *Primary Roadway*.

2. *Plant Material Sizes and Selection*. All canopy trees, accent trees, shrubs and ground cover proposed to be planted in any overlay district shall be in conformance to the tables depicted in Appendix F, *Landscaping Guidelines and Requirements*, of this Unified Development Code (UDC) and shall be subject to the following sizes:

   a. *Canopy Trees* shall be a minimum of four (4) caliper inches at DBH.
   b. *Accent Trees* shall be a minimum of four (4) feet in total height.
   c. *Deciduous Shrubs* shall be a minimum of two (2) gallons in size.
   d. *Evergreen Shrubs* shall be a minimum of two (2) gallons in size.

3. *Erosion Control/Retaining Walls.* Any slope embankments or retaining walls within the public right-of-way or within the required landscape buffer must be terraced every four (4) feet in height (maximum) with a minimum of a two (2) foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material, which matches the masonry materials used on the primary structure. The planting area must incorporate shrubs, ground cover and grasses.

F. *Signs*. All signage requirements and variances to these requirements shall conform to Chapter 32, *Signs*, of the Municipal Code of Ordinances; however, approval of any variance to the sign standards for property situated within an established overlay district shall require approval by the City Council by a supermajority vote (*i.e. a three-fourths vote of those members present*), with a minimum of four (4) votes in the affirmative required for approval.

G. *Lighting Standards.* No light standard, light fixture, light pole, pole base or combination thereof shall exceed 20-feet in total height in any overlay district with the exception of the IH-30 Overlay (IH-30 OV) District, which shall be limited to a maximum height of 30-feet.

H. *Utility Placement.* All overhead utilities within any overlay district shall be placed underground.

I. *Residential Standards*. No screening walls shall be erected adjacent to the *Primary Roadway* (*i.e. IH-30, SH-205, FM-740, SH-66, FM-549, John King Boulevard and SH-276*) in conjunction with any residential development. In addition, *eyebrow drives* with clusters of lots (*i.e. 5 – 12 homes*) shall be utilized along the *Primary Roadway* for residential developments. In lieu of *eyebrow drives,* a 50-foot landscape buffer may be utilized as an alternative. Farm fencing, including wood rail type and metal pipe and cable fencing, is allowed within the 50-foot landscape buffer. For residential developments within the SH-205 By-Pass Overlay (SH-205 BY OV) District, see *Section 6.3.5, SH-205 By-Pass Overlay (SH-205 BY OV) District*.

SUBSECTION 6.03 ~~6.02~~: HISTORIC OVERLAY (HO) DISTRICT

Subsection 6.03, *Historic Overlay (HO) District*, is omitted from this ordinance change, but is retained in its entirety.

SUBSECTION 6.04 ~~6.02-1~~: NORTH GOLIAD CORRIDOR OVERLAY (NGC OV) DISTRICT

Subsection 6.04, *North Goliad Corridor Overlay (NGC OV) District*, is omitted from this ordinance change, but is retained in its entirety.

~~***SUBSECTION 6.03: NEIGHBORHOOD PRESERVATION OVERLAY (NPO) DISTRICT***~~

A. Purpose. Neighborhood preservation districts may be designated in certain established neighborhoods. The purpose of such districts will be to preserve the cultural importance and neighborhood uniqueness in order to promote economic, cultural, educational, and general welfare of the city. It is recognized that within the City of Rockwall numerous areas, neighborhood sites and structures represent the distinguishing characteristics of a period style or method of construction that shaped the identity of generations of citizens, collectively and individually, and produced significant historic, architectural and cultural resources that constitute their heritage, and therefore this overlay district is intended to:

1. Protect, identify, enhance and preserve neighborhoods with historical, architectural, and cultural characteristics and landmarks which represent distinctive cultural, social, economic, political, and architectural history of Rockwall;
2. Foster civic pride in the accomplishments of the past;
3. Protect and enhance Rockwall's attractiveness to visitors and the support and stimulus to the economy thereby provided;
4. Ensure the harmonious, orderly and efficient growth and development of the city;
5. Promote economic prosperity and welfare of the community by encouraging the most appropriate use of such property within the city; and
6. Stabilize and improve values of such properties.

B. Neighborhood preservation officer. The neighborhood preservation officer shall administer this section and advise the board on matters submitted to it.

C. Standards. Standards are established for each Historic District which is created. Please refer to the zoning ordinance establishing the district for detailed standards which must be complied with.

D. Designation of Neighborhood Preservation Overlay Districts.

1. The city council may designate by zoning ordinance, certain areas as neighborhood preservation districts. Such districts shall bear the word "neighborhood" in their zoning designation.
2. The city council may recommend designation of qualified areas within the city after conducting public hearings and determination that neighborhood preservation designation is appropriate. Property owners within a proposed neighborhood district shall be notified prior to the planning and zoning commission and city council hearing to consider such designation. At the public hearing, owners, and interested parties may present testimony or documentary evidence which will become part of a record regarding the neighborhood enhancement, historic, architectural, or cultural importance of the proposed neighborhood preservation district. The record also may contain staff reports, public comments, or other evidence offered outside of the hearing.

Upon recommendation of the neighborhood preservation officer, the proposed neighborhood preservation district shall be submitted to the planning and zoning commission for review and recommendation. The planning and zoning commission shall give notice, conduct a public hearing, and make recommendations to the city council according to the same procedures as specifically provided in other sections of this [Unified Development Code].

If designation consideration has been requested by a citizen, property owner, or other interested party, the neighborhood preservation officer shall make its recommendation, to be forwarded to the planning and zoning commission, within 30 days from the date of submittal of designation request. The planning and zoning commission shall schedule a public hearing to be held within 45 days of receipt of such recommendation from the neighborhood preservation officer and city manager.

~~Upon designation of an area as a neighborhood preservation district by action of the Rockwall city council, the designation should be recorded on the official zoning maps. All zoning maps should indicate the designated districts by an appropriate mark.~~

~~A neighborhood preservation district may be designated if an area meets one or more of the following:~~

~~a. It possesses significance in history, architecture, archeology, and/or culture.~~
~~b. It is associated with events that made a significant contribution to the broad patterns of local, regional, state and/or national history.~~
~~c. It is associated with the lives of persons significant in the city's past.~~
~~d. It embodies the distinctive characteristics of a type, period, and/or method of construction.~~
~~e. It represents the work of a master designer, builder, and/or craftsman.~~
~~f. It represents an established and familiar visual feature of the city.~~
~~g. It constitutes a district section of the city.~~
~~h. A specific enhancement effort is underway for the neighborhood.~~

~~The boundaries of each designated neighborhood preservation district henceforth shall be specified in detail and shall be filed, in writing, in the city secretary's office for public inspection.~~

~~E. Additional standards. The city council may consider special requests in furtherance of neighborhood preservation and enhancement within an established neighborhood preservation overlay district. Such requests may include, but not necessarily be limited to, neighborhood signage plans, use of building materials not otherwise allowed, authorization of specific land uses not otherwise allowed, or other requests submitted for consideration.~~

~~Upon receipt of such special requests, the city council shall review same and forward its recommendation to the planning and zoning commission for consideration. Upon recommendations from the planning and zoning commission, the city council may approve said requests by amendment of the ordinance designating such neighborhood district. Any such amendment shall preempt any other underlying zoning restrictions in this Unified Development Code. Such special requests may be denied by the city council by passage of a motion to deny.~~

~~*(Ord. No. 10-14, § 35, 7-6-2010)*~~

SUBSECTION 6.05 ~~6.04~~: SOUTHSIDE RESIDENTIAL NEIGHBORHOOD OVERLAY (SRO) DISTRICT

Subsection 6.05, *Southside Residential Neighborhood Overlay (SRO) District*, is omitted from this ordinance change, but is retained in its entirety.

~~*SUBSECTION 6.05: MIXED USE OVERLAY (MUO) DISTRICT*~~

~~A. Purpose. The Mixed Use Overlay District applies to those areas specified in the comprehensive plan as "mixed use." These areas may be developed as a pedestrian-oriented district which includes "urban residential" uses. Urban residential uses include residential development which at least partly face streets or public sidewalks, or are located above retail, office or service uses. Ground floor urban residential should have direct access to a sidewalk via a stoop or landing, and a majority of parking should be located in a structure.~~

~~B. Application and boundaries.~~

~~1. It is intended that the Mixed Use Overlay District be applied at the time that development is imminent.~~

2. Mixed use standards will be applied using the planned development (PD) process as specified in the city's Unified Development Code and modified by ordinance.

(Ord. No. 10-14, § 37, 7-6-2010)

3. The zoning application shall include a minimum of ten acres. 4. At the time of PD application, a traffic impact analysis must be submitted to establish impacts on site access points and surrounding roadways and intersections.

C. Permitted uses. Allowed uses may include town homes, urban housing, retail, office, recreation and entertainment. A list of allowed uses, shall be specified in the PD application.

D. District standards.

1. Residential. Residential uses shall be governed by the following standards:

a. They must be integrated with retail and/or office uses in terms of site planning. The separate uses must not be perceived as separate or discrete developments.
b. They may not exceed four square feet of residential use for at least one square foot of nonresidential use (unless approved as part of the PD) for each phase of development.

2. Open space. A minimum of 20 percent of the site shall be devoted to open space. This requirement may be satisfied by either public or by a combination of public and private open space. Open space shall be satisfied with each phase of development, or the developer must execute a reservation of open space in a form that will ensure the city that such open space will be provided.
3. Enhancements. a. Pedestrian areas shall be enhanced with trees, decorative paving and pedestrian-level lighting. b. Public and private open space shall be developed to the extent reflected in the plan.
4. Height. The development should average two to three stories in height, but not exceed three stories unless otherwise approved as part of the PD. If adjacent to single-family zoned areas, this height should taper down to two stories if development is close to the property line.
5. Parking. Parking shall meet the following standards:

a. Parking required for a building shall primarily be located behind the building. On-street parking may be allowed to partially meet the required parking for a building or use.
b. A majority of parking shall be structured or decked to minimize the amount of land given over to parking.
c. Site access and nonresidential use parking shall be shared between nonresidential uses.
d. The minimum amount of required parking may be ten percent below the city's standard requirement for all uses allowed within the PD.
e. The minimum amount of parking may be further reduced where parking is shared by multiple uses and is justified by the applicant.

E. Procedures. There are three types of plans that may be required as part of the development process within a PD district. Each successive plan may modify the previous plan provided that it does not substantially change the general intent of the original PD district. Each successive plan becomes part of this [Unified Development Code] governing the property and replaces the previously approved plan.

1. PD concept plan. The PD concept plan is mandatory and is intended to be used as the first step in the PD development process. It establishes the most general guidelines for the PD district by identifying the land uses and intensities, thoroughfare locations, and open space boundaries (including public trail systems). It may include images of intended style and type of development. The concept plan illustrates the integration of these elements into a master plan for the whole PD

district. The PD concept plan, as incorporated in the PD ordinance, and together with the text of the ordinance, establishes the development standards for the PD district.

2. PD development plan. A PD development plan is optional and is intended to be used where appropriate as the second step of the PD development process. It may be required by the PD ordinance, or it may be submitted voluntarily by the property owner. A PD development plan constitutes an amendment to the approved PD concept plan and PD ordinance and may be used where the developer requests, or the council requires, certain standards for the PD district to be specified after initial establishment of the PD district. A PD development plan includes more detailed information as to the specific land uses and their boundaries. The purposes of a PD development plan are to allow flexibility in the development process by deferring specification of all development standards at the time of PD District creation and to enable developers to satisfy conditions imposed on creation of the district prior to submittal of a PD site plan.
3. PD site plan. A PD site plan is mandatory and is the final step of the PD development process. The purposes of a PD site plan are to ensure that the development of individual building lots, parcels, or tracts within the PD District are consistent with the approved concept plan and development plan, if any, and to ensure that the standards applicable within the PD District are met for each such lot, parcel or tract. A PD site plan shall continue to be valid for a period of three years after it is approved by the commission; however, such period may be extended by the council upon recommendation of the planning commission.

a. The site plan shall be accompanied by building elevations and landscape and master sign plans, which shall be reviewed by the architectural review board for consistency with the overall objectives of the district. The board's recommendation shall be forwarded to the planning and zoning commission for consideration in their recommendation to city council.
b. A PD site plan shall terminate at the end of such three-year period (or extended period if approved by the council) unless, within such period, a preliminary plat has been filed with the city for all of the land covered by the PD site plan. In which case, the site plan will remain valid as long as there is an approved plat for the property. If a PD site plan terminates, development of the land covered by the terminated plan cannot occur until a new PD site plan has been approved for the land as provided by this article.

SUBSECTION 6.06: IH-30 OVERLAY (IH-30 OV) DISTRICT

A. *Purpose.* The intent of the IH-30 Corridor Overlay (IH-30 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and, as well as to those passing through, the City of Rockwall area. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the an architectural review committee Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, residential single-family land uses shall be excluded from these standards except as otherwise stated.

B. *Application and Boundaries.* The IH-30 Corridor Overlay (IH-30 OV) District includes the entirety of all properties which adjoin or are located within 500-feet of the future right-of-way of IH-30. The IH-30 Corridor Overlay (IH-30 OV) District Zone spans east to west along IH-30 from the eastern city limits (approximately 3,600-feet east of FM 549), west to the western city limit on line along Lake Ray Hubbard. The standards and regulations set forth in the IH-30 Corridor Overlay (IH-30 OV) District Zone are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the IH-30 Overlay (IH-30 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

~~C. *Architectural standards.*~~

~~1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.~~

~~a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;~~

~~☑ That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;~~
~~☑ That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;~~
~~☑ That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;~~
~~☑ That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and~~
~~☑ That the manufactured stone product shall have a minimum warranty of 75 years.~~

~~b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.~~

~~2. Roof design standards. Rooftop mechanical equipment and other appurtenances must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory-treated, non-metallic, matte finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.~~

~~3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.~~

~~a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances shall be accomplished by either the construction of: (a) the construction of the roof systems described in~~

subsection C.2 above; or (b) an architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.

b. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.

4. All buildings shall be designed to incorporate no less than four of the architectural elements from the list below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:

1. Canopies, awnings, or porticos;
2. Recesses/projections;
3. Arcades;
4. Peaked roof forms;
5. Arches;
6. Outdoor patios;
7. Display windows;
8. Architectural details (such as tile work and moldings) integrated into the building facade;
9. Articulated ground floor levels or base;
10. Articulated cornice line;
11. Integrated planters or wing walls that incorporate landscape and sitting areas;
12. Offsets, reveals or projecting rib used to express architectural or structural bays;
13. Varied roof heights;
14. Or other architectural features approved by the director of planning or his designee.

5. All retail/commercial buildings shall be architecturally finished on all four sides with same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
6. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of glass shall be reviewed and approved by the director of planning or his designee.
7. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

8. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

D. *Site design standards.*

1. *Building setback.* All lots within the IH-30 Corridor Overlay District shall maintain a minimum building setback of 25 feet from the front property line adjacent to IH-30. All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.
2. *Parking area restrictions.* No more than one full parking bay (two rows of parking with a driving aisle) shall be allowed between the primary building and the IH-30 right-of-way.
3. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances.

a. *Further guidelines.*

DRAFT ORDINANCE 2018

- ☑ Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare;
- ☑ The ingress and egress drives shall have a minimum radius of 30 feet;
- ☑ Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
- ☑ Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
- ☑ Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
- ☑ Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.

b. *Cross access.* Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.

4. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces IH-30, additional screening of the area may be required. A minimum ten-foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semi-trailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.
5. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from IH-30.
6. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.
7. *Plan review.* In addition to other factors set out in this Unified Development Code, concept plans, development plans, and site plans shall be reviewed for:

a. Meeting the intent of the landscape ordinance: article VIII, Landscape Standards, as amended, and the screening provisions therein.
b. Achieving the intent of the architectural standards and site design standards.
c. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

F. *Landscape standards.* All sites shall, as a minimum, meet the following standards and the standards set out in article VIII, Landscape Standards. Where the following standards conflict with the landscape ordinance, these requirements shall prevail:

1. *Buffer strips.* The buffer strip shall be a minimum of 20 feet wide and include a "built-up" berm and/or shrubbery or a combination of both along the entire length of the subject property's frontage along the IH-30 right-of-way. The minimum required height of the aforementioned berm and/or shrubbery or a combination thereof is 30 inches and shall not exceed a maximum height of 48 inches.
2. *Buffer strip plantings.* Two canopy trees, along with four accent trees shall be required per 100 feet of the IH-30 right-of-way as set out below.
3. *Plant material sizes.* The following minimum sizes shall be required:

~~Canopy trees: four-inch caliper.~~
~~Accent trees: four-foot height.~~
~~Shrubs.~~
~~Deciduous: 15 inches; two-gallon minimum.~~
~~Evergreen: 12 inches; two-gallon minimum.~~

~~4. *Plant material selections.* The following materials are recommended for planting in the buffer-strip; however, other materials may be acceptable:~~

~~Canopy trees: Afghan Pine, Bald Cypress, Bur Oak, Cedar Elm, Eastern Red Cedar, Homestead Elm, Lacebark Elm, Little Gem Magnolia, Live Oak, October Glory Maple, Red Oak, Texas Ash, Texas Red Oak.~~
~~Accent trees: Desert Willow, Eastern Redbud, Eves Necklace, Mexican Buckeye, Possumhaw Holly, Shangtung Maple, Yaupon Holly.~~

~~5. *Erosion control/retaining walls.* Any slope embankments or retaining walls within the public right-of-way or within the required buffer-strip must be terraced every four feet in height (maximum) with a minimum of a two-foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry material used on the front facade of the primary building. The planting area must contain plant materials other than grass.~~

~~G. *Signs.* All signage requirements and variances to these requirements shall conform to Chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the IH-30 Overlay (IH-30 OV) District shall require city council approval by a three-quarter majority vote.~~

~~H. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this section would create a hardship. Approval of any variance to any provision of this section shall require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.~~

~~*(Ord. No. 05-49, 9-19-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 10-14, § 38, 7-6-2010; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)*~~

SUBSECTION 6.07: SH-205 OVERLAY (SH-205 OV) DISTRICT

A. *Purpose.* The intent of the SH-205 ~~Corridor~~ Overlay (SH-205 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and~~, as well as to those~~ passing through~~,~~ the City of Rockwall ~~area~~. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the ~~an architectural review committee~~ Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, ~~residential~~ single-family land uses shall be excluded from these standards except as otherwise stated.

B. *Application and Boundaries.* The SH-205 ~~Corridor~~ Overlay (SH-205 OV) District includes the entirety of all properties which adjoin or are located within 200-feet of the future right-of-way of SH-205. The SH-205 ~~Corridor~~ Overlay (SH-205 OV) District ~~Zone~~ spans north to south along SH-205 from the intersection point of SH-205 and FM 740, south to the southern city limits (approximately 2,800-feet south of FM-1139). The standards and regulations set forth in the SH-205 ~~Corridor~~ Overlay (SH-205

OV) District ~~Zone~~ are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the SH-205 Overlay (SH-205 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

~~D. *Architectural standards.*~~

~~1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.~~

~~a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;~~

~~☑ That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;~~
~~☑ That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;~~
~~☑ That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;~~
~~☑ That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and~~
~~☑ That the manufactured stone product shall have a minimum warranty of 75 years.~~

~~b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.~~

~~2. Roof design standards. Rooftop mechanical equipment and other appurtenances must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory-treated, non-metallic, matte finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.~~

~~3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include~~

~~equipment located on the roof, on the ground, or otherwise attached to the building or located on the site:~~

~~a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances screening shall be accomplished by either:~~

~~a) The construction of the roof systems described in subsection C.2 above; or~~
~~b) An architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way.~~

~~b. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.~~
~~c. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.~~

~~4. All buildings shall be designed to incorporate no less than four of the architectural elements listed below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:~~

~~1. Canopies, awnings, or porticos;~~
~~2. Recesses/projections;~~
~~3. Arcades;~~
~~4. Peaked roof forms;~~
~~5. Arches;~~
~~6. Outdoor patios;~~
~~7. Display windows;~~
~~8. Architectural details (such as tile work and moldings) integrated into the building facade;~~
~~9. Articulated ground floor levels or base;~~
~~10. Articulated cornice line;~~
~~11. Integrated planters or wing walls that incorporate landscape and sitting areas;~~
~~12. Offsets, reveals or projecting rib used to express architectural or structural bays;~~
~~13. Varied roof heights; or~~
~~14. Other architectural features approved by the director of planning or his designee.~~

~~5. All retail/commercial buildings shall be architecturally finished on all four sides with the same materials, detailing, and features with one row of trees planted on the perimeter behind the building.~~
~~6. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of the glass shall be reviewed and approved by the director of planning or his designee.~~
~~7. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.~~

~~a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.~~

~~8. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.~~

~~E. *Site design standards.*~~

DRAFT
ORDINANCE
Nov. 2018

4. *Building setback.* All lots within the SH 205 Corridor Overlay District shall maintain a minimum building setback of 25 feet from the front property line adjacent to SH 205. All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.
5. *Parking area restrictions.* No more than two rows of parking shall be allowed between the primary building and the SH 205 right-of-way.
6. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances.

   Further guidelines:

   a. Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare or as per the Texas Department of Transportation on state maintained roads;
   b. The ingress and egress drives shall have a minimum radius of 30 feet;
   c. Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
   d. Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
   e. Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
   d. Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.
   e. Cross access. Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.

7. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces SH 205, additional screening of the area may be required. A minimum ten-foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semitrailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.
8. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer-strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from SH 205.
9. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.
10. *Plan review.* In addition to other factors set out in this Unified Development Code, concept plans, development plans, and site plans shall be reviewed for:

    a. Meeting the intent of article VIII, Landscape Standards, and the screening provisions below.
    b. Achieving the intent of the architectural and site design standards.
    c. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

F. *Landscape standards.* All sites shall, as a minimum, meet the following standards and the requirements of article VIII, Landscape Standards. Where the following standards conflict with the article VIII, these requirements shall prevail:

DRAFT 08.06.2018

11. *[Required width and height.]* The buffer-strip shall be a minimum of 20 feet wide and include a "built-up" berm and/or shrubbery or a combination of both along the entire length of the subject property's frontage along the SH 205 right-of-way. The minimum required height of the aforementioned berm and/or shrubbery or a combination thereof is 30 inches and shall not exceed a maximum height of 48 inches.
12. *Buffer-strip plantings*. Two canopy trees, along with four accent trees shall be required per 100 feet of the SH 205 right-of-way. Canopy trees, accent trees, and shrubs as defined, along with sizes and types are included in subsections E.3 and E.4.

    Plant material sizes. The following size requirements shall be required:

    Canopy trees: four-inch caliper.
    Accent trees: four-foot height.
    Shrubs.

    Deciduous: 15 inches; two-gallon minimum.
    Evergreen: 12 inches; two-gallon minimum.

13. *Plant material selections.* The following materials are recommended for planting in the buffer-strip; however, other materials may be acceptable:

    Canopy trees: Afghan Pine, Bur Oak, Caddo Maple, Cedar Elm, Lacebark Elm, Leyland Cypress, Little Gem Magnolia, Live Oak, October Glory Maple.
    Accent trees: Desert Willow, Eastern Redbud, Eves Necklace, Mexican Buckeye, Possumhaw Holly, Shangtung Maple, Yaupon Holly.

G. *Erosion control/retaining walls.* Any slope embankments or retaining walls within the public right-of-way or within the required buffer-strip must be terraced every four feet in height (maximum) with a minimum of a two-foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry material used on the front facade of the primary building. The planting area must contain plant materials other than grass.
H. *Signs.* All signage requirements and variances to these requirements shall conform to chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the SH-205 Overlay (SH-205 OV) District shall require city council approval by a three-quarter majority vote.
I. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this section would create a hardship. Approval of any variance to any provision of this section shall require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.

(Ord. No. 05-40, 8-15-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 10-14, § 39, 7-6-2010; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)

SUBSECTION 6.08: SCENIC OVERLAY (SRO) DISTRICT

A. *Purpose.* The Scenic Overlay (SOV) District is a specialized overlay district along FM-740 which has been identified in the Comprehensive Plan as a scenic thoroughfare. The identified scenic aspects of FM-740 include views of the lake, existing natural topography, and existing natural landscaping. The district has been established to protect scenic or historic qualities through the use of additional development criteria and by requiring uses compatible with both existing uses and with the visual environment. The development requirements for non-residential uses are more restrictive than in other

DRAFT ORDINANCE 5-7-2018

commercial classifications in order to encourage development that will protect and enhance the existing views, topography, landscape and quality of development. This district is designed to be primarily an office and retail/commercial shopping district with an intensity of uses normally found along major thoroughfares; however, these uses may be located close to residential areas. The type of allowed uses and the more restrictive development requirements provide protection for residential areas. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the Architectural Review Board (ARB).

~~1. The Scenic Overlay District is a specialized zoning district overlay along FM-740 which has been identified in the comprehensive land use plan as a scenic thoroughfare. The identified scenic aspects of FM-740 include views of the lake, existing natural topography, and existing natural landscaping. The district has been established to protect scenic or historic qualities through the use of additional development criteria and by requiring uses compatible with both existing uses and with the visual environment. The development requirements for nonresidential uses are more restrictive than in other commercial classifications in order to encourage development that will protect and enhance the existing views, topography, landscape and quality of development.~~
~~2. This district is designed to be primarily an office and retail/commercial shopping district with an intensity of uses normally found along a major thoroughfare. These uses may, however, be located close to residential areas. The type of allowed uses and the more restrictive development requirements provide protection for residential areas.~~
~~3. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through an architectural review committee.~~

B. *Application and Boundaries.* ~~This~~ The Scenic Overlay (SOV) District shall apply to all property located within the established boundary along FM-740 (*as set forth in Ordinance No. ~~on Exhibit A of Ord. No.~~ 87-64*). Property that has been zoned, platted and site planned at the time of adoption of the ordinance, from which this section is derived, shall be exempted from the provisions of this section unless and until an application for zoning, platting, or site planning is re-submitted on the property. All property developed within the Scenic Overlay (SOV) District must meet both the terms and requirements of the underlying zoning classification applicable to the property and the provisions set forth in the Scenic Overlay (SOV) District. The most restrictive requirement applicable to the property shall apply.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the Scenic Overlay (SOV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

~~C. *Special use standards.* All development within the Scenic Overlay District shall comply with the land use tables in article IV, Permissible Uses, as amended; however, the following uses may be considered on a case-by-case basis only and shall require a specific use permit.~~

~~1. Gasoline service stations, and retail outlets where gasoline products are sold as an accessory to a retail use, subject to the conditions established in article IV, Permissible Uses.~~
~~2. Car wash (all types), subject to the conditions of article IV, Permissible Uses.~~
~~3. Any structure over 36 feet in height.~~

~~D. *Architectural standards.*~~

~~1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XII, Definitions, excluding cast stone and cultured stone,~~

on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.

a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;

- ☑ That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;
- ☑ That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;
- ☑ That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;
- ☑ That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and
- ☑ That the manufactured stone product shall have a minimum warranty of 75 years.

b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.

2. Roof design standards. Rooftop mechanical equipment and other appurtenances must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory-treated, non-metallic, matte finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.
3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.

a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances screening shall be accomplished by either:

a) The construction of the roof systems described in subsection D.2 above; or
b) An architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way.

b. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.

c. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.

4. All buildings shall be designed to incorporate no less than four of the architectural elements listed below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:

a) Canopies, awnings, or porticos;
b) Recesses/projections;
c) Arcades;
d) Peaked roof forms;
e) Arches;
f) Outdoor patios;
g) Display windows;
h) Architectural details (such as tile work and moldings) integrated into the building facade;
i) Articulated ground floor levels or base;
j) Articulated cornice line;
k) Integrated planters or wing walls that incorporate landscape and sitting areas;
l) Offsets, reveals or projecting rib used to express architectural or structural bays;
m) Varied roof heights; or
n) Other architectural features approved by the director of planning or his designee.

5. All retail/commercial buildings shall be architecturally finished on all four sides with the same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
6. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of glass shall be reviewed and approved by the director of planning or his designee.
7. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

8. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

E. *Site design standards.*

1. *Building setback.* All lots within the Scenic Overlay District shall maintain a minimum building setback of 15 feet from the front property line adjacent to FM 740. All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.
2. *Parking area restrictions.* No more than two rows of parking shall be allowed between the primary building and the FM 740 right-of-way.
3. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances.

Further guidelines:

a. Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare or as per the Texas Department of Transportation on state maintained roads;
b. The ingress and egress drives shall have a minimum radius of 30 feet;
c. Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
d. Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
e. Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
f. Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.

4. *Cross access.* Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.
5. *Shared parking.* In master planned retail centers, cross access and shared parking agreements are required for final platting.
6. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces FM 740, additional screening of the area may be required. A minimum ten-foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semitrailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.
7. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer-strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from FM 740.
8. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.
9. *Plan review.* In addition to other factors set out in this Unified Development Code, concept plans, development plans, and site plans shall be reviewed for:

a. Meeting the intent of article VIII, Landscape Standards, and the screening provisions below.
b. Achieving the intent of the Architectural and Site Design Standards.
c. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

F. *Landscape standards.* All sites shall, as a minimum, meet the following standards and the requirements of article VIII, Landscape Standards. Where the following standards conflict with the article VIII, these requirements shall prevail:

1. *[Required width and height.]* The buffer-strip shall be a minimum of 20 feet wide and include a "built-up" berm and/or shrubbery or a combination of both along the entire length of the subject property's frontage along the FM 740 right-of-way. The minimum required height of the aforementioned berm and/or shrubbery or a combination thereof is 30 inches and shall not exceed a maximum height of 48 inches.
2. *Buffer-strip plantings.* Two canopy trees, along with four accent trees shall be required per 100 feet of the FM 740 right-of-way. Canopy trees, accent trees, and shrubs as defined, along with sizes and types are included in subsections F.3 and F.4.

~~*Plant material sizes.* The following size requirements shall be required:~~
~~Canopy trees: four-inch caliper.~~
~~Accent trees: four-foot height.~~
~~Shrubs:~~

~~Deciduous: 15 inches; two-gallon minimum.~~
~~Evergreen: 12 inches; two-gallon minimum.~~

~~4. *Plant material selections.* The following materials are recommended for planting in the buffer strip; however, other materials may be acceptable:~~

~~Canopy trees: Afghan Pine, Bur Oak, Caddo Maple, Cedar Elm, Lacebark Elm, Leyland Cypress, Little Gem Magnolia, Live Oak, October Glory Maple.~~

~~Accent trees: Desert Willow, Eastern Redbud, Eves Necklace, Mexican Buckeye, Possumhaw Holly, Shangtung Maple, Yaupon Holly.~~

~~5. *Erosion control/retaining walls.* Any slope embankments or retaining walls within the public right-of-way or within the required buffer strip must be terraced every four feet in height (maximum) with a minimum of a two foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry material used on the front facade of the primary building. The planting area must contain plant materials other than grass.~~

~~G. *Signs.* All signage requirements and variances to these requirements shall conform to chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the Scenic Overlay (SOV OV) District shall require city council approval by a three-quarter majority vote.~~
~~H. *Lighting standards.* In addition to the requirements of the outdoor lighting requirements no light pole, pole base or combination thereof shall exceed 20 feet in the Scenic Overlay District. All lighting fixtures shall focus light downward and be contained on the site.~~
~~I. *Utility placement.* All overhead utilities within the Scenic Overlay District shall be placed underground.~~
~~J. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this section would create a hardship. Approval of any variance to any provision of this section shall require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.~~

~~*(Ord. No. 05-49, 9-19-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)*~~

SUBSECTION 6.09: SH-66 OVERLAY (SH-66 OV) DISTRICT

A. *Purpose.* The SH-66 Overlay (SH-66 OV) District is a specialized overlay district along SH-66 and Washington Street between Lake Ray Hubbard and SH-205, which has been identified as one of the important entry points into the City of Rockwall. The identified important scenic aspects of this corridor include views of the lake, existing natural topography, and existing natural landscaping adjacent to residential neighborhoods. The district has been established to protect scenic or historic qualities through the use of additional development criteria, and by requiring uses compatible with both existing uses and with the visual environment. The development requirements for non-residential uses are more restrictive than in other commercial classifications in order to encourage development that will protect and enhance the existing views, topography, landscape and quality of development. This district is

designed to be primarily an office and retail/commercial shopping district with an intensity of uses normally found along major thoroughfares; however, these uses may be located close to residential areas. The type of allowed uses and the more restrictive development requirements provide protection for residential areas. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the Architectural Review Board (ARB).

~~1. The S.H. 66 Overlay District is a specialized zoning district overlay along S.H. 66 and Washington Street between Lake Ray Hubbard and S. H. 205 which has been identified as one of the important entry points into the City of Rockwall. The identified important scenic aspects of this corridor include views of the lake, existing natural topography, and existing natural landscaping and adjacent residential neighborhoods. The district has been established to protect scenic or historic qualities through the use of additional development criteria and by requiring uses compatible with both existing uses and with the visual environment. The development requirements for nonresidential uses are more restrictive than in other commercial classifications in order to encourage development that will protect and enhance the existing views, topography, landscape and quality of development.~~

~~2. This district is designed to be primarily an office and retail/commercial district with an intensity of uses normally found along a major thoroughfare. These uses may, however, be located close to residential areas. The type of allowed uses and the more restrictive development requirements provide protection for residential areas.~~

~~3. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through an architectural review committee.~~

B. *Application and Boundaries.* ~~This~~ The SH-66 Overlay (SH-66 OV) District shall apply to all property located within the established boundary along SH-66 and Washington Street, between Lake Ray Hubbard and SH-205 (*as set forth in Ordinance No. ~~on exhibit A of Ord. No.~~ 01-18*). Property that has been zoned, platted and site planned at the time of adoption of the ordinance, from which this section is derived, shall be exempted from the provisions of this section unless ~~and until~~ an application for zoning, platting, or site planning is resubmitted on the property. All property developed within the SH-66 Overlay (SH-66 OV) District must meet both the terms and requirements of the underlying zoning classification applicable to the property and the provisions set forth in the SH-66 Overlay (SH-66 OV) District. The most restrictive requirement applicable to the property shall apply.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the SH-66 Overlay (SH-66 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

~~C. *Special use standards.* All development within the SH 66 Overlay District shall comply with the land use tables in article IV, Permissible Uses, as amended; however, the following uses may be considered on a case-by-case basis only and shall require a specific use permit.~~

~~1. Gasoline service stations, and retail outlets where gasoline products are sold as an accessory to a retail use, subject to the conditions established in article IV, Permissible Uses.~~

~~2. Car wash (all types), subject to conditions of article IV, Permissible Uses.~~

~~3. Any structure over 36 feet in height.~~

~~D. *Architectural standards.*~~

1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.

   a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;

      ☑ That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;
      ☑ That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;
      ☑ That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;
      ☑ That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and
      ☑ That the manufactured stone product shall have a minimum warranty of 75 years.

   b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.

2. Roof design standards. Rooftop mechanical equipment and other appurtenances must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory-treated, non-metallic, matter finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.
3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.
4. Screening of rooftop mechanical equipment and/or other rooftop appurtenances screening shall be accomplished by either:

   a) The construction of the roof systems described in subsection D.2 above; or
   b) An architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way.

5. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.

6. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.
7. All buildings shall be designed to incorporate no less than four of the architectural elements listed below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:

    ☑ Canopies, awnings, or porticos;
    ☑ Recesses/projections;
    ☑ Arcades;
    ☑ Peaked roof forms;
    ☑ Arches;
    ☑ Outdoor patios;
    ☑ Display windows;
    ☑ Architectural details (such as tile work and moldings) integrated into the building facade;
    ☑ Articulated ground floor levels or base;
    ☑ Articulated cornice line;
    ☑ Integrated planters or wing walls that incorporate landscape and sitting areas;
    ☑ Offsets, reveals or projecting rib used to express architectural or structural bays;
    ☑ Varied roof heights; or
    ☑ Other architectural features approved by the director of planning or his designee.

8. All retail/commercial buildings shall be architecturally finished on all four sides with the same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
9. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of glass shall be reviewed and approved by the director of planning or his designee.
10. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

    a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

11. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

E. *Site design standards.*

1. *Building setback.* All lots within the SH 66 Overlay District shall maintain a minimum building setback of 15 feet from the front property line adjacent to SH 66. All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.
2. *Parking area restrictions.* No more than two rows of parking shall be allowed between the primary building and the SH 66 right-of-way.
3. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances.

    Further guidelines:

a. Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare or as per the Texas Department of Transportation on state maintained roads;
b. The ingress and egress drives shall have a minimum radius of 30 feet;
c. Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
d. Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
e. Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
f. Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.

4. *Cross access.* Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.
5. *Shared parking.* In master planned retail centers, cross access and shared parking agreements are required for final platting.
6. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces SH 66, additional screening of the area may be required. A minimum ten-foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semitrailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.
7. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer-strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from SH 66.
8. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.
9. *Plan review.* In addition to other factors set out in this Unified Development Code, concept plans, development plans, and site plans shall be reviewed for:

a. Meeting the intent of article VIII, Landscape Standards, and the screening provisions below.
b. Achieving the intent of the architectural and site design standards.
c. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

F. *Landscape standards.* All sites shall, as a minimum, meet the following standards and the requirements of article VIII, Landscape Standards. Where the following standards conflict with the article VIII, these requirements shall prevail:

1. *[Required width and height.]* The buffer-strip shall be a minimum of 20 feet wide and include a "built-up" berm and/or shrubbery or a combination of both along the entire length of the subject property's frontage along the SH 66 right-of-way. The minimum required height of the aforementioned berm and/or shrubbery or a combination thereof is 30 inches and shall not exceed a maximum height of 48 inches.
2. *Buffer-strip plantings.* Two canopy trees, along with four accent trees shall be required per 100 feet of the SH 66 right-of-way. Canopy trees, accent trees, and shrubs as defined, along with sizes and types are included in subsections F.3 and F.4.

3. *Plant material sizes.* The following size requirements shall be required:

Canopy trees: four-inch caliper.
Accent trees: four-foot height.
Shrubs:

Deciduous: 15 inches; two-gallon minimum.
Evergreen: 12 inches; two-gallon minimum.

4. *Plant material selections.* The following materials are recommended for planting in the buffer strip; however, other materials may be acceptable:

Canopy trees: Afghan Pine, Bur Oak, Cedar Elm, Lacebark Elm, Little Gem Magnolia, Live Oak, October Glory Maple, Red Oak, Texas Ash, Texas Red Oak.

Accent trees: Desert Willow, Eastern Redbud, Eves Necklace, Mexican Buckeye, Possumhaw Holly, Shangtung Maple, Yaupon Holly.

5. *Erosion control/retaining walls.* Any slope embankments or retaining walls within the public right-of-way or within the required buffer strip must be terraced every four feet in height (maximum) with a minimum of a two-foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry material used on the front facade of the primary building. The planting area must contain plant materials other than grass.

G. *Signs.* All signage requirements and variances to these requirements shall conform to chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the SH-66 Overlay (SH-66 OV) District shall require city council approval by a three-quarter majority vote.

H. *Lighting standards.* In addition to the requirements of the outdoor lighting requirements no light pole, pole base or combination thereof shall exceed 20 feet in the SH 66 Overlay District. All lighting fixtures shall focus light downward and be contained on the site.

I. *Utility placement.* All overhead utilities within the SH 66 Overlay District shall be placed underground.

J. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this section would create a hardship. Approval of any variance to any provision of this section shall require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.

(Ord. No. 05-49, 9-19-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)

SUBSECTION 6.10: SH-205 BY-PASS OVERLAY (SH-205 BY OV) DISTRICT

A. *Purpose*. The intent of the SH-205 By-Pass Bypass Corridor Overlay (SH-205 BY OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting, as well as to those and passing through, the City of Rockwall area. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility and plan review shall be conducted through the Architectural Review Board (ARB)an architectural review committee. These development requirements shall apply to non-residential and multi-family uses only. All other residential uses shall be excluded from these standards except has otherwise stated.

B. *Application and Boundaries.* The SH-205 By-Pass ~~Bypass Corridor~~ Overlay (SH-205 BY OV) District includes the entirety of all properties which adjoin or are located within 500 feet of the current and future right-of-way of John King Boulevard ~~Blvd~~. The SH-205 By-Pass ~~Bypass Corridor~~ Overlay (SH-205 BY OV) District ~~Zone~~ extends along the current and future right-of-way of John King Boulevard ~~Blvd~~. to the existing city limits. The standards and regulations set forth in the SH-205 By-Pass ~~Bypass Corridor~~ Overlay (SH-205 BY OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the SH-205 By-Pass Overlay (SH-205 BY OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

D. *Special District Requirements*.

(1) *Residential Frontage Requirements*. To ensure proper separation of residential land uses from John King Boulevard all residential developments that have direct frontage on John King Boulevard shall utilize one (1) or a combination of the following design alternatives along the entire frontage of John King Boulevard:

a. *Increased Landscape Buffer*. A minimum of a 100-foot landscape buffer maybe substituted for the required landscape buffer as depicted in *Design Alternative #1*.

b. *Increased Rear Yard Building Setback*. A minimum of 50-foot rear yard building setback may be incorporated adjacent to the required landscape buffer as depicted in *Design Alternative #2*.

c. *Incorporation of a Slip Street*. A slip street -- *meeting the Engineering Department's requirements for right-of-way design* -- may be incorporated adjacent to and running parallel with the required landscape buffer. Homes are permitted to front or side to the slip street. Examples of this design alternative are depicted in *Design Alternative #3* and *Design Alternative #4*.

d. *Incorporation of an Eyebrow*. An eyebrow street meeting the -- *Engineering Department's requirements for right-of-way design* -- with a minimum cluster of five (5) homes and a maximum cluster of 12 homes can be incorporated with a 30-foot landscape buffer. All homes should front onto the eyebrow street and have a minimum of a 25-foot front yard building setback. An example of this design alternative is depicted *Design Alternative #5*.

(2) *Design Alternatives*.

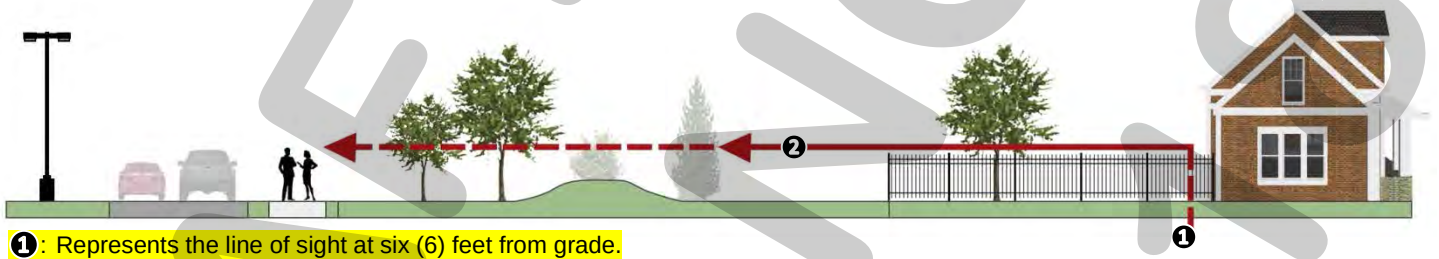
(3) *Line of Sight Requirements*. Homes that back to a required landscape buffer should be built in such a manner where the required berm visually impairs visibility to John King Boulevard. In cases where a berm proves to be ineffective at screening traffic from John King Boulevard (*due to topography, height, etc.*) the developer shall be responsible for incorporating additional landscaping to provide sufficient screening in the required landscape buffer. This will be reviewed by the Planning and Zoning Commission at the time of site plan.



❶: Represents the line of sight at six (6) feet from grade.
❷: The solid red line shows that visibility is impaired from John King Boulevard by [*1*] a row of trees or [*2*] a berm and/or row of shrubbery.

~~C. *Architectural standards.*~~

~~1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XIII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.~~

~~a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;~~

~~That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;~~
~~That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;~~
~~That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;~~
~~That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and~~
~~That the manufactured stone product shall have a minimum warranty of 75 years.~~

~~b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.~~

2. Roof design standards. Rooftop mechanical equipment and other appurtenances must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory-finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.
3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.

    a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances screening shall be accomplished by either:

        a) The construction of the roof systems described in subsection C.2 above; or
        b) An architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way.

    b. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.
    c. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.

4. All buildings shall be designed to incorporate no less than four of the architectural elements listed below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:
        a) Canopies, awnings, or porticos;
        b) Recesses/projections;
        c) Arcades;
        d) Peaked roof forms;
        e) Arches;
        f) Outdoor patios;
        g) Display windows;
        h) Architectural details (such as tile work and moldings) integrated into the building facade;
        i) Articulated ground floor levels or base;
        j) Articulated cornice line;
        k) Integrated planters or wing walls that incorporate landscape and sitting areas;
        l) Offsets, reveals or projecting rib used to express architectural or structural bays;
        m) Varied roof heights; or
        n) Other architectural features approved by the director of planning or his designee.
5. All retail/commercial buildings shall be architecturally finished on all four sides with the same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
6. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of glass shall be reviewed and approved by the director of planning or his designee.
7. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

DRAFT
09.19.2018

a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

8. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

D. *Site design standards.*

1. *Building setback.* All lots within the 205 Bypass Corridor Overlay District shall maintain the following minimum front yard building setbacks:

Retail/Commercial: 15-Feet
Industrial/Office/Technology: 50-Feet

All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.

2. *Parking area restrictions.* No more than two rows of parking, approximately 60 feet in width, shall be allowed between the primary building and the John King Blvd. right-of-way.

3. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances. In addition:

a. Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare or as per the Texas Department of Transportation on state maintained roads;
b. The ingress and egress drives shall have a minimum radius of 30 feet;
c. Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
d. Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
e. Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
f. Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.

4. *Cross access.* Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.

5. *Shared parking.* In master planned retail centers, cross access and shared parking agreements are required for final platting.

6. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces John King Blvd., additional screening of the area may be required. A minimum ten-foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semitrailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.

7. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer-strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize

similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from John King Blvd.

8. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.
9. *Plan review.* In addition to other factors set out in this Unified Development Code, any concept plans, development plans, and site plans shall be reviewed for:
   a. Meeting the intent of the landscape ordinance: article VIII, Landscape Standards, as amended, and the screening provisions herein.
   b. Achieving the intent of the architectural standards and site design standards.
   c. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

E. *Landscape standards.* All sites shall, as a minimum, meet the following standards and the standards set out in the landscape ordinance: article VIII, Landscape Standards. Where the following standards conflict with the landscape ordinance, these requirements shall prevail:

1. Landscape Buffer. The buffer-strip shall be a minimum of 25-feet wide for retail/commercial use; 50-feet wide for residential use; and 50 feet wide for office, research-technology and industrial use, and include a "built-up" berm and shrubbery along the entire length of the subject property's frontage along the John King Blvd. right-of-way. The minimum required height of the aforementioned berm and is 48-inches..

2. Buffer-strip plantings. Two (2) canopy trees, along with four (4) accent trees shall be required per 100-feet of the John King Blvd. right-of-way. Canopy tree, accent tree, and shrub sizes and types are included in Subsection F.3, District Landscaping Requirements, of Appendix F, Landscaping Guidelines and Requirements, of the Unified Development Code. In addition, all shrubs shall be a minimum of two (2) gallons in size and 15-inches in height (i.e. deciduous or evergreen).
3. Erosion control/retaining walls. Any slope embankments or retaining walls within the public right-of-way or within the required buffer-strip must be terraced every four feet in height (maximum) with a minimum of a two-foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry material used on the front facade of the primary building. The planting area must contain plant materials other than grass.

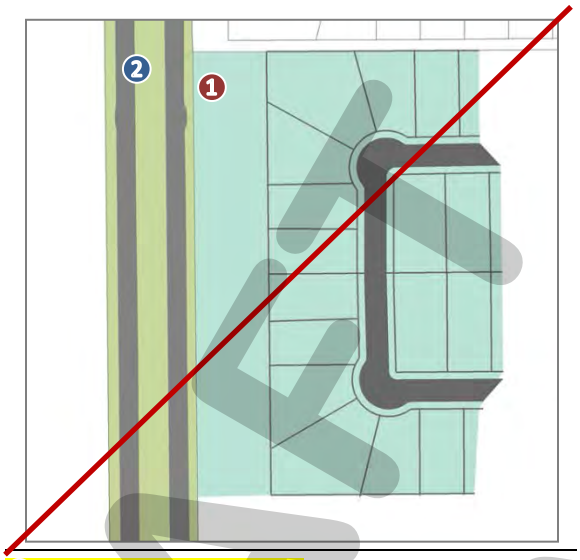
F. *Signs.* All signage requirements and variances to these requirements shall conform to chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the 205 By-Pass Overlay (205 BY-OV) District shall require city council approval by a three-quarter majority vote.

G. *Lighting standards.* In addition to the requirements of the outdoor lighting requirements no light pole, pole base or combination thereof shall exceed 20 feet in the 205 Bypass Overlay District. All lighting fixtures shall focus light downward and be contained on the site.

H. *Utility placement.* All overhead utilities within the 205 Bypass Corridor Overlay District shall be placed underground.

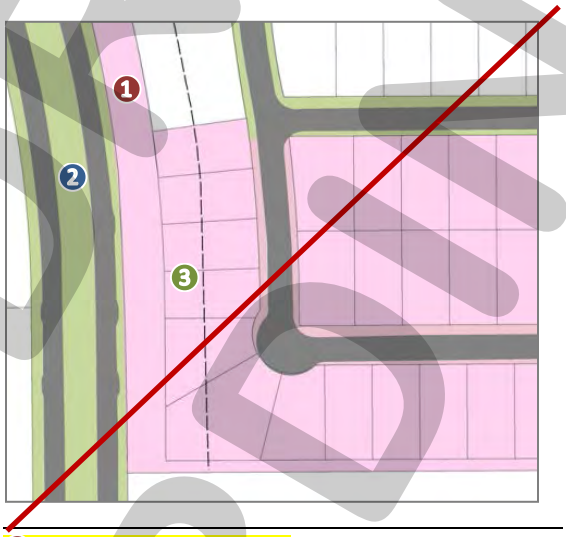
I. Residential Frontage Requirements. To ensure proper separation of residential land uses from John King Boulevard all residential developments that have direct frontage on John King Boulevard shall utilize one (1) or a combination of the following design alternatives along the entire frontage of John King Boulevard:

(1) Increased Landscape Buffer. A minimum of 100-foot landscape buffer maybe substituted for the required landscape buffer.



~~1: 100-Foot Landscape Buffer~~
~~2: John King Boulevard~~

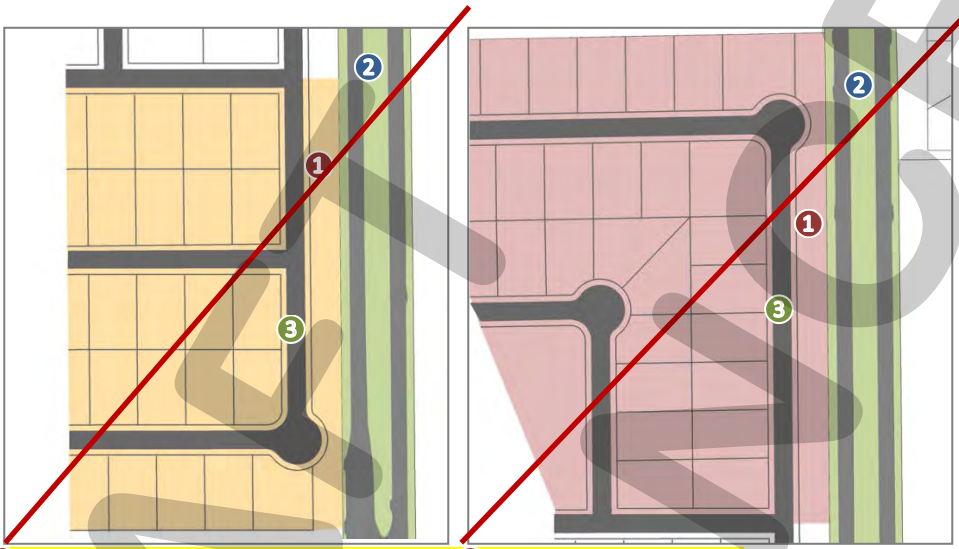
~~(2) Increased Rear Yard Building Setback. A minimum of 50-foot rear yard building setback may be incorporated adjacent to the required landscape buffer.~~



~~1: 50-Foot Landscape Buffer~~
~~2: John King Boulevard~~
~~3: 50-Foot Rear Yard Building Setback~~

~~(3) Incorporation of a Slip Street. A slip street meeting the Engineering Department's requirements for right-of-way and design may be incorporated adjacent to and running parallel with the required landscape buffer. Homes are permitted to front or side to the slip street.~~

DRAFT ORDINANCE 19.2018



1: 50-Foot Landscape Buffer
2: John King Boulevard
3: Slip Street

1: 50-Foot Landscape Buffer
2: John King Boulevard
3: Slip Street

(4) Incorporation of an Eyebrow. An eyebrow street meeting the -- Engineering Department's requirements for right-of-way and design -- with a minimum cluster of five (5) homes and a maximum cluster of 12 homes can be incorporated with a 30-foot landscape buffer. All homes should front onto the eyebrow street and have a minimum of a 25-foot front yard building setback.

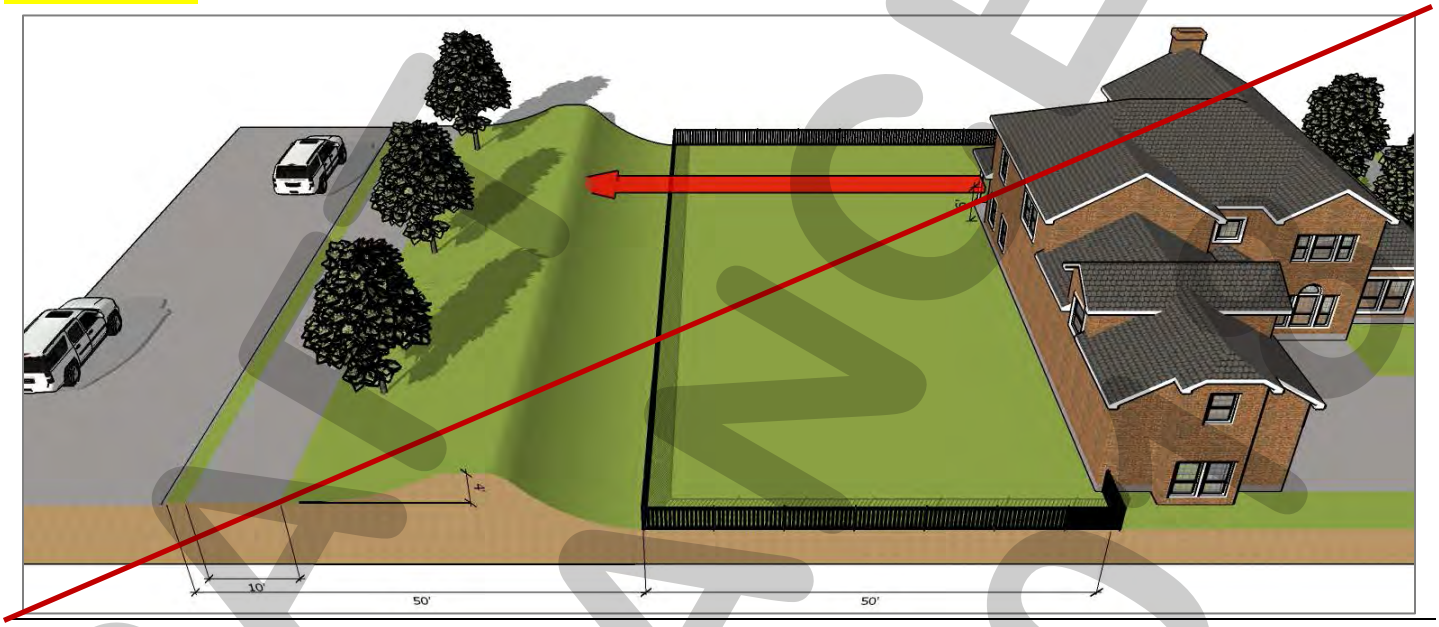
1: 30-Foot Landscape Buffer
2: John King Boulevard
3: Eyebrow Street
4: 25-Foot Front Yard Building Setback

In addition, homes that back to a required landscape buffer should be built in such a manner where the required berm visually impairs visibility to John King Boulevard. In cases where a berm proves to be ineffective at screening traffic from John King Boulevard (due to topography, height, etc.) the developer shall be responsible for incorporating additional landscaping to provide sufficient screening in the required landscape buffer. This will be reviewed by the Planning and Zoning Commission at the time of site plan.

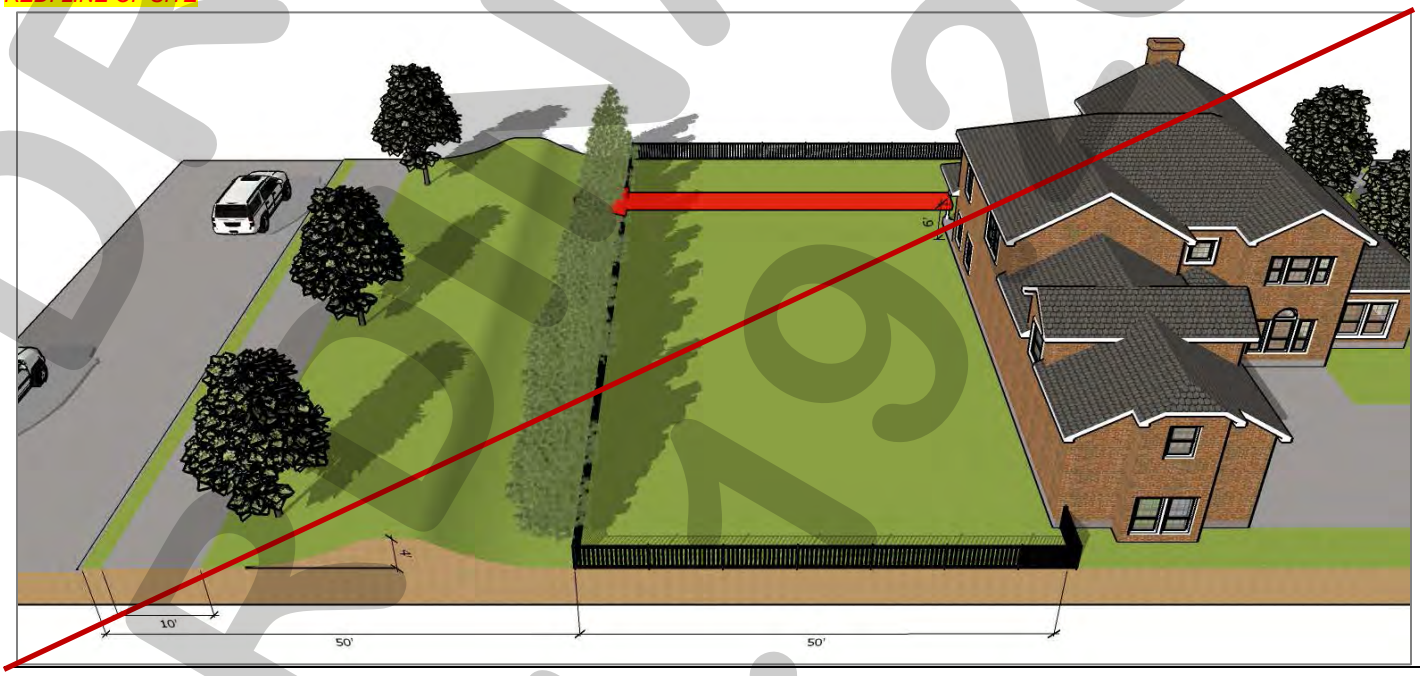
Example 1:

DRAFT 10.19.2018

~~RED: LINE OF SITE~~



~~Example 2: Additional Landscaping Required~~
~~RED: LINE OF SITE~~



~~J. *Residential Subdivision Fence Standards.* No screening walls shall be erected adjacent to the John King Blvd. right-of-way in conjunction with any residential development. Eyebrow drives with clusters of lots (5 – 12 homes) shall be utilized along the John King Blvd. right-of-way for residential development or a 50-foot landscape buffer can be used as an alternative to the eyebrow drive design. Farm fencing, including wood rail type and metal pipe and cable fencing, is allowed within the 50-foot landscape buffer.~~

~~K. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this section would create a hardship. Approval of any variance to any provision of this section shall~~

DRAFT ORDINANCE 2018

~~require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.~~

~~*(Ord. No. 05-49, 9-19-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 10-14, §§ 40—44, 7-6-2010; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)*~~

SUBSECTION 6.11: NORTH SH-205 OVERLAY (N. SH-205 OV) DISTRICT

A. *Purpose.* The intent of the North SH-205 ~~Corridor~~ Overlay (N. SH-205 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and~~, as well as to those~~ passing through~~,~~ the City of Rockwall ~~area~~. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the ~~an architectural review committee~~ Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, ~~residential~~ single-family land uses shall be excluded from these standards except ~~h~~as otherwise stated.

B. *Application and boundaries.* The North SH-205 ~~Corridor~~ Overlay (N. SH-205 OV) District includes the entirety of all properties which adjoin or are located within 500-feet of the current or future right-of-way of N.~~orth~~ SH-205. The North SH-205 ~~Corridor~~ Overlay (N. SH-205 OV) District ~~Zone~~ spans north to south along SH-205 from the northern city limits (approximately 4,200-feet north of FM-552), south to the intersection point of SH-205 and Health Street. The standards and regulations set forth in the North SH-205 ~~Corridor~~ Overlay (N. SH-205 OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the North SH-205 Overlay (N. SH-205 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

~~C. *Architectural standards.*~~

~~1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XIII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.~~

~~a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;~~

~~That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;~~

That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;
That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;
That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and
That the manufactured stone product shall have a minimum warranty of 75 years.

b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.

2. Roof design standards. Rooftop mechanical equipment and other appurtenances, must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory-finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.
3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.

a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances screening shall be accomplished by either:

a) The construction of the roof systems described in subsection C.2 above; or
b) An architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way.

b. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.
c. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.
4. All buildings shall be designed to incorporate no less than four of the architectural elements listed below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:

a. Canopies, awnings, or porticos;
b. Recesses/projections;
c. Arcades;
d. Peaked roof forms;
e. Arches;
f. Outdoor patios;
g. Display windows;
h. Architectural details (such as tile work and moldings) integrated into the building facade;
i. Articulated ground floor levels or base;
j. Articulated cornice line;
k. Integrated planters or wing walls that incorporate landscape and sitting areas;

l. Offsets, reveals or projecting rib used to express architectural or structural bays;
m. Varied roof heights;
n. Or other architectural features approved by the director of planning or his designee.

5. All retail/commercial buildings shall be architecturally finished on all four sides with the same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
6. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of glass shall be reviewed and approved by the director of planning or his designee.
7. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

8. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

D. *Site design standards.*

1. *Building setback.* All lots within the North SH 205 Corridor Overlay District shall maintain a minimum building setback of 25 feet from the front property line adjacent to North SH 205. All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.
2. *Parking area restrictions.* No more than two rows of parking, approximately 60 feet in width, shall be allowed between the primary building and the SH 205 right-of-way.
3. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances. In addition,

a. Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare or as per the Texas Department of Transportation on state maintained roads;
b. The ingress and egress drives shall have a minimum radius of 30 feet;
c. Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
d. Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
e. Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
f. Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.

4. *Cross access.* Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.
5. *Shared parking.* In master planned retail centers, cross access and shared parking agreements are required for final platting.
6. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces SH 205, additional screening of the area may be required. A minimum ten-foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semitrailer delivery from any

public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.

7. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer-strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from SH 205.
8. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.
9. *Plan review.* In addition to other factors set out in this Unified Development Code, any concept plans, development plans, and site plans shall be reviewed for:

    a. Meeting the intent of the landscape ordinance: article VIII, Landscape Standards, as amended, and the screening provisions herein.
    b. Achieving the intent of the architectural standards and site design standards.
    c. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

D. *Landscape standards.* All sites shall, as a minimum, meet the following standards and the standards set out in the landscape ordinance: article VIII, Landscape Standards. Where the following standards conflict with the landscape ordinance, these requirements shall prevail:

1. *[Required width and height.]* The buffer-strip shall be a minimum of 20 feet wide and include a "built-up" berm and/or shrubbery or a combination of both along the entire length of the subject property's frontage along the North SH 205 right-of-way. The minimum required height of the aforementioned berm and/or shrubbery or a combination thereof is 30 inches and shall not exceed a maximum height of 48 inches.
2. *Buffer-strip plantings.* Two canopy trees, along with four accent trees shall be required per 100 feet of the SH 205 right-of-way. Canopy trees, accent trees, and shrubs as defined, along with sizes and types are included in subsections E(3) and (4).
3. *Plant material sizes.* The following size requirements shall be required:

    Canopy trees: four-inch caliper.
    Accent trees: four-foot height.
    Shrubs:

    Deciduous: 15 inches; two-gallon minimum.
    Evergreen: 12 inches; two-gallon minimum.
4. *Plant material selections.* The following materials are recommended for planting in the buffer-strip; however, other materials may be acceptable:

    Canopy trees: Afghan Pine, Bur Oak, Caddo Maple, Cedar Elm, Lacebark Elm, Leyland Cypress, Little Gem Magnolia, Live Oak, October Glory Maple.

    Accent trees: Desert Willow, Eastern Redbud, Eves Necklace, Mexican Buckeye, Possumhaw Holly, Shangtung Maple, Yaupon Holly.
5. *Erosion control/retaining walls.* Any slope embankments or retaining walls within the public right-of-way or within the required buffer-strip must be terraced every four feet in height (maximum) with a minimum of a two-foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry

material used on the front facade of the primary building. The planting area must contain plant materials other than grass.

E. *Signs.* All signage requirements and variances to these requirements shall conform to chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the North SH-205 Overlay (N. SH-205 OV) District shall require city council approval by a three-quarter majority vote.

F. *Lighting standards.* In addition to the requirements of the outdoor lighting requirements no light pole, pole base or combination thereof shall exceed 20 feet in the North SH 205 Overlay District. All lighting fixtures shall focus light downward and be contained on the site.

G. *Utility placement.* All overhead utilities within the North SH 205 Corridor Overlay District shall be placed underground.

H. *Residential standards.* No wall, screening or otherwise, shall be erected adjacent to the North SH 205 right-of-way in conjunction with any residential development. Eyebrow drives with clusters of lots (5—12 homes) shall be utilized along the North SH 205 right-of-way for residential development or a 50-foot landscape buffer can be used as an alternative to the eyebrow drive design. Farm fencing, including wood rail type and metal pipe and cable fencing, is allowed within the 50-foot landscape buffer.

I. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this section would create a hardship. Approval of any variance to any provision of this section shall require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.

(Ord. No. 05-49, 9-19-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 10-14, § 45, 7-6-2010; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)

SUBSECTION 6.12: EAST SH-66 OVERLAY (E. SH-66 OV) DISTRICT

E. *Purpose.* The intent of the East SH-66 Corridor Overlay (E. SH-66 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and, as well as to those passing through, the City of Rockwall area. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the an architectural review committee Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, residential single-family land uses shall be excluded from these standards except has otherwise stated.

A.

B. *Application and boundaries.* The East SH-66 Corridor Overlay (E. SH-66 OV) District includes the entirety of all properties which adjoin or are located within 500-feet of the current or future right-of-way of E.ast SH-66. The East SH-66 Corridor Overlay (E. SH-66 OV) District Zone extends from FM-1141 to the east approximately 2,700-feet, and on property that lies within 500-feet of the south right-of-way line of SH-66 beginning at a point approximately 2,700-feet east of FM-1141 and then continuing east to FM-549. The standards and regulations set forth in the East SH-66 Corridor Overlay (E. SH-66 OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the East SH-66 Overlay (E. SH-66 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

C. *Architectural standards.*

1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XIII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.
   a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;

      ☑ That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;
      ☑ That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;
      ☑ That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;
      ☑ That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and
      ☑ That the manufactured stone product shall have a minimum warranty of 75 years.
   b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.

2. Roof design standards. Rooftop mechanical equipment and other appurtenances, must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.
3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.

   a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances screening shall be accomplished by either:

      a) The construction of the roof systems described in subsection C.2 above; or
      b) An architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way.

   b. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.

c. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.

4. All buildings shall be designed to incorporate no less than four of the architectural elements from the list below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:

a. Canopies, awnings, or porticos;
b. Recesses/projections;
c. Arcades;
d. Peaked roof forms;
e. Arches;
f. Outdoor patios;
g. Display windows;
h. Architectural details (such as tile work and moldings) integrated into the building facade;
i. Articulated ground floor levels or base;
j. Articulated cornice line;
k. Integrated planters or wing walls that incorporate landscape and sitting areas;
l. Offsets, reveals or projecting rib used to express architectural or structural bays;
m. Varied roof heights;
n. Or other architectural features approved by the director of planning or his designee.

5. All retail/commercial buildings shall be architecturally finished on all four sides with the same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
6. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of glass shall be reviewed and approved by the director of planning or his designee.
7. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

8. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

B. *Site design standards.*

1. *Building setback.* All lots within the East SH 66 Corridor Overlay District shall maintain the following minimum front building setbacks:

Residential: 25 feet.
Retail/commercial: 15 feet.
Industrial/office/technology: 50 feet.

All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.

2. *Parking area restrictions.* No more than two rows of parking, approximately 60 feet in width, shall be allowed between the primary building and East SH 66 right-of-way.

3. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances. In addition:

   a. Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare or as per the Texas Department of Transportation on state maintained roads;
   b. The ingress and egress drives shall have a minimum radius of 30 feet;
   c. Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
   d. Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
   e. Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
   f. Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.

4. *Cross access.* Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.
5. *Shared parking.* In master planned retail centers, cross access and shared parking agreements are required for final platting.
6. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces East SH 66, additional screening of the area may be required. A minimum ten foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semi-trailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.
7. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer-strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from East SH 66.
8. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.
9. *Plan review.* In addition to other factors set out in this Unified Development Code, any concept plans, development plans, and site plans shall be reviewed for:

   a. Meeting the intent of the landscape ordinance: article VIII, Landscape Standards, as amended, and the screening provisions herein.
   b. Achieving the intent of the architectural standards and site design standards.
   d. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

F. *Landscape standards.*

1. *[Required width and height.]* The buffer-strip shall be a minimum of 15 feet wide for retail/commercial use; 25 feet wide for residential use; and 50 feet for office, research-technology and industrial use and include a "built-up" berm and/or shrubbery or a combination of both along the entire length of the subject property's frontage along East SH 66. The minimum required height of

the aforementioned berm and/or shrubbery or a combination thereof is 30 inches and shall not exceed a maximum height of 48 inches.

2. *Buffer strip plantings.* Two canopy trees, along with four accent trees shall be required per 100 feet of the East SH 66 right-of-way. Canopy trees, accent trees, and shrubs as defined, along with sizes and types are included in subsections E(3) and (4). The East SH 66 Corridor Overlay shall include an average of one cedar tree for each 100 feet of frontage planted in clusters of three to five trees.
3. *Plant material sizes.* The following size requirements shall be required:

Canopy trees: four-inch caliper.
Accent trees: four-foot height.
Shrubs:

Deciduous: 15 inches; two-gallon minimum.
Evergreen: 12 inches; two-gallon minimum.

4. *Plant material selections.* The following materials are recommended for planting in the buffer strip; however, other materials may be acceptable:

Canopy trees: Afghan Pine, Bur Oak, Caddo Maple, Cedar Elm, Lacebark Elm, Leyland Cypress, Little Gem Magnolia, Live Oak, October Glory Maple.

Accent trees: Desert Willow, Eastern Redbud, Eves Necklace, Mexican Buckeye, Possumhaw Holly, Shangtung Maple, Yaupon Holly.

5. *Erosion control/retaining walls.* Any slope embankments or retaining walls within the public right-of-way or within the required buffer strip must be terraced every four feet in height (maximum) with a minimum of a two-foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry material used on the front facade of the primary building. The planting area must contain plant materials other than grass.

C. *Signs.* All signage requirements and variances to these requirements shall conform to chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the East SH 66 Overlay (E. SH 66 OV) District shall require city council approval by a three-quarter majority vote.

D. *Lighting standards.* In addition to the requirements of the outdoor lighting requirements no light pole, pole base or combination thereof shall exceed 20 feet in the East SH 66 Corridor Overlay District. All lighting fixtures shall focus light downward and be contained on the site.

E. *Utility placement.* All overhead utilities within the East SH 66 Corridor Overlay District shall be placed underground.

F. *Residential standards.* No screening walls shall be erected adjacent to the East SH 66 right-of-way in conjunction with any residential development. Eyebrow drives with clusters of lots (5—12 homes) shall be utilized along the East SH 66 right-of-way for residential development or a 50-foot landscape buffer can be used as an alternative to the eyebrow drive design. Farm fencing, including wood rail type and metal pipe and cable fencing, is allowed within the 50-foot landscape buffer.

G. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this section would create a hardship. Approval of any variance to any provision of this section shall require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.

(Ord. No. 05-49, 9-19-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 10-14, § 46, 7-6-2010; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)

DRAFT 5-7-2018

SUBSECTION 6.13: FM-549 OVERLAY (FM-549 OV) DISTRICT

A. *Purpose.* The intent of the FM-549 ~~Corridor~~ Overlay (FM-549 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and~~, as well as to those~~ passing through~~,~~ the City of Rockwall ~~area~~. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the ~~an architectural review committee~~ Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, ~~residential~~ single-family land uses shall be excluded from these standards except ~~h~~as otherwise stated.

B. *Application and boundaries.* The FM-549 ~~Corridor~~ Overlay (FM-549 OV) District includes the entirety of all properties which adjoin or are located within 500-feet of the current or future right-of-way of FM-549. The FM-549 ~~Corridor~~ Overlay (FM-549 OV) District ~~Zone~~ extends from SH-276 to a point approximately 800-feet north of IH-30 and on property that lies within 500-feet of the west right-of-way line of FM-549 from a point approximately 800-feet north of IH-30 to SH-66. The standards and regulations set forth in the FM-549 ~~Corridor~~ Overlay (FM-549 OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the FM-549 Overlay (FM-549 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

~~C. *Architectural standards.*~~

~~1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XIII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.~~

~~a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;~~

~~That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;~~
~~That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;~~
~~That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;~~

That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and
That the manufactured stone product shall have a minimum warranty of 75 years.

b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.

2. Roof design standards. Rooftop mechanical equipment and other appurtenances must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.

3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.

a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances screening shall be accomplished by either:

a) The construction of the roof systems described in subsection C.2 above; or
b) An architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way.

b. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.
c. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.

4. All buildings shall be designed to incorporate no less than four of the architectural elements listed below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:

a. Canopies, awnings, or porticos;
b. Recesses/projections;
c. Arcades;
d. Peaked roof forms;
e. Arches;
f. Outdoor patios;
g. Display windows;
h. Architectural details (such as tile work and moldings) integrated into the building facade;
i. Articulated ground floor levels or base;
j. Articulated cornice line;
k. Integrated planters or wing walls that incorporate landscape and sitting areas;
l. Offsets, reveals or projecting rib used to express architectural or structural bays;
m. Varied roof heights;
n. Or other architectural features approved by the director of planning or his designee.

5. All retail/commercial buildings shall be architecturally finished on all four sides with the same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
6. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of glass shall be reviewed and approved by the director of planning or his designee.
7. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

    a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

8. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

B. *Site design standards.*

1. *Building setback.* All lots within the FM 549 Corridor Overlay District shall maintain the following minimum front building setbacks:

    Residential: 25 feet.
    Retail/commercial: 15 feet.
    Industrial/office/technology: 50 feet.

    All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.

2. *Parking area restrictions.* No more than two rows of parking, approximately 60 feet in width, shall be allowed between the primary building and FM 549 right-of-way.
3. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances.
4. *Further guidelines.*

    a. Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare or as per the Texas Department of Transportation on state maintained roads;
    b. The ingress and egress drives shall have a minimum radius of 30 feet;
    c. Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
    d. Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
    e. Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
    f. Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.

5. *Cross access.* Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.
6. *Shared parking.* In master planned retail centers, cross access and shared parking agreements are required for final platting.

7. ~~*Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces FM 549, additional screening of the area may be required. A minimum ten-foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semitrailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.~~
8. ~~*Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer-strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from SH 276.~~
9. ~~*Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.~~
10. ~~*Plan review.* In addition to other factors set out in this Unified Development Code, any concept plans, development plans, and site plans shall be reviewed for:~~

    a. ~~Meeting the intent of the landscape ordinance: article VIII, Landscape Standards, as amended, and the screening provisions herein.~~
    b. ~~Achieving the intent of the architectural standards and site design standards.~~
    c. ~~Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.~~

D. ~~*Landscape standards.* All sites shall, as a minimum, meet the following standards and the standards set out in the landscape ordinance: article VIII, Landscape Standards. Where the following standards conflict with the landscape ordinance, these requirements shall prevail:~~

1. ~~*[Required width and height.]* The buffer-strip shall be a minimum of 15 feet wide for retail/commercial use; 25 feet wide for residential use; and 50 feet for office, research-technology and industrial use and include a "built-up" berm and/or shrubbery or a combination of both along the entire length of the subject property's frontage along FM 549. The minimum required height of the aforementioned berm and/or shrubbery or a combination thereof is 30 inches and shall not exceed a maximum height of 48 inches.~~
2. ~~*Buffer strip plantings.* Two canopy trees, along with four accent trees shall be required per 100 feet of the FM 549 right-of-way. Canopy trees, accent trees, and shrubs as defined, along with sizes and types are included in subsections E(3) and (4). The area of the FM 549 Corridor Overlay from Airport Road to SH 66 shall include an average of one cedar tree for each 100 feet of frontage planted in clusters of three to five trees.~~
3. ~~*Plant material sizes.* The following size requirements shall be required:~~

    ~~Canopy Trees: four-inch caliper.~~
    ~~Accent Trees: four-foot height.~~
    ~~Shrubs:~~

    ~~Deciduous: 15 inches; two-gallon minimum.~~
    ~~Evergreen: 12 inches; two-gallon minimum.~~
4. ~~*Plant material selections.* The following materials are recommended for planting in the buffer-strip; however, other materials may be acceptable:~~

    ~~Canopy trees: Afghan Pine, Bald Cypress, Bur Oak, Caddo Maple, Cedar Elm, Lacebark Elm, Leyland Cypress, Little Gem Magnolia, Live Oak, October Glory Maple, Red Oak, Texas Ash, Texas Red Oak.~~

~~Accent trees: Desert Willow, Eastern Redbud, Eves Necklace, Mexican Buckeye, Possumhaw Holly, Shangtung Maple, Yaupon Holly.~~

~~5. *Erosion control/retaining walls.* Any slope embankments or retaining walls within the public right-of-way or within the required buffer strip must be terraced every four feet in height (maximum) with a minimum of a two-foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry material used on the front facade of the primary building. The planting area must contain plant materials other than grass.~~

~~C. *Signs.* All signage requirements and variances to these requirements shall conform to chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the FM-549 Overlay (FM-549 OV) District shall require city council approval by a three-quarter majority vote.~~

~~D. *Lighting standards.* In addition to the requirements of the outdoor lighting requirements no light pole, pole base or combination thereof shall exceed 20 feet in the FM 549 Corridor Overlay District. All lighting fixtures shall focus light downward and be contained on the site.~~

~~E. *Utility placement.* All overhead utilities within the FM 549 Corridor Overlay District shall be placed underground.~~

~~F. *Residential standards.* No wall, screening or otherwise, shall be erected adjacent to the FM 549 right-of-way in conjunction with any residential development. Eyebrow drives with clusters of lots (5—12 homes) shall be utilized along the FM 549 right-of-way for residential development or a 50-foot landscape buffer can be used as an alternative to the eyebrow drive design. Farm fencing, including wood rail type and metal pipe and cable fencing, is allowed within the 50-foot landscape buffer.~~

~~G. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this section would create a hardship. Approval of any variance to any provision of this section shall require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.~~

~~*(Ord. No. 05-49, 9-19-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 10-14, § 47, 7-6-2010; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)*~~

SUBSECTION 6.14: SH-276 OVERLAY (SH-276 OV) DISTRICT

A. *Purpose.* The intent of the SH-276 ~~Corridor~~ Overlay (SH-276 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and~~, as well as to those~~ passing through~~,~~ the City of Rockwall ~~area~~. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the ~~an architectural review committee~~ Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, ~~residential~~ single-family land uses shall be excluded from these standards except ~~h~~as otherwise stated.

B. *Application and boundaries.* The SH-276 ~~Corridor~~ Overlay (SH-276 OV) District includes the entirety of all properties which adjoin or are located within 500-feet of the current or future right-of-way of SH-276. The SH-276 ~~Corridor~~ Overlay (SH-276 OV) District ~~Zone~~ extends from SH-205 east to the eastern city limits ~~line~~, as may be extended with future annexation(s). The standards and regulations set forth in the SH-276 ~~Corridor~~ Overlay (SH-276 OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the SH-276 Overlay (SH-276 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

~~C. *Architectural standards.*~~

~~1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XIII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.~~

~~a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;~~

~~That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;~~

~~That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;~~

~~That highly skilled artisans should be utilized to hand-paint each piece in order to give each stone depth and variation of color;~~

~~That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and~~

~~That the manufactured stone product shall have a minimum warranty of 75 years.~~

~~b. Secondary materials used on the facade of a building are those that comprise less than two percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.~~

~~2. Roof design standards. Rooftop mechanical equipment and other appurtenances must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.~~

~~3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.~~

~~a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances screening shall be accomplished by either:~~

~~a) The construction of the roof systems described in subsection C.2 above; or~~

b) An architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way.

b. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.
c. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.

4. All buildings shall be designed to incorporate no less than four of the architectural elements listed below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:

a. Canopies, awnings, or porticos;
b. Recesses/projections;
c. Arcades;
d. Peaked roof forms;
e. Arches;
f. Outdoor patios;
g. Display windows;
h. Architectural details (such as tile work and moldings) integrated into the building facade;
i. Articulated ground floor levels or base;
j. Articulated cornice line;
k. Integrated planters or wing walls that incorporate landscape and sitting areas;
l. Offsets, reveals or projecting rib used to express architectural or structural bays;
m. Varied roof heights; or
n. Other architectural features approved by the director of planning or his designee.

5. All retail/commercial buildings shall be architecturally finished on all four sides with the same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
6. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of glass shall be reviewed and approved by the director of planning or his designee.
7. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

8. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

B. *Site design standards.*

1. *Building setback.* All lots within the FM-549 Corridor Overlay District shall maintain the following minimum front building setbacks:

Residential: 25 feet.
Retail/commercial: 15 feet.
Industrial/office/technology: 50 feet.
All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.

2. *Parking area restrictions.* No more than two rows of parking, approximately 60 feet in width, shall be allowed between the primary building and SH 276 right-of-way.
3. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances.
4. *Further guidelines.*

    a. Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare or as per the Texas Department of Transportation on state maintained roads;
    b. The ingress and egress drives shall have a minimum radius of 30 feet;
    c. Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
    d. Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
    e. Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
    f. Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.

5. *Cross access.* Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.
6. *Shared parking.* In master planned retail centers, cross access and shared parking agreements are required for final platting.
7. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces SH 276, additional screening of the area may be required. A minimum ten-foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semitrailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.
8. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer-strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from SH 276.
9. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.
10. *Plan review.* In addition to other factors set out in this Unified Development Code, any concept plans, development plans, and site plans shall be reviewed for:

    a. Meeting the intent of the landscape ordinance: article VIII, Landscape Standards, as amended, and the screening provisions herein.
    b. Achieving the intent of the architectural standards and site design standards.
    c. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

E. *Landscape standards.* All sites shall, as a minimum, meet the following standards and the standards set out in the landscape ordinance: article VIII, Landscape Standards. Where the following standards conflict with the landscape ordinance, these requirements shall prevail:

1. *[Required width and height.]* The buffer-strip shall be a minimum of 15 feet wide for retail/commercial use; 25 feet wide for residential use; and 50 feet for office, research-technology

and industrial use and include a "built-up" berm and/or shrubbery or a combination of both along the entire length of the subject property's frontage along SH 276. The minimum required height of the aforementioned berm and/or shrubbery or a combination thereof is 30 inches and shall not exceed a maximum height of 48 inches.

2. *Buffer strip plantings.* Two canopy trees, along with four accent trees shall be required per 100 feet of the SH 276 right-of-way. Canopy trees, accent trees, and shrubs as defined, along with sizes and types are included in subsections E(3) and (4).
3. *Plant material sizes.* The following size requirements shall be required:

Canopy trees: four-inch caliper.
Accent trees: four-foot height.
Shrubs:

Deciduous: 15 inches: two-gallon minimum.
Evergreen: 12 inches: two-gallon minimum.

4. *Plant material selections.* The following materials are recommended for planting in the buffer strip; however, other materials may be acceptable:

Canopy trees: Afghan Pine, Bald Cypress, Bur Oak, Cedar Elm, Eastern Red Cedar, Homestead Elm, Lacebark Elm, Little Gem Magnolia, Live Oak, October Glory Maple, Red Oak.

Accent trees: Desert Willow, Eastern Redbud, Eves Necklace, Mexican Buckeye, Possumhaw Holly, Shangtung Maple, Yaupon Holly.

5. *Erosion control/retaining walls.* Any slope embankments or retaining walls within the public right-of-way or within the required buffer strip must be terraced every four feet in height (maximum) with a minimum of a two-foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry material used on the front facade of the primary building. The planting area must contain plant materials other than grass.

C. *Signs.* All signage requirements and variances to these requirements shall conform to chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the SH-276 Overlay (SH-276 OV) District shall require city council approval by a three-quarter majority vote.

D. *Lighting standards.* In addition to the requirements of the outdoor lighting requirements, no light pole, pole base or combination thereof shall exceed 20 feet in the SH 276 Corridor Overlay District. All lighting fixtures shall focus light downward and be contained on the site.

E. *Utility placement.* All overhead utilities within the SH 276 Corridor Overlay District shall be placed underground.

F. *Residential standards.* For any residential development adjacent to SH 276, a seven-foot wall comprised of masonry and wrought iron style fencing set back at least 25 feet from the right-of-way is required in addition to landscaping of the area. At least ten percent of the wall shall be a wrought iron style. Such walls adjacent to SH 276 shall be off-set by at least eight feet for at least 16 feet for every 100 feet of length.

G. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this ordinance section would create a hardship. Approval of any variance to any provision of this section shall require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.

(Ord. No. 05-49, 9-19-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 10-14, § 48, 7-6-2010; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)

DRAFT NOT FOR SIGNATURE 5.7.2018

SUBSECTION 6.15: LAKE RAY HUBBARD TAKELINE OVERLAY (TL OV) DISTRICT

Subsection 6.15, *Lake Ray Hubbard Takeline Overlay (TL OV) District*, is omitted from this ordinance change, but is retained in its entirety.

SUBSECTION 6.16: VARIANCES TO THE GENERAL OVERLAY DISTRICT STANDARDS

Unless otherwise specified in this section, an applicant may request the Planning and Zoning Commission grant a variance to any provision contained in *Section 6.02, General Overlay District Standards*, where unique or extraordinary conditions exist or where strict adherence to the technical requirements of this section would create an undue hardship. If the Planning and Zoning Commission denies a variance request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the variance or variances being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*). Approval of any variance to the requirements of this section by the Planning and Zoning Commission or City Council shall require a supermajority vote (*i.e. a three-fourths vote of those members present*), with a minimum of four (4) votes in the affirmative required for approval.

SECTION 7: DISTRICT DEVELOPMENT STANDARDS

DRAFT ORDINANCE 1.19.2018

SUBSECTION 7.01: RESIDENTIAL DISTRICT DEVELOPMENT STANDARDS

ADDITIONAL REQUIREMENTS:

[1]: The Single Family 1 (SF-1) District allows for one (1) unit per gross acre.

[2]: Frontage on a Public Street

[3]: The side setback adjacent to a street is treated the same as a front yard building setback.

[4]: Minimum maintenance easement is ten (10) feet. Minimum maintenance easement on the non-zero lot line side, when adjacent to another lot in the same zoning district is five (5) feet (*this easement shall be maintained as an open space except upon a finding by the building official that the proposed improvements do not impede the use of said easement for maintenance of the adjoining structure*).

[5]: Abutting structures separated by fire retardant walls.

[6]: Townhouses separated by firewall meeting the requirements of the building code may build to the property line where such structures abut.

[7]: Minimum length of driveway pavement from public right-of-way for rear and side yard is 20-feet.

[8]: An enclosed garage shall not be considered in meeting the off-street parking requirements. For all other uses see Article VI, *Parking and Loading*.

[9]: A two (2) car garage is required.

[10]: Two (2) off-street parking spaces plus one (1) garage parking space for each dwelling unit is required.

DRAFT

[11]: A minimum lot size of ten (10) acres is required for the construction of any single-family dwelling.

SUBSECTION 7.02: MULTI-FAMILY DISTRICT DEVELOPMENT STANDARDS

Multi-Family District Development Standards Zoning Districts → Development Standards ↓		Multi-Family 14 (MF-14) District [1]
Abbreviation		MF-14
Dwelling Units/Acre		14.0 [2]
Minimum Lot Requirements	Site Area (Square Feet)	10,000
	Lot Area (Square Feet)	2,000 (*Per Unit*)
	Width (Feet) [3]	60
	Depth (Feet)	100
Minimum Setbacks	Front (Feet)	25
	Rear (Feet) w/ Residential Adjacency (Feet) [3 & 8]	One Story = 25 Two Stories = 50 Three Stories = 75
	Rear (Feet)	10
	Side w/ Residential Adjacency (Feet) [4 & 8]	One Story = 25 Two Stories = 50 Three Stories = 75
	Side (Feet)	One Story = 10 Two or More Stories = 15
Between Buildings (Feet)		Main to Accessory = 10 Two Main Buildings w/ Doors or Windows in Facing Walls = 20 Two Main Buildings w/o Doors or Windows in Facing Walls = 15
Building Height (Feet)		36
Minimum Masonry Content (%)		100
Maximum Lot Coverage (%)		45 [5]
Minimum Landscaping (%) [7]		25% of Total Lot Area w/ 30% of Total Required in the Front and Alongside Buildings w/ Street Frontage [6]
Required Parking Spaces		See Article VI, *Parking and Loading*

ADDITION REQUIREMENTS:

[1]: Duplexes shall meet the requirements of the Two-Family (2F) District, with only one (1) duplex per lot.

[2]: Density is calculated by gross acre.

[3]: Unenclosed carports may be built within five (5) feet of any property line that abuts an alley, but no closer than 20-feet from any street intersection.

[4]: Side on street is treated the same as a front yard building setback.

[5]: Each development containing over 100 dwelling units shall provide 300 SF of open space per two (2) and three (3) bedroom units, with at least one (1) open area with the minimum dimensions of 200-feet by 150-feet. Swimming pools, tennis courts and other recreational facilities can be counted toward the overall open space requirement, but not toward the required 200-feet by 150-feet area.

[6]: Any parking lot with more than two (2) rows of parking spaces shall have a minimum of two (2) percent of the interior of the parking lot landscaped. Such landscaping shall be counted toward the landscaping requirement.

DRAFT 10.19.2018

[7]: All required landscaped areas shall be permanently maintained and shall have an irrigation system installed meeting all applicable city codes.
[8]: Lots with more than five (5) dwelling units that are contiguous to a residential zoning district, must be separated by a buffer as established in Article VIII, *Landscape Standards*.

ORDINANCE

NOTES:
Blue: When adjacent to Interstate 30.
H: Building Height
1/2*H*>36: One-Half the Building Height Over 36-Feet
FRW: Fire Retardant Wall
w/o FRW: Without Fire Retardant Wall

ADDITIONAL REQUIREMENTS:
[1]: A maximum building size of 5,000 SF in area, unless otherwise approved through a Specific Use Permit (SUP) by the Planning and Zoning Commission and City Council.
[2]: A maximum building size of 25,000 SF in area, unless otherwise approved through a Specific Use Permit (SUP) by the Planning and Zoning Commission and City Council.
[3]: Maximum lot area is 43,560 SF.
[4]: From future right-of-way as shown on the adopted Master Thoroughfare Plan or as actually exists, whichever is greater.
[5]: Parking should not be located between the front façade and the property line.
[6]: Lots with non-residential uses that have a side or rear yard contiguous or separated only by an alley, easement, or street, from any residential district must be separated from such residential district by a buffer as defined in Article VIII, *Landscape Standards*, or as approved by the Planning and Zoning Commission.
[7]: Not to exceed 50-Feet.
[8]: Building height may be increased up to 60-feet if approved through a Specific Use Permit (SUP) by the Planning and Zoning Commission and City Council.
[9]: Building height may be increased up to 240-feet if approved through a Specific Use Permit (SUP) by the Planning and Zoning Commission and City Council.
[10]: (or) as approved by Planning and Zoning Commission.
[11]: A minimum of seven (7) percent of the interior of the parking lot -- *not including the setback and landscape buffer* -- shall be pervious land area with additional plantings to create an amenity open space.
[12]: Parking shall not be permitted in the required setback.
[13]: Building height may be increased up to 120-feet if approved through a Specific Use Permit (SUP) by the Planning and Zoning Commission and City Council.

Between Buildings (Feet)		10	10	10	6	3	3	10	10
Building Height (Feet)		15	15	15	15	10	10	15	15
Minimum Masonry Content (%) [3]		80[5]	80[5]	80[5]	80[5]	80[5]	0	80[5]	80[5]

ADDITIONAL REQUIREMENTS:

1: Accessory buildings and accessory structures shall be accessory to a residential use and located on the same lot. Unless stipulated above, only two (2) accessory structures are permitted per single-family lot; excluding carports that are integrated into the main accessory structure.

2: If more than one (1) accessory building is proposed or if an accessory building, 625 SF or less, is existing then the maximum accessory building that can be constructed is 625 SF. If there is an existing accessory building greater than 625 SF no additional accessory buildings or structures are permitted.

3: Greenhouses are exempt from the minimum masonry requirements.

4: If the accessory building does not have garage doors facing the alleyway the setback is the same as the base zoning district.

5: The exterior of the accessory building or structure shall be clad in the same materials in roughly the same proportions as the primary structure; however, accessory buildings or structures that are less than 120 SF and under ten (10) feet in height may be constructed with non-masonry materials, or may be all metal with a baked-on pre-painted surface.

6: Each property shall be permitted one (1) detached garage up to 900 SF and one (1) accessory building up to 225 SF.

7: In residential districts, carports must be open on at least two (2) sides, architecturally integrated into the primary structure, and be located 20-feet behind the corner of the front façade and meet the garage setback adjacent to an alley. Porte-cocheres are not considered carports, and are allowed, if they are attached and integral with the design of the house.

8: Accessory buildings and accessory structures not meeting the masonry requirements shall require the approval of an exception from the Planning and Zoning Commission.

9: Barns used for agricultural and/or farm animal purposes, on sites ten (10) acres or more that are zoned Agricultural (AG) District, are excluded from this masonry requirement.

403

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: Mayor and City Council

CC: Rick Crowley, *City Manager*
Brad Griggs, *Assistant City Manager*
Ryan Miller*, Director of Planning and Zoning*

FROM: David Gonzales, *Planning and Zoning Manager*

DATE: November 5, 2018

SUBJECT: SP2018-033: Variance Requests for *Hyatt Place Hotel*

On August 7, 2017, the City Council approved a Specific Use Permit (*SUP No. S-170*) [*Ordinance No. 17-38*] to allow for a hotel in a Commercial (C) District on the *subject property*. The applicant is requesting approval of variances to the exterior material requirements and the parking requirements of the Unified Development Code (UDC). This request is in conjunction with an approved amending site plan [*Case No. SP2018-033*] -- *approved by the Planning and Zoning Commission on October 30, 2018* -- for the purpose of constructing a four (4) story hotel [*Hyatt Place Hotel*] that will contain a total of 100 rooms and an 1,800 SF meeting room. The SUP allows for an overall height not exceed 60-feet and limits the hotel to suites that do not contain kitchen facilities or cook-tops. The hotel will be located at the southeast corner of the intersection of Laguna Drive and La Jolla Pointe Drive and is within the IH-30 Overlay (*IH-30 OV*) and Scenic Overlay (*SOV*) Districts.

Originally, this site plan was approved without variances. By amending the site plan and increasing the amount of stucco on the north (*i.e. 58%*) and west (*i.e. 51%*) elevations, the applicant will require approval of a variance to allow for cementitous materials to exceed a maximum 50% of the masonry requirement. Since this site is within the IH-30 Overlay (*IH-30 OV*) and Scenic Overlay (*SOV*) Districts, this will require approval by a ¾ majority vote of City Council. Approval of variances to the SOV and IH-30 OV is discretionary for the City Council.

The off-street parking requirements for a hotel requires one (1) space for each room (*i.e. 100 parking spaces*) and one (1) space for each 100-SF of the meeting room area at 50% of the total square footage [*i.e. (1800-SF/100)*50% = 9 parking spaces*]. The total number of parking spaces required for the site is 109 spaces; however, due to site constraints, the applicant will be parking deficient by three (3) parking spaces (*i.e. only providing 106 of the 109 required parking spaces*). This requires approval of a variance by a simple majority vote of City Council.

On October 30, 2018, the Architectural Review Board (ARB) recommended approval of the request by a vote of 4-0, with board members Neil, Meyrat and Wacker absent. Subsequently, on October 30, 2018, the Planning and Zoning Commission approved a motion to recommend approval per staff conditions. This motion was approved by a vote of 5-1, with Commissioner Logan dissenting and Chairman Lyons absent.

CITY OF ROCKWALL
CITY COUNCIL MEMO

AGENDA DATE: 11/05/2018

APPLICANT: Cameron Slown; *FC Cuny Corporation*

AGENDA ITEM: **SP2018-029**; Marriott Towneplace Suites

SUMMARY:

Discuss and consider a request by Cameron Slown of FC Cuny Corporation on behalf of Tom Kirkland of TEKMAK Development Company for the approval of a variance to the cementitious material requirements in conjunction with a site plan for a residence hotel on a 2.8-acre tract of land being a portion of a larger 8.613-acre tract of land Tract 4 of the J. D. McFarland Survey, Abstract No. 145, and Lot 1, Block B, Goldencrest Addition, City of Rockwall, Rockwall County, Texas, zoned Commercial (C) District, situated within the IH-30 Overlay (IH-30 OV) District, situated north of the intersection of Greencrest Boulevard and the IH-30 Frontage Road, and take any action necessary.

PURPOSE AND BACKGROUND:

The applicant is requesting a variance to the cementitious materials requirements associated with an approved sited plan for an ~ 16,210 SF residence hotel on the subject property. On February 6, 2017, the City Council approved a Specific Use Permit (SUP) [*Ordinance No. 17-07*] allowing a residence hotel on the subject property. The proposed residence hotel will be situated on a 2.8-acre portion of a larger 8.613-acre tract of land (*i.e. a portion of Tract 4 of the J. D. McFarland Survey, Abstract No. 145, and Lot 1, Block B, Goldencrest Addition*). The proposed residence hotel will be situated behind an existing restaurant (*i.e. Texas Roadhouse*). The residence hotel will be four (4) stories (*i.e. 49-feet high*), approximately 16,210 SF, and have 112 units with kitchen facilities. The hotel will be accessible from IH-30 via a mutual access easement and the main driveway located on Greencrest Boulevard. The hotel will utilize underground parking as well as surface parking. The subject property is zoned Commercial (C) District and situated within the IH-30 Overlay (IH-30 OV) District.

VARIANCE:

Based on the applicant's submittal, staff has identified the following variance:

1) IH-30 Overlay (IH-30 OV) District Standards

   a. *Cementitious Material.* According to Subsection 6.6C.1, *Masonry Requirements*, of Section 6.6, *IH-30 Overlay (IH-30 OV) District,* of Article V, *District Development Standards*, of the Unified Development Code (UDC), cementitious materials (*i.e. stucco*) shall be limited to 50% of each building façade. In this case, the applicant is proposing to utilize between 69% to 79% stucco on each building façade. This variance will require a ¾ majority vote of the City Council members present to be approved.

ARCHITECTURAL REVIEW BOARD

On September 25, 2018 the Architectural Review Board (ARB) reviewed the proposed building elevations and requested 20% natural stone in-lieu of brick on each façade.

Additionally, the Architectural Review Board (ARB) requested that the applicant utilize 3-part stucco in-lieu of EIFS.

On October 9, 2018, the Architectural Review Board (ARB) reviewed the revised building elevations. The applicant proposed cultured stone on all facades; however, the rear façade only utilized 13%. Additionally, the applicant proposed a secondary material that exceeded the 10% maximum as well as stucco that exceeded the maximum of 50% on all facades. The Architectural Review Board (ARB) requested additional revisions from the applicant and made a motion to postpone action on the site plan to allow the Architectural Review Board (ARB) to review the revisions. This motion passed by a vote of 6-0 with Board Member Meyrat absent.

On October 30, 2018, the Architectural Review Board (ARB) reviewed the revised building elevations. The applicant's revisions eliminated the secondary materials, and utilized at least 20% natural stone on all facades. The Architectural Review Board's (ARB's) motion to recommend approval of the variance to the cementitious materials passed by a vote of 4-0 with Board Members Meyrat, Wacker, and Neill absent.

RECOMMENDATIONS:

If the City Council chooses to approve the applicant's request then staff would recommend the following conditions of approval:

1) All comments provided by the Planning, Engineering and Fire Department must be addressed prior to the submittal of a building permit;

2) Any construction or building necessary to complete this *Site Plan* request must conform to the requirements set forth by the UDC, the International Building Code, the Rockwall Municipal Code of Ordinances, city adopted engineering and fire codes and with all other applicable regulatory requirements administered and/or enforced by the state and federal government.

PLANNING AND ZONING COMMISSION:

On October 9, 2018, the Planning and Zoning Commission's motion to postpone action on the site plan passed by a vote of 6-0 with Commissioner Fishman absent,

On October 30, 2018, the Planning and Zoning Commission's motion to approve the site plan and to recommend approval of the variance to the cementitious materials requirements passed by a vote of 6-0 with Commissioner Lyons absent.

Variance Request

Greencrest TPS Hotel, LP dba TownePlace Suites Marriott ("Hotel") files this variance request from certain architectural standards set forth in detail in the attached ***Exhibit A***.

Specifically, the Hotel requests relief from the 90% exterior masonry requirements described in the architectural standards. In support of this request the Hotel provides the below information:

1. **The Hotel is not located on a public street and has limited visibility**. The Hotel is on an interior lot as depicted on ***Exhibit B***. The Hotel lot is 505 feet from the IH30 Frontage Road and 607 feet from Greencrest Blvd. Access to the Hotel will be via a private road. The Hotel lot is considerably below the existing grades of the surrounding building. Specifically, the finished floor elevation of the Texas Roadhouse is 571.50 and the finished floor elevation of the Hotel will be 550. As a result, the exterior materials of the Hotel will have little to no visibility to public traffic.

2. The prototypical TownePlace Suites Marriott design does not have any masonry specified. The prototypical exterior materials consist of a combination of cementitious board (Hardie type) and EIFs. (***see bottom of Exhibit C***). **However**, the Hotel intends to dramatically upscale the exterior look of its TownePlace Suites to include brick masonry covering approximately 26% of its exterior surface. (***see Exhibit D***). The remaining exterior surface will be the identical EIFs product used on the exterior of the Springhill Suites Marriott at The Harbor. (***see top and middle of Exhibit C***).

3. The Hotel site is a challenge given its below street grade location and will be costly to develop. As a result, the Hotel will have covered below grade parking, making it one of just a handful of TownePlace Suites Marriott hotels in the U.S. with this feature. The Hotel

10000 North Central Expressway, Suite 400 • Dallas, TX 75231 • T 214.890.9225 • F 214.890.1355
www.tekmakdevelopment.com

413

will add significant property tax value to the City of Rockwall's tax roles by turning a developmentally challenged lot into valuable property.

4. The Hotel's interior design will be upscale and above Marriott standards for a prototypical TownePlace Suites, very similar to the interior design upgrades contained in the Springhill Suites Marriott at The Harbor. (***see Exhibit C***)

Based upon these factors, the Hotel requests the City of Rockwall grant this variance request.

Greencrest TPS Hotel, LP.

C. *Architectural standards.*

1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.

   a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;

   - ☑ That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;
   - ☑ That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;
   - ☑ That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;
   - ☑ That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and
   - ☑ That the manufactured stone product shall have a minimum warranty of 75 years.

b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.

A TREE GUYING DETAIL
SCALE: N.T.S. SECTION/ELEVATION

PLANT LIST

KEY	QTY	COMMON NAME	BOTANICAL NAME	SIZE	REMARKS
LO	14	LIVE OAK	*Quercus virginiana*	100 gallon; minimum 4" caliper x 15' height x 6' spread	Container-grown; full head; matched. Cherry Lake Tree Farm or approved equal.
RO	12	SHUMARD RED OAK	*Quercus shumardii*	100 gallon; minimum 4" caliper x 15' height x 6' spread.	Container-grown; full head; matched. Cherry Lake Tree Farm or approved equal.
CE	9	CEDAR ELM	*Ulmus crassifolia*	100 gallon; minimum 4" caliper x 16' height x 7' spread	Container-grown; full head; matched.
BC	6	BALD CYPRESS	*Taxodium distichum*	65 gallon; minimum 4" caliper x 12' height x 6' spread.	Container-grown; full head; clear trunk.
CM	9	'MUSKOGEE' CRAPE MYRTLE	*Lagerstroemia indica 'Muskogee'*	30 gallon; minimum 7' height x 3' spread; single-trunk.	Container grown; full; multi-trunk.
NPH	128	NEEDLE POINT HOLLY	*Ilex comuta 'Needlepoint'*	7 gallon; minimum 36" height and 30" spread	Full-to-ground; plant 36" o.c.

LANDSCAPE GENERAL NOTES :

1. QUANTITIES SHOWN ON PLANT LIST ARE LANDSCAPE ARCHITECT'S ESTIMATE ONLY AND SHOULD BE VERIFIED PRIOR TO BIDDING. CONTRACTOR SHALL BE RESPONSIBLE FOR BIDDING AND PROVIDING QUANTITY OF PLANT REQUIRED AT SPACING DESIGNATED FOR BED SIZES AND CONFIGURATIONS SHOWN ON PLANS REGARDLESS OF QUANTITIES DESIGNATED ON PLANT LIST.
2. ALL SIZE REQUIREMENT AND CONTAINER SIZES FOR PLANT MATERIALS SHOWN ON THE PLANT LIST MUST BE MET AS MINIMUM. IF ANY SPECIFIC REQUIREMENT CANNOT BE MET (I.E., IF A 100 GALLON TREE CANNOT MEET THE SPECIFIED CALIPER REQUIREMENT), THE CONTRACTOR SHALL NOTIFY THE LANDSCAPE ARCHITECT PRIOR TO BIDDING. THE CONTAINER SIZE MUST BE MET REGARDLESS WHETHER THE SPECIFIED SIZES CAN BE REACHED WITH A SMALLER SIZE CONTAINER.
3. ALL LANDSCAPING WILL BE WATERED BY AN AUTOMATIC UNDERGROUND WATERING SYSTEM.
4. THE CONTRACTOR SHALL VERIFY WATER RESTRICTIONS WITHIN THE CITY OF ROCKWALL AT TIME OF PLANTING. SHOULD WATER RESTRICTIONS NOT ALLOW HYDRO-MULCH, HYDRO-SEEDING, OR SPRIGGING (STAGE 3 AND STAGE 4 WATER RESTRICTIONS), AN APPROVED ALTERNATIVE FOR GRASSING SHALL BE INSTALLED.

PROJECT NUMBER

TREE PRESERVATION PLAN

TM1.1
SHEET NUMBER

SP2018-029

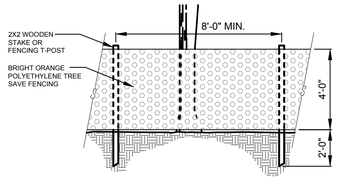
TREE PROTECTION:

A. PRIOR TO CONSTRUCTION, ALL PROTECTED TREES AS SHOWN ON THE DEMOLITION PLANS SHALL BE CLEARLY MARKED WITH A BARRIER CONSISTING OF A 4' BARRICADE FENCE OR APPROVED EQUIVALENT TO PROTECT THE AREA UNDER THE CANOPY OF DRIP LINE OF ANY PROTECTED TREE OR GROUP OF PROTECTED TREES.

B. DURING CONSTRUCTION, THE BUILDER SHALL PROHIBIT THE CLEANING OF EQUIPMENT OR STORAGE OF MATERIALS AND THE DISPOSAL OF ANY WASTE MATERIAL, INCLUDING, BUT NOT LIMITED TO, PAINT, OIL, SOLVENTS, ASPHALT, CONCRETE, MORTAR, ETC., UNDER THE CANOPY OR DRIP LINE OF ANY PROTECTED TREE OR GROUP OF TREES.

C. NO ATTACHMENTS OR WIRES OF ANY KIND, OTHER THAN THOSE OF A PROTECTIVE NATURE, SHALL BE ATTACHED TO ANY PROTECTED TREE.

D. IN ADDITION, CONTRACTOR WILL BE RESPONSIBLE FOR ANY PROTECTED TREE WHICH DIES OR IS DAMAGED DUE TO CONTRACTOR NEGLECT. VALUE OF DEAD AND/OR DAMAGED PROTECTED TREE SHALL BE DETERMINED USING THE "GUIDE FOR PLANT APPRAISAL" PREPARED UNDER CONTRACT BY THE COUNCIL OF TREE AND LANDSCAPE APPRAISERS AND EDITED, PUBLISHED AND COPYRIGHTED BY THE INTERNATIONAL SOCIETY OF ARBORCULTURE, NINTH EDITION, 2000.



A TREE PROTECTION
SCALE: N.T.S. SECTION

TREE PRESERVATION NOTES: (SEE ARTICLE IX SECTION 5)
THE TREE MITIGATION REQUIREMENTS SHALL APPLY FOR ALL PROPERTIES THAT DO NOT FALL UNDER THE EXEMPTIONS LISTED IN SECTION 1.3, EXEMPTIONS, OF THIS ARTICLE. IN ADDITION, IF A TREESCAPE PLAN OR TREE REMOVAL PERMIT ALLOWS FOR THE REMOVAL OF A PROTECTED OR FEATURE TREE(S), THE APPLICANT AND/OR PROPERTY OWNER SHALL ACCOUNT FOR THE NUMBER OF INCHES OF TREE BEING REMOVED USING THE FOLLOWING CRITERIA:

1. PRIMARY PROTECTED TREES:
PRIMARY PROTECTED TREES MEASURING FOUR INCHES THROUGH 25 INCHES DBH SHALL BE REPLACED ON AN INCH-FOR-INCH BASIS (I.E. THE TOTAL NUMBER OF CALIPER INCHES OF TREE BEING REPLACED SHALL EQUAL THE TOTAL NUMBER OF CALIPER INCHES BEING REMOVED).

2. SECONDARY PROTECTED TREES:
HACKBERRY AND CEDAR TREES MEASURING 11 INCHES THROUGH 25 INCHES DBH SHALL BE REPLACED WITH A HALF-INCH FOR EVERY INCH REMOVED (I.E. THE TOTAL NUMBER OF CALIPER INCHES OF TREE REQUIRED TO BE REPLACED SHALL BE HALF (½) OF THE INCHES BEING REMOVED).

3. FEATURED TREES:
FEATURED TREES (I.E. ALL TREES GREATER THAN 25 INCHES) SHALL BE REPLACED WITH TWICE THE NUMBER OF INCHES BEING REMOVED (I.E. THE TOTAL NUMBER OF CALIPER INCHES OF TREE BEING REPLACED SHALL BE TWICE THE NUMBER OF CALIPER INCHES BEING REMOVED).

4. NON-PROTECTED TREE:
NO MITIGATION WILL BE REQUIRED FOR THE REMOVAL OF ANY TREE THAT IS LESS THAN FOUR INCHES DBH OR LESS THAN 11 INCHES DBH FOR HACKBERRY AND CEDAR TREES. IN ADDITION, NO MITIGATION SHALL BE REQUIRED FOR THE REMOVAL OF BOIS D'ARC, WILLOW, COTTONWOOD, LOCUST AND CHINABERRY TREES.

5. EXEMPTION: (SEE ARTICLE IX SECTION 1.3 - TREE PRESERVATION)
UTILITY COMPANIES, UTILITY SERVICE AND OR DISTRIBUTION/TRANSMISSION LINES. UTILITY COMPANIES SHALL NOT BE SUBJECT TO THE TREE PROTECTION OR REPLACEMENT REQUIREMENTS IN THIS ARTICLE WHEN ESTABLISHING DISTRIBUTION AND TRANSMISSION LINES. WHEN ESTABLISHING NEW UTILITY SERVICE, SERVICES SHOULD BE ROUTED BETWEEN THE SERVICE POLE OR TRANSMISSION AND DISTRIBUTION LINES AND THE BUILDING BEING SERVED IN A MANNER THAT DOES NOT REQUIRE THE REMOVAL OF A PROTECTED OR FEATURE TREE. ALL RIGHT-OF-WAY, EASEMENTS OR SIMILAR TYPES OF PUBLIC PROPERTY MAINTAINED BY UTILITY COMPANIES SHALL NOT BE SUBJECT TO THE TREE PROTECTION OR REPLACEMENT REQUIREMENTS OF THIS ARTICLE.

DESIGN ELEMENTS

BUILDINGS OVER 50,000 SQUARE FEET MUST INCLUDE A MINIMUM OF SIX OF THE REFERENCED ARCHITECTURAL ELEMENTS:

- ■ CANOPIES, AWNINGS, OR PORTICOS;
- ■ RECESSES/PROJECTIONS;
- □ ARCADES;
- □ PEAKED ROOF FORMS;
- □ ARCHES;
- ■ OUTDOOR PATIOS;
- □ DISPLAY WINDOWS;
- □ ARCHITECTURAL DETAILS (SUCH AS TILE WORK AND MOLDINGS) INTEGRATED INTO THE BUILDING FACADE;
- ■ ARTICULATED GROUND FLOOR LEVELS OR BASE;
- □ ARTICULATED CORNICE LINE;
- ■ INTEGRATED PLANTERS OR WING WALLS THAT INCORPORATE LANDSCAPE AND SITTING AREAS;
- ■ OFFSETS, REVEALS OR PROJECTING RIB USED TO EXPRESS ARCHITECTURAL OR STRUCTURAL BAYS;
- ■ VARIED ROOF HEIGHTS;

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: Mayor and City Council

CC: Rick Crowley, *City Manager*
Brad Griggs, *Assistant City Manager*
Amy Williams, *Director of Public Works/City Engineer*

FROM: Ryan Miller, *Director of Planning and Zoning*

DATE: November 5, 2018

SUBJECT: Policy for Requiring Traffic Impact Analysis (TIA) with Zoning Applications

At the last City Council meeting on October 15, 2018, the City Council directed staff to incorporate a variance or waiver process into the policy addressing when a Traffic Impact Analysis (TIA) would be required in conjunction with a zoning application. This means the final policy concerning TIA's would be as follows:

Traffic Impact Analysis Policy

A Traffic Impact Analysis (TIA) shall be required to be submitted with a zoning applications if: [*1*] a proposed Planned Development District is 25-acres or greater, or [*2*] when a proposed zoning change necessitates a change in the Future Land Use Map that is considered to be more intense than the current designation (*e.g. a change from a Low Density Residential designation to a Medium Density Residential designation*). The TIA may be waived: [*1*] by City staff if the proposed zoning change is five (5) acres or less, or [*2*] in all circumstances by the City Council. In cases where a TIA is waived, there should be a finding that sufficient public roadway facilities are in existence.

In addition to providing direction on the proposed policy, the City Council also directed staff to require that a TIA be prepared by an engineer chosen by the City, and that a retainer would be required from an applicant to initiate the study. This is similar to how the City's infrastructure studies are currently being required and prepared. In response to this direction, staff requested a rough estimate of cost from an engineer that currently has an engineering services contract with the City. The estimate for preparing a TIA is as follows:

Small TIA: $6,000.00 - $9,000.00
Large TIA: $9,001.00 - $15,000.00+

The typical estimated turnaround time on a TIA was estimated to be two (2) weeks for traffic counts and an addition five (5) weeks for the preparation of the TIA. This means that before an applicant would be able to submit a zoning application, they would need to submit a request to perform a TIA a minimum two (2) months prior. During this two (2) months staff would also have the applicant submit a request for an infrastructure study if necessary.

As part of this quote, staff also requested a quote for reviewing an existing TIA prepared by an outside engineer. This was done to give the City Council an alternative to engaging an *in-house* engineer. The estimate for review of a TIA is as follow:

Small TIA: $2,000.00 - $3,500.00

Large TIA: $3,501.00 - $5,500.00

In addition, to these costs the engineering company also quoted a $1,000.00 fee per meeting that the engineer was required to attend. A definition of what constitutes a *Small TIA* and a *Large TIA* are provided in the attached email.

In response to this information staff is looking for [1] acceptance of the above TIA policy, and [2] further direction with how to proceed with the implementation and preparation of the TIA. Should the City Council have any questions, staff will be available at the meeting on ***November 5, 2018*** to discuss.

From:	White, Jeremy
To:	Miller, Ryan
Cc:	Williams, Amy
Subject:	Conducting and Reviewing Traffic Impact Analysis
Date:	Tuesday, October 30, 2018 4:44:34 PM

Ryan,

Here is a summary of what is scope and fee of Preforming and Reviewing TIAs.

Performing TIAs

- "Small TIA" - $6,000 - $9,000
- "Large TIA" - $9,000 - $15,000+
- Typical Schedule (2 weeks for Traffic Counts) (another 5 weeks or less for Performing TIA)

Reviewing TIAs

- Small TIA Review: $2000 to $3500
- Large TIA Review: $3500 to $5500
- Typical Schedule (2 weeks)

Attending Meetings (City Council or P&Z)

- $1000 per meeting

Definition of a "Small TIA" and a "Large TIA", here are some descriptions:

- "Small TIA" – A single phase development with only one or two driveways or street connections.
  - Examples: A gas station, fast food restaurant, small retail/commercial building, a small single family residential development (i.e. < 100 homes)
  - Generates lower numbers of site trips and impacts a limited area. Really only want to know what is happening at the driveways and/or one adjacent intersection.
- "Large TIA" – A multi-phase master planned development which may include a single use or multiple uses

435

- Examples: large office complex, multi-use site that includes multi-family, commercial/retail, and office space

- Generates larger numbers of site trips and impacts a larger area. May need to look a multiple signalized intersections to see if improvements are needed. The site will be developed overall several years requiring analysis of multiple phases of the development and not just a full build condition.

If Engineering is to have a general Engineering Services Contract with a Traffic Engineer to perform these services the Scope would be as follows:

> Provide miscellaneous consulting services on an as-needed basis for issues related to traffic impact analysis and other traffic engineering matters, which may be requested from time to time by, or approved by, the City of Rockwall's City Engineer/Public Works Director, or by the City Engineer's/Public Works Director's representative(s) or assistant(s). Such services are anticipated to typically consist of the following:

A. Assist in preparing the City's traffic impact analysis requirements and ordinances

B. Perform traffic impact analyses for the City as requested.

C. Perform traffic counts for the City as requested.

D. Assist in scoping traffic impact analyses for proposed developments which shall include study intersections/limits, required traffic counts, analyses, etc.

E. Review and provide comments on traffic impact analyses submitted to the City

F. Provide opinions, advice, recommendations and other miscellaneous assistance to the City regarding traffic impact analyses and traffic operations.

G. Attendance at developer review meetings, planning and zoning meetings, City Council meetings, and others as required or needed.

H. Other miscellaneous traffic engineering services as requested by the City and agreed by Traffic Engineer provided that such services are within the field of expertise of the Traffic Engineer.

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: Mayor and City Council

CC: Rick Crowley, *City Manager*
Brad Griggs, *Assistant City Manager*
Amy Williams, *Director of Public Works/City Engineer*

FROM: Ryan Miller, *Director of Planning and Zoning*

DATE: November 5, 2018

SUBJECT: Traffic Impact Analysis (TIA) for the Harbor District

At the last City Council meeting on October 15, 2018, the City Council requested staff provide a list of all instances when a Traffic Impact Analysis (TIA) would be required in conjunction with development in the Harbor District. As stated in staff's previous memorandums concerning TIA policies for the Harbor District, the original TIA for Planned Development District 32 (PD-32) was drafted in June 2011. This report outlined a comprehensive analysis for current and future traffic generation in the district -- *including accounting for the 1,161 urban residential units (i.e. Condominiums or Townhomes) permitted in the district* -- and detailed specific recommendations to address the potential increases in traffic; however, the Harbor District has not developed in strict adherence to the original concept plan, and new projects proposed by the Texas Department of Transportation (TXDOT) will affect the current level of service in the area (*e.g. IH-30 frontage road improvements*). This will change the recommendations provided with the original TIA document, and will most likely require the document to be updated. Considering this the following are instances when the Planning and Zoning Commission and City Council can require a TIA for development in the Harbor District:

(1) City staff -- *either administratively or at the direction of the Planning and Zoning Commission and/or City Council* -- can require a new TIA or an update to an existing TIA at the time of PD Development Plan. According to the Planned Development (PD) District requirements in the Unified Development Code (UDC), -- *if required by the PD ordinance or by the City Engineer* -- a TIA shall be submitted prior to action being taken on a PD Development Plan. The purpose of the updated TIA is to determine whether the traffic estimated to be generated by the original concept plan matches the proposed PD Development Plan or if the PD Development Plan will necessitate specific on-site or off-site traffic improvements (*e.g., turn lanes, stacking lanes, signalization, etc.*) [*Subsection 2.2.E; Article X; UDC*].

(2) The Planning and Zoning Commission and City Council can require a developer to submit a new TIA or update an existing TIA at the time of site plan. Under the PD District requirements in the UDC, a TIA is required with a zoning application proposing to establish a new PD District, unless waived by the City Council. Upon the establishment of a PD District the TIA is required to be updated with each site plan in the PD District [*Subsection 2.1.E; Article X; UDC*].

(3) City staff, the Planning and Zoning Commission, and/or City Council can require a *comprehensive traffic impact study* (*i.e. TIA*) along with other public facility studies concurrently with an application for subdivision plat (*i.e. preliminary, master, replat or final plat*) to ensure that the proposed development will be supported with adequate levels of

public facilities and services comparable to the increased demand for public facilities created by the development [*Section 38-5; Chapter 38; Municipal Code of Ordinance*].

The City's ordinances give broad discretion to City staff, the Planning and Zoning Commission, and the City Council with regard to when a TIA can be required. Moving forward the Planning and Zoning Commission and/or City Council may choose to request a TIA for development in this district due to some of the substantial changes that have taken place since the original TIA was prepared. Some of these changes include (1) development inconsistent with the original concept plan, (2) changes to the proposed road network (*i.e. reincorporating Lakefront Trail into the street network*), or (3) changes to access/adjacent roadways proposed by TXDOT. As requested by the City Council, City staff will brief the Planning and Zoning Commission on when a TIA can be required at their next meeting on *November 13, 2018*. Should the City Council have any questions concerning TIA requirements in the Harbor District, staff will be available at the *November 5, 2018*.

PO Box 703 | Terrell | TX 75160

October 23, 2018

Mayor Jim Pruitt
City of Rockwall
385 S. Goliad
Rockwall, TX 75087

RE: STAR Transit Board of Directors Open Position (Place 2)

Dear Mayor Pruitt,

Please be aware that STAR Transit now has an open Board of Directors position. Place 2 on the Board of Directors has an unexpired partial term ending August 31, 2020. This is an unexpired term. The individual selected will serve through August 31, 2020.

Under our recently revised ByLaws, this open nomination process is open to our entire service area. Nominations will be accepted from any official elected to public office in the STAR Transit service area or any identified member of the public who has established residency in the STAR Transit Service Area. To be eligible to serve on the Board, the individual must be maintaining a place of permanent residence or full-time employment in the STAR Transit service area, currently in Ellis, Kaufman, Navarro and Rockwall Counties and the Cities of Balch Springs, DeSoto, Hutchins, Mesquite, and Seagoville.

As the Chief Elected Officer of your jurisdiction, we are providing a nominations form in case you would like to complete the form. The form allows you to nominate a Board of Director and an associated Alternate. Alternates to the STAR Board vote only upon absence of the Primary Board Member. To be considered, the forms must arrive to STAR Transit by December 5, 2018.

Under our process, the Nominations Committee of the Board of Directors will review all eligible nominations and make a recommendation at an upcoming Board of Directors meeting.

For a copy of our ByLaws or additional nominations forms, please see our website, www.STARtransit.org.

If you have any questions, please feel free to contact Teresa Elliott, Executive Assistant at TElliott@STARtransit.org or 469-474-2309.

Respectfully,

Omega Ann Hawkins

AGENDA
ROCKWALL CITY COUNCIL
Monday, November 19, 2018
4:00 p.m. Regular City Council Meeting
City Hall, 385 S. Goliad, Rockwall, Texas 75087

I. CALL PUBLIC MEETING TO ORDER

II. WORK SESSION

pg.11 **1.** Hold work session to discuss the city's Hotel Occupancy Tax (HOT) program.

pg.14 **2.** Hold work session to hear update on the departmental strategic business plans.

pg.24 **3.** Hold a work session to discuss the recommendation for a sub-committee to discuss the comprehensive review of compensation.

III. EXECUTIVE SESSION.

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding potential litigation associated with Breezy Hill Road pursuant to Section §551.071 (Consultation with Attorney).
2. Discussion regarding Chapter 12, Article X of the Code of Ordinances as related to inspection of food service establishments pursuant to Section §551.071 (Consultation with Attorney).
3. Discussion regarding (re)appointments to city regulatory boards, commissions, and committees - specifically the Rockwall Economic Development Corporation (REDC) - pursuant to Section 551.074 (Personnel Matters)
4. Discussion regarding possible lease of real property on city owned land at Yellowjacket Park pursuant to Section §551.072 (Real Property).
5. Discussion regarding land acquisition adjacent to N. Goliad pursuant to Section §551.072 (Real Property).
6. Discussion regarding (re)appointment of municipal court judge and associate judge and related interviews, pursuant to Section 551.074 (Personnel Matters)
7. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney).

IV. ADJOURN EXECUTIVE SESSION

AGENDA
ROCKWALL CITY COUNCIL
Monday, November 19, 2018
6:00 p.m. Regular City Council Meeting
City Hall, 385 S. Goliad, Rockwall, Texas 75087

V. RECONVENE PUBLIC MEETING

VI. TAKE ANY ACTION AS A RESULT OF EXECUTIVE SESSION

VII. INVOCATION AND PLEDGE OF ALLEGIANCE –COUNCILMEMBER TROWBRIDGE

VIII. PROCLAMATIONS / AWARDS

pg.26 **1.** Diabetes Awareness Month

IX. OPEN FORUM

X. CONSENT AGENDA

pg.28 **1.** Consider approval of the minutes from the November 5, 2018 regular city council meeting, and take any action necessary.

pg.39 **2.** **Z2018-032** - Consider a request by Bill Bricker of Columbia Development Company, LLC for the approval of an **ordinance** for a zoning change from a Light Industrial (LI) District to a Planned Development District for commercial, light industrial and townhome land uses on a 16.26-acre tract of land identified as Lot 1, Block 1, Indalloy Addition (7.409-acres) and Tract 31 of the R. Ballard Survey, Abstract No. 29, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, addressed as 1100 & 1300 E. Washington Street, and take any action necessary **(2nd Reading).**

pg.54 **3.** **Z2018-042** - Consider the approval of an **ordinance** for a text amendment affecting various sections of the Unified Development Code [Ordinance No. 04-38] for the purpose of generally amending the Development Standards and procedural processes for the approval of Variances, Exceptions, and Waivers, and take any action necessary **(2nd Reading).**

pg.194 **4.** Consider approval of a resolution supporting the Rockwall Fire Department's application to FEMA's "Assistance to Firefighters Grant" for the purpose of funding the future purchase and installation of a vehicle exhaust capture and removal system in all City of Rockwall fire stations, and take any action necessary.

pg.197 **5.** Consider approval of the County Line Road Reconstruction Project and authorize the City Manager to execute a contract with McMahon Contracting, LP. in an amount of $5,335,467.51, to be funded by Street Bond Fund and the Water / Sewer Fund, and take any action necessary.

pg.206 **6.** Consider approval of the Construction Materials Testing for County Line Road Reconstruction Project and authorize the City Manager to execute a

contract with Alliance Geotechnical Group for an amount of $54,883.50 to be funded by Street Bond Funds, and take any action necessary.

pg. 210 **7.** Consider approval of the S. Lakeshore Drive and Summit Ridge Drive Reconstruction Project and authorize the City Manager to execute a contract with Tiseo Paving Co. for the Base Bid and add Alternate Bid A for a total amount of $9,343,280.80, to be funded by Street Bond Fund and the Water / Sewer Fund, and take any action necessary.

pg. 222 **8.** Consider approval of the Construction Materials Testing for S. Lakeshore Drive/Summit Ridge Drive Reconstruction Project and authorize the City Manager to execute a contract with Alliance Geotechnical Group for an amount of $77,426.50 to be funded by Street Bond Funds, and take any action necessary.

pg. 226 **9.** Consider awarding a bid to IWC Texas and authorizing the City Manager to execute a Contract for SH 66 Boat Ramp and Myers Park light pole replacement in the amount of $42,000 to be funded out of the General Fund Parks Operations Budget, and take any action necessary.

pg. 228 **10.** Consider approval of Contract Amendments Number Eight for the total additional contract amount of $49,115.00 with Freese and Nichols, Inc. for the County Line Road Reconstruction Project, and take any action necessary.

pg.232 **11.** **P2018-037** - Consider a request by Cameron Slown of F. C. Cuny Corporation on behalf of Phillip McNeill of MHC Rockwall, LLC and Jason Lentz of Atticus of Atticus Summer Lee Townhomes for the approval of a replat for Lots 3 & 4, Block A, Harbor Village Addition, being a 6.196-acre tract of land currently identified as Lot 2A of the Isaac Brown Addition and Lot 2, Block A, Harbor Village Addition, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 32 (PD-32), situated within the Scenic Overlay (SOV) District, located adjacent to Summer Lee Drive southwest of the intersection of Horizon Road [FM-3097] and Summer Lee Drive, and take any action necessary.

XI. APPOINTMENTS

1. Appointment with the Planning and Zoning Chairman to discuss and answer any questions regarding cases on the agenda and related issues and take any action necessary.

pg.238 **2.** Appointment with Jenny Krueger of the Boys & Girls Club to hear report on the 2018 Duck Regatta.

XII. PUBLIC HEARING ITEMS

pg.239 **1.** **Z2018-047** - Hold a public hearing to discuss and consider the approval of an **ordinance** adopting the OURHometown Vision 2040 Comprehensive Plan (i.e. 2018 Comprehensive Plan Update) and take any action necessary **(1st Reading).**

pg.388 **2.** **Z2018-044** - Hold a public hearing to discuss and consider a request by Reubin E. Harle for the approval of an **ordinance** for a Specific Use Permit (SUP) allowing an accessory building that does not meet the requirements stipulated by the Unified Development Code (UDC) on a 4.632-acre parcel of land identified as Lot 5R, Block A, Zion Addition, City

of Rockwall, Rockwall County, Texas, zoned Single-Family One (SF-1) District, addressed as 825 Zion Hills Circle, and take any action necessary **(1st Reading).**

pg.406 **3.** **Z2018-045** - Hold a public hearing to discuss and consider a request by Kira Bauman of Bauman Consultants on behalf of John Gatz of EcoSite for the approval of an **ordinance** for a Specific Use Permit (SUP) allowing a Freestanding Commercial Antenna on a 0.0826-acre portion of a larger 7.64-acre tract of land, known as Yellow Jacket Park, identified as Tract 11 of the J. Cadle Survey, Abstract No. 65, City of Rockwall, Rockwall County, Texas, zoned General Retail (GR) District, situated on the south side of Yellow Jacket Lane, west of the intersection of S. Goliad Street [SH-205] and Yellow Jacket Lane, and take any action necessary **(1st Reading).**

pg.433 **4.** **Z2018-046** - Hold a public hearing to discuss and consider a request by Brad Helmer on behalf of Heritage Christian Academy (HCA) for the approval of an **ordinance** for a Specific Use Permit (SUP) allowing existing temporary educational buildings in conjunction with a private school to remain on a 6.64-acre parcel of land identified as Lot 1, Block A, Heritage Christian Academy Addition, City of Rockwall, Rockwall County, Texas, zoned Multi-Family 14 (MF-14) District, situated within the SH-205 Overlay (SH-205 OV) District, addressed as 1408 S. Goliad Street [SH-205], and take any action necessary **(1st Reading).**

XIII. ACTION ITEMS

pg.450 **1.** **SP2018-032** - Discuss and consider a request by William Salee of the Rockwall Independent School District (RISD) for the approval of variances to the material and articulation requirements in conjunction with an approved site plan for an Elementary School on a 17.2922-acre tract of land being identified as Lot 1, Block A, RISD Elementary School Addition and Tract 2-7 of the W. T. Deweese Survey, Abstract No. 71, City of Rockwall, Rockwall, Texas, zoned Planned Development District 70 (PD-70) for single family land uses, located at the southeast corner of Greenway Boulevard and FM-552, and take any action necessary.

pg.459 **2.** **SP2018-030** - Discuss and consider a request by John David of Express Oil Change, LLC for the approval of a variance to the articulation requirements in conjunction with an approved site plan for a Minor Auto Repair Garage (i.e. Brakes Plus) on a 0.656-acre tract of land being identified as Lots 1 & 2, Block A, Billy Peoples #1 Addition, City of Rockwall, Rockwall County, Texas, zoned General Retail (GR) District, situated within the SH-205 Overlay (SH-205 OV) District, addressed as 1902 & 2000 S. Goliad Street [SH-205], and take any action necessary.

pg.465 **3.** A2018-004 – Discuss and consider a request by Suresh Shridharani on behalf Harlan Properties, Inc. for the approval of annexation of an 69.679-acre tract of land identified as Tract 3 of the J. Merriman Survey, Abstract No. 155, Rockwall County, Texas, and take any action necessary.

pg.470 **4.** Discuss and consider the appointment of a subcommittee to discuss the compensation plan.

pg.472 **5.** Discuss and consider a request from Texas Department of Transportation regarding the City's preference on the time of day for concrete repair along FM 740/Ridge Road and SH 66, and take any action necessary.

XIV. EXECUTIVE SESSION

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding potential litigation associated with Breezy Hill Road pursuant to Section §551.071 (Consultation with Attorney).
2. Discussion regarding Chapter 12, Article X of the Code of Ordinances as related to inspection of food service establishments pursuant to Section §551.071 (Consultation with Attorney).
3. Discussion regarding (re)appointments to city regulatory boards, commissions, and committees - specifically the Rockwall Economic Development Corporation (REDC) - pursuant to Section 551.074 (Personnel Matters)
4. Discussion regarding possible lease of real property on city owned land at Yellowjacket Park pursuant to Section §551.072 (Real Property).
5. Discussion regarding land acquisition adjacent to N. Goliad pursuant to Section §551.072 (Real Property).
6. Discussion regarding (re)appointment of municipal court judge and associate judge and related interviews, pursuant to Section 551.074 (Personnel Matters)
7. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney).

XV. RECONVENE PUBLIC MEETING & TAKE ANY ACTION AS RESULT OF EXECUTIVE SESSION

XVI. ADJOURNMENT

This facility is wheelchair accessible and accessible parking spaces are available. Request for accommodations or interpretive services must be made 48 hours prior to this meeting. Please contact the City Secretary's Office at (972) 771-7700 or FAX (972) 771-7727 for further information.

The City of Rockwall City Council reserves the right to adjourn into executive session at any time to discuss any of the matters listed on the agenda above, as authorized by Texas Government Code § 551.071 (Consultation with Attorney) § 551.072 (Deliberations about Real Property) § 551.074 (Personnel Matters) and § 551.087 (Economic Development)

I, Kristy Cole, City Secretary for the City of Rockwall, Texas, do hereby certify that this Agenda was posted at City Hall, in a place readily accessible to the general public at all times, on the **16th** day of **November**, 2018 at 4:00 p.m. and remained so posted for at least 72 continuous hours preceding the scheduled time of said meeting.

MEMORANDUM

TO: **Mayor and City Council**

FROM: **Rick Crowley, City Manager**

DATE: **November 16, 2018**

SUBJECT: **Hotel Occupancy Tax**

The Council has previously indicated it prefers to consider the City's future use of Hotel Occupancy Tax (HOT) receipts as a full Council. It is time to begin the discussion and resolution of several key questions which will guide HOT use moving forward.

I believe that the best way to begin this endeavor is through holding a dedicated workshop with the Council. So that the staff can prepare the information for that workshop, I hope that as many of the questions noted below can be answered Monday evening as is possible at the time:

HOT CVB related

- Is the Council interested in re-examining the various structures associated with operation of a CVB as have been employed by other cities and the extent to which they are funded by HOT receipts?
- Does the Council want to examine various options of incentivizing "head-in-beds" with use of HOT receipts regardless of which structure is selected?
- Does the Council want to examine the effectiveness of previous uses of HOT receipts in circumstances where these have been applied directly to incentivizing specific conferences and meetings?
- Is the Council interested in expanding the CVB efforts through use of HOT receipts?
- Does the Council have any other HOT related information or study directives for the City staff to prepare for Council consideration?

OTHER HOT Uses

- Does the Council want to review our current policies and practices for use of HOT receipts?
- Is the Council interested in reviewing the legally authorized uses for HOT receipts?
- Does the Council want to initiate study of the use of HOT receipts for funding construction of a conference/meeting (or other) facility and/or paying for its operating expenses?
- Does the Council want to examine City uses of HOT receipts?

- Does the Council want to examine the historic uses of HOT receipts to determine if charges from historic uses might warrant policy of process changes for their use?
- Does the Council have any other HOT related information or study directives for the City staff to provide for Council consideration?

As a reminder, HOT collections currently total about $425,000 per year. With the expiration of the rebate period to the Hilton ending December 31, 2018, it is anticipated that the total annual collectors will increase to about $1,025,000 when that occurs.

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Mayor and City Council**

FROM: **Rick Crowley, City Manager**

DATE: **November 16, 2018**

SUBJECT: **Strategic Plans**

Please find the attached spreadsheets related to updating Strategic Planning. These had been prepared at the time of budget consideration; however, we did not consider them specifically in the budget workshop. In preparation of moving them forward for discussion on Monday there were actually several changes that were made to them to bring them to date and to be consistent with the adopted budget for the coming year.

As they were being initially prepared, a concerted effort was made to eliminate those entries on the previous spreadsheet that were not strategic (operational) in nature. We have also changed to design of the spreadsheet so it reflects “by strategy and by department” rather than strictly “by department.”

When these were presented by department, because of the workload of the Council at each meeting (regular meeting and workshop agendas), it took at least three meetings to get them before you for comment and consideration. On Monday evening, I plan to present the item to you for all departments. On Monday, I look forward to direction from the Council in general and as to the approach we have taken, whether the Council is interested in specific presentation by selected or all departments, and as to any specific area of content contained (or not contained) in the document.

Strategy 1: Maintain percentage of residential assessed value close to 67%.

Department	Departmental Strategic Goal	Strategic Initiatives	Target Completion Date	Completion
Finance	Initiate an acquisition process for the "Right to Serve" the 23 unique areas of the City which are served by rural Water Supply Corporations (WSC).	Educate developers on their ability to opt out of WSC	Q2 FY 2019	
	Ensure rates are established sufficient to account for future water/wastewater system costs.	Complete rate study and present results to Council for consideration and implementation	Q1 FY 2019	
P&Z	Balance and maintain the city's current land use ratio.	Amend the Comprehensive Plan to incorporate policies targeted at maintaining the current ratio of residential to non-residential assessed value.	Q1 FY 2019	
		Re-evaluate the Future Land Use Map to ensure compliance to the targeted ratio and make any necessary corrections.	Q1 FY 2019	
		Develop a process to provide the City Council with information relating to land use ratios and assessed value ratios with every zoning case.	Q1 FY 2020	
		Revise the Planning and Zoning Division's case memorandums to include information concerning changes to the City's targeted ratio of residential to non-residential assessed value.	Q2 FY 2019	

15

Department	Departmental Strategic Goal	Strategic Initiatives	Target Completion Date	Completion
Public Works	Assist the development community to better understand the infrastructure requirements and provide decision makers with the tools to allow for optimal selection of development options.	Assess the drainage and floodways as shown in the current Master Drainage Study to provide better information to the development community within the city limits and our ETJ.	Q4 FY 2020	
		Present revised Standards of Design and Construction to City Council for adoption, thus inform and educate the development community regarding the new criteria for development within the city.	Q2 FY 2019	
		Complete Master Water/Sewer Plan update and Water and Sewer Impact Fee Study to present to City Council for adoption	Q4 FY 2019	
PARD	Ensure developers make equitable contributions to the park system	Evaluate the current Parkland Dedication ordinance relative to future needs, costs alignment with Comprehensive Plan	Q2 FY 2019	
		Park Board to develop and present recommendations to City Council for consideration	Q3 FY 2019	

16

Department	Departmental Strategic Goal	Strategic Initiatives	Target Completion Date	Completion

Strategy 2: Maintain the high per capita sales tax revenue of $399.

Department	Departmental Strategic Goal	Strategic Initiatives	Target Completion Date	Completion
Administration	Finalize appropriate retail development and recruitment initiatives related to achievement of strategic/financial strategies of the City Council.	Work with the City Council to determine appropriate City and EDC role in retail recruitment including any associated costs that may be applicable.	Q4 FY 2019	
	Propose short and long-term alternatives for use of Hotel Occupancy Tax (HOT) Revenue.	Provide assistance to the Council to explore alternatives for future Convention and Visitors Bureau activities and related fund uses	Q2 FY 2019	
P&Z	Maintain or increase the current per capita sales tax revenue.	Amend the comprehensive plan to layout the city's demographic data and perceived trade area.	Q1 FY 2019	
		Review the City's zoning code to ensure regulations on non-commercial development are not a hindrance to attracting high-quality regional development.	Q1 FY 2020	
		Create IH-30 commercial corridor plan targeted at emphasizing strategic properties and development opportunities.	Q3 FY 2019	

Department	Departmental Strategic Goal	Strategic Initiatives	Target Completion Date	Completion

Strategy 3: Develop and implement a thoughtful and funded long term street/sewer/water infrastructure plan.

Department	Departmental Strategic Goal	Strategic Initiatives	Target Completion Date	Completion
Administration	Provide assistance in the development of a long-term plan for boundary planning, future annexation, water and wastewater service options.	Prepare and assemble data for City Council to consider regarding boundary planning, future annexation, water and wastewater service options.	Q4 FY 2019	
	Define the City's role in developing an overall plan for the Outer Loop.	Work with County and other cities north of I-30 and encourage completion of more detailed route study north of I-30.	Q4 FY 2019	
		Engage with state and regional officials to help facilitate planning for route studies south of I-30.	Q1 FY 2020	
PARD	Develop South Community Park.	Identify and acquire ~50 acre site south of I-30 for the south community park.	Q4 FY 2019	
		Initiate design process including public hearings, Park Board input, and other tools to present to City Council.	Q2 FY 2020	

18

Department	Departmental Strategic Goal	Strategic Initiatives	Target Completion Date	Completion
	Develop Lakeside Park	Expand takeline lease area to secure the opportunity to develop a lakeside park and open space, from the Shores Golf Course north to the county line	Q3 FY 2019	
		Conduct preliminary cost estimates, phasing of development, and determine funding source and potential grant opportunities	Q4 FY 2020	
Public Works	Develop an infrastructure life cycle management program that provides a comprehensive review of the investments needed to sustain service through the operations, maintenance, and renewal of existing infrasture.	Complete engineering design of 8 street rehabilitation projects within the 2018 Street Bond funding	Q4 FY 2020	
		Highland Drive and portions of Stonebridge and Shoretrail project construction to commence	Q2 FY 2019	
		Begin implemention of program to replace water pipes below six-inch in diameter, related to pressure, and fire protection issues	Q4 FY 2020	
		Begin implementation of program to replace sewer pipes constructed of vitrified clay tile (VCT), cast iron, and ductile iron.	Q4 FY 2020	

19

Department	Departmental Strategic Goal	Strategic Initiatives	Target Completion Date	Completion

Strategy 4: Public Safety

Department	Departmental Strategic Goal	Strategic Initiatives	Target Completion Date	Completion
HR	Staff will work with Council to begin the development of a comprehensive, in-house study of employee compensation for FY 2019	Work with Council to propose and adopt compensation philosophies and specific goals	Q2 FY 2019	
		Work with hiring supervisors and interview boards to evaluate causes and pursue alternatives to resolve identified recruitment and retention challenges.	Q4 FY 2019	
Fire	Provide on duty staffing levels sufficient to respond simultaneously to a structure fire in a single family home and a second incident, e.g. a motor vehicle collision (MVC) – 16 on duty personnel to be achieved utilizing full-time and/or part-time personnel	Enhance the training program through the implementation of a Training/Safety Officer position (part-time to full-time position)	Q1 FY 2019	Complete
		Enhance the accountability system so that personnel can be organized into crews on 100% of incidents	Q1 FY 2019	
		Have 100% of new recruits trained to the level of TCFP Basic Firefighter within 6 months of their start date	Q2 FY 2019	
		Evaluate the benefit of certifying personnel in Blue Card ICS	Q2 FY 2018	Q3 FY 2018
	Ensure the health and safety of the membership	100% of members to complete a Huguley Assessment (or similar assessment) annually	Q1 FY 2019	Complete
		Develop a program for the cleaning and inspection (and documentation of said cleaning and inspection) of 100% of PPE on an annual basis.	Q3 FY 2018	Q3 FY 2018
	Provide rapid response times for service delivery	Report quarterly on our ability to have a 4 minute drive time or less to 90% of code 3 incidents within the city limits	Q2 FY 2018	Q2 FY 2018

20

Department	Departmental Strategic Goal	Strategic Initiatives	Target Completion Date	Completion
		Report quarterly on our ability to have a full alarm assignment (13 adequately trained personnel) on scene at working structure fires within 8 minutes 90% of the time.	Q3 FY 2018	
	Open new fire stations as needed	Evaluate the need for and/or begin the planning of an additional station when: (1)The number of built-upon street miles in a district without a station is equal to 50% of the average built-upon street miles in districts with stations	Ongoing assessment	
	Replace fire apparatus at the end of its useful life	Evaluate apparatus replacement guidelines	Q4 FY 2018	Complete
		Evaluate the type of apparatus (ladder, engine, etc.) that are housed in stations	Q4 FY 2018	Complete
	Implement policies and programs that assist in minimizing community risks.	Establish a community risk-based fire inspection program.	Q4 FY 2018	Complete
		Improve efficiency of inspections.	Q2 FY 2019	
		Enhance fire investigation through improved policies and procedures.	Q2 FY 2019	
		Enhance public education programs offered within the City.	Q2 FY 2019	
	Retain or improve the ISO rating which is currently a 2.	Work to ensure that organizational decisions concering communications, fire operations, water supply, and fire prevention and public education are consistent with maintaining said ISO rating.	Ongoing assessment

MEMORANDUM

TO: **Mayor and Councilmembers**

FROM: **Rick Crowley, City Manager**

DATE: **November 16, 2018**

SUBJECT: **Compensation Discussion**

During the budget process, Council indicated a desire to conduct a comprehensive review of compensation to include all aspects of compensation.

Our recommendation is this first be considered by sub-committee of the Council. If we use the subcommittee approach then the full Council should provide direction to guide the subcommittee as well as set reporting requirements back to the full Council on an interim basis.

If Council is satisfied with the subcommittee approach then we can ratify this process and appoint the subcommittee this evening.

Rockwall, Texas

Proclamation

Whereas, in the United States, nearly 30 million people – including 400,000 in North Texas – have diabetes, a serious disease with potentially life-threatening complications such as heart disease, stroke, blindness, kidney disease and amputation; and

Whereas, approximately 1.25 million American children and adults have type 1 diabetes, and an additional 86 million people in the United States are at risk for developing type 2 diabetes; and

Whereas, recent estimates project that as many as one in three American adults will have diabetes by 2050 if current trends continue; and

Whereas, an increase in community awareness is necessary to put a stop to the diabetes epidemic; and

Whereas, this year's American Diabetes Month focuses on promoting health after gestational diabetes, which is a type of diabetes that develops during pregnancy; and

Whereas, mothers who've had gestational diabetes need to know that they and their children have an increased lifelong risk for developing type 2 diabetes.

Now, Therefore, I, Jim Pruitt, Mayor of the City of Rockwall, Texas, do hereby proclaim the month of November, 2018 as

DIABETES AWARENESS MONTH

in the City of Rockwall and encourage all citizens to consider participating in collective efforts to confront, fight and, most importantly, change the future of this deadly disease.

In Witness Whereof, I hereunto set my hand and official seal this 19th day of November, 2018.

_____

Jim Pruitt, Mayor

MINUTES
ROCKWALL CITY COUNCIL
Monday, November 05, 2018
4:15 p.m. Regular City Council Meeting
City Hall - 385 S. Goliad, Rockwall, Texas 75087

I. CALL PUBLIC MEETING TO ORDER

Mayor Pruitt called the public meeting to order at 4:15 p.m. Present were Mayor Jim Pruitt, Mayor Pro Tem Kevin Fowler, and Council Members Patrick Trowbridge, Dana Macalik, John Hohenshelt, Bennie Daniels and Trace Johannesen. Also present were City Manager Rick Crowley, Assistant City Managers Mary Smith and Brad Griggs and the city's legal counsel, Patrick Lindner.

Mayor Pruitt then read the following discussion items into the record before recessing the public meeting to go into Executive Session.

II. EXECUTIVE SESSION.

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding (re)appointment of municipal court judge and associate judge and related interviews, pursuant to Section 551.074 (Personnel Matters)
2. Discussion regarding legal advice associated with homeowners association (HOA) regulations within the city pursuant to Section 551.071 (Consultation with Attorney).
3. Discussion regarding land acquisition adjacent to N. Goliad pursuant to Section §551.072 (Real Property).
4. Discussion regarding possible sale or lease of real property / land in the vicinity of County Line Road pursuant to Section §551.072 (Real Property).
5. Discussion regarding legal issues pertaining to potential annexation pursuant to Section §551.071 (Attorney/Client Consultation).
6. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney).

III. ADJOURN EXECUTIVE SESSION

Executive Session was adjourned at 5:35 p.m.

IV. RECONVENE PUBLIC MEETING (6:00 P.M.)

Mayor Pruitt reconvened the public meeting at 6:00 p.m.

V. TAKE ANY ACTION AS A RESULT OF EXECUTIVE SESSION

Mayor Pro Tem Fowler shared that no action was needed as a result of Executive Session this evening.

VI. INVOCATION AND PLEDGE OF ALLEGIANCE – COUNCILMEMBER JOHANNESEN

Councilmember Johannesen delivered the invocation and led the Pledge of Allegiance.

VII. PROCLAMATIONS / AWARDS

1. T.A.A.F. Region 7 Athlete of the Year (Keviah Ealy Recognition Day)

Mayor Pruitt called forth Keviah, her mom and her coach. He then read and presented Keviah with this proclamation, recognizing her for beating a state record in the "long jump" in track and field at the Texas Amateur Athletic Federation's summer games.

2. GIS Day Proclamation

Mayor Pruitt called forth staff members from the Planning Department's Geographical Information Systems (GIS) division. He then read and presented the proclamation for "GIS Day."

VIII. OPEN FORUM

Mayor Pruitt explained how Open Forum is conducted, asking if anyone would like to come forth and speak at this time.

Jim Turner
1691 Old E. Quail Run Road
Rockwall, TX 75087

Mr. Turner came forth and shared that he has read the draft of the city's updated comprehensive plan, and he has some concerns pertaining to drainage, retention and detention. He explained that as the city continues to grow, build and develop, flooding created by nearby reservoirs is going to increasingly become even more problematic than it already is today. He went on to encourage the City to look into potential grant opportunities to help address these types of concerns.

There being no one else wishing to come forth and speak, Mayor Pruitt closed Open Forum.

IX. CONSENT AGENDA

1. Consider approval of the minutes from the October 15, 2018 regular city council meeting, and take any action necessary

2. Consider approval of a resolution authorizing and consenting to the City of Forney, TX providing sanitary sewer service to 114.446 acres of land (the "Evans Tract") through an amendment to the City of Forney's Wastewater Service Contract with the Kaufman Co. Municipal Utility District No. 3 (Devonshire Development), and take any action necessary.

3. Consider entering into a cooperative purchasing agreement with the Public Procurement Authority, awarding a bid to ESCI and authorizing the City Manager to execute Contracts for (1) cooperative purchasing; (2) Community Risk Assessment Services for $47,346 to be funded with the previously awarded Homeland Security Grant funds, and take any action necessary.

4. Consider awarding a bid to Caldwell Country Chevrolet and authorizing the City Manager to execute a Purchase Order for a new Streets and Drainage Service Truck in the amount of $45,524 to be funded out of the Street Operations budget, and take any action necessary.

5. Consider approval of the total alternate Base Bid of Highland Drive Phase 1 Reconstruction Project (Bedford Falls Lane to Driftwood Street) and authorize the City Manager to execute a contract with Tiseo Paving Company in an amount of $1,095,983.25, to be funded by Street Bond Fund and the Water / Sewer Fund, and take any action necessary.

6. Consider approval of the Construction Materials Testing for Highland Drive Phase 1 Reconstruction Project and authorize the City Manager to execute a contract with Alliance Geotechnical Group for an amount of $16,484.00 to be funded by Street Bond Funds, and take any action necessary.

7. Consider approval of a professional engineering services contract for BW2 Engineers, Inc. to perform the engineering design services and specifications for the Lakedale Drive (Lakeview Drive to Ridge Road), South Lakeshore Drive (2000 Block), and Woodpark Lane (Spring Creek to S. Alamo Drive) Reconstruction Project in an amount not to exceed $184,300.00, to be paid for out of the 2018 Street Bond funds and water wastewater funds, and take any action necessary.

8. Consider approval of a professional engineering services contract for Dannenbaum Engineering Company – Dallas LLC. to perform the engineering design services and specifications for the Ridge Road West (Shores Boulevard to N. Goliad Street) Reconstruction Project in an amount not to exceed $370,047.49, to be paid for out of the 2018 Street Bond funds, and take any action necessary.

9. Consider authorizing the City Manager to execute a contract with MHS Planning and Design for engineering and design services in the amount of $51,600 as budgeted and funded by the Recreation Development Fund to develop a neighborhood park in The Harbor area, and take any action necessary.

10. **P2018-031** - Consider a request by First Christian Church Disciples of Christ for the approval of a replat for Lot 2, Block A, First Christian Church Disciples of Christ Addition, being a 5.231-acre parcel of land currently identified as Lot 1, Block A, First Christian Church Disciples of Christ Addition, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 47 (PD-47) for Single Family 10 (SF-10) District land uses, situated within the Scenic Overlay (SOV) District, addressed as 3375 Ridge Road (FM-740), and take any action necessary.

11. **P2018-034** - Consider a request by Dub Douphrate of Douphrate & Associates, Inc. on behalf of Trevor Arterburn of Teasdale Investments, LLC for the approval of a conveyance plat for Lot 1, Block A, Rustic Warehouse & Town Center Addition and Lot 9, Block 1, First United Methodist Church Addition being an 11.774-acre tract of land currently identified as Lot 8, Block 1 First United Methodist Church Addition and Tract 2 of the B. J. T. Lewis Survey, Abstract No. 255, City of Rockwall, Rockwall County, Texas, zoned Commercial (C) District, situated within the SH-205 Overlay (SH-205 OV) District, generally located in between S. Goliad Street [SH-205] and T. L. Townsend Drive, north of E. Yellow Jacket Lane, and take any action necessary.

12. **P2018-036** - Consider a request by Priya Acharya, PE of Weir & Associates, Inc. on behalf of Getra Thomason-Sanders of Chick-Fil-A, Inc. for the approval of a replat for Lot 8, Block A, Lakeshore Commons Addition, being a 1.401-acre parcel of land currently identified as Lot 2, Block A, Lakeshore Commons Addition, City of Rockwall, Rockwall County, Texas, zoned Planned Development District 65 (PD-65) for General Retail (GR) District land uses, situated within the North SH-205 Overlay (N. SH-205 OV) District, addressed as 1979 N. Goliad Street [SH-205], and take any action necessary.

Councilmember Trowbridge moved to approve the entire Consent Agenda (#s 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 12). Councilmember Daniels seconded the motion, which passed unanimously of those present (7 ayes to 0 nays).

X. APPOINTMENTS

1. Appointment with the Planning and Zoning Chairman to discuss and answer any questions regarding cases on the agenda and related issues and take any action necessary.

The Chairman was unable to attend this evening, so this item was not discussed, and no action was taken.

XI. PUBLIC HEARING ITEMS

1. **Z2018-032** - Hold a public hearing to discuss and consider a request by Bill Bricker of Columbia Development Company, LLC for the approval of an **ordinance** for a zoning change from a Light Industrial (LI) District to a Planned Development District for commercial, light industrial and townhome land uses on a 16.26-acre tract of land identified as Lot 1, Block 1, Indalloy Addition (7.409-acres) and Tract 31 of the R. Ballard Survey, Abstract No. 29, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, addressed as 1100 & 1300 E. Washington Street, and take any action necessary **(1st Reading).**

Planning Director Ryan Miller provided background information pertaining to this agenda item. On September 17, 2018, the City Council approved a motion to continue the public hearing for this case and directed staff to work with the applicant to resolve the SH-66 right-of-way issue prior to the City Council taking action on the proposed zoning change. In accordance with this direction, staff met with the applicant on October 2, 2018. Through this meeting, staff and the applicant came to a consensus concerning SH-66, which involved minor revisions to the schematic alignment of this roadway. In accordance with this agreement, the applicant has revised the concept plan to show the full dedication of right-of-way for SH-66, which will be landscaped and irrigated by the City -- at the time of dedication -- until the roadway is constructed. On October 30, 2018, the Planning and Zoning Commission reviewed the changes and approved a motion to recommend approval of the zoning change by a vote of 6-0, with Chairman Lyons absent.

Following Mr. Miller's comments, Mayor Pruitt then opened the public hearing, asking if anyone would like to come forth and speak at this time. There being no one indicating such, he then closed the public hearing.

Bill Bricker, the applicant, came forth and briefly commented.

Councilmember Trowbridge moved to approve Z2018-032 with staff recommendations. Councilmembers Daniels seconded the motion. Daniels thanked staff for working so diligently with Mr. Bricker between the time he initially came before Council concerning this matter and now. The ordinance was then read as follows:

CITY OF ROCKWALL
ORDINANCE NO. 18-XX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, SO AS TO CHANGE THE ZONING FROM A LIGHT INDUSTRIAL (LI) DISTRICT TO PLANNED DEVELOPMENT DISTRICT XX (PD-XX) FOR TOWNHOMES, COMMERCIAL/RETAIL, AND LIGHT INDUSTRIAL LAND USES ON THE SUBJECT PROPERTY, BEING A 16.26-ACRE TRACT OF LAND IDENTIFIED AS LOT 1, BLOCK 1, INDALLOY ADDITION AND TRACT 31 OF THE R. BALLARD SURVEY, ABSTRACT NO. 29, CITY OF ROCKWALL, ROCKWALL COUNTY, TEXAS AND MORE FULLY DESCRIBED HEREIN BY *EXHIBIT 'A'* AND DEPICTED HEREIN BY *EXHIBIT 'B'*; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

The motion passed by a vote of 7 ayes to 0 nays.

2. **Z2018-042** - Hold a public hearing to discuss and consider the approval of an **ordinance** for a text amendment affecting various sections of the Unified Development Code [Ordinance No. 04-38] for the purpose of generally amending the Development Standards and procedural processes for the approval of Variances, Exceptions, and Waivers, and take any action necessary **(1st Reading).**

Planning Director Ryan Miller briefed the Council on the draft text amendments/updates that are contained in this draft ordinance and the reasoning behind them. Councilmember Macalik thanked Mr. Miller for all the hard work that he performed in getting this prepared, especially in such a short amount of time. Councilmember Trowbridge commented that he, overall, likes the "look and feel" of these draft text amendments. Discussion ensued pertaining to the role(s) of the Planning & Zoning Commission (technical review) and the City Council (would serve as sort of an appeals board). Mayor Pro Tem Fowler stressed that it will be very important for councilmembers to be sure to appoint 'the right' people to serve on the P&Z Commission.

Mayor Pro Tem Fowler moved to approve the ordinance. Councilmember Hohenshelt seconded the motion. The ordinance was read as follows:

CITY OF ROCKWALL
ORDINANCE NO. 18-XX

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, BY AMENDING ARTICLE II, *AUTHORITY AND ADMINISTRATIVE PROCEDURES*, ARTICLE III, *ZONING DISTRICTS AND MAPS*, ARTICLE IV, *PERMISSIBLE USES*, ARTICLE V, *DISTRICT DEVELOPMENT STANDARDS*, AND APPENDIX F, *LANDSCAPE GUIDELINES AND REQUIREMENTS*; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A

REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

The motion passed by a vote of 7 ayes to 0 nays.

XII. ACTION ITEMS

1. **SP2018-033** - Discuss and consider a request by Mahbub H. Dewan of D1 Architect & Associates, Inc. on behalf of Deepak Gandhi of Rockwall Inn Keepers I, LTD for the approval of variances to the material and parking requirements in conjunction with an approved site plan for a hotel on a 2.681-acre identified as Lot 1, Block A, Hyatt Rockwall Addition, City of Rockwall, Rockwall County, Texas, zoned Commercial (C) District, situated within the IH-30 Overlay (IH-30 OV) and Scenic Overlay (SOV) Districts, located at the southeast corner of the intersection of Laguna Drive and La Jolla Pointe Drive, and take any action necessary.

Planning Director, Ryan Miller, provided background information pertaining to this item. The applicant is requesting approval of variances to the exterior material requirements and the parking requirements of the Unified Development Code (UDC). This request is in conjunction with an approved amending site plan [Case No. SP2018-033] -- approved by the Planning and Zoning Commission on October 30, 2018 -- for the purpose of constructing a four (4) story hotel [Hyatt Place Hotel] that will contain a total of 100 rooms and an 1,800 SF meeting room. The SUP allows for an overall height not exceed 60-feet and limits the hotel to suites that do not contain kitchen facilities or cooktops. The hotel will be located at the southeast corner of the intersection of Laguna Drive and La Jolla Pointe Drive and is within the IH-30 Overlay (IH-30 OV) and Scenic Overlay (SOV) Districts.

Originally, this site plan was approved without variances. By amending the site plan and increasing the amount of stucco on the north (i.e. 58%) and west (i.e. 51%) elevations, the applicant will require approval of a variance to allow for cementitous materials to exceed a maximum 50% of the masonry requirement. Since this site is within the IH-30 Overlay (IH-30 OV) and Scenic Overlay (SOV) Districts, this will require approval by a ¾ majority vote of City Council. Approval of variances to the SOV and IH-30 OV is discretionary for the City Council.

The off-street parking requirements for a hotel requires one (1) space for each room (i.e. 100 parking spaces) and one (1) space for each 100-SF of the meeting room area at 50% of the total square footage [i.e. (1800-SF/100)*50% = 9 parking spaces]. The total number of parking spaces required for the site is 109 spaces; however, due to site constraints, the applicant will be parking deficient by three (3) parking spaces (i.e. only providing 106 of the 109 required parking spaces). This requires approval of a variance by a simple majority vote of City Council.

On October 30, 2018, the Architectural Review Board (ARB) recommended approval of the request by a vote of 4-0, with board members Neil, Meyrat and Wacker absent. Subsequently, on October 30, 2018, the Planning and Zoning Commission approved a motion to recommend approval per staff conditions. This motion was approved by a vote of 5-1, with Commissioner Logan dissenting and Chairman Lyons absent.

Following brief clarifications, Councilmember Trowbridge moved to approve all of the variance requests for SP2018-033, including staff recommendations. Councilmember Hohenshelt seconded the motion. Mayor Pro Tem Fowler asked for the ability to please address each variance request separately – one for the stucco-related variance request and one for the parking-related variance request.

Councilmember Trowbridge then amended his motion to only call for approval of the stucco-related variance. The motion passed by a vote of 6 in favor with 1 (Fowler) against. Councilmember Trowbridge then moved to approve the parking related variance request, including staff recommendations. Councilmember Macalik seconded the motion, which passed by a vote of 6 in favor with 1 against (Pruitt).

2. **SP2018-029** - Discuss and consider a request by Cameron Slown of FC Cuny Corporation on behalf of Tom Kirkland of TEKMAK Development Company for the approval of a variance to the cementitious material requirements in conjunction with a site plan for a residence hotel on a 2.8-acre tract of land being a portion of a larger 8.613-acre tract of land Tract 4 of the J. D. McFarland Survey, Abstract No. 145, and Lot 1, Block B, Goldencrest Addition, City of Rockwall, Rockwall County, Texas, zoned Commercial (C) District, situated within the IH-30 Overlay (IH-30 OV) District, situated north of the intersection of Greencrest Boulevard and the IH-30 Frontage Road, and take any action necessary.

Planning Director Ryan Miller provided background information pertaining to this agenda item and the associated request. The applicant is requesting a variance to the cementitious materials requirements associated with an approved sited plan for a 16,210 sq. foot residence hotel on the subject property. On February 6, 2017, the City Council approved a Specific Use Permit (SUP) [Ordinance No. 17- 07] allowing a residence hotel on the subject property. The proposed residence hotel will be situated on a 2.8-acre portion of a larger 8.613-acre tract of land (i.e. a portion of Tract 4 of the J. D. McFarland Survey, Abstract No. 145, and Lot 1, Block B, Goldencrest Addition). The proposed residence hotel will be situated behind an existing restaurant (Texas Roadhouse). The residence hotel will be four (4) stories (49-feet high), approximately 16,210 SF, and have 112 units with kitchen facilities. The hotel will be accessible from IH-30 via a mutual access easement and the main driveway located on Greencrest Boulevard. The hotel will utilize underground parking as well as surface parking. The subject property is zoned Commercial (C) District and situated within the IH-30 Overlay (IH-30 OV) District.

Based on the applicant's submittal, staff has identified the following variance:

1) IH-30 Overlay (IH-30 OV) District Standards

a. Cementitious Material. According to Subsection 6.6C.1, Masonry Requirements, of Section 6.6, IH-30 Overlay (IH-30 OV) District, of Article V, District Development Standards, of the Unified Development Code (UDC), cementitious materials (i.e. stucco) shall be limited to 50% of each building façade. In this case, the applicant is proposing to utilize between 69% to 79% stucco on each building façade. This variance will require a ¾ majority vote of the City Council members

On September 25, 2018 the Architectural Review Board (ARB) reviewed the proposed building elevations and requested 20% natural stone in-lieu of brick on each façade. Additionally, the Architectural Review Board (ARB) requested that the applicant utilize 3-part stucco in-lieu of EIFS.

On October 9, 2018, the Architectural Review Board (ARB) reviewed the revised building elevations. The applicant proposed cultured stone on all facades; however, the rear façade only utilized 13%. Additionally, the applicant proposed a secondary material that exceeded the 10% maximum as well as stucco that exceeded the maximum of 50% on all facades. The Architectural Review Board (ARB) requested additional revisions from the applicant and made a motion to postpone action on the site plan to allow the Architectural Review Board (ARB) to review the revisions. This motion passed by a vote of 6-0 with Board Member Meyrat absent.

On October 30, 2018, the Architectural Review Board (ARB) reviewed the revised building elevations. The applicant's revisions eliminated the secondary materials, and utilized at least 20% natural stone on all facades. The Architectural Review Board's (ARB's) motion to recommend approval of the variance to the cementitious materials passed by a vote of 4-0 with Board Members Meyrat, Wacker, and Neill absent.

On October 9, 2018, the Planning and Zoning Commission's motion to postpone action on the site plan passed by a vote of 6-0 with Commissioner Fishman absent.

On October 30, 2018, the Planning and Zoning Commission's motion to approve the site plan and to recommend approval of the variance to the cementitious materials requirements passed by a vote of 6-0 with Commissioner Lyons absent.

Tom Kirkland
613 Willow Springs Dr.
Heath, TX

The applicant, Mr. Kirkland, came forth and briefed the Council on the "high points" of his variance requests. Extensive dialogue took place pertaining to these variance requests, including questions pertaining to why the city has standards in place to begin with if variance requests are always going to be coming before Council for consideration. Mayor Pruitt clarified with Mr. Miller, confirming that variance requests are typically brought forth due to financial considerations on the part of the developer (they want to build things for less money).

Following extensive dialogue, Councilman Daniels made a motion to deny SP2018-029. Councilmember Hohenshelt seconded the motion, which passed by a vote of 7 ayes to 0 nays.

3. Discuss and consider establishing a policy for requiring a Traffic Impact Analysis (TIA), and take any action necessary.

Mayor Pruitt indicated that he would like to address this item as well as Action item #4 at the same time.

Planning Director, Mr. Miller briefed the Council on the following draft policy:

Traffic Impact Analysis Policy

A Traffic Impact Analysis (TIA) shall be required to be submitted with a zoning applications if: [*1*] a proposed Planned Development District is 25-acres or greater, or [*2*] when a proposed zoning change necessitates a change in the Future Land Use Map that is considered to be more intense than the current designation (*e.g. a change from a Low Density Residential designation to a Medium Density Residential designation*). The TIA may be waived: [*1*] by City staff if the proposed zoning change is five (5) acres or less, or [*2*] in all circumstances by the City Council. In cases where a TIA is waived, there should be a finding that sufficient public roadway facilities are in existence.

In addition to providing direction on the proposed policy, the City Council also directed staff to require that a TIA be prepared by an engineer chosen by the City, and that a retainer would be required from an applicant to initiate the study. This is similar to how the City's infrastructure studies are currently being required and prepared. In response to this direction, staff requested a rough estimate of cost from an engineer that currently has an engineering services contract with the City. The estimate for preparing a TIA is as follows:

Small TIA: $6,000.00 - $9,000.00
Large TIA: $9,001.00 - $15,000.00+

Mr. Miller explained that the typical estimated turnaround time on a TIA was estimated to be two (2) weeks for traffic counts and an addition five (5) weeks for the preparation of the TIA. This means that before an applicant would be able to submit a zoning application, they would need to submit a request to perform a TIA a minimum two (2) months prior. During this two (2) months staff would also have the applicant submit a request for an infrastructure study if necessary.

As part of this quote, staff also requested a quote for reviewing an existing TIA prepared by an outside engineer. This was done to give the City Council an alternative to engaging an in-house engineer. The estimate for review of a TIA is as follows:

Small TIA: $2,000.00 - $3,500.00
Large TIA: $3,501.00 - $5,500.00

In addition, to these costs the engineering company also quoted a $1,000.00 fee per meeting that the engineer was required to attend.

Following additional, extensive comments, Mayor Pruitt moved to approve establishing this policy as presented, calling for a TIA to be required in the following two circumstances - [1] when a proposed Planned Development District is 25-acres or greater, or [2] when a proposed zoning change necessitates a change in the Future Land Use Map that is considered to be more intense than the current designation. Councilmember Hohenshelt seconded the motion. Following brief comments, the motion passed unanimously.

4. Discuss the requirements for a Traffic Impact Analysis (TIA) as related to Planned Development District 32 (PD-32), and take any action necessary.

Mayor Pruitt commented that he is fine with the way staff has proposed to handle TIAs related to development in PD-32. He summarized that the Planning & Zoning Commission will be able to request traffic impact analyses at the time of site plan submittal. Mayor Pruitt asked Planning Director, Mr. Miller, if any action on the part of the Council is needed pertaining to this particular agenda item. Mr. Miller indicated that no action is necessary.

5. Discuss and consider nomination of a Board Member (Place 2) and associated "alternate" to the STAR Transit Board of Directors, and take any action necessary.

Mayor Pruitt shared that he believes Councilmember Macalik has been doing a good job in this role, and Councilmember Fowler has been serving well as an "alternate." He then motioned to resubmit Councilmember Macalik to serve and to have Councilmember Fowler be an "alternate." Councilmember Hohenshelt seconded the motion, which passed by a vote of 7 ayes to 0 nays.

XIII. CITY MANAGER'S REPORT TO DISCUSS CURRENT CITY ACTIVITIES, UPCOMING MEETINGS, FUTURE LEGISLATIVE ACTIVITIES, AND OTHER RELATED MATTERS.

1. Departmental Reports
Fire Department Monthly Report - September 2018
GIS Division Monthly Report - September 2018

Harbor PD Monthly Report - September 2018
Internal Operations Department Monthly Report - September 2018
Police Department Monthly Report - September 2018
Recreation Monthly Report - September 2018
Rockwall Animal Adoption Center Monthly Report - September 2018
Rockwall Meals on Wheels / Senior Services 4th Quarter Report - 2018
STAR Transit Monthly Report - September 2018

2. City Manager's Report

Councilmember Hohenshelt requested an update from staff concerning strategic planning. Mr. Crowley shared that this information is ready and will be provided to Council at the next meeting.

Mayor Pruitt reminded everyone to get out and vote tomorrow between 7 AM and 7 PM.

XIV. EXECUTIVE SESSION

THE CITY OF ROCKWALL CITY COUNCIL WILL RECESS INTO EXECUTIVE SESSION TO DISCUSS THE FOLLOWING MATTERS AS AUTHORIZED BY CHAPTER 551 OF THE TEXAS GOVERNMENT CODE:

1. Discussion regarding (re)appointment of municipal court judge and associate judge, pursuant to Section 551.074 (Personnel Matters)
2. Discussion regarding legal advice associated with homeowners association (HOA) regulations within the city pursuant to Section 551.071 (Consultation with Attorney).
3. Discussion regarding land acquisition adjacent to N. Goliad pursuant to Section §551.072 (Real Property).
4. Discussion regarding possible sale or lease of real property / land in the vicinity of County Line Road pursuant to Section §551.072 (Real Property).
5. Discussion regarding legal issues pertaining to potential annexation pursuant to Section §551.071 (Attorney/Client Consultation).
6. Discussion regarding the appeal to the Public Utility Commission filed by the cities of Garland, Mesquite, Plano and Richardson against the North Texas Municipal Water District (NTMWD) regarding water rates pursuant to Section §551.071 (Consultation with Attorney).

XV. RECONVENE PUBLIC MEETING & TAKE ANY ACTION AS RESULT OF EXECUTIVE SESSION

XVI. ADJOURNMENT

The meeting was adjourned at 7:13 p.m.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS 19th DAY OF NOVEMBER, 2018.

CITY OF ROCKWALL

ORDINANCE NO. 18-46

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, SO AS TO CHANGE THE ZONING FROM A LIGHT INDUSTRIAL (LI) DISTRICT TO PLANNED DEVELOPMENT DISTRICT XX (PD-XX) FOR TOWNHOMES, COMMERCIAL/RETAIL, AND LIGHT INDUSTRIAL LAND USES ON THE SUBJECT PROPERTY, BEING A 16.26-ACRE TRACT OF LAND IDENTIFIED AS LOT 1, BLOCK 1, INDALLOY ADDITION AND TRACT 31 OF THE R. BALLARD SURVEY, ABSTRACT NO. 29, CITY OF ROCKWALL, ROCKWALL COUNTY, TEXAS AND MORE FULLY DESCRIBED HEREIN BY *EXHIBIT 'A'* AND DEPICTED HEREIN BY *EXHIBIT 'B'*; PROVIDING FOR SPECIAL CONDITIONS; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City has received a request by the applicant Bill Bricker on behalf of the owner, Columbia Development Company, LLC, for the approval of a zoning change from a Light Industrial (LI) District to a Planned Development District for the purpose of establishing commercial/retail, light industrial, and townhome land uses on a 16.26-acre tract of land identified as Lot 1, Block 1, Indalloy Addition and Tract 31 of the R. Ballard Survey, Abstract No. 29, City of Rockwall, Rockwall County, Texas, zoned Light Industrial (LI) District, addressed as 1100 & 1300 E. Washington Street and more fully described in *Exhibit 'A'* and depicted in *Exhibit 'B'* of this ordinance, which hereinafter shall be referred to as the *Subject Property* and incorporated by reference herein; and

WHEREAS, the Planning and Zoning Commission of the City of Rockwall and the governing body of the City of Rockwall in compliance with the laws of the State of Texas and the ordinances of the City of Rockwall have given the requisite notices by publication and otherwise, and have held public hearings and afforded a full and fair hearing to all property owners generally and to all persons interested in and situated in the affected area, and in the vicinity thereof, and the governing body in the exercise of its legislative discretion, has concluded that the Unified Development Code [*Ordinance No. 04-38*] should be amended as follows:

NOW, THEREFORE, **BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:**

SECTION 1. That the *Subject Property* shall be used only in the manner and for the purposes authorized by this Planned Development District Ordinance and the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future;

SECTION 2. That development of the *Subject Property* shall be in accordance with the *Planned Development Concept Plan*, contained in *Exhibit 'D'* of this ordinance, attached hereto and incorporated herein by reference as *Exhibit 'D'*, which is deemed hereby to be a condition of approval of the amended zoning classification for the *Subject Property*;

SECTION 3. That development of the *Subject Property* shall be in accordance with the *Development Standards*, described in *Exhibit 'E'* of this ordinance, attached hereto and incorporated herein by reference as *Exhibit 'E'*, which is deemed hereby to be a condition of approval of the amended zoning classification for the *Subject Property*;

SECTION 4. That a preliminary plat for the entire *Subject Property -- as depicted in Exhibits 'C' & 'D' of this ordinance* -- shall be submitted prior to any other submittal for any portion of the *Subject Property*.

SECTION 5. That development of *Tract 1* of the *Subject Property -- as depicted in Exhibits 'C' & 'D' of this ordinance --* shall be in conformance with the schedule listed below (*except as set forth below with regard to simultaneous processing and approvals*).

(a) The procedures set forth in the City's subdivision regulations on the date this ordinance is approved by the City, as amended by this ordinance [*including Subsections 5(b) through 5(d) below*], shall be the exclusive procedures applicable to the subdivision and platting of *Tract 1* as depicted in *Exhibits 'C'* & *'D'* of this ordinance.

(b) The following plans and plats shall be required in the order listed below (*except as set forth below with regard to simultaneous processing and approvals*). If required, the City Council shall act on an application for an *Open Space Master Plan* in accordance with the time period specified in *Section 212.009* of the *Texas Local Government Code*.

(1) PD Site Plan
(2) Final Plat

(c) *PD Site Plan.* A *PD Site Plan* covering all of *Tract 1* as depicted in *Exhibit 'B'* of this ordinance shall be submitted and shall identify all site/landscape/hardscape plan(s) for all open space, neighborhood parks, trail systems, street buffers and entry features. A *PD Site Plan* application may be processed by the City concurrently with a *Final Plat Application* after engineering approval.

(d) *Final Plat.* Prior to the issuance of any building permits, a *Final Plat*, for all of *Tract 1* as depicted in *Exhibits 'C'* & *'D'* of this ordinance shall be submitted for approval.

SECTION 6. That development of *Tracts 2, 3, 4 & 5* of the *Subject Property -- as depicted in Exhibits 'C' & 'D' of this ordinance --* shall be in conformance with the procedures set forth in the Unified Development Code [*Ordinance No. 04-38*];

SECTION 7. That any person, firm, or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a penalty of fine not to exceed the sum of *Two Thousand Dollars* (*$2,000.00*) for each offense and each and every day such offense shall continue shall be deemed to constitute a separate offense;

SECTION 8. That if any section, paragraph, or provision of this ordinance or the application of that section, paragraph, or provision to any person, firm, corporation or situation is for any reason judged invalid, the adjudication shall not affect any other section, paragraph, or provision of this ordinance or the application of any other section, paragraph or provision to any other person, firm, corporation or situation, nor shall adjudication affect any other section, paragraph, or provision of the Unified Development Code, and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions for this ordinance are declared to be severable;

SECTION 9. The standards in this ordinance shall control in the event of a conflict between this ordinance and any provision of the Unified Development Code or any provision of the City Code, ordinance, resolution, rule, regulation, or procedure that provides a specific standard that is different from and inconsistent with this ordinance. References to zoning district regulations or other standards in the Unified Development Code (including references to the *Unified Development Code*), and references to overlay districts, in this ordinance or any of the Exhibits hereto are those in effect on the date this ordinance was passed and approved by the City Council of the City of Rockwall, Texas;

SECTION 10. That this ordinance shall take effect immediately from and after its passage;

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 4TH DAY OF SEPTEMBER, 2018.

Jim Pruitt, Mayor

ATTEST:

Kristy Cole, City Secretary

APPROVED AS TO FORM:

Frank J. Garza, City Attorney

1st Reading: November 5, 2018

2nd Reading: November 19, 2018

All that certain lot, tract or parcel of land situated in the *R. BALLARD SURVEY, ABSTRACT NO. 29*, City of Rockwall, Rockwall County, Texas, and being a part of Lot 1, Block 1, *INDALLOY ADDITION*, an Addition to the City of Rockwall, Texas, according to the Plat thereof recorded in Cabinet D, Slide 273 of the Plat Records of Rockwall County, Texas, and also being a part of a 98.319 acres tract of land as described in a Warranty deed from Alumax Aluminum Corporation to Columbia Extrusion Corporation, dated December 22, 1988 and being recorded in Volume 444, Page 102 of the Real Property Records of Rockwall County, Texas, and being more particularly described as follows:

BEGINNING at a 1/2" iron rod found for corner at the northeast corner of said Lot 1, Block 1, said point being in the south right-of-way line of E. Washington Street;

THENCE S. 06 deg. 42 min. 50 sec. E. along the east boundary line of Lot 1,a distance of 718.54 feet to a 1/2" iron rod found for corner;

THENCE N. 85 deg. 37 min. 16 sec. W .a distance of 435 .64 feet to a 1/2" iron rod found for corner on the West boundary line of said Lot 1, Block 1;

THENCE N. 83 deg. 23 min. 14 sec. W. a distance of 274.94 feet to a 1/2" iron rod found for corner;

THENCE S. 81 deg. 27 min. 00 sec. W. a distance of 408.12 feet to a Y," iron rod found for corner in the east boundary line of *PARK PLACE WEST II*, according to the Amended plat thereof recorded in Cabinet G, Slide 100, of the Plat Records of Rockwall County, Texas;

THENCE N. 04 deg. 52 min. 54 sec. W. along said addition, a distance of 106.88 feet to a W' iron rod found for corner;

THENCE N. 07 deg. 20 min. 27 sec. E. along said addition, a distance of 603.20 feet to a W' iron rod found for corner in the south line of E. Washington Street;

THENCE N. 89 deg. 51 min. 05 sec. E. along the south line of said street, a distance of 513.76 feet to a P-K nail found for corner at the northwest corner of said Lot 1, Block 1;

THENCE N. 89 deg. 34 min. 40 sec. E. along the south line of said street and north line of said Lot 1, a distance of 445.34 feet to the *POINT OF BEGINNING* and containing 16.26 acres of land.

Tracts 1-5 (16.26-Acres): Development Standards for all Tracts

(1) *Landscaping Standards.*

(i) *Landscape Requirements.* Landscaping shall be reviewed and approved with a *PD Site Plan*. All *Canopy/Shade Trees* planted within this development shall be a minimum of three (3) caliper inches in size and all *Accent/Ornamental/Under-Story Trees* shall be a minimum of four (4) feet in total height.

(ii) *Landscape Buffers (Streets A, B, & C and Other Streets).* A minimum of a ten (10) foot landscape buffer shall be provided along the frontage of *Streets A, B & C* as depicted in *Exhibit 'D'* of this ordinance, and shall incorporate a minimum of one (1) canopy tree per 50-feet of linear frontage unless otherwise specified in this ordinance. Any streets added to the subject property that are not depicted on the Concept Plan in *Exhibit 'D'* of this ordinance or referenced in *Exhibit 'E'* of this ordinance shall also be subject to this requirement.

(iii) *Landscape Buffer and Sidewalks (SH-66/SH-66 Right-of-Way)*. A minimum of a 20-foot landscape buffer shall be provided along the future right-of-way for SH-66 (*outside of and beyond any required right-of-way dedication*), and shall incorporate ground cover, a *built-up* berm and/or shrubbery or a combination thereof along the entire length of the frontage. Berms and/or shrubbery shall have a minimum height of 30-inches and a maximum height of 48-inches. In addition, two (2) canopy trees shall be planted per 100-feet of linear frontage.

(iv) *Landscape Buffer (Adjacent to Residential).* A minimum of a 20-foot landscape buffer shall be provided along the western boundary of *Tracts 2 & 4* (*i.e. areas adjacent to residential land uses*). The landscape buffer shall incorporate a combination of shrubbery and ground cover along the entire length of the adjacency for the purpose of screening the commercial areas from the residential areas without using a physical barrier. In addition, the landscape buffer shall incorporate canopy trees planted on 20-foot centers along the entire length of the adjacency. *Tract 4* shall also incorporate a minimum of a six (6) foot wrought iron fence in the required landscape buffer.

(v) *Irrigation Requirements.* Irrigation shall be installed for all required landscaping. Irrigation installed in these areas shall be designed by a Texas licensed irrigator or landscape architect.

(2) *Washington Street.* The applicant shall *not* be responsible for upgrading E. Washington Street to a M4U (*major collector, four [4] lane, undivided roadway*) as shown on the Master Thoroughfare Plan in the Comprehensive Plan.

(3) *Buried Utilities.* New transmission and distribution power-lines required to serve the *Subject Property* shall be placed underground, whether such lines are located internally or along the perimeter of the *Subject Property*, unless otherwise authorized by the City Council. The *Developer* shall not be required to re-locate existing overhead power-lines along the perimeter of the *Subject Property* as long as these lines remain in their current pre-developed state. Temporary power-lines constructed across undeveloped portions of the *Subject Property* to facilitate development phasing and looping may be allowed above ground, but shall not be considered existing lines at the time the area is developed, and if they are to become permanent facilities, such lines shall be placed underground pursuant to this paragraph. Franchise utilities shall be placed within a ten (10) foot public utility easement behind the sidewalk, between the home and the property line.

(4) *Variances.* The variance procedures and standards for approval that are set forth in the Unified Development Code [*Ordinance No. 04-38*] shall apply to any application for variances to any provisions of this ordinance.

Tract 1: Townhomes (2.38-Acres)

(1) *Permitted Uses.* Unless specifically provided by this Planned Development ordinance, *Tract 1* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the land uses permitted for the Single Family 10 (SF-10) District as stipulated by the *Permissible Use Charts* contained in Article IV, *Permissible Uses*, of the Unified Development Code (UDC) [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future; however, the following conditions shall apply:

The following land uses shall be permitted on the *Tract 1* in addition to the land uses permitted in the Single Family 10 (SF-10) District:

- ☑ Townhomes

However, the following land uses shall be expressly prohibited on *Tract 1*:

- ☑ Accessory Building
- ☑ Guest Quarters/Secondary Living Unit
- ☑ Portable Buildings
- ☑ Church/House of Worship
- ☑ Day Care
- ☑ Private or Public School
- ☑ Railroad Yard or Shop

(2) *Density and Dimensional Requirements.* Unless specifically provided by this Planned Development ordinance, *Tract 1* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the development standards for the Single Family 10 (SF-10) District as stipulated by Article V, *District Development Standards*, of the Unified Development Code [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future. The maximum permissible density for the *Subject Property* shall not exceed *5.10* dwelling units per gross acre of land; however, in no case should the proposed development exceed *12* dwelling units. All lots shall conform to the standards depicted in *Table 2*, which are as follows:

Table 2: Lot Dimensional Requirements

Minimum Lot Width [1]	28'
Minimum Lot Depth	115'
Minimum Lot Area	3,000 SF
Minimum Front Yard Setback [2] & [4]	20'
Minimum Side Yard Setback	0'
Minimum Distance Between Buildings	10'
Minimum Length of Driveway Pavement	20'
Maximum Height [3]	36'
Minimum Rear Yard Setback [4]	10'
Minimum Area/Dwelling Unit (SF) [Air Conditioned Space]	1,400 SF
Garage Orientation	*Rear Entry*
Maximum Number of Attached Units Per Buildings	5 Units
Maximum Lot Coverage	75%

General Notes:
[1]: The minimum lot width shall be measured at the *Front Yard Building Setback*.
[2]: The location of the *Front Yard Building Setback* as measured from the front property line.

[3]: The *Maximum Height* shall be measured to the eave or top plate (*whichever is greater*) of the single-family home.
[4]: Porches, stoops, bay windows, balconies, eaves and similar architectural features may encroach beyond the *Front* and *Rear Yard Building Setbacks* by up to five (5) feet for any property; however, the encroachment shall not exceed three (3) feet on *Side Yard Setbacks* where appropriate for such use and shall not encroach into public right-of-way.

(3) *Garage Orientation.* All garages are required to be rear entry (*i.e. access from Road 'A'*) and shall generally conform to the Concept Plan depicted in *Exhibit 'D'* of this ordinance (*i.e. the Townhomes will front towards the Park Place Subdivision*).

(4) *Building Standards.* The building elevations shall generally conform to the *Conceptual Building Elevations* depicted in *Exhibit 'F'* of this ordinance; however, all development shall adhere to the following building standards:

(i) *Masonry Requirements.* The minimum masonry requirement for the exterior façades of all buildings shall be 90%. For the purposes of this ordinance, the masonry requirement shall be limited to full width brick, natural stone, and cast stone. Cementaceous fiberboard horizontal lap-siding (*e.g. HardiBoard or Hardy Plank*) and/or similar cementaceous products may be used for up to *100%* of the exterior of the building pending conformance with the anti-monotony restrictions outlined in this ordinance. Stucco (*i.e. three [3] part stucco or similar*) shall be prohibited.

(ii) *Roof Design Requirements.* All buildings shall be designed such that no roof mounted mechanical equipment (*i.e. HVAC, satellite, vents, etc.*) shall be visible from any direction. *Note: Screening of mechanical equipment is necessary for all equipment regardless of location (i.e. roof mounted, ground mounted, or otherwise attached to the building and/or located on the site).*

(iii) *Architectural Requirements.* All units shall be architecturally finished on all sides of the building that are visible from a public right-of-way or open space with the same materials, detailing and features.

(5) *Anti-Monotony Restrictions.* The development shall generally conform to development scheme portrayed in the *Conceptual Building Elevations* depicted in *Exhibit 'F'* of this ordinance; however, all development shall adhere to the following anti-monotony restrictions:

(i) Identical brick blends and paint colors may not occur on adjacent (*i.e. side-by-side*) properties within the development without at least two (2) intervening townhomes of differing materials on the same side of the adjacent townhome beginning with the adjacent property.

(ii) Front building elevations shall not repeat along any block face without at least two (2) intervening homes of differing appearance on the same block face within the development.

(iii) The rear elevation of the homes, backing to the public right-of-way (*i.e. Street A*), shall not repeat without at least two (2) (*i.e. side-by-side*) intervening homes of differing appearance. Homes are considered to have a differing appearance if any of the following two (2) items deviate:

a) Front Encroachment (*i.e. Porch and/or Sunroom*) Type and Layout
b) Roof Type and Layout
c) Articulation of the Front Façade
d) Differing Primary Exterior Materials

(6) *Sidewalks.* The sidewalk adjacent to *Road 'A'* as depicted in *Exhibit 'D'* of this ordinance shall be constructed adjacent to the roadway with the exception of the area directly adjacent to the

townhomes. In this area the sidewalk may be deviated to run in between the western property line of the *Subject Property* and the front facades of the townhomes. Where the sidewalk is on private property it shall be in a *pedestrian access easement.*

(7) *Fence Standards.* All fences shall be required to be wrought iron or a tubular steel fence. Wrought iron/tubular steel fences shall be a minimum of four (4) feet in height; however, may not exceed a maximum of eight (8) feet in height.

(8) *Homeowner's Association (HOA).* A Homeowner's Association shall be created to enforce the restrictions established in accordance with the requirements of *Section 38-15* of the *Subdivision Regulations* contained within the *Municipal Code of Ordinances* of the City of Rockwall. As an alternative -- *and pending the approval of an adjacent HOA* --, this property can be incorporated into an existing HOA. The HOA shall also maintain all neighborhood parks, open space and common areas, irrigation, landscaping, screening fences and the private roadway, drive aisles and drive approaches for the subject property associated with this development.

Tracts 2 & 3: Commercial/Retail (6.33-Acres)

(1) *Permitted Uses.* Unless specifically provided by this Planned Development ordinance, *Tracts 2 & 3* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the land uses permitted for the General (GR) District as stipulated by the *Permissible Use Charts* contained in Article IV, *Permissible Uses*, of the Unified Development Code (UDC) [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future; however, the following conditions shall apply:

The following land uses shall be expressly prohibited on *Tracts 2 & 3*:

- ☑ Convent or Monastery
- ☑ Hotel or Motel
- ☑ Residence Hotel
- ☑ Cemetery/Mausoleum
- ☑ Church/House of Worship
- ☑ Convalescent Care Facility/Nursing Home
- ☑ Emergency Ambulance Services (*Ground*)
- ☑ Hospital
- ☑ Mortuary or Funeral Chapel
- ☑ Social Service Provider
- ☑ Billiard Parlor or Pool Hall
- ☑ Carnival, Circus, or Amusement Ride
- ☑ Commercial Amusement/Recreation (*Outside*)
- ☑ Golf Driving Range
- ☑ Astrologer, Hypnotist, or Psychic Art and Science
- ☑ Night Club, Discotheque, or Dance Hall
- ☑ Secondhand Dealer
- ☑ Auto Repair Garage (*Minor*)
- ☑ Car Wash/Auto Detail
- ☑ Car Wash (*Self Service*)
- ☑ Retail Store with Gasoline Product Sales (*Any Amount of Dispensers*)
- ☑ Service Station
- ☑ Mining and Extraction (*Sand, Gravel, Oil & Other*)
- ☑ Helipad
- ☑ Railroad Yard or Shop
- ☑ Transit Passenger Facility

(2) *Density and Dimensional Requirements.* Any development on *Tracts 2 & 3* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the development standards required for

properties in a General Retail (GR) District as stipulated by Article V, *District Development Standards*, of the Unified Development Code [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future.

Tracts 4 & 5: Light Industrial (6.22-Acres)

(1) *Permitted Uses.* Unless specifically provided by this Planned Development ordinance, *Tracts 4 & 5* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the land uses permitted for the Light Industrial (LI) District as stipulated by the *Permissible Use Charts* contained in Article IV, *Permissible Uses*, of the Unified Development Code (UDC) [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future; however, the following conditions shall apply:

The following land uses shall be expressly prohibited on the *Tracts 4 & 5*:

- ☑ Animal Shelter
- ☑ Hotel or Motel
- ☑ Residence Hotel
- ☑ Cemetery/Mausoleum
- ☑ Church/House of Worship
- ☑ Crematorium (*Stand Alone*)
- ☑ Emergency Ambulance Services (*Ground*)
- ☑ Mortuary or Funeral Chapel
- ☑ Prison/Custodial Institution
- ☑ Rescue Mission or Shelter for the Homeless
- ☑ Social Service Provider
- ☑ Billiard Parlor or Pool Hall
- ☑ Carnival, Circus, or Amusement Ride
- ☑ Commercial Amusement/Recreation (*Outside*)
- ☑ Golf Driving Range
- ☑ Private Sports Arena, Stadium or Track
- ☑ Night Club, Discotheque, or Dance Hall
- ☑ Secondhand Dealer
- ☑ Car Wash (*Self Service*)
- ☑ Building & Landscape Material with Outside Storage
- ☑ Building & Landscape Material with Limited Outside Storage
- ☑ Building Maintenance, Service & Sales with Outside Storage
- ☑ Commercial Cleaners
- ☑ Food Processing
- ☑ Heavy Machinery & Equipment (Rental, Sales & Service)
- ☑ Motor Vehicle Dealership (*New or Used*)
- ☑ Recreation Vehicle Sales
- ☑ Service Station
- ☑ Towing & Impound Yard
- ☑ Truck Rental
- ☑ Truck Stop with Fuel and Accessory Services
- ☑ Asphalt or Concrete Batch Plant
- ☑ Environmentally Hazardous Materials
- ☑ Food Processing (*No Slaughtering*)
- ☑ Heavy Manufacturing
- ☑ Metal Plating/Electro Plating
- ☑ Mining and Extraction (*Sand, Gravel, Oil & Other*)
- ☑ Salvage or Reclamation of Products (*Indoors or Outdoors*)
- ☑ Heavy Construction Trade Yard
- ☑ Outside Storage and/or Outside Display
- ☑ Bus Charter Service & Service Facility

- ☑ Airport, Heliport or Landing Field
- ☑ Railroad Yard or Shop
- ☑ Transit Passenger Facility

The following land uses shall be permitted by Specific Use Permit (SUP) on the *Tracts 4 & 5*:

- ☑ Auto Repair Garage (*Minor*)
- ☑ Auto Repair Garage (*Major*)
- ☑ Mini-Warehouse

(2) *Density and Dimensional Requirements.* Any development on *Tracts 4 & 5* as depicted in *Exhibits 'C' & 'D'* of this ordinance shall be subject to the development standards required for properties in a Light Industrial (LI) District as stipulated by Article V, *District Development Standards*, of the Unified Development Code [*Ordinance No. 04-38*] as heretofore amended, as amended herein by granting this zoning change, and as may be amended in the future.

CITY OF ROCKWALL

ORDINANCE NO. 18-47

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, AMENDING THE UNIFIED DEVELOPMENT CODE [*ORDINANCE NO. 04-38*] OF THE CITY OF ROCKWALL, AS HERETOFORE AMENDED, BY AMENDING ARTICLE II, *AUTHORITY AND ADMINISTRATIVE PROCEDURES*, ARTICLE III, *ZONING DISTRICTS AND MAPS*, ARTICLE IV, *PERMISSIBLE USES*, ARTICLE V, *DISTRICT DEVELOPMENT STANDARDS*, AND APPENDIX F, *LANDSCAPE GUIDELINES AND REQUIREMENTS*; PROVIDING FOR A PENALTY OF FINE NOT TO EXCEED THE SUM OF TWO THOUSAND DOLLARS ($2,000.00) FOR EACH OFFENSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR A REPEALER CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, an amendment to the City of Rockwall's Unified Development Code [*Ordinance No. 04-38*] has been initiated by the City Council of the City of Rockwall to amend Article II, *Authority and Administrative Procedures*; Article III, *Zoning Districts and Maps*; Article IV, *Permissible Uses*; Article V, *District Development Standards*; and, Appendix F, *Landscape Guidelines and Requirements,* of the Unified Development Code [*Ordinance No. 04-38*]; and,

WHEREAS, the Planning and Zoning Commission of the City of Rockwall and the governing body of the City of Rockwall in compliance with the laws of the State of Texas and the ordinances of the City of Rockwall have given the requisite notices by publication and otherwise, and have held public hearings and afforded a full and fair hearing to all property owners generally and to all persons interested in and situated in the city's corporate boundaries, and the governing body in the exercise of its legislative discretion, has concluded that the Unified Development Code [*Ordinance No. 04-38*] should be amended as follows:

NOW, THEREFORE, **BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS:**

SECTION 1. That Article II, *Authority and Administrative Procedures,* of the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall, as heretofore amended, be and the same is hereby amended as specifically described in *Exhibit 'A'* of this ordinance.

SECTION 2. That Article III, *Zoning Districts and Maps,* of the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall, as heretofore amended, be and the same is hereby amended as specifically described in *Exhibit 'B'* of this ordinance.

SECTION 3. That Article IV, *Permissible Uses,* of the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall, as heretofore amended, be and the same is hereby amended as specifically described in *Exhibit 'C'* of this ordinance.

SECTION 4. That Article V, *District Development Standards,* of the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall, as heretofore amended, be and the same is hereby amended as specifically described in *Exhibit 'D'* of this ordinance.

SECTION 5. That Appendix F, *Landscape Guidelines and Requirements,* of the Unified Development Code [*Ordinance No. 04-38*] of the City of Rockwall, as heretofore amended, be and the same is hereby amended as specifically described in *Exhibit 'E'* of this ordinance.

SECTION 6. That any person, firm, or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a penalty of fine not to exceed the sum of *Two Thousand Dollars ($2,000.00*) for each offense and each and every day such offense shall continue shall be deemed to constitute a separate offense;

SECTION 7. That if any section, paragraph, or provision of this ordinance or the application of that section, paragraph, or provision to any person, firm, corporation or situation is for any reason judged invalid, the adjudication shall not affect any other section, paragraph, or provision of this ordinance or the application of any other section, paragraph or provision to any other person, firm, corporation or situation, nor shall adjudication affect any other section, paragraph, or provision of the Unified Development Code [*Ordinance No. 04-38*], and the City Council declares that it would have adopted the valid portions and applications of the ordinance without the invalid parts and to this end the provisions for this ordinance are declared to be severable;

SECTION 8. That this ordinance shall take effect immediately from and after its passage.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 5TH DAY OF NOVEMBER, 2018.

_____
Jim Pruitt, Mayor

ATTEST:

_____
Kristy Cole, City Secretary

APPROVED AS TO FORM:

_____
Frank J. Garza, City Attorney

SECTION 7: PLANNING AND ZONING COMMISSION AUTHORITY

SUBSECTION 7.1: APPROVAL AUTHORITY

The planning and zoning commission shall make decisions, or make recommendations to the city council, on the following matters:

A. Decisions on site plans, building elevations, lighting plans, landscape plans and tree preservation plans as may be required.
B. Recommendations to city council on plats as required by the subdivision ordinance, chapter 38 of part II, Code of Ordinances.
C. Recommendations to city council on replats, when such public hearing is required by the provisions of V.T.C.A., Local Government Code Chapter 212.
D. Recommendations to city council regarding text amendments to this Unified Development Code.
E. Recommendations to city council regarding zoning changes and map amendments, including reclassification of the zoning designations on land, specific use permits, and planned developments.
F. ~~Recommendations to city council~~ Decisions regarding variances and special exceptions to this Unified Development Code.
G. Recommendations to city council regarding amendments to the comprehensive plan.
H. Recommendations to city council regarding amendments to the master thoroughfare plan.
I. Recommendations to city council regarding amendments to a master open space plan.

SECTION 8: CITY COUNCIL AUTHORITY

SUBSECTION 8.1: AUTHORITY

The city council shall hold a meeting, conduct a public hearing—if required by this Unified Development Code—and make determinations on the following matters:

A. Text amendments to this Unified Development Code.
B. Zoning changes and map amendments, including reclassification of the zoning designations on land, specific use permits, and planned developments.
C. Appeals related to the Planning and Zoning Commission's decision on ~~Special~~ special exceptions, variances, or waivers related to site plans for development.
D. Amendments to the comprehensive plan.
E. Amendments to the master thoroughfare plan.
F. Amendments to the master open space plan.
G. Variances, special exceptions and appeals as set out in this Unified Development Code.

SECTION 1: LAND USE SCHEDULE

SECTION 1.01: USE OF LAND AND BUILDINGS

Buildings, structures and land shall be used only in accordance with the uses permitted in the following "land use schedule," subject to all other applicable requirements of this [Unified Development Code], including article V, Zoning District Development Standards.

A. The symbol "P" shall mean that the use is permitted as a principal use in that zoning district by right.
B. The symbol "S" shall mean that the principal use is permitted in that zoning district only after first obtaining a "specific use permit" as set forth in this article.
C. The symbol "A" shall mean that this use is specifically permitted as an accessory use to a main use in the district. This does not exclude other land uses which are generally considered ancillary to the primary use.
D. The symbol "+" shall mean that this use is conditional and has special standards or requirements listed in this section, which it must meet in order to be allowed.
E. A blank square shall mean that the use is not allowed in that zoning district as a principal use.

SECTION 2.01.02: RESIDENTIAL AND LODGING USE CONDITIONS

Accessory Building (Accessory to Residential Use). See *Section 7.04, Accessory Structure Development Standards*.

~~1. The accessory building shall be accessory to a residential use and located on the same lot.~~
~~2. In all residential districts, one detached garage shall be allowed provided that it does not exceed 900 square feet in area or 15 feet in height, provided that it is located on the same lot as the residential use and that the exterior cladding contains the same materials, excluding glass, as found on the main structure and is generally in the same proportion.~~

71

3. In SF-E: a. No more than two accessory buildings shall be allowed which are up to 625 square feet (each) in area and 15 feet or less in height; or b. In SF-E/1.5, a single building which is up to 1,250 square feet in area and 15 feet or less in height, provided the exterior cladding contains the same materials, excluding glass, as is found on the main structure and generally in the same proportion. In SF-E/2.0 the single accessory building may be up to 1,500 square feet, and in SF-E/4.0, up to 2,000 square feet in area.
4. In SF-7, SF-8.4, SF-10, SF-16, and SF-1, no more than two accessory buildings shall be allowed which are up to 225 square feet (each) in area and 15 feet or less in height, provided the exterior cladding contains only materials found on the main structure. (Greenhouses are exempt from the materials requirement.)

(Ord. No. 07-18, 6-4-2007)

5. In 2F, no more than two accessory buildings shall be allowed which is up to 100 square feet (each) in area and ten feet or less in height, provided the exterior cladding contains only materials found on the main structure. (Greenhouses are exempt from the materials requirement.) 6. Accessory buildings not meeting these standards shall require approval of an SUP.

Bed and Breakfast Operation.

1. Permitted in the Historic Overlay District by right, and in SF-7 by specific use permit, and must be located on an owner-occupied single-family lot.
2. One parking space per bedroom to be rented shall be provided above the single-family parking requirement
3. No outside advertising shall be allowed on the lot unless located in a nonresidential zoning district or permitted by an SUP.
4. A permanent wired smoke alarm system meeting all city codes shall be installed.
5. The premises shall pass a fire code inspection before opening and on an annual basis thereafter.
6. All applicable hotel/motel taxes shall be paid.
7. The maximum length of stay is limited to 14 consecutive days in any 30-day period.
8. Any bed and breakfast specific use permit (SUP) shall be reviewed after an initial six-month period and annually thereafter unless otherwise stipulated in the permit.

Carport (Residential). See *Section 7.04, Accessory Structure Development Standards*.

1. In residential districts, carports must be open on at least two sides and be located at least 20 feet behind the corner of the front facade and meet the garage setback adjacent to an alley. It must also meet the minimum required side yard setbacks for a detached garage.

(Ord. No. 06-14, 4-17-2006)

2. Carports which are visible from a public street must be constructed of materials matching those of the primary residential structure.
3. Carports not meeting these standards must obtain an SUP.
4. Porte-cocheres are not considered carports, and are allowed, provided that they are attached and integral with the design of the house.

SECTION 1: GENERAL STANDARDS

SUBSECTION 1.01: OPEN SPACE

~~A. *Applicability*. This provision applies to all development in the city.~~

A. *Purpose*. The City of Rockwall is ~~planned to be~~ a rural and recreation-oriented community ~~with opportunity for both residents and workers, and it is intended to~~ with open space that ties into a regional framework of open space, trails, and corridors. Open space corridors link all major areas of the city using primarily floodplain ~~areas~~ and drainage areas. ~~Because of the importance of~~ Since open space and recreational amenities ~~to~~ are vital to the City's commercial and residential developments ~~vitality of the city~~, all projects must ~~contribute to the~~ provide open space ~~system as established~~ in accordance with the City's *Comprehensive Plan* and the *Parks, Recreation, and Open Space Master Plan*. ~~city's comprehensive plan, parks plan and thoroughfare plan.~~

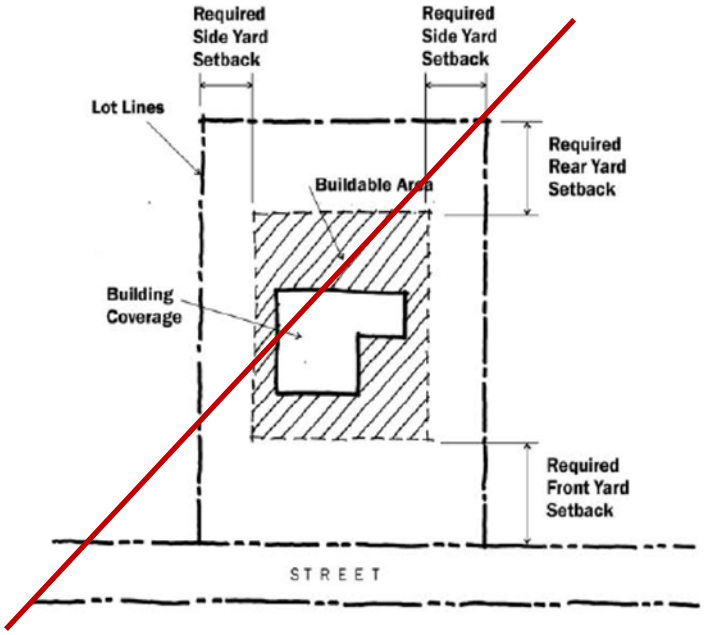
B. *Requirements*. All projects in the city must reserve, dedicate and/or develop public and private open spaces consistent with the requirements of the following sections: ~~open space plan, subdivision standards and development agreements.~~

a. *Residential*. Subsection C, *Open Space*, of Section 3.01, *General Residential District Standards*
b. *Commercial*. Subsection D, *Open Space Guidelines*, of Section 4.01, *General Commercial District Standards*
c. *Industrial*. Subsection D, *Open Space Guidelines*, of Section 5.01, *General Industrial District Standards*

SUBSECTION 1.02: SITE PLANS

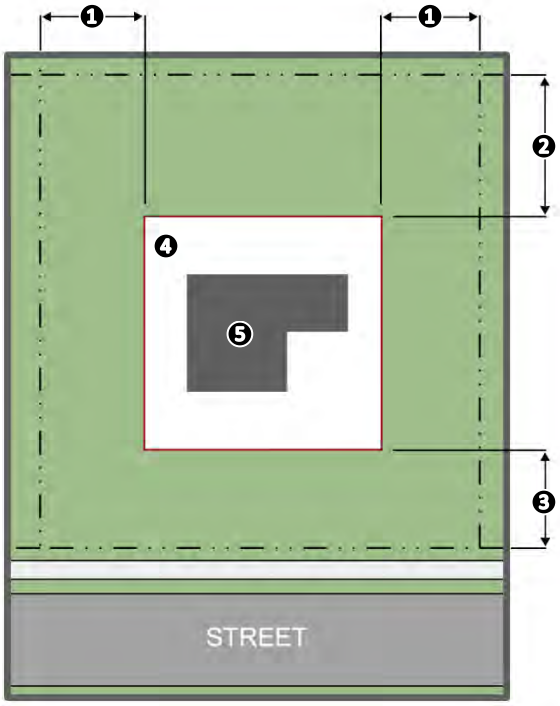
~~Approval of a site plan shall be required for all developments except individual single-family and duplex lots and shall be accompanied by a proposed development schedule. Any owner, builder, or developer of a tract or parcel of land shall obtain an approved site and building plan for the proposed development, prior to issuance of a building permit, from the director, providing for an appeal of denial to the planning and zoning commission. The contents of this site and building plan shall comply with the requirements as specified in article XI [of this Unified Development Code], Zoning Related Applications. Upon approval, such development shall comply with the approved plan.~~

All development in the City of Rockwall -- *with the exception of single lot single-family and duplex developments* -- shall require the approval of a site plan in accordance with the requirements of Article XI, *Zoning Related Applications*.



SUBSECTION 1.03: LOTS ~~WITH MULTIPLE FRONTAGES~~ CONFIGURATIONS

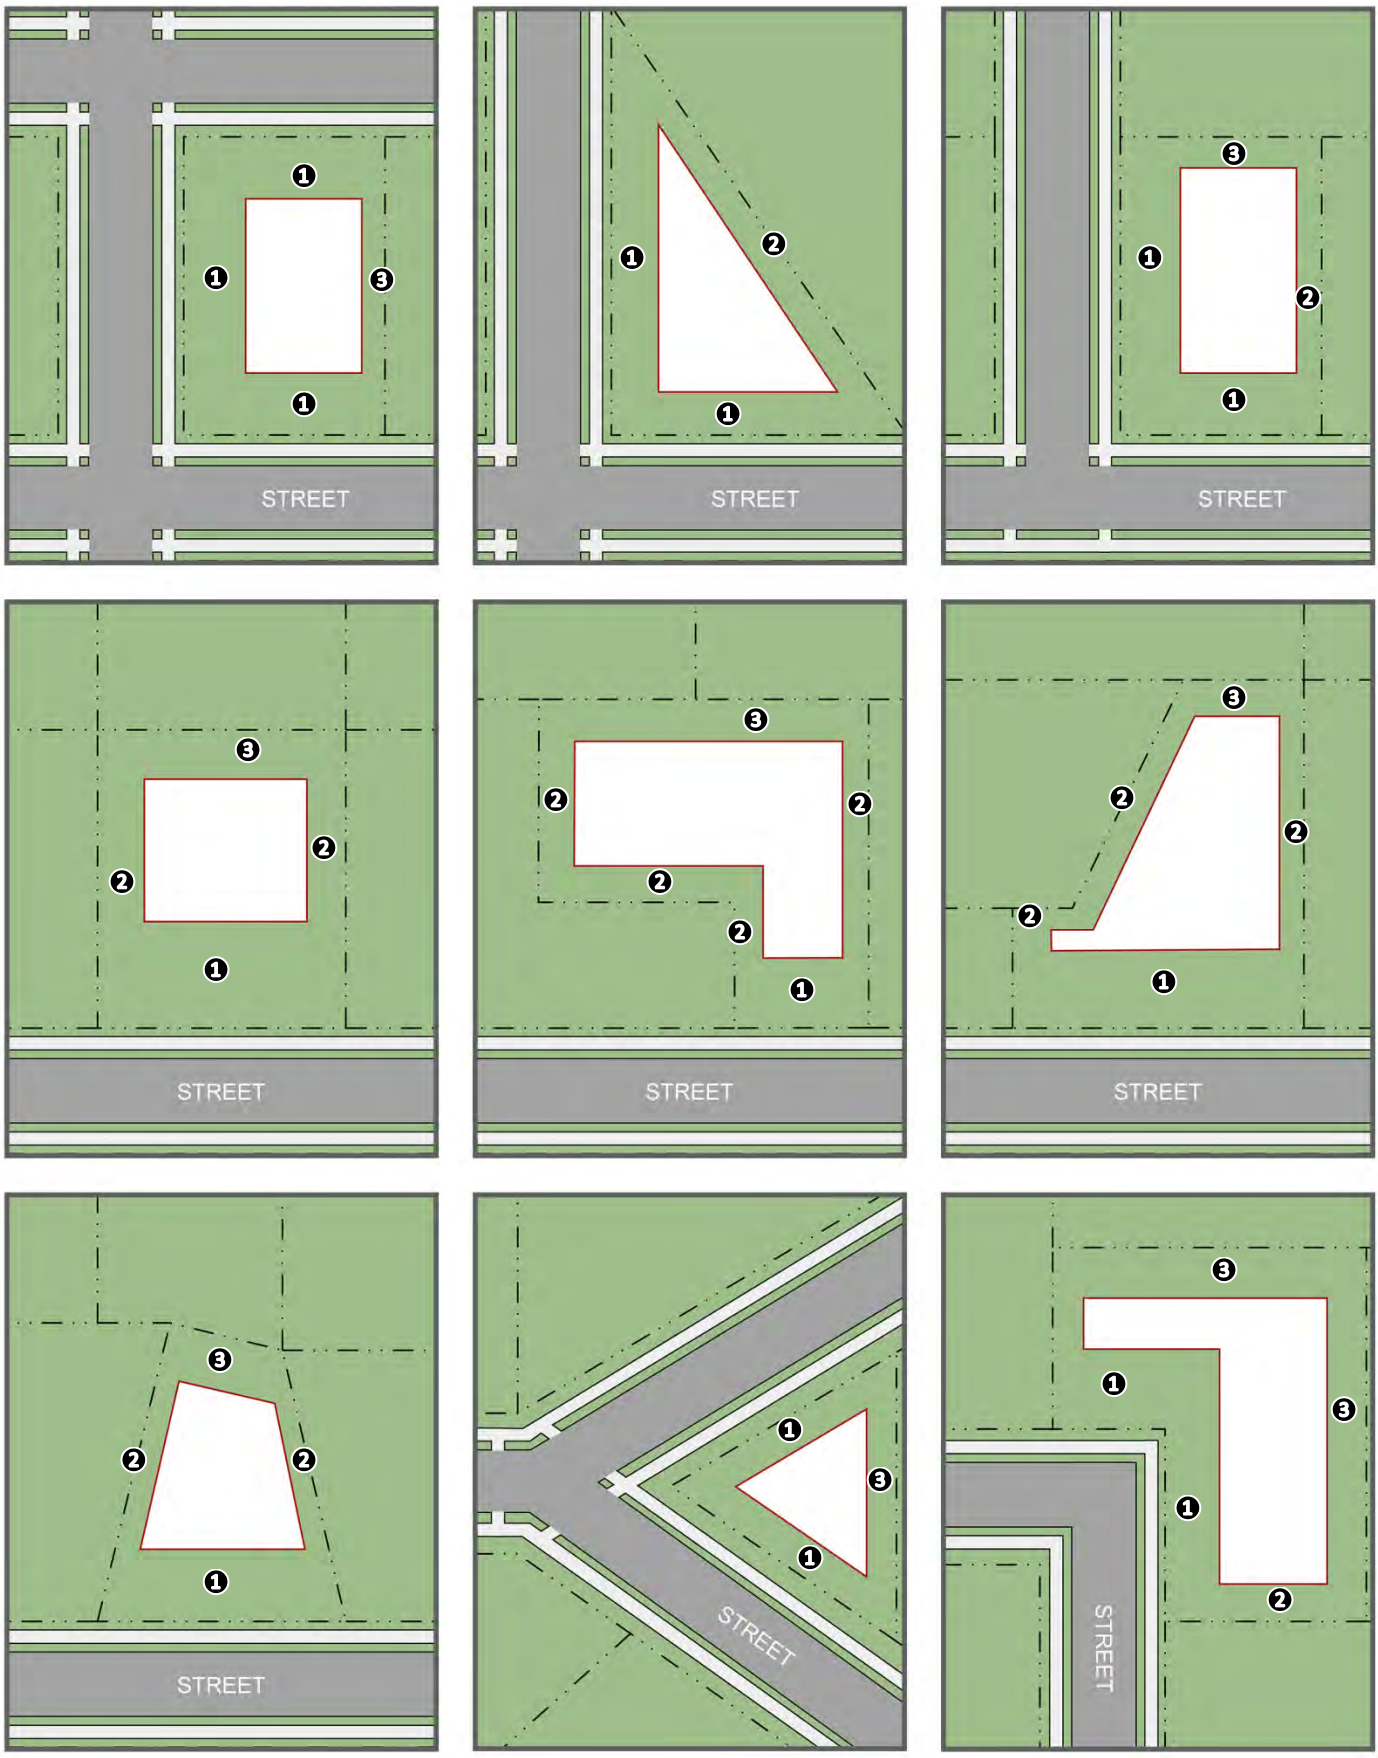
A. *Lots with a Single Street Frontage*. Where lots have a single street frontage, the required setbacks should generally adhere to the following diagram:



❶: Required Side Yard Setback
❷: Required Rear Yard Setback
❸: Required Front Yard Setback
❹: Buildable Area
❺: Building Coverage

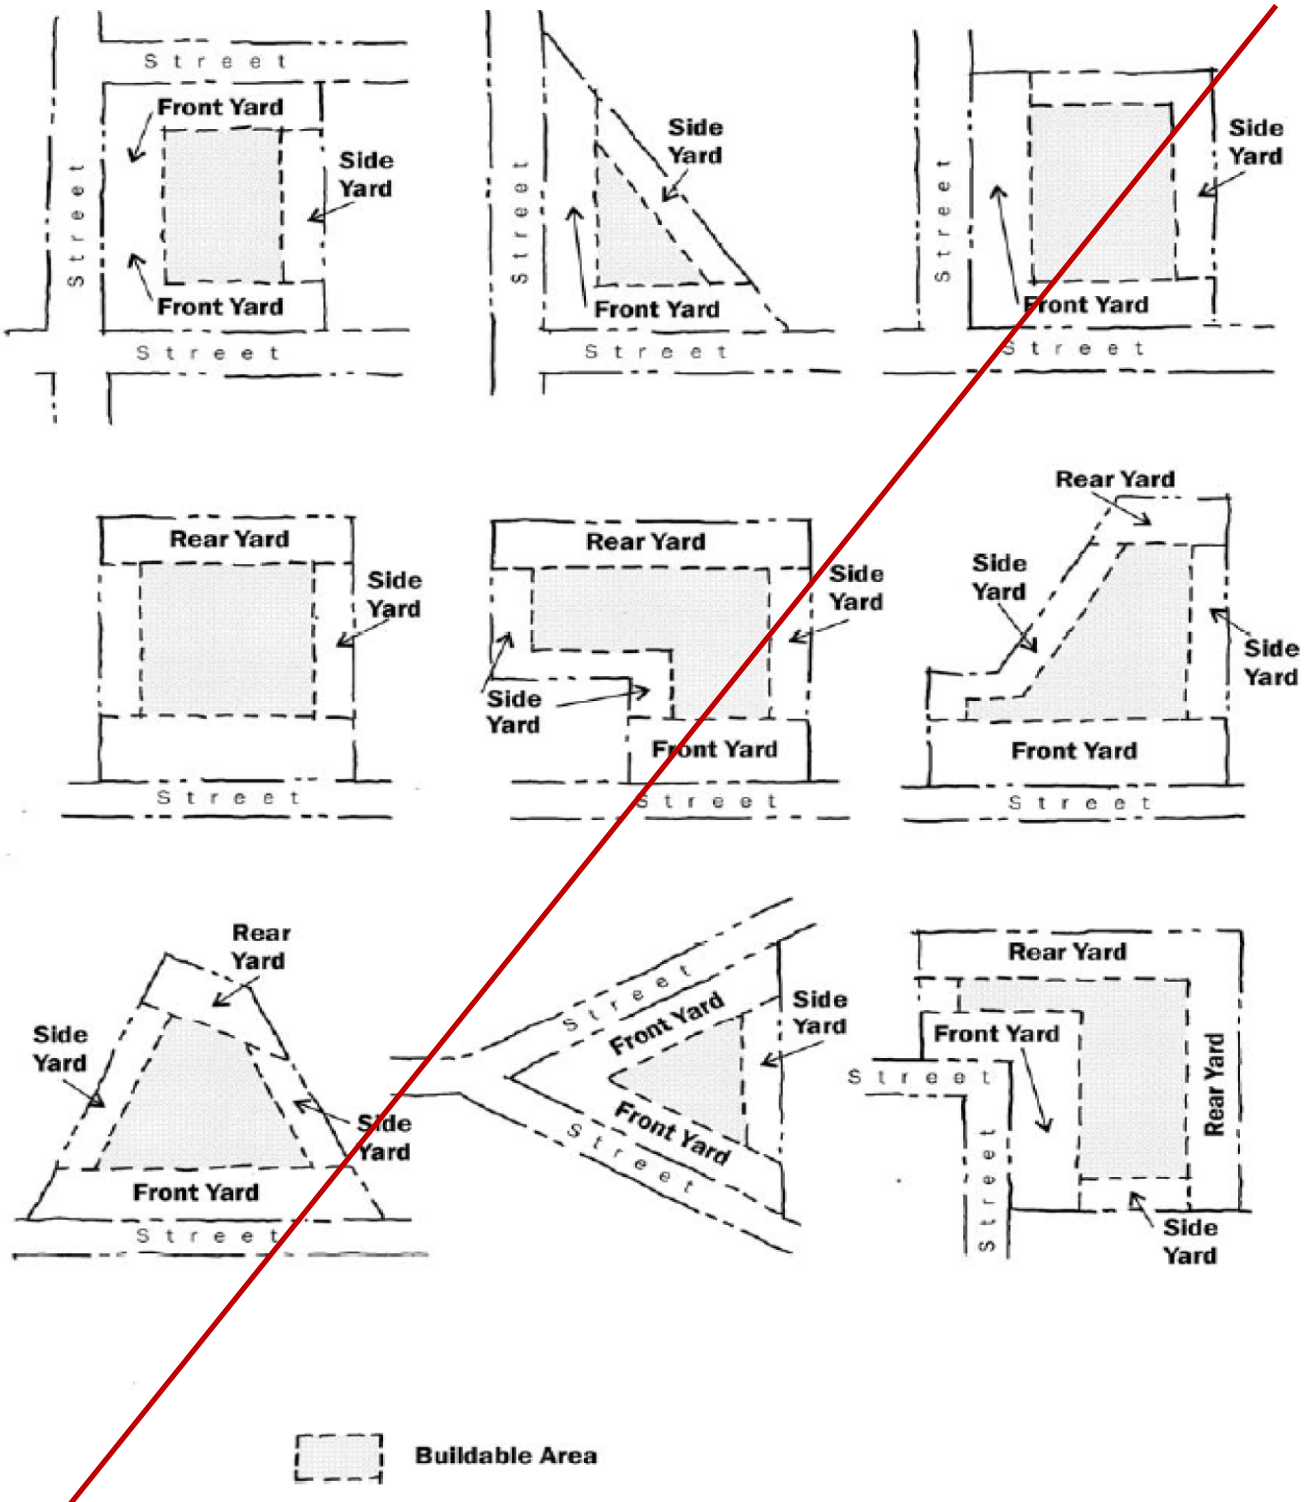
74

~~B.~~ *Lots with Multiple Street Frontages*. Where lots have multiple street frontages on one (1) or more streets, the required setbacks should generally adhere to the following diagram: ~~front yard shall be provided on each street.~~



❶: Front Yard; ❷: Side Yard; ❸: Rear Yard

76



YARD LOCATION IN DIFFERENT SHAPED LOTS

77

SUBSECTION 1.04: CALCULATION OF DENSITY

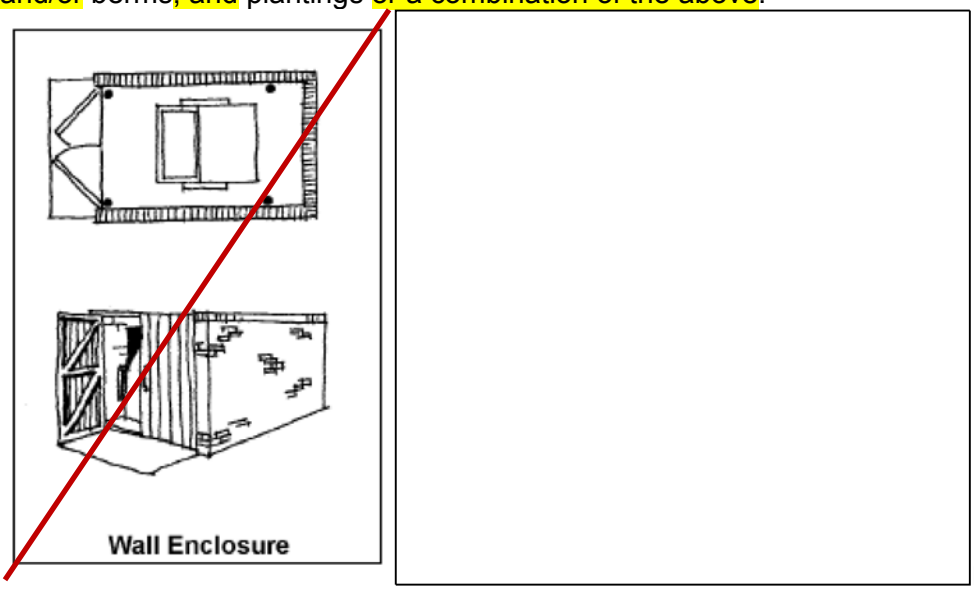
1. ~~*Calculation.* Calculation~~ The calculation of the allowable density for residential developments shall be based on the gross site area including ~~road~~ right-of-way, floodplain, open space and public/private parks ~~areas~~ that will be dedicated to the city or preserved and maintained by some other mechanism. ~~Notwithstanding the~~ Despite this calculation requirement, other provisions of this ~~[Unified Development] Code~~ Unified Development Code may limit the actual density allowed on any given ~~site~~ property.

2. ~~*Residential properties.* Minimum lot sizes in residential districts may be reduced up to 20 percent in order to preserve community or public open space, including trails, provided that the front of lots face, either directly or across a public street, over 75 percent of the edge of the open space within the project. If this standard cannot be met, then the planning and zoning commission may approve a site plan provided it concludes that the resulting development would be significantly better than strict application of the standards would provide.~~

SUBSECTION 1.05: SCREENING STANDARDS

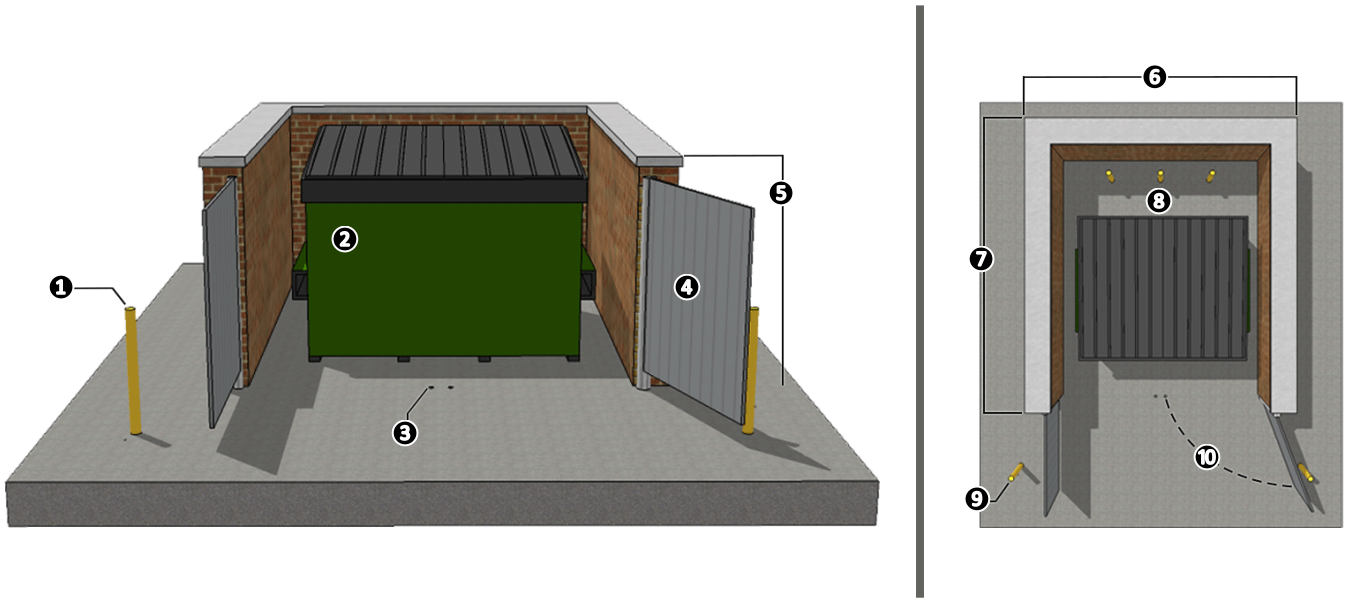
~~Unless otherwise approved by the planning and zoning commission and city council, the following items shall be screened as follows:~~ All development shall adhere to the following screening standards:

1. *Loading Docks*. Off-street loading docks must be screened from all public streets and any residential zoning district or residentially used property that abuts or is directly across a public street or alley from the ~~lot~~ subject property. The screening ~~required under this section~~ must be at least six (6) feet in height and may be provided by using a masonry wall ~~fence~~ (*excluding tilt wall or ~~concrete block~~ concrete masonry units [CMU] unless otherwise approved by the Planning and Zoning Commission ~~city council~~*), and/or berms~~,~~ and plantings ~~or a combination of the above~~.



2. *Trash/Recycling Enclosures*. Trash/Recycling enclosures shall be four (4) sided. These receptacles shall be screened by a minimum six (6) foot, solid masonry dumpster enclosure that utilizes the same masonry materials as the primary building and incorporates an opaque, self-latching gate. These enclosures shall be located to the side or rear of the primary building, and shall not front on to a public right-of-way. Every effort shall be made to reduce the visibility of these structures utilizing landscaping and/or the building. All trash/recycling enclosures shall be constructed in conformance to the diagram below, unless otherwise approved/required by the City and/or its contractor for trash services. ~~All refuse storage areas for trash dumpster shall be visually screened on three sides with an enclosure~~

~~matching the main structure not less than six feet in height. The access area shall be screened with an opaque gate and shall not face a public street unless otherwise approved during site plan approved.~~



❶: Concrete Filled Steel Protected Pole
❷: Standard End Loading Container
❸: Deep Recesses for Gate Cane Bolts [*If Necessary*]
❹: Opaque Screening Gate
❺: Six (6) Feet in Height [*Eight (8) Feet in Overlay Districts*]
❻: Ten (10) Feet in Width
❼: 12-Feet in Length
❽: Three (3) Concrete Filled Steel Protected Poles
❾: Concrete Filled Steel Protected Pole
❿: 120 Degree Swing on Opaque Screening Gate

~~Dumpster storage should be located to the rear of the buildings with proper access. Trash dumpster shall not be located in any required parking space and shall allow proper access by service trucks. The minimum enclosure area shall be 12 feet by ten feet, or as otherwise approved by the city and/or its contractor for trash service. Six-inch concrete filled steel protective poles shall be placed at possible impact areas. Dumpster pad sites shall be designed to city standards specified in the subdivision standards of design, as currently adopted or as may be amended in the future.~~

3. *Utility Equipment and Air Condition Units.* Pad or roof mounted utility equipment~~,~~ and air conditioning units~~, including roof mounted units,~~ shall be screened from ~~horizontal~~ view from any adjacent public street or ~~and from any adjacent~~ property. Utility equipment and air conditioning units shall be screened utilizing plantings, berms, ~~or~~ walls matching the main structure, or an architectural feature that is integral to the building's design.

4. *Aboveground Storage Tanks.* Aboveground storage tanks shall be screened utilizing plantings, berms, or walls matching the main structure. Screening plans for above ground storage tanks shall be approved by the Planning and Zoning Commission in conjunction with a site plan.

(Ord. No. 06-14, 4-17-2006)

SUBSECTION 1.06: RESIDENTIAL ADJACENCY STANDARDS

Subsection 1.06, *Residential Adjacency Standards*, is omitted from this ordinance change, but is retained in its entirety.

SUBSECTION 1.07: FENCES

All fences within the ~~city~~ City shall conform to Article XI, *Fences,* of Chapter 10, *Building and Building Regulations,* of the Municipal Code of Ordinances ~~chapter 10, article XI of the Code of Ordinances~~, unless otherwise required by this Unified Development Code. ~~noted in this [Unified Development] Code or an approved planned development district.~~

(Ord. No. 10-14, § 30, 7-6-2010)

SUBSECTION 1.08: PROJECTIONS INTO REQUIRED YARD OR COURT

A. Every part of a required yard within a building setback shall be unobstructed and open from its lowest point to the sky ~~unobstructed~~, except for the ordinary projections of sills, belt courses, cornices, chimneys, buttresses, ornamental features and eaves; provided, however, that none of the above projections shall extend into a court more than six (6) inches nor into a required yard by more than 30-inches; and provided existing open porches extending into the required yard shall not be enclosed.

   An open fire escape may project into a required yard by not more than half the width of the setback ~~such yard~~, but not more than four (4) feet from the building. Fire escapes, solid floored balconies and enclosed outside stairways may project ~~not more than four feet~~ into a rear yard by a maximum of four (4) feet.

B. Where ~~an official~~ a lot abuts a right-of-way line has been established for the future widening or opening of a street or highway ~~upon which a lot abuts~~, then the depth or width of a yard shall be measured from such ~~official~~ right-of-way line to the ~~nearest~~ required building setback ~~line of the building~~.

   (Ord. No. 06-14, 4-17-2006)

SUBSECTION 1.09: PUBLIC RIGHT-OF-WAY VISIBILITY

A. *Street/drive intersection visibility obstruction triangles.* A landscape plan showing the plan of the street on both sides of each proposed drive/street to the proposed development with the grades, curb elevations, proposed street/drive locations, and all items (*both natural and manmade*) within the visibility triangles as prescribed below shall be provided with all site plans, if they are not on engineering plans that are submitted at the same time. this plan shall show no horizontal or vertical restrictions (*either existing or future*) within the areas defined below.

B. *Obstruction/interference triangles defined.* No fence, wall screen, billboard, sign face, tree or shrub foliage, berm, or any other item, either manmade or natural, shall be erected, planted, or maintained in such a position or place so as to obstruct or interfere within the following minimum standards; however, on non-residentially zoned lots, a single pole for mounting a sign may be placed within this area provided the pole does not exceed 12-inches in diameter, and provided every portion of the sign has a minimum height clearance of nine (9) feet:

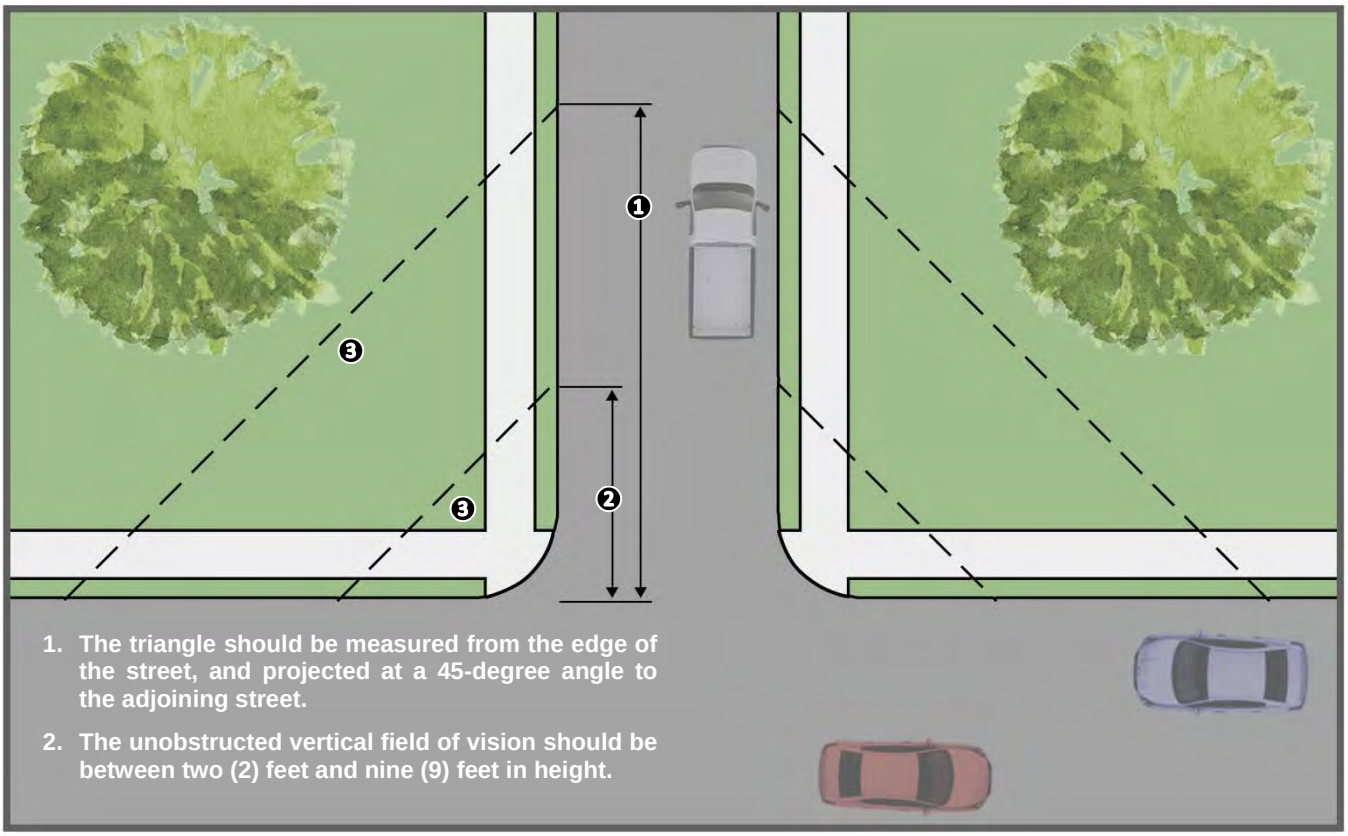
   1. *Visibility Triangles*. Vision at all intersections which intersect at or near right angles shall be clear at elevations between 24-inches and nine (9) feet above the top of the curb elevation, within a triangular area formed by extending the two (2) curblines from their point of intersection, for the following minimum distances for the applicable intersection, and connecting these points with an imaginary line, thereby making a triangle. If there are no curbs existing, the triangular area shall be formed by extending the property lines from their point of intersection for a distance as prescribed below, and connecting these points with an imaginary line, thereby making a triangle as shown below.

2. *Intersection of two (2) public streets*. The minimum required distance from the curb shall be 30-feet and the minimum distance from the property line on streets without a curb shall be 20-feet.

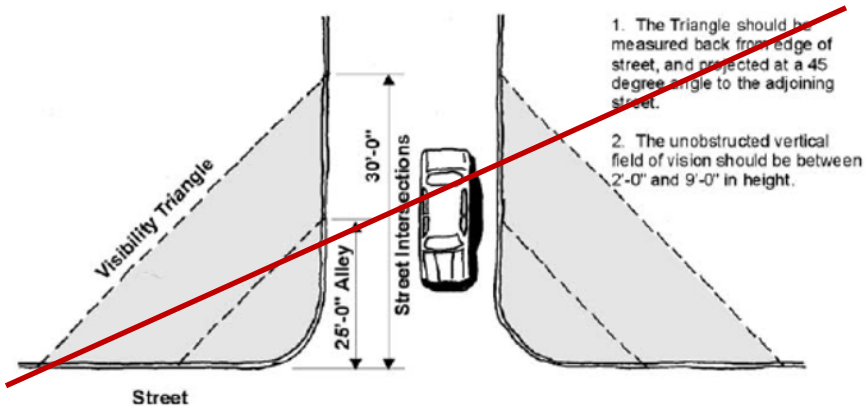
3. *Intersection of a public street and an alley*. The minimum required distance measured from the property line shall be 15-feet, or 25-feet from street curb.

4. *Intersection of private drive and public street*. The minimum required distance from the curb shall be 15-feet and the minimum distance from the property line on streets without a curb shall be ten (10) feet.

C. *Sight distance requirements.* The city hereby adopts the standards for both vertical and horizontal sight distance requirements set forth in the latest edition of AASHTO green book "a policy on geometric design of highways and streets" for the construction of both public street intersections and private drive intersections, unless otherwise approved by the city engineer. If, in the opinion of the city engineer, a proposed street or drive intersection ~~may~~ does not meet these standards, additional engineering information exhibiting how the standards have been addressed may be required for submission and approval by the city's engineer.



❶: 30-Foot for Arterials and Collectors and 20-Foot for Residential Distance from Intersection for Streets
❷: 10-Foot Distance from Intersection for Alleyways
❸: Visibility Triangles



SECTION 2: AGRICULTURAL DISTRICTS

SUBSECTION 2.01: ~~AGRICULTURE~~ AGRICULTURAL (AG) DISTRICT

~~A. *Purpose*. The Agricultural (AG) District is a zoning designation used for land that is reserved for the anticipated future growth of the city. It is the intent of this district that agricultural land be held in that use for as long as is practical and reasonable to promote orderly growth. This zoning is suitable for areas where development is premature because of a lack of utilities, capacity, or service, or where the ultimate land use has not been determined. The zone is also to be used:~~

~~1. To protect those areas that are unsuitable for development because, of physical problems or potential health or safety hazards such as flooding. The use of the land would be permanently restricted to low intensity agricultural uses until such time as the property is proven to be suitable for development and is rezoned.~~
~~2. To provide a permanent greenbelt to preserve natural areas or open space buffer around uses that might otherwise be objectionable or pose environmental or health hazards.~~

Purpose. The Agricultural (AG) District is a zoning designation used for land that is reserved for the anticipated future growth of the city. This district is intended to be used for raw land or land with agricultural land uses, and is intended to be held in these conditions as long as practical and

reasonable to promote the orderly growth of the community. This zoning designation is suitable for areas where development is premature due to lack of utilities, capacity, or service. The Agricultural (AG) District is also used to protect areas that are unsuitable for development due to physical constraints or safety issues (*e.g. topography, floodplain, ecologically sensitive areas, etc.*), or to protect green belts, natural areas and/or open space that might otherwise be developed.

B. *Permitted Uses*. All land uses permitted within the Agricultural (AG) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, farming and ranching-related activities and accessory uses, including the owner's single-family dwelling on more than ten acres, shall be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. All development within an Agricultural (AG) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

~~1. Minimum lot area: 43,560 square feet (one acre).~~
~~2. Minimum lot frontage on a public street: 100 feet.~~
~~3. Minimum square footage per dwelling unit: 1,600 square feet.~~
~~4. Minimum lot depth: 200 feet.~~
~~5. Minimum depth of front setback: 40 feet.~~
~~6. Minimum depth of rear setback: ten feet.~~
~~7. Minimum width of side setback. a. Internal lot: six feet.~~
~~8. Minimum distance between buildings on the same lot or parcel of land: 12 feet.~~
~~9. Minimum length of driveway pavement from the public right-of-way on a side or rear yard: 20 feet.~~
~~10. Maximum building coverage as a percentage of lot area: N/A.~~
~~11. Maximum height of structures: 36 feet.~~
~~12. Minimum number of off-street parking spaces required for:~~

~~a. One single dwelling unit: two. An enclosed garage shall not be considered in meeting the off-street parking requirements.~~
~~b. All other uses: see article VI, Parking and Loading.~~

~~*(Ord. No. 06-14, 4-17-2006; Ord. No. 16-47, § 1, 9-6-2016)*~~

SECTION 3: RESIDENTIAL DISTRICTS

SUBSECTION 3.01: GENERAL RESIDENTIAL DISTRICT STANDARDS

All residential development shall conform to the following standards:

A. ~~*Exterior Wall*~~ *Construction Materials*.

(1) *Materials and Masonry Composition*. All buildings with a building footprint of 120 square feet or greater that are over ten (10) feet in height shall consist of a minimum of 80% *Primary Materials* and/or a maximum of 20% *Secondary Materials* -- *excluding doors and windows* -- as defined below.

(a) *Primary Materials*. *Primary Materials* shall include stone, brick, and cementitious materials. Specific requirements for *Primary Materials* are as follows:

A. *Cementitious Materials.* The use of cementitious materials (*e.g. stucco, cementitious lap siding, or similar materials approved by the Director of Planning or his/her designee*) shall be limited to 60% of the building's exterior façade.

B. *Chimneys.* All new homes shall be required to incorporate a masonry chimney (*i.e. brick and stone only*).

(b) *Secondary Materials*. *Secondary Materials* are any material that is not deemed to be a *Primary Material* as defined above.

~~1. *Exterior Wall Materials*. All buildings of 120 square feet or more and over ten feet tall shall have exterior walls constructed of masonry construction. Exterior walls for all buildings of 120 square feet or more and over ten feet tall, shall be constructed of at least 80 percent standard masonry construction, excluding windows and doors, unless the wall is on a porch, patio, courtyard, or breezeway, in which event, the wall may be of non-masonry construction. Hardy Plank or similar cementaceous material may be used for up to 50 percent of the masonry requirement. Buildings with less than 80 percent shall require approval of the planning and zoning commission.~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~2. Buildings less than 120 square feet and under ten feet in height may be constructed with non-masonry materials, or may be all metal with a baked-on pre-painted surface.~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

2. ~~3.~~ *Exceptions*. Exceptions to the~~se~~ material requirements~~,~~ -- *including exceptions for buildings for farm animals*~~,~~ -- may be permitted on a case-by-case basis by the Planning and Zoning Commission ~~council~~ upon submission and approval of material samples and building elevations ~~drawings~~ of the ~~subject~~ structure~~, and material samples~~. If the Planning and Zoning Commission denies an exception request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the exception being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*).

~~3. Barns used for agricultural or farm animal purposes on sites of ten acres or more are excluded from this masonry requirement.~~

~~B. Residential Garages. See article VI.4, Residential Parking for residential parking and garage standards.~~

B. *Accessory Structures*.

1. *Accessory Structure Standards.* All accessory structures shall conform to the related standards listed within Section 7.04, *Accessory Structure Development Standards*.

~~C. Residential Portable and Accessory Building Setbacks.~~

~~1. Portable buildings zero to 120 square feet and up to ten feet in height:~~

~~a. Rear setback: three feet.~~
~~b. Side setback: three feet.~~
~~c. Separation from other structures: three feet.~~

~~2. Accessory buildings 121 to 225 square feet and up to 15 feet in height:~~

~~a. Rear setback: three feet.~~
~~b. Side setback: required zoning district setback.~~
~~c. Separation from other structures: six feet.~~

~~3. Detached garages 226 to 900 square feet and up to 15 feet in height:~~

~~a. Rear setback:~~

~~With alley:~~
~~20 feet with garage doors facing alley;~~
~~Three feet without garage doors facing alley;~~

~~Without alley: ten feet.~~

~~b. Side setback: required zoning district setback.~~
~~c. Separation from other structures: ten feet.~~

~~4. Accessory buildings not meeting these standards shall require approval of an SUP.~~

C. *Open Space.* On all new subdivisions, ten (10) lots or greater, that are not infill projects (*i.e. projects going into an established area as determined by the Director of Planning and Zoning or his/her designee*) the following open space requirements shall be applied:

a. Unless otherwise provided by this Unified Development Code, a minimum of 20% of the gross land area within a residential subdivision that is five (5) acres or greater shall be devoted to open space. Where floodplain exists in a proposed subdivision, the floodplain may be used to meet the 20% requirement at a rate of ½-acre for every one (1) acre of floodplain dedicated to open space. Open space requirements for subdivisions may be satisfied by public open space/parkland, or by a combination of public and private open space. Public open space/parkland shall be dedicated to the city, and shall be approved by the Parks and Recreation Board and the City Council during the platting process. Open space requirements specified in this subsection are in addition to requirements for site landscaping and buffering.

b. To encourage the provision of open space, the minimum lot sizes in a residential subdivision may be reduced by up to 20% in order to preserve additional public and/or private open space, provided that the lots being reduced face onto a single loaded street (*i.e. a street with open space and/or a public park on one side of the street and lots on the other side of the street*). This requirement shall be approved by the City Council at the time of preliminary plat, final plat, or site plan whichever comes first.

D. *Anti-Monotony.* The front elevation of a home shall not repeat along any block face without at least four (4) intervening homes of differing appearance on the same side of the street and two (2) intervening homes of differing appearance on the opposite side of the street. The rear elevation of homes backing to open spaces or thoroughfares shall not repeat without at least two (2) intervening homes of differing appearance. Identical brick blends may not occur on adjacent (*side-by-side*) properties. Homes are considered to differ in appearance if any two (2) of the following elements are different:

a. The number of stories of the home.
b. The garage location/orientation on the home.
c. The roof type and layout of the home.
d. The articulation of the front façade of the home.

E. *Fencing.*

a. Solid fencing shall be cedar standard fencing material that are a minimum ½-inch in thickness or more. Spruce fencing is prohibited. All cedar pickets shall be placed on the *public side* (*i.e. facing out*) facing a street or alleyway. All posts and framing shall be placed on the *private side* (*i.e. facing towards the home*) of the fence. Other types of solid fencing (*e.g. vinyl*) may be considered on a *case-by-case basis* by the Planning and Zoning Commission at the time of preliminary plat, final plat, or site plan whichever comes first.
b. Tubular steel or wrought-iron type fencing shall be allowed.
c. Tubular steel or wrought-iron type fencing shall be required on all lots located adjacent to perimeter roadways, open spaces, greenbelts and/or parks.
d. Split rail fencing shall be allowed on lots containing 20,000 SF or more.
e. Fencing on corner lots constructed adjacent to the street shall provide masonry columns at 45-feet off-center spacing that begins at the rear property line corner and terminates at least 15-feet behind the front yard building setback line. A maximum six (6) foot tall, solid board-on-board, panel cedar fencing or wrought-iron type fencing shall be allowed between the masonry columns along the side and/or rear yard adjacent to a street.

    1. On corner lots that have rear lot lines adjacent to alleyways or other rear lot lines, fences may be constructed along the side yard adjacent to the street, subject to a minimum five (5) foot setback from the right-of-way. The property owner shall maintain that portion of the property outside of the fence.

    2. On corner lots that have rear lot lines adjacent to a side lot line of an adjoining lot(s), only tubular steel or wrought-iron type fences not exceeding 42-inches in height may be constructed beyond the building line. Fences constructed on or behind the building line shall comply with the material requirements detailed above.

f. All common areas and perimeter fencing shall be maintained by a Homeowners Association (HOA) as specified in the City's subdivision regulations. Perimeter fencing shall be constructed of six (6) foot tall tubular steel or wrought-iron type fencing with masonry columns and entry features. The Planning and Zoning Commission may consider alternative perimeter screening, such as earthen berms with landscaping, at the time of preliminary plat, final plat, or site plan whichever comes first.

SUBSECTION 3.02: SINGLE-FAMILY ESTATE 1.5 (SFE-1.5) DISTRICT ~~SINGLE-FAMILY ESTATE (SF-E/1.5, 2.0, 4.0) DISTRICT~~

A. *Purpose*. The Single-Family Estate 1.5 (SFE-1.5) District is the proper zoning classification for rural, estate lots that are a minimum of 1½-acres in size. These lots are typically in areas that are located in the City's hinterland, away from higher density residential developments and non-residential development. While these properties are on the City's periphery, they should still be provided with access to public roadways, water, wastewater, and drainage.

~~1. This district is considered to be the proper zoning classification for large lot developments for single-family dwelling use in a rural setting.~~
~~2. Areas that are zoned for this use shall have or provide for water, wastewater, drainage and access to paved streets based on single-family use required by the allowed density.~~
~~3. It is intended for areas that are properly buffered from nonresidential uses, and protected from pollution and/or environmental hazards or from high volume of non-single-family traffic.~~
~~4. Developers wishing to restrict their subdivision to lot sizes in excess of what this [Unified Development Code] requires shall use restrictive covenants.~~

B. *Permitted Uses*. All land uses permitted within the Single-Family Estate 1.5 (SFE-1.5) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, large lot single-family uses shall be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. ~~Development standards.~~ *Area Requirements.* All development within a Single-Family Estate 1.5 (SFE-1.5) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

~~1. Minimum lot area:~~

~~SF-E/1.5 65,340 square feet (1.5 acres)~~
~~SF-E/2.0 87,120 square feet (2.0 acres)~~
~~SF-E/4.0 174,240 square feet (4.0 acres)~~

~~2. Maximum number of single-family detached dwellings units per lot: One.~~
~~3. Minimum square footage per dwelling unit:~~

~~SF-E/1.5 2,000 square feet~~
~~SF-E/2.0 2,200 square feet~~
~~SF-E/4.0 2,500 square feet~~

~~4. Minimum lot yard frontage on a public street:~~

~~SF-E/1.5 150 feet~~
~~SF-E/2.0 150 feet~~
~~SF-E/4.0 200 feet~~

~~5. Minimum lot depth: 250 feet.~~
~~6. Minimum depth of front setback: 50 feet.~~
~~7. Minimum depth of rear yard setback: ten feet.~~
~~8. Minimum width of side yard setback:~~
~~*(Ord. No. 06-14, 4-17-2006)*~~

~~a. Internal lot: 25 feet.~~

~~9. Minimum distance between separate buildings on the same lot or parcel of land: ten feet.~~
~~10. Minimum length of driveway pavement from public right-of-way for rear and side yard: 20 feet.~~
~~11. Maximum building coverage as a percentage of lot area: 35 percent.~~
~~12. Maximum building height: 36 feet.~~
~~13. Minimum number of paved off-street parking spaces required for:~~

~~a. One single-family dwelling unit: two spaces. An enclosed garage shall not be considered in meeting the off-street parking requirements.~~
~~b. All other uses: see article VI, Parking and Loading.~~

SUBSECTION 3.03: SINGLE FAMILY ESTATE 2.0 (SFE-2.0) DISTRICT

A. *Purpose*. The Single-Family Estate 2.0 (SFE-2.0) District is the proper zoning classification for rural, estate lots that are a minimum of two (2) acres in size. These lots are typically in areas that are located in the City's hinterland, away from higher density residential developments and non-residential development. While these properties are on the City's periphery, they should still be provided with

access to public roadways, water, wastewater, and drainage.

B. *Permitted Uses*. All land uses permitted within the Single-Family Estate 2.0 (SFE-2.0) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements.* All development within a Single-Family Estate 2.0 (SFE-2.0) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

SUBSECTION 3.04: SINGLE FAMILY ESTATE 4.0 (SFE-4.0) DISTRICT

A. *Purpose*. The Single-Family Estate 4.0 (SFE-4.0) District is the proper zoning classification for rural, estate lots that are a minimum of four (4) acres in size. These lots are typically in areas that are located in the City's hinterland, away from higher density residential developments and non-residential development. While these properties are on the City's periphery, they should still be provided with access to public roadways, water, wastewater, and drainage. Developers wishing to restrict their subdivision to a lot size greater than four (4) acres shall be required to use restrictive covenants.

B. *Permitted Uses*. All land uses permitted within the Single-Family Estate 4.0 (SFE-4.0) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

C. *Area Requirements.* All development within a Single-Family Estate 4.0 (SFE-4.0) District shall conform to the related standards listed within Section 7.01, *Residential District Development Standards*.

SUBSECTION 3.05 ~~3.03~~: SINGLE-FAMILY 1 (SF-1) DISTRICT ~~Single-Family One (SF-1) District~~

A. *Purpose*. The Single-Family 1 (SF-1) District is the proper zoning classification for larger, single-family lots that are a minimum of one (1) acre in size or clustered developments that have a gross density of one (1) dwelling unit per acre. Cluster developments should conserve open space, floodplains, tree groupings, natural slopes and wildlife habitats to achieve the desired density. The Single-Family 1 (SF-1) District is also intended to be used for developments that incorporate public/private parks, denominational and private schools, and churches that are essential in creating the basic neighborhood unit. These developments are typically in the City's hinterland, away from higher density residential developments and non-residential developments; however, they may be used in areas closer to the periphery of the City's developed areas, where they will serve as a logical transition to an estate or rural area. These developments should provide access to public roadways, water, wastewater, and drainage.

~~1. This district is considered the proper zoning classification for large lot developments for single-family dwelling use, as well as clustered development with an emphasis on conservation of open space, tree groupings, natural slopes and wildlife habitat. It is intended to be composed of single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units.~~

~~2. Areas that are zoned for this use shall have or provide for water, wastewater, drainage and access to paved streets based on single-family use required by the allowed density.~~

~~3. It is intended for areas that are properly buffered from nonresidential uses, and protected from pollution and/or environmental hazards or from high volume of non-single-family traffic.~~

B. *Permitted Uses*. All land uses permitted within the Single-Family 1 (SF-1) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic~~

neighborhood units, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.

C. *Area Requirements*. Development standards. All development within a Single-Family 1 (SF-1) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

1. Minimum lot area: 8,400 square feet.
2. Maximum number of single-family detached dwellings units per lot: one.
3. Minimum square footage per dwelling unit: 2,500 square feet.
4. Minimum lot frontage on a public street: 70 feet.
5. Minimum lot depth: 100 feet.
6. Minimum depth of front yard setback: 20 feet.
7. Minimum depth of rear yard setback: ten feet.
8. Minimum width of side yard setback: a. Internal lot: six feet.
9. Minimum distance between separate buildings on the same lot or parcel of land: ten feet.
10. Minimum length of driveway pavement from the public right-of-way for rear and side yard: 20 feet.
11. Maximum building coverage as a percentage of lot area: 45 percent.
12. Maximum building height: 36 feet.
13. Minimum number of paved off-street parking spaces required for:

    a. One single-family dwelling unit: two. An enclosed garage shall not be considered in meeting the off-street parking requirements.
    b. For all other uses: see article VI, Parking and Loading.

D. Other minimum development standards.

1. Density standards for residential use. The (SF-1) District shall allow a density of only one unit per gross acre with a minimum requirement of 20 percent open space.

E. Open space standards.

1. *Public and Private Open Space*. Unless otherwise provided by this [Unified Development Code], a minimum of 20 percent of the gross land area within the entire Single-Family One (SF-1) District over five acres shall be devoted to open space, except where floodplain exists in the proposed development in which case the dedicated floodplain shall count for up to 50 percent of the 20 percent open space requirement and shall be consistent with the open space requirements of the city's parks and open space plan. Open space requirements for SF-1 Districts may be satisfied by public open space, or by a combination of public and private open space. Public open space shall be dedicated to the city, and shall be approved by the parks board and city council during the platting process. Open space requirements specified in this subsection are in addition to requirements for site landscaping and buffering.

F. Anti-monotony standards.

2. *Exterior Materials.* Exterior wall materials must comply with section 3.1, *General Residential District Standards*, of article V of this [Unified Development] Code. Additionally, masonry chimneys shall be required on all homes.
3. *Anti-Monotony Standards.* Front elevations shall not repeat along any block face without at least four intervening homes of differing appearance on the same side of the street and two intervening homes of differing appearance on the opposite side of the street. The rear elevation of homes backing to open spaces or thoroughfares shall not repeat without at least two intervening homes of

~~differing appearance. Identical brick blends may not occur on adjacent (side-by-side) properties. Homes may differ in appearance in any two of the following ways:~~

~~a. Number of stories.~~
~~b. Garage location.~~
~~c. Roof type and layout.~~
~~d. Articulation of the front facade.~~

~~G. Fencing standards.~~

~~4. *Fencing*.~~

~~a. Solid fencing shall be cedar standard fencing material (minimum one-half inch thickness or more). Spruce fencing will not be allowed. All cedar pickets shall be placed on the "public side" facing a street or an alley. All posts and framing shall be placed on the "private side" of the fence. Other types of solid fencing (such as vinyl) may be considered on a case-by-case basis by the planning and zoning commission at the time of final platting.~~
~~b. Tubular steel or wrought-iron type fencing shall also be allowed.~~
~~c. Tubular steel or wrought-iron type fencing shall be required on all lots located adjacent to perimeter roadways, open spaces, greenbelts and parks.~~
~~d. Split rail fencing shall be allowed on lots containing 20,000 square feet or more.~~
~~e. Fencing on corner lots constructed adjacent to the street shall provide masonry columns at 45 feet off-center spacing that begins at the rear property line corner and terminates at least 15 feet behind the front yard building setback line. A maximum six-foot-high, solid board-on-board "panel" cedar fencing or wrought iron-type fencing shall be allowed between the masonry columns along the side and/or rear yard adjacent to a street. a. On corner lots which have rear lot lines adjacent to alleys or other rear lot lines, fences may be constructed along the side yard adjacent to the street, subject to a minimum five feet setback from the right-of-way. The property owner shall maintain that portion of the property outside of the fence. b. On corner lots which have rear lot lines adjacent to a side lot line of an adjoining lot(s), only tubular steel or wrought iron-type fences not exceeding 42 inches in height may be constructed beyond the building line. Fences constructed on or behind the building line shall comply with the materials requirement in section G.5 above.~~
~~f. All common areas and perimeter fencing shall be maintained by a homeowners association as specified in the city's subdivision regulations. Perimeter fencing shall be constructed of six-foot-tall tubular steel or wrought iron type fencing with masonry columns and entry features. The planning and zoning commission may consider alternative perimeter screening such as earthen berms with landscaping at the time of platting.~~

~~*(Ord. No. 07-18, 6-4-2007)*~~

SUBSECTION 3.06 ~~3.04~~: SINGLE-FAMILY 16 (SF-16) DISTRICT ~~Single-Family Residential (SF-16) District~~

A. *Purpose*. The Single-Family 16 (SF-16) District is the proper zoning classification for larger lot, single-family developments. This zoning district also accommodates public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas buffered from non-residential land uses, and where they will serve as a logical transition from higher to lower density residential zoning districts. These developments should provide access to public roadways, water, wastewater, and drainage.

~~1. This district is considered to be the proper zoning classification for large lot developments for single family dwelling use. It is intended to be composed of single-family dwellings together with~~

~~public, denominational and private schools, churches and public parks essential to create basic neighborhood units.~~

~~2. Areas that are zoned for this use shall have or provide for water, wastewater, drainage and access to paved streets based on single-family use required by the allowed density.~~

~~3. It is intended for areas that are properly buffered from nonresidential uses, and protected from pollution and/or environmental hazards or from high volume of non-single-family traffic.~~

B. *Permitted Uses*. All land uses permitted within the Single-Family 16 (SF-16) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV [of this Unified Development Code], Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Single-Family 16 (SF-16) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

~~1. Minimum lot area: 16,000 square feet.~~
~~2. Maximum number of single-family detached dwellings units per lot: one.~~
~~3. Minimum square footage per dwelling unit: 2,400 square feet.~~
~~4. Minimum lot frontage on a public street: 90 feet.~~
~~5. Minimum lot depth: 100 feet.~~
~~6. Minimum depth of front yard setback: 25 feet.~~
~~7. Minimum depth of rear yard setback: ten feet.~~
~~8. Minimum width of side yard setback:~~

~~a. Internal lot: eight feet.~~

~~9. Minimum distance between separate buildings on the same lot or parcel of land: ten feet.~~
~~10. Minimum length of driveway pavement from the public right-of-way for rear and side yard: 20 feet.~~
~~11. Maximum building coverage as a percentage of lot area: 45 percent.~~
~~12. Maximum building height: 36 feet.~~
~~13. Minimum number of paved off-street parking spaces required for:~~

~~a. One single-family dwelling unit: two. An enclosed garage shall not be considered in meeting the off-street parking requirements.~~
~~b. For all other uses: see article VI [of this Unified Development Code], Parking and Loading.~~

~~*(Ord. No. 06-14, 4-17-2006; Ord. No. 16-47, § 2, 9-6-2016)*~~

SUBSECTION 3.07 ~~3.05~~: SINGLE-FAMILY 10 (SF-10) DISTRICT ~~Single-Family Residential (SF-10) District~~

A. *Purpose*. The Single-Family 10 (SF-10) District is the proper zoning classification for the majority of the City's existing single-family residential development, and is the appropriate zoning classification for single-family developments with medium sized lots. This zoning district also accommodates public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas buffered from non-residential land uses, and where they will serve as a logical transition from higher to lower density residential zoning districts. These developments should provide access to public roadways, water, wastewater, and drainage.

1. This district comprises a major portion of the existing single-family dwelling development of the city. It is intended to be composed of single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units.
2. Areas that are zoned for this use shall have or provide for water, wastewater, drainage and transportation capacities based on single-family use required by the allowed density.
3. It is intended for areas that are properly buffered from nonresidential uses, and protected from pollution and/or environmental hazards or from high volume of non-single-family traffic.

B. *Permitted Uses*. All land uses permitted within the Single-Family 10 (SF-10) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. In general, single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV [of this Unified Development Code], Permissible Uses.

C. *Area Requirements*. Development standards. All development within a Single-Family 10 (SF-10) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

1. Minimum lot area: 10,000 square feet.
2. Maximum number of single-family detached dwellings units per lot: one.
3. Minimum square footage per dwelling unit: 2,200 square feet.
4. Minimum lot frontage on a public street: 80 feet.
5. Minimum lot depth: 100 feet.
6. Minimum depth of front yard setback: 20 feet.
7. Minimum depth of rear yard setback: ten feet.
8. Minimum width of side yard setback:

    a. Internal lot: six feet.

9. Minimum distance between separate buildings on the same lot or parcel of land: ten feet.
10. Minimum length of driveway pavement from the public right-of-way for rear and side yard: 20 feet.
11. Maximum building coverage as a percentage of lot area: 45 percent.
12. Maximum building height: 36 feet.
13. Minimum number of paved off-street parking spaces required for:

    a. One single-family dwelling unit: two. An enclosed garage shall not be considered in meeting the off-street parking requirements.
    b. For all other uses: see article VI [of this Unified Development Code], Parking and Loading.

(Ord. No. 06-14, 4-17-2006; Ord. No. 16-47, § 3, 9-6-2016)

SUBSECTION 3.08 ~~3.06~~: SINGLE-FAMILY 8.4 (SF-8.4) DISTRICT ~~Single-Family Residential (SF-8.4) District~~

A. *Purpose*. The Single-Family 8.4 (SF-8.4) District is the proper zoning classification for areas of undeveloped land remaining in the City deemed appropriate for medium sized, single-family lots. This zoning district also accommodates public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas buffered from non-residential land uses, and where they will serve as a logical transition from higher to lower density residential zoning districts. These developments should provide access to public roadways, water, wastewater, and drainage.

1. This district is considered to be the proper zoning classification for areas of the undeveloped land remaining in the city appropriate for single-family dwelling use. It is intended to be composed of single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units.
2. Areas that are zoned for this use shall have or provide for water, wastewater, drainage and transportation capacities based on single-family use required by the allowed density.
3. It is intended for areas that are properly buffered from nonresidential uses, and protected from pollution and/or environmental hazards or from high volume of non-single-family traffic.

B. *Permitted Uses*. All land uses permitted within the Single-Family 8.4 (SF-8.4) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. In general, single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.

C. *Area Requirements*. Development standards. All development within a Single-Family 8.4 (SF-8.4) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

1. Minimum lot area: 8,400 square feet.
2. Maximum number of single-family detached dwellings units per lot: one.
3. Minimum square footage per dwelling unit: 1,500 square feet.
4. Minimum lot frontage on a public street: 70 feet.
5. Minimum lot depth: 100 feet.
6. Minimum depth of front yard setback: 20 feet.
7. Minimum depth of rear yard setback: ten feet.
8. Minimum width of side yard setback:

(Ord. No. 06-14, 4-17-2006)

a. Internal lot: six feet.

9. Minimum distance between separate buildings on the same lot or parcel of land: ten feet.
10. Minimum length of driveway pavement from the public right-of-way for rear and side yard: 20 feet.
11. Maximum building coverage as a percentage of lot area: 45 percent.
12. Maximum building height: 36 feet.
13. Minimum number of paved off-street parking spaces required for:

a. One single-family dwelling unit: two. An enclosed garage shall not be considered in meeting the off-street parking requirements.
b. For all other uses: see article VI, Parking and Loading.

SUBSECTION 3.09 3.07: SINGLE-FAMILY 7 (SF-7) DISTRICT Single-Family Residential (SF-7) District

A. *Purpose*. The Single-Family 7 (SF-7) District is the proper zoning classification for single-family developments with smaller lots. This zoning district also accommodates public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas adjacent to low intensity non-residential land uses, in and around the Old Town Rockwall (OTR) Historic District, and/or where they will serve as a logical transition from higher to lower density residential zoning districts. These developments should provide access to public roadways, water, wastewater, and drainage.

1. This district is considered to be the proper zoning classification for smaller lot developments for a single-family dwelling use. It is intended to be composed of single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units.
2. Areas that are zoned for this use shall have or provide for water, wastewater, drainage and transportation capacities based on single-family use required by the allowed density.
3. It is intended for areas that are properly buffered from nonresidential uses, and protected from pollution and/or environmental hazards or from high volume of non-single-family traffic.

B. *Permitted Uses*. All land uses permitted within the Single-Family 7 (SF-7) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. In general, single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.

C. *Area Requirements*. Development standards. All development within a Single-Family 7 (SF-7) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

1. Minimum lot area: 7,000 square feet.
2. Maximum number of single-family detached dwellings units per lot: one.
3. Minimum square footage per dwelling unit: 1,100 square feet.
4. Minimum lot frontage on a public street: 60 feet.
5. Minimum lot depth: 100 feet.
6. Minimum depth of front yard setback: 20 feet.
7. Minimum depth of rear yard setback: ten feet.
8. Minimum width of side yard setback:

(Ord. No. 06-14, 4-17-2006)

a. Internal lot: six feet.

9. Minimum distance between separate buildings on the same lot or parcel of land: ten feet.
10. Minimum length of driveway pavement from the public right-of-way for rear and side yard: 20 feet.
11. Maximum building coverage as a percentage of lot area: 45 percent.
12. Maximum building height: 32 feet.
13. Minimum number of paved off-street parking spaces required for:

a. One single-family dwelling unit: two. An enclosed garage shall not be considered in meeting the off-street parking requirements.
b. For all other uses: see article VI, Parking and Loading.

SUBSECTION 3.10 3.08: ZERO LOT LINE (ZL-5) DISTRICT Zero Lot Line Residential (ZL-5) District

D. *Purpose*. The Zero Lot Line (ZL-5) District is the proper zoning classification for medium-density residential developments that are on separate lots (*i.e. single-family*), and are typically owner occupied. This zoning district also accommodates public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas buffered from non-residential land uses, adjacent to low intensity non-residential land uses, and/or where they will serve as a logical transition from higher to lower

density residential zoning districts. These developments have increased requirements for public roadways, water, wastewater, and drainage due to their density.

~~1. The Zero Lot Line Residential District is established to provide adequate space and site diversification for medium-density residential development that is single-family, on separate lots, and typically owner occupied.~~
~~2. Zero lot line development is a medium density use. The increased requirements for street, water and fire protection, wastewater, drainage, and adequate open space should be met or provided for before zoning to this district.~~
~~3. Zero lot line developments must be properly buffered from nonresidential uses, and protected from high volumes of non-single-family traffic, or from pollution and/or environmental hazards.~~

A. *Permitted Uses*. All land uses permitted within the Zero Lot Line (ZL-5) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, single-family dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

B. *Area Requirements*. ~~Development standards.~~ All development within a Zero Lot Line (ZL-5) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

~~1. Minimum lot area: 5,000 square feet.~~
~~2. Maximum number of single-family dwellings units per lot: one.~~
~~3. Minimum square footage per dwelling unit: 1,000 square feet.~~
~~4. Minimum lot frontage on a public street: 50 feet.~~
~~5. Minimum lot depth: 90 feet.~~
~~6. Minimum front yard setback: 20 feet.~~
~~7. Minimum rear yard setback: ten feet.~~
~~8. Minimum width of side yard setback:~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~a. Zero lot line side: zero feet.~~
~~b. Maintenance easement side: ten feet.~~

~~9. Minimum maintenance easement on the non-zero lot line side, when adjacent to another lot in the same zoning district: five feet (this easement shall be maintained as an open space except upon a finding by the building official that the proposed improvements do not impede the use of said easement for maintenance of the adjoining structure).~~
~~10. Minimum distance between buildings on the same lot or parcel of ground: ten feet.~~
~~11. Minimum length of driveway pavement from public right-of-way for rear and side yard: 20 feet.~~
~~12. Maximum building coverage as a percentage of lot area: 50 percent.~~
~~13. Maximum building height: 30 feet.~~
~~14. Minimum number of paved off-street parking spaces:~~

~~a. One single-family dwelling unit: two spaces plus a two-car garage.~~
~~b. For all other uses: see article VI, Parking and Loading.~~

SUBSECTION 3.11 ~~3.09~~: TWO-FAMILY (2F) DISTRICT ~~Duplex (Two-Family) Residential (2F) District~~

A. *Purpose*. The Two-Family (2F) District is the proper zoning classification for medium-density, duplex developments (*i.e. two [2] dwelling units per lot*). This zoning district accommodates low to medium-density developments and allows public land uses, denominational and private schools, churches, and public/private parks essential to creating the basic neighborhood unit. These developments are typically in areas buffered from non-residential land uses, but may be located directly adjacent to low intensity non-residential land uses. These areas are also located where they will serve as a logical transition from higher to lower density residential zoning districts. These developments have increased requirements for public roadways, water, wastewater, drainage, open space and fire protection due to their density.

~~1. The Duplex Residential District is established to provide adequate space and site diversification for medium-density, duplex type residential development with two dwelling units per lot, and at almost twice the density of a typical single-family development, and to adjust the development standards accordingly.~~
~~2. Duplex type development is a low to medium density use, and additional requirements for streets, water and fire protection, wastewater, drainage, and adequate open space shall be met before development to such use.~~
~~3. Duplex developments are not necessarily a buffer between single-family and commercial uses, and should be properly buffered from nonresidential uses, and protected from high volumes of nonresidential traffic, or from pollution and/or environmental hazards.~~

B. *Permitted Uses*. All land uses permitted within the Two-Family (2F) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, single-family and duplex dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Two-Family (2F) District shall conform to Section 3.01, *General Residential District Standards*, and the related standards listed within Section 7.01, *Residential District Development Standards*.

~~1. Minimum lot area: 7,000 square feet.~~
~~2. Maximum number of single-family attached dwellings units per lot: two.~~
~~3. Minimum square footage per dwelling unit: 800 square feet.~~
~~4. Minimum lot frontage on a public street: 60 feet.~~
~~5. Minimum lot depth: 100 feet.~~
~~6. Minimum depth of front yard setback: 20 feet.~~
~~7. Minimum depth of rear yard setback: ten feet.~~
~~8. Minimum width of side yard setback:~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~a. Abutting structures separated by fire retardant walls: zero feet.~~
~~b. Internal lot: six feet*.~~

~~*Townhouses separated by firewall meeting the requirements of the building code may build to the property line where such structures abut.~~

~~9. Minimum distance between buildings on the same lot or parcel of ground: ten feet.~~
~~10. Minimum length of driveway pavement from public right-of-way for rear and side yard: 20 feet.~~
~~11. Maximum building coverage as a percentage of lot area: 45 percent.~~
~~12. Maximum building height: 32 feet.~~

~~13. Minimum number of paved off-street parking spaces:~~

~~a. Each residential dwelling unit: two off-street spaces plus one garage parking space for each dwelling unit.~~
~~b. For all other uses: see article VI, Parking and Loading.~~

SUBSECTION 3.12 ~~3.10~~: MULTI-FAMILY 14 (MF-14) DISTRICT ~~Multi-Family Residential (MF-14) District~~

A. *Purpose*. The Multi-Family 14 (MF-14) District is the proper zoning classification for higher density developments. This zoning district should be located within 1,200-feet of retail and other services, and should not contain more than 500-units within one (1) mile of another multi-family development. These standards are intended to create a strong market for multi-family units, and provide for the ongoing reinvestment in these types developments while helping to ensure that inappropriate concentrations of higher density residential developments are not created. The downtown area shall be exempted from the spacing requirements.

The Multi-Family 14 (MF-14) District allows high density developments that are extremely amenitized, and that necessitate additional requirements for public roadways, water, wastewater, drainage, open space and fire protection. These types of developments should not run traffic through single-family neighborhoods, and should be located close to an arterial or collector street that is capable of carrying the additional traffic.

~~1. The Multi-Family 14 (MF-14) Residential District is established to provide adequate space and site diversification for medium density areas.~~
~~2. Multi-family districts should be located within 1,200 feet of retail and other services; and no more than 500 units should be located within one mile of each other. These standards will help support a strong market for the units, and consequently on-going reinvestment, while helping to make sure that inappropriate concentrations of multi-family units are not created. The downtown area is exempted from the spacing standard.~~
~~3. This zone allows medium density developments, and should be located where additional requirements for streets, water and fire protection, wastewater, drainage, and adequate open spaces are met. MF-14 uses should not run traffic through single-family neighborhoods, and should be located close to arterial or collectors capable of carrying the additional traffic.~~
~~4. Multi-family developments are not necessarily a buffer between single-family and commercial uses, and should be property buffered from nonresidential land uses and traffic, as well as from pollution and/or environmental hazards.~~

B. *Permitted Uses*. All land uses permitted within the Multi-Family 14 (MF-14) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, duplex and apartment dwellings together with public, denominational and private schools, churches and public parks essential to create basic neighborhood units, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Multi-Family 14 (MF-14) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.02, *Multi-Family District Development Standards*.

~~1. Duplexes shall meet the requirements of the 2-F District, with only one duplex per lot.~~
~~2. Minimum site area: 10,000 square feet.~~
~~3. Minimum lot area: 2,000 square feet of lot per unit.~~
~~4. Maximum density per gross acre: 14 units/acre.~~
~~5. Minimum lot frontage on a public street: 60 feet.~~

6. Minimum lot depth: 100 feet.
7. Minimum depth of front yard setback: 25 feet.
8. Minimum depth of rear yard setback*:

a. Abutting a single-family, townhouse, or duplex district:

One-story structure: 25 feet.
Two-story structure: 50 feet.
Three-story structure: 75 feet.

b. Abutting any other district: ten feet.

*Unenclosed carports may be built up to within five feet of any property line that abuts an alley and no closer than 20 feet from any street intersection.

9. Minimum width of side yard setback:

(Ord. No. 06-14, 4-17-2006)

a. Abutting a single-family, townhouse, or duplex district:

One story structure: 25 feet.
Two story structure: 50 feet.
Three story structure: 75 feet.

b. Internal lot: ten feet for a one story structure or 15 feet for structures two or more stories in height.

10. Minimum distance between buildings on the same lot or parcel of land:

a. Ten feet from main to accessory buildings.
b. 20 feet for two main buildings with doors or windows in facing walls.
c. 15 feet for two main buildings without doors or windows in facing walls.

11. Maximum building coverage as a percentage of lot area: 45 percent. Each development containing over 100 dwelling units shall provide 300 square feet of open space per two- and three-bedroom unit, with at least one open area with the minimum dimensions of 200 feet by 150 feet.

Swimming pools, tennis courts and other recreational facilities can be counted toward the overall open space requirement, but not toward the required 200 feet by 150 feet area.

12. Minimum amount of permanent, landscaped open space: 20 percent of total lot area, with 30 percent of total requirement located in front and alongside buildings along street frontages. See article VIII, section 5.12, Required Landscaping.

Any parking lot with more than two rows of spaces shall have a minimum of two percent of the interior of the parking lot in landscaping. Such landscaping shall be counted toward the 20 percent total landscaping requirement.

All required landscaped areas shall be permanently maintained and shall have an irrigation system installed meeting all applicable city codes, and approved by the building official.

~~Also, see article VIII, Landscape Standards.~~

~~13. Maximum building height: 36 feet.~~
~~14. For required off-street parking: see article VI, Parking and Loading.~~
~~15. Lots with more than five dwelling units that are contiguous to a single-family, townhouse, or duplex district, must be separated by a buffer as established in article VIII, Landscape Standards. The required buffer shall be reviewed and approved by city council.~~

~~*(Ord. No. 09-23, 6-15-2009)*~~

SECTION 4: COMMERCIAL DISTRICTS

SUBSECTION 4.01: GENERAL COMMERCIAL DISTRICT STANDARDS

All commercial development shall conform to the following standards:

A. *Construction Materials.*

1. *Materials and Masonry Composition*. Each exterior wall of a building's façade shall consist of a minimum of 90% *Primary Materials* and/or a maximum of 10% *Secondary Materials* -- *excluding doors and windows* -- as defined below.

   a. *Primary Materials*. *Primary Materials* shall include stone, brick, glass curtain wall, glass block, tile, and custom Concrete Masonry Units (CMU) (*i.e. CMUs that have been sandblasted, burnished or that have a split face -- light weight block or smooth faced CMU shall be prohibited*). Specific requirements for *Primary Materials* are as follows:

      1. *Stone.* A minimum of 20% stone (*i.e. natural or synthetic/cultured*) is required on all building façades.
      2. *Cementitious Materials.* The use of cementitious materials (*e.g. stucco, cementitious lap siding, or similar materials approved by the Director of Planning or his/her designee*) shall be limited to 50% of the building's exterior façade; however, stucco shall not be used within the first four (4) feet from grade on a building's façade.
      3. *Accent Brick and Stone.* Each building shall incorporate accent brick or stone, or brick and stone patterns and materials that create contrast through color, shape, size, and/or texture to the planes of the primary brick or stone materials used on each building elevation.

   b. *Secondary Materials*. *Secondary Materials* are any material that is not deemed to be a *Primary Material* as defined above. This includes materials like aluminum composite materials, metal panels, acrylic products (*i.e. EIFS products*), cast stone, or other materials identified by the Director of Planning and Zoning or his/her designee.

~~1. *Exterior Walls.* Each exterior wall shall consist of 90 percent masonry materials as defined in article XIII, Definitions, excluding doors and windows, on walls which are visible from a public street or open space, including a minimum of 20 percent stone.~~

~~All buildings shall have exterior walls constructed of stone, brick, glass block, tile, cast metal, cast or cultured stone, or a combination of those materials. The use of other cementaceous products (e.g., stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the buildings exterior finishes where it is deemed important as a design~~

99

~~feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area.~~

2. *Exceptions*. Exceptions to ~~this~~ the material requirements may be permitted on a case-by-case basis by the Planning and Zoning Commission ~~council~~ upon recommendation from the Architectural Review Board (ARB). The submission and approval of material samples and building elevations ~~drawings~~ of the ~~subject~~ structure shall be required~~, and material samples~~. If the Planning and Zoning Commission denies an exception request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the exception being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*).

B. *Maximum Building Height*.

1. ~~All districts. The height limit for all structures shall be as established in the districts governing the property on which the structures are located, and the exceptions to height setback standards below.~~
2. ~~Building height and~~ *Setback Exceptions for Building Height in Commercial Districts*. ~~*Exceptions.*~~ All structures shall conform to the height requirements specified for the zoning district of the subject property as stipulated by Section 7.03, *Non-Residential District Development Standards*; however, ~~The~~ the following features may be constructed 12-feet higher than the maximum height requirement ~~of the zoning district in which the structure is located~~ if they [*1*] are not more than 33% of the total roof area, and [*2*] are setback from the edge of the roof a minimum of two (2) feet for every one (1) foot that the feature extends above the surface of the roof:

   a. Chimneys, Church Spires, Elevator Shafts, and similar appendages not intended as places of occupancy and/or storage.~~;~~
   b. Flag Poles ~~and similar devices~~.~~;~~
   c. ~~Heating and air conditioning equipment~~, Solar Collectors and/or Similar Equipment, Fixtures, and Devices~~;~~.

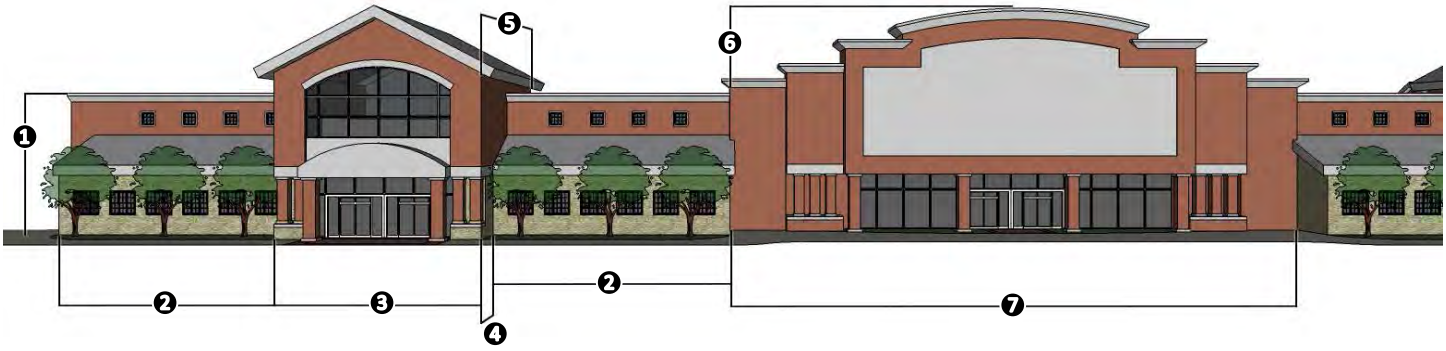
   ~~provided that they are:~~

      ~~a. Not more than one-third of the total roof area; and~~
      ~~b. Set back from the edge of the roof a minimum distance of two feet for every foot by which such features extend above the roof surface of the building to which they are attached.~~

C. *Building Articulation.*

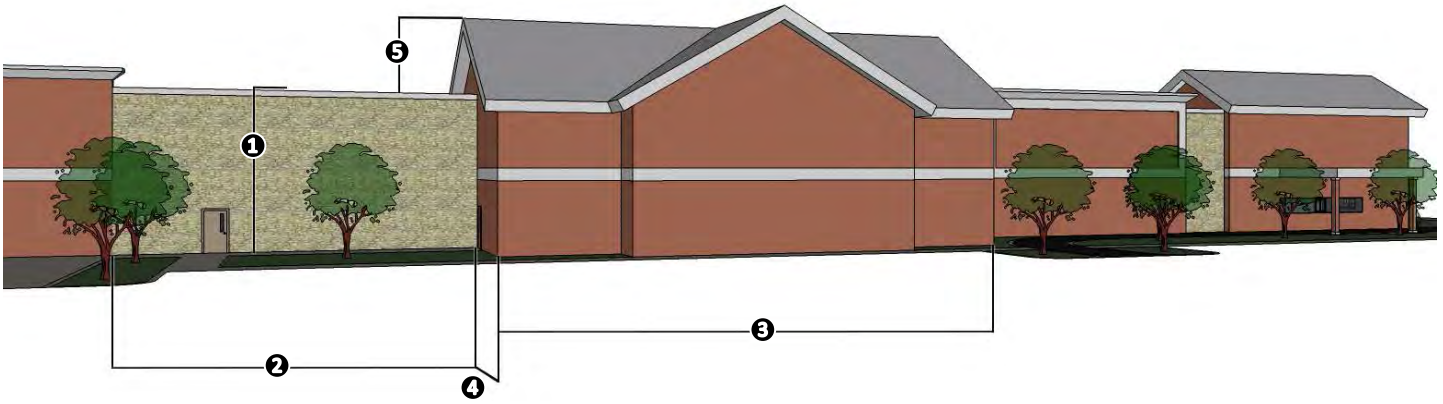
1. *Primary Building Façades.* A primary building façade is any building façade that has a primary entryway for a business or that has an adjacency to a public right-of-way, open space/green space, public/private park, and/or a residential zoning district or residentially used property. All commercial buildings ~~Facades~~ shall meet the following ~~minimum~~ standards for articulation on primary building façades:

~~a. Horizontal articulation. No building wall shall extend for a distance equal to three times the wall's height without having an offset of 25 percent of the wall's height, and that new plane shall extend for a distance equal to at least 25 percent of the maximum length of the first plane.~~
~~b. Vertical articulation. No horizontal wall shall extend for a distance greater than three times the height of the wall without changing height by a minimum of 25 percent of the wall's height.~~



❶: *Wall Height*. The wall height shall be measured from grade to the top of the wall.
❷: *Wall Length*. The maximum wall length shall not exceed three (3) times the wall height (*i.e. 3 x* ❶ ≥ ❷).
❸: *Secondary Entryway/Architectural Element Length*. The minimum length of the secondary entryway or projecting architectural element shall be 25% of the wall length *(i.e. 25% x* ❷ ≤ ❸).
❹: *Wall Projection*. The minimum wall projection for a primary and/or secondary entryway/architectural element shall be 25% of the wall height (*i.e. 25% x* ❶ ≤ ❹).
❺: *Primary and/or Secondary Entryway/Architectural Element Width*. The minimum width of the primary and/or secondary entryway/architectural element shall extend for twice the required wall projection (*i.e. 2 x* ❹ ≥ ❺).
❻: *Projection Height*. The primary and secondary entryways/architectural element shall extend a minimum of 25% of the wall height above the top of the wall (*i.e. 25% x* ❶ ≤ ❻).
❼: *Primary Entryway/Architectural Element Length*. The primary entryway/architectural element shall meet all of the same projections as the secondary entryway/architectural element, but shall extend for a minimum of twice the length of the secondary element (*i.e. 2 x* ❸ ≥ ❼).

2. *Secondary Building Façade.* A secondary building façade is any building façade that does not have a primary entryway or an adjacency to a public right-of-way, open space/green space, public/private park, and/or a residential zoning district or residentially used property. All commercial buildings shall meet the following standards for articulation on secondary building façades:



❶: *Wall Height*. The wall height shall be measured from grade to the top of the wall.
❷: *Wall Length*. The maximum wall length shall not exceed three (3) times the wall height (*i.e. 3 x* ❶ ≥ ❷).
❸: *Secondary Entryway/Architectural Element Length*. The minimum length of the secondary

101

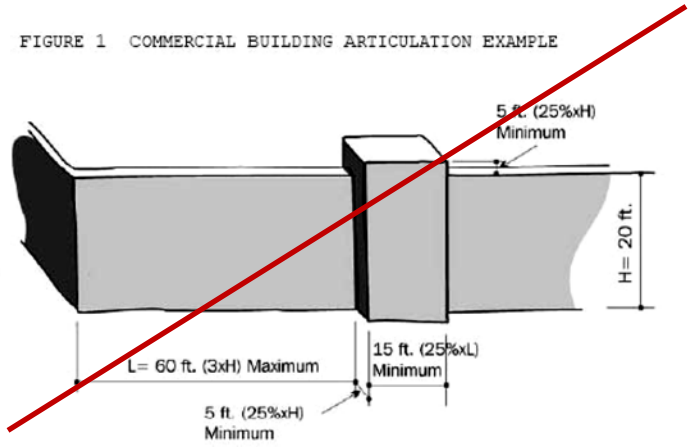
entryway or projecting architectural element shall be 15% of the wall length *(i.e. 15% x ❷ ≤ ❸)*.

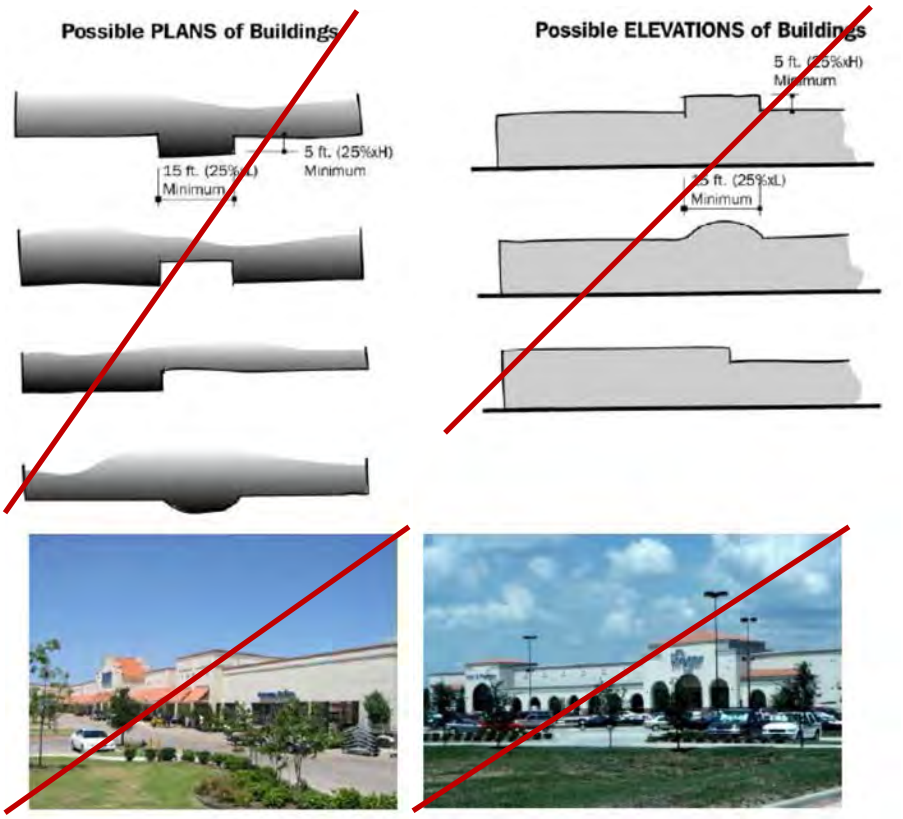
❹: *Secondary Entryway/Architectural Element Width*. The minimum wall projection for a secondary entryway/architectural element shall be 15% of the wall height (*i.e. 15% x ❶ ≤ ❹*).

❺: *Projection Height*. The secondary entryway/architectural element shall extend a minimum of 15% of the wall height above the top of the wall (*i.e. 15% x ❶ ≤ ❺*).

3. *Exceptions*. Exceptions to the building articulation requirements may be permitted on a case-by-case basis by the Planning and Zoning Commission pending a recommendation from the Architectural Review Board (ARB). In determining if an exception to the building articulation requirements is appropriate the Planning and Zoning Commission should determine if the proposed request is [*1*] in conformance with the spirit and intent of the building articulation requirements, and [*2*] if granting the exception will substantially weaken the City's ability to enforce the general purpose of the building articulation requirements in the future. If the Planning and Zoning Commission denies an exception request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the exception being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*).

FIGURE 1 COMMERCIAL BUILDING ARTICULATION EXAMPLE





D. *Open Space Guidelines.* Commercial land uses should be designed to be integrated with adjacent land uses, as opposed to separating land uses using physical barriers or screening walls (*unless necessary*). This should be achieved by making commercial developments pedestrian-oriented and easily accessible to adjacent developments through the use of natural buffers, open space and trails. This involves creating trails that connect commercial and residential developments, using landscape buffers that incorporate berms and landscaping to separate residential and non-residential land uses, and utilizing building design to create compatibility with surrounding land uses.

E. *Commercial Buildings ~~Greater Than~~ 25,000 ~~square feet~~ SF or Greater*.

1. *Applicability.* These criteria shall apply to new retail/commercial building construction in ~~general retail and commercial districts only~~ all commercial zoning districts. This ~~These~~ criteria shall not be applied ~~apply~~ to the use, re-use, modification or consolidation of existing retail and/or commercial space developed ~~as of~~ on or before April 2, 2001, or to the expansion of ~~existing~~ retail space in existence ~~existing~~ ~~as of~~ on or before April 2, 2001, that is being expanded by ~~no greater~~ less than ten (10%) percent of the existing ~~ground~~ floor area.

2. *Exterior Building Materials.* ~~Ninety percent of the~~ The area of all exterior facades shall consist of 90% ~~clay fired~~ brick, ~~native~~ stone, cast stone, custom Concrete Masonry Units (CMUs) (*i.e. CMUs that have been sandblasted, burnished or that have a split face -- light weight block or smooth faced CMU shall be prohibited*)~~integral colored architectural split faced concrete block, plaster~~, stucco or a combination of these materials. Each facade shall not contain more than 75% ~~percent~~ of any single material.

3. *Loading Docks.* Loading docks shall not be oriented towards a residential zoning district~~s~~ or residentially used property. Where loading areas are located parallel to a residential zoning district~~s~~ or residentially used property, they must be screened by an architecturally integrated masonry

screening wall that is a minimum 14-foot ~~tall~~ in height and that runs ~~wall~~ the entire length of the loading space. As an alternative, the Planning and Zoning Commission may approve the use of a berm in conjunction with landscape screening if it is determined that this screening method will [*1*] provide a suitable substitute to a masonry wall, and [*2*] if the screening method will completely screen the proposed loading docks.

4. *On-Site Circulation Guidelines*.

   a. On-site circulation standards should try to minimize the conflict between pedestrians and vehicles by placing driveways and service areas in locations that reduce the chance of interrupting on-site vehicle movement.
   b. Buildings should be placed in a manner that screens the drive-through lane and creates pedestrian pathways and spaces.
   c. In order to maintain on-site circulation, each drive-through lane is to be separate from pump islands and from routes necessary for entering and exiting the property.

5. *Residential Adjacency Standards*. Where the property immediately abuts a residential zoning district or residentially used property~~,~~ -- *unless separated by an ~~MD~~4 M4D (major collector, four [4] lane, divided roadway) or larger thoroughfare*~~,~~ -- a minimum ~~ten-foot-wide~~ ten (10) foot wide landscaped ~~edge~~ buffer must be installed for buildings with a building footprint of 25,000 SF ~~square feet~~ to ~~50,000~~ 49,999 SF ~~square feet~~ in area, a minimum 15-foot wide landscaped ~~edge~~ buffer for buildings with a building footprint of ~~50,001~~ 50,000 SF ~~square feet~~ to 79,999 SF ~~square feet~~ in area, and a minimum 30-foot wide landscaped ~~edge~~ buffer for buildings with a building footprint of 80,000 SF ~~square feet~~ and greater in area. This shall be in addition to the screening required by the landscape regulations of the City of Rockwall for all aforementioned building sizes. The landscaped ~~edge~~ buffer must include a combination of berms, evergreen shrubs, and a mix of evergreen and deciduous trees (*minimum four [4] inch caliper*) placed at a minimum 25-feet on center. Planting may be grouped if approved by the Planning and Zoning Commission.

6. *Outside Storage*. Open storage areas shall be connected to the building and screened with a wall that is constructed of the same building materials as the remainder of the primary structure.

7. *Adaptive Reuse Standards*. For those buildings over 80,000 SF ~~square feet~~ in area, the applicant must demonstrate that the building can be subdivided in a reasonable manner by submitting a plan indicating potential entrances and exits and loading areas for multiple tenants. This plan will need to be submitted at the time of site plan.

(Ord. No. 14-52, § 1, 12-1-2014)

SUBSECTION 4.02: RESIDENTIAL-OFFICE (RO) DISTRICT

A. *Purpose*. The Residential-Office (RO) ~~R-O~~ District is a zoning district intended to recognize~~s~~ the existence of older residential areas of the city, where larger houses have been or can be converted from single-family and multi-family ~~two-family~~ residences to low-intensity office uses in order to extend the economic life of these structures, and to allow the owners to justify the expenditures for repairs and modernization. The intent of this district is to allow for low intensity office development providing professional, medical and other office services and limited retail businesses to residents in adjacent neighborhoods. The Residential-Office (RO) ~~R-O~~ District shall have principle access to major or secondary thoroughfares, and may serve as an area of transition between residential and high-intensity, non-residential uses or busy arterial thoroughfares.

B. *Permitted Uses*. All land uses permitted within the Residential-Office (RO) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, low intensity office development providing professional, medical and other office services to residents in adjacent neighborhoods, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Residential-Office (RO) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

~~1. Minimum lot area: 6,000 square feet.~~
~~2. Maximum lot area: 43,560 square feet.~~
~~3. Minimum lot frontage on a public street: 60 feet.~~
~~4. Minimum lot depth: 100 feet.~~
~~5. Minimum depth of front yard setback: 25 feet (from future right-of-way as shown on the adopted thoroughfare plan or as actually exists, whichever is greater) in those instances where an existing structure is converted into an office use.~~
~~6. Minimum width of side yard setback: ten feet, except if the adjacent property is predominantly residentially zoned or residentially used, in which case the setback shall be 20 feet.~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~7. Minimum depth of rear yard setback: 30 feet.~~
~~8. Minimum distance between detached buildings on the same lot or parcel of land:~~

~~a. Without fire retardant wall: 15 feet.~~
~~b. With fire retardant wall: zero feet.~~

~~9. Minimum requirement for construction materials. For existing structures, no change to exterior walls shall be required. For new structures, each exterior wall shall consist of 90 percent masonry material excluding doors and windows.~~
~~10. Maximum building coverage as a percentage of lot area: 40 percent.~~
~~11. Maximum floor-area ratio (FAR): 0.33 FAR.~~
~~12. Maximum amount of impervious coverage as a percentage of lot area: 75 to 80 percent.~~
~~13. Minimum amount of landscaped areas: all development shall comply with article VIII, section 5.12, Required Landscaping.~~

~~Amenity open space: seven percent of the interior of the parking lot, not including the setback and buffer development standards, shall be previous land area in association with plantings.~~

~~14. Maximum building height: 36 feet.~~
~~15. Minimum number of paved off-street parking spaces required: see article VI, Parking and Loading. Off-street parking shall not be permitted in the required setback in this district.~~
~~16. Maximum number of entrances and/or exits:~~

~~a. Arterial streets: one per each 200 feet of street frontage per site, or as approved by the city council.~~
~~b. Collector streets: one per each 100 feet of street frontage per site, or as approved by the city council.~~
~~c. Local streets: one per each 50 feet of street frontage per site, or as approved by the city council.~~

17. ~~Residential adjacency. Lots with nonresidential uses that have a side or rear contiguous or separated only by an alley, or easement or street, from any residential district must be separated from such residential district by a buffer as defined in article VIII, Landscape Standards, or as approved by the planning and zoning commission.~~
18. ~~Building code. The building code may impose more restrictive development standards depending on the size, use and construction of the structures.~~

SUBSECTION 4.03: NEIGHBORHOOD SERVICES (NS) DISTRICT

A. *Purpose*. The Neighborhood Services (NS) District is a zoning district intended to provide limited retail land uses near neighborhoods for the purpose of supplying the *day-to-day* retail and personal service needs of residents. The Neighborhood Services (NS) District is typically located at limited corner locations on arterials in existing developments, and is intended to serve small service areas. The average site is from ½-acre to a maximum of two (2) acres. Since these sites are typically small and surrounded by residential development they can appear to be spot zones; however, the Comprehensive Plan acknowledges the need to create neighborhood units, which involve the need for limited retail and service uses in close proximity to neighborhoods. These convenience centers should be constructed to a residential scale, and be visually and dimensionally compatible to adjacent residential developments. The Neighborhood Services (NS) District should not contain uses that create excessive amounts of traffic, noise, litter or that would not be conducive to residential adjacency. Due to the residential adjacency of this zoning district, increased landscaping and buffering requirements are necessary.

1. ~~The (NS) Neighborhood Service District is established as a limited retail category intended for use near neighborhood areas for the purpose of supplying day-to-day retail needs of the residents in the area, such as food, drugs and personal services.~~
2. ~~The NS District occurs at limited corner locations on arterials in existing developments and is intended for small service areas in new developments. The average site is from one-half to one acre, up to two acres.~~
3. ~~Since the site is typically small, and surrounded by residential type land uses, this zoning would have the appearance of a spot zone. It is not an illegal spot zone, however, if it is called for in the comprehensive plan, or if it serves a need in the neighborhood. A similar neighborhood convenience center within one-fourth mile of a proposed center would be an indication that the need for such a center is already being met.~~
4. ~~While the uses allowed in this district are intended to be located within or adjacent to residential areas, care must be taken to ensure that adjacent residential uses are protected. Uses with excessive amounts of traffic, noise, or litter are not intended for this district. Areas where two or more comers of an intersection are intended to have shopping facilities should be zoned a less restrictive district. The centers should be located at the intersection of collector type streets or larger that are capable of handling the additional traffic. The area, landscaping, and buffering requirements are more restrictive in this district in order to protect adjacent uses.~~

B. *Permitted Uses*. All land uses permitted within the Neighborhood Services (NS) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, retail businesses which supply day-to-day retail needs of the residents in adjacent neighborhoods, such as food, pharmaceuticals and personal services, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Neighborhood Services (NS) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

4. Minimum site size: 6,000 square feet.
5. Minimum site frontage on a public street: 60 feet.
6. Minimum site depth: 100 feet.
7. Minimum depth of front yard setback: 15 feet. Parking should not be located between the front facade and the property line.
8. Minimum width of side yard setback:

    a. Without fire retardant wall: five feet.
    b. With fire retardant wall: zero feet.
    c. Abutting residentially zoned property: 20 feet.

9. Minimum depth of rear yard setback:

    d. Abutting nonresidentially zoned property with fire retardant wall and alley separating: zero feet.
    e. Without fire retardant wall or alley: 20 feet.
    f. Abutting residentially zoned property: 20 feet.

10. Minimum distance between detached buildings on the same lot or parcel of land:

    c. Without fire retardant wall: 15 feet.
    d. With fire retardant wall: zero feet.

11. Maximum building size: 5,000 square feet in area, unless otherwise approved as a specific use permit (SUP) by the planning and zoning commission and city council.

    (Ord. No. 06-14, 4-17-2006)

12. Maximum building coverage as a percentage of lot area: 40 percent.
13. Maximum amount of impervious coverage as a percentage of lot area: 80 to 85 percent. See article VIII.5.12, Required Landscaping.
14. Minimum amount of landscaped area: all development shall comply with the landscaping regulations in article VIII, Landscape Standards.
15. Maximum building height: 36 feet.
16. Minimum number of paved off-street parking spaces required: see article VI, Parking and Loading.
17. Maximum number of entrances and/or exits:

    a. Arterial streets: one per each 200 feet of street frontage per site, or as approved by the city council.
    b. Collector streets: one per each 100 feet of street frontage per site, or as approved by the city council.
    c. Local streets: one per each 50 feet of street frontage per site, or as approved by the city council.

18. Residential adjacency. Neighborhood service uses that have a side or rear contiguous or separated only by an alley, or easement or street, from any residential district must be separated from such residential district by a buffer as defined in article VIII, Landscape Standards, or as approved by the city council.
19. Building code. The building code may impose more restrictive development standards depending on the size, use and construction of the structures.

SUBSECTION 4.04: GENERAL RETAIL (GR) DISTRICT

A. *Purpose.* The General Retail (GR) District is a zoning district intended to provide limited retail and service uses for one (1) or more neighborhoods. The land uses specified in this district include most types of retail and office activity, and are typically located on/at the intersections of major thoroughfares. This district does ***not*** include strip commercial/retail centers, large shopping centers, wholesaling operations, lumberyards, contractor yards, and/or warehouses with high volumes of commercial truck traffic. The General Retail (GR) District is not a major commercial/retail district, and should try to avoid intensive commercial land uses that carry large volumes of retail traffic. The noise, traffic, litter, late night hours, and other influences that could be harmful to residential areas require adequate buffering and screening from residential areas. Traffic from land uses in this district should not pass through residential areas, except on arterial or major collectors. There are restrictions on access to prevent traffic congestion or an adverse effect on major thoroughfares adjacent to residential areas. Areas should not be zoned General Retail (GR) District unless they are located on or close to an arterial or major collector that is capable of carrying increased traffic. Since the General Retail (GR) District will be located close to residential areas, the development standards are stringent and require high standards of development similar to the Residential-Office (RO) and Neighborhood Services (NS) Districts.

~~1. The general retail district is established to provide limited retail and service uses for one or more neighborhoods. The uses specified in this district include most types of retail activity and are located on, or at the intersections of, major thoroughfares. This district does not include strip commercial, large shopping centers, wholesaling operations, lumber yards, contractor yards, and warehousing with high volumes of truck traffic and low volumes of retail type traffic.~~
~~2. This district will not be a major retail district, and will try to avoid intensive commercial uses and large volumes of retail traffic. The noise, traffic, litter, late night hours, and other influences that could be harmful to residential areas require adequate buffering from residential areas, and the traffic from such uses should not pass through residential areas, except on arterial or major collectors. There are restrictions on access to prevent traffic congestion or an adverse effect on major thoroughfares.~~
~~3. Areas should not be zoned to this use unless they are located on or close to arterial or major collectors capable of carrying the additional traffic they will generate, and in areas where there is increased water, fire protection, wastewater and drainage capacity.~~
~~4. This zone is a light retail zone, and it is intended that limited commercial uses fall in this district. Since the zone will be located close to residential areas, the development standards are stringent and require as high a standard of development as the RO and NS Districts.~~

B. *Permitted Uses.* All land uses permitted within the General Retail (GR) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, retail and service uses for one or more neighborhoods may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a General Retail (GR) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

~~1. Minimum site size: 6,000 square feet; one acre when adjacent to Interstate 30.~~
~~2. Minimum site frontage on a public street: 60 feet; 200 feet when adjacent to Interstate 30.~~
~~3. Minimum site depth: 100 feet; 200 feet when adjacent to Interstate 30.~~
~~4. Minimum depth of front yard setback: 15 feet from the future right-of-way as shown on the adopted thoroughfare plan or as actually exists, whichever is greater. Parking should not be located between the front facade and the property line.~~
~~5. Minimum width of side yard setback.~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~a. Without fire retardant wall: ten feet, or as required by building and/or fire codes.~~
~~b. With fire retardant wall: zero feet.~~
~~c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.~~
~~d. In no case shall more than a 50 foot setback be required.~~

~~6. Minimum depth of rear yard setback:~~

~~a. Abutting nonresidentially zoned property, with fire retardant wall and alley separating: zero feet.~~
~~b. Without fire retardant wall, or alley: ten feet, or as required by building and/or fire codes.~~
~~c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.~~
~~d. In no case shall more than a 50 foot setback be required.~~

~~7. Minimum distance between detached buildings on the same lot or parcel of land:~~
~~a. Without fire retardant wall: 15 feet.~~
~~b. With fire retardant wall: zero feet.~~

~~8. Maximum building size: 25,000 square feet in area, unless otherwise approved as a specific use permit (SUP) by the planning and zoning commission and city council.~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~9. Maximum building coverage as a percentage of lot area: 40 percent.~~
~~10. Maximum amount of impervious coverage as a percentage of lot area: 85 to 90 percent. See article VIII.5.12, Required Landscaping.~~
~~11. Minimum amount of landscaped area: all development shall comply with article VIII, Landscape Standards.~~
~~12. Maximum floor area ratio (FAR): 2:1 (FAR).~~
~~13. Maximum building height: 60 feet. Any structure over 36 feet shall require a specific use permit.~~
~~14. Minimum number of paved off-street parking spaces required: see article VI, Parking and Loading.~~
~~15. Maximum number of entrances and/or exits:~~

~~a. Arterial streets: one per each 200 feet of street frontage per site, or as approved by the city council.~~
~~b. Collector streets: one per each 100 feet of street frontage per site, or as approved by the city council.~~
~~c. Local streets: one per each 50 feet of street frontage per site, or as approved by the city council.~~

~~16. Residential adjacency. Lots with nonresidential uses that have a side or rear contiguous or separated only by an alley, or easement or street, from any residential district must be separated from such residential district by a buffer as defined in article VIII, Landscape Standards, or as approved by the city council.~~
~~17. Building code. The building code may impose more restrictive development standards depending on the size, use and construction of the structures.~~

SUBSECTION 4.05: COMMERCIAL (C) DISTRICT

A. *Purpose*. The Commercial (C) District is the proper zoning classification for most types of commercial development (*e.g. larger shopping centers at major intersections, commercial strips along arterial roadways, etc.*). The land uses specified for the Commercial (C) District include most types of office and retail activity with some special provisions for wholesale land uses. This district mostly excludes land uses that are not compatible with retail shopping (*e.g. lumberyards, contractor yards,*

warehousing, or other land uses with high volumes of truck traffic and low volumes of retail traffic). The noise, traffic, litter, late night hours, and other influences that could be harmful to neighborhoods require adequate buffering and mitigating factors when locating adjacent to residential areas. Areas should not be zoned to Commercial (C) District unless they are located on or close to an arterial or major collector that is capable of carrying the additional traffic generated by land uses in this district. In addition, these areas may require increased water, fire protection, wastewater and drainage capacity. The Commercial (C) District is a general business zone, and is intended to service most commercial land uses, with the exception of land uses that would fall into the Heavy Commercial (HC) District. Since the Commercial (C) District is general in nature, the development standards are less stringent and do not require as high of standards of development as the Residential-Office (RO), Neighborhood Services (NS) and General Retail (GR) Districts.

~~1. The Commercial District is established to provide adequate space and site diversification for most types of commercial development in the City of Rockwall. Larger shopping centers and most of the existing commercial strips along major arterial roadways would be included in this district. The uses specified in this district include most types of retail activity and some wholesale with the exception of those uses which are not compatible with the retail shopping function. For example, lumberyards, contractor yards, and warehousing with high volumes of truck traffic and low volumes of retail type traffic are not included in this district.~~

~~2. This district will be the major retail district, with intensive commercial uses and large volumes of retail traffic. The noise, traffic, litter, late night hours, and other influences that could be harmful to residential areas require adequate buffering from residential areas, and the traffic from such uses should not pass through residential areas, except on arterial or major collectors.~~

~~3. Areas should not be zoned to this use unless they are located on or close to arterial or major collectors capable of carrying the additional traffic they will generate, and in areas where there is increased water, fire protection, wastewater and drainage capacity.~~

~~5. This zone is the general business zone, and it is intended that most commercial uses fall in this district, with the exception of the heavy commercial type uses. Since the zone is of a general nature, the development standards are less stringent and do not require as high a standard of development as the RO, NS and GR Districts.~~

B. *Permitted Uses*. All land uses permitted within the Commercial (C) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, any retail business, personal service, professional service, or business service conducted within a completely enclosed building, excluding high truck traffic uses, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Commercial (C) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

~~1. Minimum site size: 10,000 square feet; one acre when adjacent to Interstate 30.~~

~~2. Minimum site frontage on a public street: 60 feet; 200 feet when adjacent to Interstate 30.~~

~~3. Minimum site depth: 100 feet; 200 feet when adjacent to Interstate 30.~~

~~4. Minimum depth of front yard setback: 15 feet from the future right-of-way as shown on the adopted thoroughfare plan or as actually exists, whichever is greater. Parking should not be located between the front facade and the property line.~~

~~6. Minimum width of side yard setback:~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~a. Without fire retardant wall: ten feet, or as required by building and/or fire codes.~~

~~b. With fire retardant wall: zero feet.~~
~~c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.~~
~~d. In no case shall more than a 50 foot setback be required.~~

~~7. Minimum depth of rear yard setback:~~

~~a. Abutting nonresidentially zoned property, with fire retardant wall and alley separating: zero feet.~~
~~b. Without fire retardant wall, or alley: ten feet, or as required by building and/or fire codes.~~
~~c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.~~
~~d. In no case shall more than a 50 foot setback be required.~~

~~8. Minimum distance between detached buildings on the same lot or parcel of land:~~

~~a. Without fire retardant wall: 15 feet.~~
~~b. With fire retardant wall: zero feet.~~

~~9. Maximum building coverage as a percentage of lot area: 60 percent.~~
~~10. Maximum amount of impervious coverage as a percentage of lot area: 85 to 90 percent. See article VIII.5.12, Required Landscaping.~~
~~11. Minimum amount of landscaped area - all development shall comply with article VIII, Landscape Standards.~~
~~12. Maximum floor area ratio (FAR): 4:1 (FAR).~~
~~13. Maximum building height: 240 feet. Any structure over 60 feet shall require a specific use permit.~~
~~14. Minimum number of paved off-street parking spaces required: see article VI, Parking and Loading.~~
~~15. Maximum number of entrances and/or exits:~~

~~a. Arterial streets: one per each 200 feet of street frontage per site, or as approved by the city council.~~
~~b. Collector streets: one per each 100 feet of street frontage per site, or as approved by the city council.~~
~~c. Local streets: one per each 50 feet of street frontage per site, or as approved by the city council.~~

~~16. Residential adjacency. Lots with nonresidential uses that have a side or rear contiguous or separated only by an alley, or easement or street, from any residential district must be separated from such residential district by a buffer as defined in article VIII, Landscape Standards, or as approved by the city council.~~
~~17. Building code. The building code may impose more restrictive development standards depending on the size, use and construction of the structures.~~

D. ~~*Special standards.*~~ *Special District Requirements.*

~~1. *Sale of Goods*. All business establishments other than those selling a service, shall be retail or wholesale service establishments dealing directly with customers. All goods produced on the premises shall be sold on premises where they are produced.~~
1. ~~2.~~ *Business Operations and Storage*. All business operations including storage shall be conducted within a completely enclosed building unless specifically authorized for the use as ~~listed~~ stipulated in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. This excludes off-street parking and loading, incidental display of retail items for sale, retail outlets where gasoline products are sold and drive-in businesses.

~~Sec. 4.6. - Reserved.~~

111

SUBSECTION 4.06 ~~4.7~~: HEAVY COMMERCIAL (HC) DISTRICT

A. *Purpose*. The Heavy Commercial (HC) District is the proper zoning classification for commercial establishments that may involve uses that would not be suitable in the other commercial zoning districts. Included in this district are commercial uses that involve large volumes of commercial truck traffic, outside operations, outside storage of materials and equipment, excessive noise from heavy service operations, and/or any other possibly adverse operations. The Heavy Commercial (HC) District is commercial in nature, but has some aspects that are similar to industrial land uses. The zoning district allows noise, traffic, litter, late night hours, outside storage of materials and equipment, and other influences that could be harmful if directly adjacent to residential areas, and will require adequate buffering and other mitigating factors if such an adjacency exists. Areas should not be zoned to Heavy Commercial (HC) District unless they are located on or close to an arterial that is capable of carrying large volumes of commercial truck traffic. Businesses locating in the Heavy Commercial (HC) District should work with the City to ensure that water, wastewater, and drainage capacity is adequate before locating on a particular property, and that streets in and adjacent to this district are of a size and strength to accommodate commercial truck traffic.

~~1. The Heavy Commercial District is established to provide adequate space and site diversification for commercial establishments may involve uses that would be objectionable in the other commercial districts or adjacent to residential districts. Included in this district are commercial uses that involve large volumes of truck traffic, outside operations and storage of materials and equipment, either for sale or as part of the business, excessive noise from heavy service operations, or any other possibly adverse influences.~~

~~2. This district is commercial in nature, but has some aspects that are similar to industrial uses. The noise, traffic, litter, late night hours, outside storage of materials and equipment, and other influences that could be harmful to residential areas require adequate buffering from residential areas, and the traffic from such uses should not pass through residential areas at all, if possible. These areas should not be located in close proximity to residential areas of any type.~~

~~3. Areas should not be zoned to this use unless they are located on or close to arterials capable of carrying commercial and truck traffic. They should be located close to major truck routes. Internal streets in such developments should be sized and strengthened to accommodate truck traffic. Fire protection should be adequate for large warehouse type operations, and the water, wastewater, and drainage systems should have enough existing capacity to support such development.~~

B. *Permitted Uses*. All land uses permitted within the Heavy Commercial (HC) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, any retail business, personal service, professional service, or business service conducted within a completely enclosed building, excluding high truck traffic uses, may be allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Commercial (C) District shall conform to Section 4.01, *General Commercial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

~~1. Minimum site size: 12,500 square feet; one acre when adjacent to Interstate 30.~~
~~2. Minimum site frontage on a public street: 100 feet; 200 feet when adjacent to Interstate 30.~~
~~3. Minimum site depth: 125 feet; 200 feet when adjacent to Interstate 30.~~
~~4. Minimum depth of front yard setback: 25 feet from the future rights-of-way as shown on the adopted thoroughfare plan or as actually exists, whichever is greater.~~
~~5. Minimum width of side yard setback:~~

(Ord. No. 06-14, 4-17-2006)

a. Without fire retardant wall: 15 feet plus one-half of the building height over 36 feet.
b. With fire retardant wall: zero feet plus one-half of the building height over 36 feet.
c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.
d. In no case shall more than a 50 foot setback be required.

6. Minimum depth of rear yard setback:

a. Abutting nonresidentially zoned property, with fire retardant wall and alley separating: zero feet plus one-half the building height over 36 feet.
b. Without fire retardant wall, or alley: 20 feet.
c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.
d. In no case shall more than a 50 foot setback be required.

7. Minimum distance between detached buildings on the same lot or parcel of land:

a. Without fire retardant wall: 15 feet plus one-half the building height over 36 feet.
b. With fire retardant wall: zero feet plus one-half the building height over 36 feet.
c. In no case shall more than a 50 foot setback be required.

8. Maximum building coverage as a percentage of lot area: 60 percent.
9. Maximum amount of impervious coverage as a percentage of lot area: 90 to 95 percent. See article VIII.5.12, Required Landscaping.
10. Minimum amount of landscaped area: all development shall comply with article VIII, Landscape Standards.
11. Maximum floor area ratio (FAR): 4:1 (FAR).
12. Maximum building height: 240 feet. Any structure over 60 feet shall require a specific use permit.
13. Minimum number of paved off-street parking spaces required: see article VI, Parking and Loading.
14. Maximum number of entrances and/or exits:

a. Arterial streets: one per each 200 feet of street frontage per site, or as approved by the city council.
b. Collector streets: one per each 100 feet of street frontage per site, or as approved by the city council.
c. Local streets: one per each 50 feet of street frontage per site, or as approved by the city council.

15. Residential adjacency. Lots with nonresidential uses that have a side or rear contiguous or separated only by an alley, or easement or street, from any residential district must be separated from such residential district by a buffer as defined in article VIII, Landscape Standards, or as approved by the city council.
16. Building code. The building code may impose more restrictive development standards depending on the size, use and construction of the structures.
17. Outside storage.

d. All outside storage shall be placed behind the front facade of the main structure. This does not apply to uses that allow incidental display, in which case only the amount of goods necessary for display purposes shall be exempt from this requirement.
e. All outside storage shall be screened from streets and public areas.

113

D. *Special District Requirements.*

1. *Outside Storage*.

a. All outside storage shall be placed behind the front facade of the main structure. This does not apply to uses that allow incidental display, in which case only the amount of goods necessary for display purposes shall be exempt from this requirement.
b. All outside storage shall be screened from streets and public areas.

SUBSECTION 4.07 ~~4.8~~: DOWNTOWN (DT) DISTRICT

Subsection 4.07, *Downtown (DT) District*, is omitted from this ordinance change, but is retained in its entirety.

SECTION 5: INDUSTRIAL DISTRICTS

SUBSECTION 5.01: GENERAL INDUSTRIAL DISTRICT STANDARDS

All industrial development shall conform to the following standards:

A. *Construction Materials*.

1. *Materials and Masonry Composition*. Each exterior wall of a building's façade shall consist of a minimum of 90% *Primary Materials* and/or a maximum of 10% *Secondary Materials* -- *excluding doors and windows* -- as defined below.

a. *Primary Materials*. *Primary Materials* shall include stone, brick, glass curtain wall, glass block, tile, and custom Concrete Masonry Units (CMU) (*i.e. CMUs that have been sandblasted, burnished or that have a split face -- light weight block or smooth faced CMU shall be prohibited*). Specific requirements for *Primary Materials* are as follows:

1. *Stone.* A minimum of 20% stone (*i.e. natural or synthetic/cultured*) is required on all building façades.
2. *Cementitious Materials.* The use of cementitious materials (*e.g. stucco, cementitious lap siding, or similar materials approved by the Director of Planning or his/her designee*) shall be limited to 50% of the building's exterior façade; however, stucco shall not be used within the first four (4) feet from grade on a building's façade. The use of concrete tilt-up walls may be permitted on a case-by-case basis in accordance with the exception requirements outlined below.
3. *Accent Brick and Stone.* Each building shall incorporate accent brick or stone, or brick and stone patterns and materials that create contrast through color, shape, size, and/or texture to the planes of the primary brick or stone materials used on each building elevation.

b. *Secondary Materials*. *Secondary Materials* are any material that is not deemed to be a *Primary Material* as defined above. This includes materials like aluminum composite materials, metal panels, acrylic products (*i.e. EIFS products*) cast stone, or other materials identified by the Director of Planning and Zoning or his/her designee.

~~1. *Exterior Walls.* Each exterior wall shall consist of 90 percent masonry materials as defined in article XIII, Definitions, excluding doors and windows, on walls which are visible from a public street or open space, including a minimum of 20 percent stone.~~

~~All buildings shall have exterior walls constructed of stone, brick, glass block, tile, cast metal, cast or cultured stone, or a combination of those materials. The use of other cementaceous products (e.g., stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the buildings exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area.~~

2. *Exceptions*. Exceptions to ~~this~~ the material requirements may be permitted on a case-by-case basis by the Planning and Zoning Commission ~~council~~ upon recommendation from the Architectural Review Board (ARB). The submission and approval of material samples and building elevations ~~drawings~~ of the ~~subject~~ structure shall be required~~, and material samples~~. If the Planning and Zoning Commission denies an exception request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the exception being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*).

B. *Maximum Building Height.*

1. ~~All districts. The height limit for all structures shall be as established in the districts governing the property on which the structures are located, and the exceptions to height setback standards below.~~
2. ~~Building height and~~ *Setback Exceptions for Building Height in Industrial Districts*. ~~*Exceptions.*~~ All structures shall conform to the height requirements specified for the zoning district of the subject property as stipulated by Section 7.03, *Non-Residential District Development Standards*; however, ~~The~~ the following features may be constructed 12-feet higher than the maximum height requirement ~~of the zoning district in which the structure is located~~ if they [*1*] are not more than 33% of the total roof area, and [*2*] are setback from the edge of the roof a minimum of two (2) feet for every one (1) foot that the feature extends above the surface of the roof:

   a. Chimneys, Church Spires, Elevator Shafts, and similar appendages not intended as places of occupancy and/or storage.~~;~~
   b. Flag Poles~~ and similar devices~~.~~;~~
   c. ~~Heating and air conditioning equipment~~, Solar Collectors and/or Similar Equipment, Fixtures, and Devices~~;~~.

   ~~provided that they are:~~

      ~~a. Not more than one-third of the total roof area; and~~
      ~~b. Set back from the edge of the roof a minimum distance of two feet for every foot by which such features extend above the roof surface of the building to which they are attached.~~

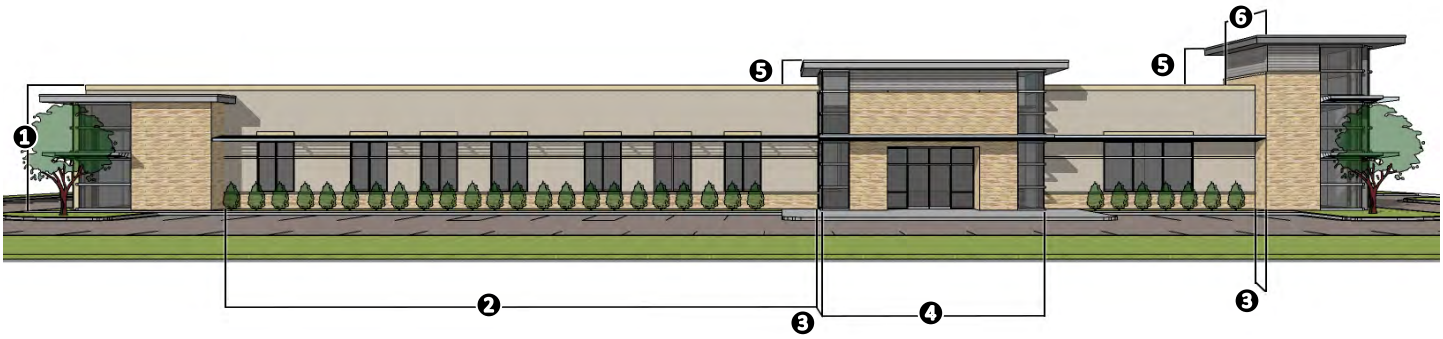
C. *Building Articulation*.

1. ~~*Requirements*. Facades which face streets shall meet the following minimum standards for articulation:~~

   ~~a. *Horizontal articulation*. No building wall shall extend for a distance equal to four times the wall's height without having an offset of 25 percent of the wall's height, and that new plane shall extend for a distance equal to at least 20 percent of the maximum length of the first plane.~~

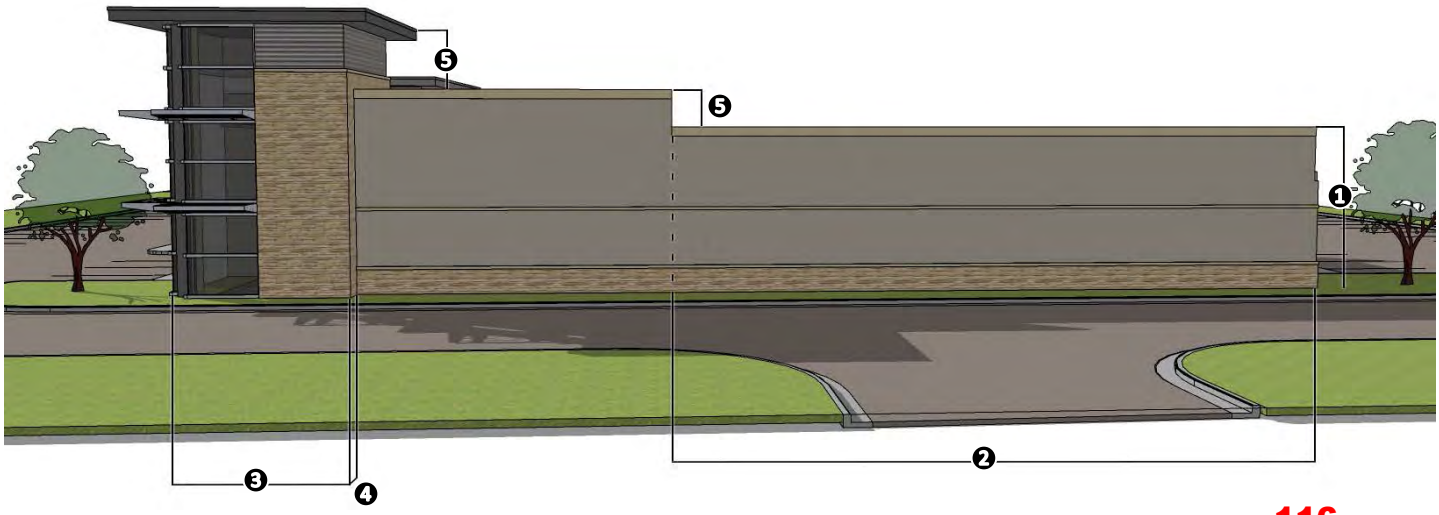
~~b. *Vertical articulation.* No horizontal wall shall extend for a distance greater than four times the height of the wall without changing height by a minimum of 25 percent of the wall's height.~~

1. *Primary Building Façades.* A primary building façade is any building façade that has a primary entryway for a business or that has an adjacency to a public right-of-way, open space/green space, public/private park, and/or a residential zoning district or residentially used property. All industrial buildings shall meet the following standards for articulation on primary building façades:



❶: *Wall Height*. The wall height shall be measured from grade to the top of the wall.
❷: *Wall Length*. The maximum wall length shall not exceed four (4) times the wall height (*i.e. 4 x* ❶ ≥ ❷).
❸: *Wall Projection*. The minimum wall projection for an entryway/architectural element shall be 25% of the wall height (*i.e. 25% x* ❶ ≤ ❸).
❹: *Entryway/Architectural Element Length*. The minimum entryway/architectural element length shall be 33% of the wall height (*i.e. 33% x* ❷ ≥ ❹).
❺: *Projection Height*. The entryways/architectural elements shall extend a minimum of 25% of the wall height above the top of the wall (*i.e. 25% x* ❶ ≤ ❺).
❻: *Entryway/Architectural Element Width*. The minimum width of the entryway/architectural element shall extend for twice the required wall projection (*i.e. 2 x* ❸ ≥ ❻).

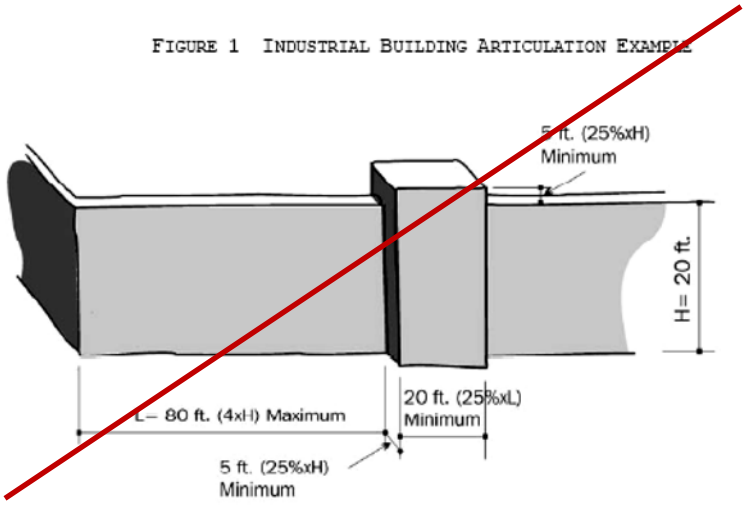
2. *Secondary Building Façade.* A secondary building façade is any building façade that does not have a primary entryway or an adjacency to a public right-of-way, open space/green space, public/private park, and/or a residentially zoned district or residentially used property. All industrial buildings shall meet the following standards for articulation on secondary building façades:

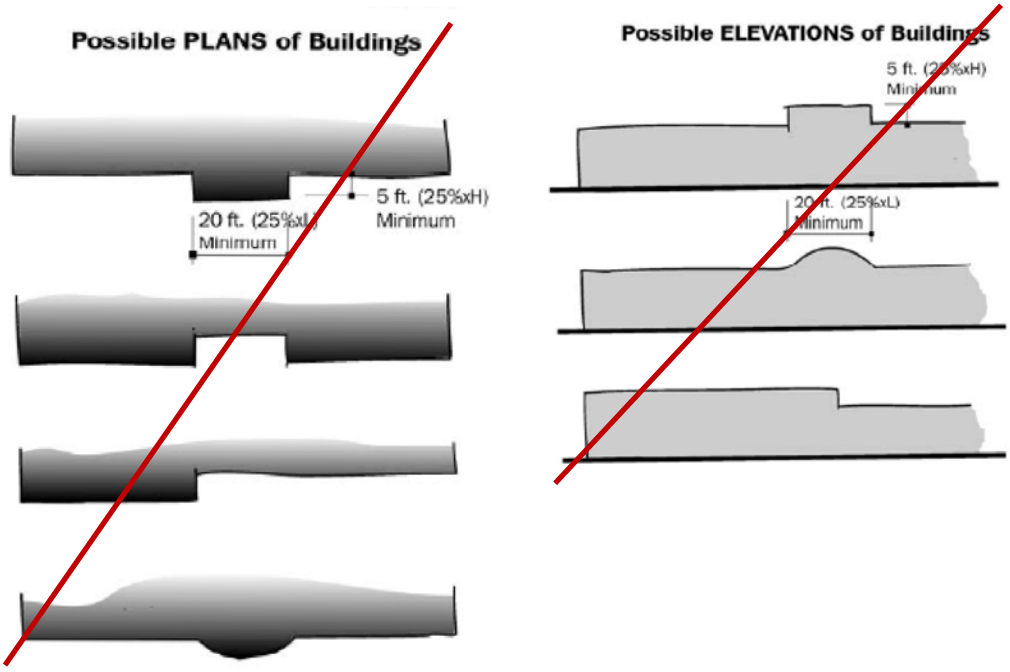


116

❶: *Wall Height*. The wall height shall be measured from grade to the top of the wall.
❷: *Wall Length*. The maximum wall length shall not exceed three (3) times the wall height (*i.e. 3 x* ❶ ≥ ❷).
❸: *Secondary Entryway/Architectural Element Length*. The minimum length of the secondary entryway or projecting architectural element shall be 15% of the wall length *(i.e. 15% x* ❷ ≤ ❸).
❹: *Secondary Entryway/Architectural Element Width*. The minimum wall projection for a secondary entryway/architectural element shall be 15% of the wall height (*i.e. 15% x* ❶ ≤ ❹).
❺: *Projection Height*. The secondary entryways/architectural elements shall extend a minimum of 15% of the wall height above the top of the wall (*i.e. 15% x* ❶ ≤ ❺).

FIGURE 1 INDUSTRIAL BUILDING ARTICULATION EXAMPLE





~~*(Ord. No. 14-52, § 1, 12-1-2014)*~~

117

3. *Exceptions.* Exceptions to the building articulation requirements may be permitted on a case-by-case basis by the Planning and Zoning Commission pending a recommendation from the Architectural Review Board (ARB). In determining if an exception to the building articulation requirements is appropriate the Planning and Zoning Commission should determine if the proposed request is [1] in conformance with the spirit and intent of the building articulation requirements, and [2] if granting the exception will substantially weaken the City's ability to enforce the general purpose of the building articulation requirements in the future. If the Planning and Zoning Commission denies an exception request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the exception being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*).

D. *Open Space Guidelines*. Industrial land uses should be designed to be integrated with adjacent land uses, as opposed to separating land uses using physical barriers or screening walls (*unless necessary*). This should be achieved by making industrial developments pedestrian-oriented and easily accessible to adjacent developments through the use of natural buffers, open space and trails. This involves creating trails that connect commercial and residential developments, using landscape buffers that incorporate berms and landscaping to separate residential and non-residential land uses, and utilizing building design to create compatibility with surrounding land uses.

~~*SUBSECTION 5.02: RESEARCH TECHNOLOGY (RT) DISTRICT*~~

~~E. Purpose.~~

~~2. The purpose of the research technology district is to create a light office/industrial zone that provides for the modern type of office and technology park development that would include research and development as well as light manufacturing and assembly. Limitations are placed on the uses in this district to significantly restrict the outside activities and storage of materials, noise, vibration, smoke, pollution, fire and explosive hazard, glare and any other potentially adverse influences.~~

~~3. The light manufacturing and assembly uses should be conducted within a totally enclosed building. The sites for such uses are typically a minimum of two acres and average five to ten acres, with a significant amount of land dedicated to landscaping.~~

~~4. Because this is a light industrial zone with substantial screening and buffering requirements, these uses are suitable for high visibility locations such as along the freeway, or within a reasonable distance of residential areas. Residential uses should be discouraged from locating near the industrial district to protect the industries from residential complaints.~~

~~18. Though truck traffic should be minimal, areas zoned for this use should be located with access to arterials capable of accommodating some truck traffic. Each industry should work with the city to ensure the water pressure and capacity is adequate to provide fire protection for that particular industry before such industry is developed. Industries should also work with the city to ensure that the water, wastewater, and drainage capacity is adequate before the industry is developed.~~

~~F. Permitted uses. In general, office, research and development as well as light manufacturing and assembly uses are allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

~~G. Development standards.~~

~~1. Minimum site size: 12,500 square feet; adjacent to IH-30: one acre.~~
~~2. Minimum site frontage on a public street: 100 feet; adjacent to IH-30: 200 feet.~~

118

3. Minimum site depth: 125 feet; adjacent to IH-30: 200 feet.
4. Minimum depth of front yard setback: 25 feet from the future rights-of-way as shown on the adopted thoroughfare plan or as actually exists, whichever is greater.

19. Minimum width of side yard setback:

(Ord. No. 06-14, 4-17-2006)

a. Without fire retardant wall: 15 feet plus one-half of the building height over 36 feet.
b. With fire retardant wall: zero feet plus one-half of the building height over 36 feet.
c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.
d. In no case shall more than a 50-foot setback be required.

20. Minimum depth of rear yard setback:

a. Abutting nonresidentially zoned property, with fire retardant wall and alley separating: zero feet plus one-half the building height over 36 feet.
b. Without fire retardant wall or alley; ten feet, or as required by building and/or fire codes.
c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.
d. In no case shall more than a 50-foot setback be required.

21. Minimum distance between detached buildings on the same lot or parcel of land:
a. Without fire retardant wall: 15 feet plus one-half the building height over 36 feet.
b. With fire retardant wall: zero feet plus one-half the building height over 36 feet.
c. In no case shall more than a 50-foot setback be required.

22. Maximum building coverage as a percentage of lot area: 60 percent.
23. Maximum amount of impervious coverage as a percentage of lot area: 80 to 85 percent. See article VIII.5.12, Required Landscaping.
24. Minimum amount of landscaped areas: all development shall comply with article VIII, Landscape Standards.
25. Maximum floor area ratio: 2:1 FAR.
26. Maximum building height: 120 feet. Any structure over 60 feet shall require a specific use permit.
27. Minimum number of paved off-street parking spaces required: See article VI, Parking and Loading.
28. Maximum number of entrances and/or exits:

a. Arterial streets: one per each 200 feet of street frontage per site, or as approved by the city council.
b. Collector streets: one per each 100 feet of street frontage per site, or as approved by the city council.
c. Local streets: one per each 50 feet of street frontage per site, or as approved by the city council.

29. Residential adjacency. Lots with nonresidential uses that have a side or rear contiguous or separated only by an alley, or easement or street, from any residential district must be separated from such residential district by a buffer as defined in article VIII [of this Unified Development Code], Landscape Standards, or as approved by the city council.
30. Building code. The building code may impose more restrictive development standards depending on the size, use and construction of the structures.

H. Special requirements.

1. Manufacturing operations and storage. All business and light assembly and manufacturing operations including storage shall be conducted within a completely enclosed building.

SUBSECTION 5.02 ~~5.03~~: LIGHT INDUSTRIAL (LI) DISTRICT

A. *Purpose*. The Light Industrial (LI) District is a zoning district intended to create a limited industrial zone that provides for modern types of industrial land uses. With the exception of hazardous materials/manufacturing, this zone allows the same uses as the Heavy Industrial (HI) District. Limitations have been placed on the uses in this district to significantly restrict outside activities and the storage of materials, noise, vibration, smoke, pollution, fire and explosive hazards, glare and any other potentially adverse externalities. The Light Industrial (LI) District is intended for industrial parks and larger, cleaner types of industries. The manufacturing uses should be conducted within a totally enclosed building, and any activities conducted outside should be screened and buffered to ensure no external effects (*e.g. excessive noise or odor*) extend beyond the property lines. The locations for these types of industrial land uses are typically a minimum of two (2) acres and average of five (5) to ten (10) acres. These types of development also incorporate open space and significant amounts of land dedicated to landscaping.

Since this zoning district accommodates limited industrial activities that require substantial screening and buffering requirements, the Light Industrial (LI) District is a suitable zoning designation for high visibility locations (*e.g. IH-30 and SH-276*) or within a reasonable distance of residential areas as long as they are separated by an appropriate amount of open space. Residential uses should be discouraged from locating directly adjacent to or near the Light Industrial (LI) District to protect these types of businesses from excessive complaints about performance standards. Areas should not be zoned to Light Industrial (LI) District unless they are located on or close to an arterial capable of carrying commercial truck traffic. In industrial parks, internal streets should be of a size and strength to accommodate commercial truck traffic. Businesses locating in the Light Industrial (LI) District should work with the City to ensure that water, wastewater, and drainage capacity is adequate before locating on a particular property.

~~1. The purpose of the Light Industrial district is to create a limited industrial zone that provides for the modern type of industrial uses or industrial park. With the exception of hazardous materials manufacture, this zone allows the same uses as the HI, Heavy Industrial District. Limitations are placed on the uses in this district to significantly restrict the outside activities and storage of materials, noise, vibration, smoke, pollution, fire and explosive hazard, glare and any other potentially adverse influences.~~

~~2. This zone is intended for industrial parks and larger, cleaner types of industries. The manufacturing uses should be conducted within a totally enclosed building. Any activities conducted outside should be screened and buffered, and no external effects such as excessive noise or odor should extend beyond the property lines. The sites for such uses are typically a minimum of two acres and average five to ten acres, with a significant amount of land dedicated to landscaping.~~

~~3. Because this is a limited industrial zone with substantial screening and buffering requirements, limited industrial uses are suitable for high visibility locations such as along the freeway, or within a reasonable distance of residential areas. Residential uses should be discouraged from locating near the industrial district to protect the industries from residential complaints.~~

~~4. Areas should not be zoned to this use unless they are located on or close to arterial capable of carrying commercial and truck traffic. They should be located close to major truck routes. Internal streets in such developments should be sized and strengthened to accommodate truck traffic. Each industry should work with the city to ensure the water pressure and capacity is adequate to provide fire protection for that particular industry before such industry is developed. Industries should also work with the city to ensure that the water, wastewater, and drainage capacity is adequate before the industry is developed.~~

B. *Permitted Uses*. All land uses permitted within the Light Industrial (LI) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, industrial parks and larger, cleaner types of industrial uses are allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Light Industrial (LI) District shall conform to Section 4.01, *General Industrial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

~~1. Minimum site size: 12,500 square feet; adjacent to IH-30: one acre.~~
~~2. Minimum site frontage on a public street: 100 feet; adjacent to IH-30: 200 feet.~~
~~3. Minimum site depth: 125 feet; adjacent to IH-30: 200 feet.~~
~~4. Minimum depth of front yard setback: 25 feet from the future rights-of-way as shown on the adopted thoroughfare plan or as actually exists, whichever is greater.~~
~~5. Minimum width of side yard setback:~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~a. Without fire retardant wall: 15 feet plus one-half of the building height over 36 feet.~~
~~b. With fire retardant wall: zero feet plus one-half of the building height over 36 feet.~~
~~c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.~~
~~d. In no case shall more than a 50 foot setback be required.~~

~~6. Minimum depth of rear yard setback:~~

~~a. Abutting nonresidentially zoned property, with fire retardant wall and alley separating: zero feet plus one-half the building height over 36 feet.~~
~~b. Without fire retardant wall, or alley: ten feet, or as required by building and/or fire codes.~~
~~c. Abutting residentially zoned property: 20 feet plus one-half the building height over 36 feet.~~
~~d. In no case shall more than a 50-foot setback be required.~~

~~7. Minimum distance between detached buildings on the same lot or parcel of land:~~

~~a. Without fire retardant wall: 15 feet plus one-half the building height over 36 feet.~~
~~b. With fire retardant wall: zero feet plus one-half the building height over 36 feet.~~
~~c. In no case shall more than a 50-foot setback be required.~~

~~8. Maximum building coverage as a percentage of lot area: 60 percent.~~
~~9. Maximum amount of impervious coverage as a percentage of lot area: 90 to 95 percent. See article VIII.5.12, Required Landscaping.~~
~~10. Minimum amount of landscaped areas: all development shall comply with article VIII, Landscape Standards.~~
~~11. Maximum floor area ratio: 2:1 FAR.~~
~~12. Maximum building height: 120 feet. Any structure over 60 feet shall require a specific use permit.~~
~~13. Minimum number of paved off-street parking spaces required: See article VI, Parking and Loading.~~
~~14. Maximum number of entrances and/or exits:~~

~~a. Arterial streets: one per each 200 feet of street frontage per site, or as approved by the city council.~~
~~b. Collector streets: one per each 100 feet of street frontage per site, or as approved by the city council.~~
~~c. Local streets: one per each 50 feet of street frontage per site, or as approved by the city council.~~

121

~~15. Residential adjacency. Lots with nonresidential uses that have a side or rear contiguous or separated only by an alley, or easement or street, from any residential district must be separated from such residential district by a buffer as defined in article VIII, Landscape Standards, or as approved by the city council.~~

~~16. Building code. The building code may impose more restrictive development standards depending on the size, use and construction of the structures.~~

D. ~~Special requirements.~~ Special District Requirements.

1. *Manufacturing Operations and Storage*. All business and manufacturing operations including storage shall be conducted within a completely enclosed building unless specifically authorized for the use as listed in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*.

SUBSECTION 5.03 ~~5.04~~: HEAVY INDUSTRIAL (HI) DISTRICT

A. *Purpose*. The City of Rockwall recognizes that some industrial uses cannot be conducted within a totally enclosed building, are not visually attractive, may involve hazardous materials, and could have adverse impacts to adjacent land uses due to noise, odor, pollution, and truck traffic. The Heavy Industrial (HI) District is intended to provide adequate space and site diversification for these types of developments. The development standards in the Heavy Industrial (HI) District are minimal, and allow both large and small industrial uses either on separate small lots or as part of a larger industrial park. Some screening is required, but because of the potential for hazardous or possibly adverse uses, this district should not be located close to residential areas of any type. Areas should not be zoned Heavy Industrial (HI) District unless they are located on or close to an arterial roadway capable of carrying commercial truck traffic. Internal streets in the Heavy Industrial (HI) District should be of a size and strength to accommodate commercial truck traffic. Businesses locating in the Heavy Industrial (HI) District should work with the City to ensure that water, wastewater, and drainage capacity is adequate before locating on a particular property.

~~1. The City of Rockwall recognizes that some industrial uses including fabrication processes, cannot be conducted within a totally enclosed building, are not visually attractive, may involve hazardous materials, and could have adverse impacts due to noise, odor, pollution and truck traffic. The Heavy Industrial District is intended to provide adequate space and site diversification for such types of developments.~~

~~2. The development standards in this district are minimal, and will allow both large and small industrial uses either on separate small lots or as part of a park. Some screening is required, but because of the potential for hazardous or possibly adverse uses, this district should not be located close to residential areas of any type.~~

~~3. Areas should not be zoned to this use unless they are located on or close to arterial roadways capable of carrying commercial and truck traffic. They should be located close to major truck routes. Internal streets in such developments should be sized and strengthened to accommodate truck traffic. Each industry should work with the city to ensure the water pressure and capacity is adequate to provide fire protection for that particular industry before such industry is developed.~~

B. *Permitted Uses*. All land uses permitted within the Heavy Industrial (HI) District are outlined in Section 1, *Land Use Schedule*, of Article IV, *Permissible Uses*. ~~In general, industrial uses which cannot be conducted within an enclosed building, and which may involve hazardous materials, and could have adverse impacts due to noise, odor, pollution and truck traffic, are allowed. However, no building or land may be used, unless in accordance with the use tables and requirements in article IV, Permissible Uses.~~

C. *Area Requirements*. ~~Development standards.~~ All development within a Heavy Industrial (HI) District shall conform to Section 4.01, *General Industrial District Standards*, and the related standards listed within Section 7.03, *Non-Residential District Development Standards*.

~~1. Minimum site size: two acres.~~
~~2. Minimum site frontage on a public street: 200 feet.~~
~~3. Minimum site depth: 350 feet.~~
~~4. Minimum depth of front yard setback: 25 feet plus one-half the building height over 36 feet, but in no case shall more than a 50-foot front yard setback be required.~~

~~a. Adjacent to IH-30: 50 feet from the future width of right-if-way as shown on the adopted thoroughfare plan or as actually exists, whichever is greater.~~

~~5. Minimum width of side yard setback:~~

~~*(Ord. No. 06-14, 4-17-2006)*~~

~~a. Without fire retardant wall: 15 feet plus one-half of the building height over 36 feet.~~
~~b. With fire retardant wall: eight feet plus one-half of the building height over 36 feet.~~
~~c. Abutting residentially zoned property: 50 feet.~~
~~d. In no case shall more than a 50-foot setback be required.~~

~~6. Minimum depth of rear yard setback:~~

~~a. Abutting nonresidentially zoned property, with fire retardant wall and alley separating: eight feet plus one-half the building height over 36 feet.~~
~~b. Without fire retardant wall or alley: 20 feet plus one-half the building height over 36 feet.~~
~~c. Abutting residentially zoned property: 50 feet plus one-half the building height over 36 feet.~~
~~d. In no case shall more than a 50-foot setback be required.~~

~~7. Minimum distance between detached buildings on the same lot or parcel of land:~~

~~a. Without fire retardant wall: 25 feet plus one-half the building height over 36 feet.~~
~~b. With fire retardant wall: 16 feet plus one-half the building height over 36 feet.~~
~~c. In no case shall more than a 50-foot setback be required.~~

~~8. Maximum building coverage as a percentage of lot area: 85 percent.~~
~~9. Maximum amount of impervious coverage as a percentage of lot area: 90 to 95 percent. See article VIII.5.12, Required Landscaping.~~
~~10. Minimum amount of landscaped areas: all development shall comply with article VIII, Landscape Standards.~~
~~11. Required screening: all outside storage shall be screened as herein defined from all public streets and neighboring zoning districts.~~
~~12. Maximum floor area ratio: 4:1 FAR.~~
~~13. Maximum building height: 120 feet. Any structure over 60 feet shall require a specific use permit.~~
~~14. Minimum number of paved off-street parking spaces required: see article VI, Parking and Loading.~~
~~15. Maximum number of entrances and/or exits:~~

~~a. Arterial streets: one per each 200 feet of street frontage per site, or as approved by the city council.~~
~~b. Collector streets: one per each 100 feet of street frontage per site, or as approved by the city council.~~

123

~~c. Local streets: one per each 50 feet of street frontage per site, or as approved by the city council.~~

~~16. Residential adjacency. Lots with nonresidential uses that have a side or rear contiguous or separated only by an alley, or easement or street, from any residential district must be separated from such residential district by a buffer as defined in article VIII, Landscape Standards, or as approved by the city council.~~

~~17. Building code. The building code may impose more restrictive development standards depending on the size, use and construction of the structures.~~

SECTION 6: OVERLAY DISTRICTS

SUBSECTION 6.01: ~~GENERAL OVERLAY DISTRICT STANDARDS~~ OVERLAY DISTRICTS

~~A. *Applicability*. Overlay districts are applied to land which has a traditional district already applied. It establishes additional uses and standards which may be either more or less restrictive than the underlying zoning district. The overlay district governs in all cases where it sets out a particular use or standard. Otherwise, standards and uses in the underlying district will govern.~~

Overlay districts are applied to land that has a traditional zoning district designation already applied to it. It establishes additional uses and standards, which may be either more or less restrictive than the underlying zoning district. The overlay district governs in all cases where it sets out a particular use or standard that conflicts with other sections of this Unified Development Code (UDC). In cases where the overlay district does not specifically address a standard or requirement, the underlying zoning district will govern.

SUBSECTION 6.02: GENERAL OVERLAY DISTRICT STANDARDS

A. *Applicability*. The *General Overlay District Standards* shall be applied to the following overlay districts:

- ☑ IH-30 Overlay (IH-30 OV) District
- ☑ SH-205 Overlay (SH-205 OV) District
- ☑ Scenic Overlay (SOV) District
- ☑ SH-66 Overlay (SH-66 OV) District
- ☑ SH-205 By-Pass Overlay (SH-205 BY OV) District
- ☑ North SH-205 Overlay (N. SH-205 OV) District
- ☑ East SH-66 Overlay (E. SH-66 OV) District
- ☑ FM-549 Overlay (FM-549 OV) District
- ☑ SH-276 Overlay (SH-276 OV) District

All other overlay district standards are detailed in Sections 6.03 – 6.15.

B. *Special Use Standards.* Development within the Scenic Overlay (SOV) District and the SH-66 Overlay (SH-66 OV) District shall comply with the *Land Use Schedule* contained in Article IV, *Permissible Uses*, of this Unified Development Code (UDC); however, the following land uses may be considered on a case-by-case basis through a Specific Use Permit:

a. Retail Store with Gasoline Sales (*Any Amount of Dispensers or Vehicles*)
b. Car Wash (*Any Type*)
c. Structures Over 36-Feet in Height

C. *Architectural Standards.*

1. *Materials and Masonry Composition*. Each exterior wall of a building's façade shall consist of a minimum of 90% *Primary Materials* and/or a maximum of 10% *Secondary Materials -- excluding doors and windows* -- as defined below.

   c. *Primary Materials*. *Primary Materials* shall include stone, brick, glass curtain wall, glass block, tile, and custom Concrete Masonry Units (CMU) (*i.e. CMUs that have been sandblasted, burnished or that have a split face -- light weight block or smooth faced CMU shall be prohibited*). Specific requirements for *Primary Materials* are as follows:

      1. *Stone.* A minimum of 20% natural or quarried stone is required on all building façades; however, the Planning and Zoning Commission, upon recommendation from the Architectural Review Board (ARB), may grant the use of a high quality manufactured or cultured stone in lieu of natural or quarried stone if it is determined that the application of the manufactured or cultured stone will be complimentary and integral to the design of the building. In making this determination, both the Architectural Review Board (ARB) and the Planning and Zoning Commission should consider the shape, texture, size, quality and warranty of the product being proposed.
      2. *Cementitious Materials.* The use of cementitious materials (*e.g. stucco, cementitious lap siding, or similar materials approved by the Director of Planning or his/her designee*) shall be limited to 50% of the building's exterior façade; however, stucco shall not be used within the first four (4) feet from grade on a building's façade.
      3. *Accent Brick and Stone.* Each building shall incorporate accent brick or stone, or brick and stone patterns and materials that create contrast through color, shape, size, and/or texture to the planes of primary brick or stone materials in an elevation.

   d. *Secondary Materials*. *Secondary Materials* are any material that is not deemed to be a *Primary Material* as defined above. This includes materials like aluminum composite materials, metal panels, acrylic products (*i.e. EIFS products*) cast stone, cultured stone or other materials identified by the Director of Planning and Zoning or his/her designee.

2. *Roof Design Standards*. All structures that have a building footprint of less than 6,000 SF shall be constructed with a pitched roof. Those structures having a footprint 6,000 SF or greater shall have the option of being constructed with either a pitched, parapet, or mansard roof system as long as the roof system is enclosed on all sides. Standing seam metal roofs shall be constructed of a factory-treated, non-metallic, matte finish to avoid glare. Metal roofs with lapped seam construction, bituminous built-up roofs, and/or flat membrane-type roofs that are visible from adjacent public right-of-way shall be prohibited.

3. *Mechanical Equipment Screening*. All buildings shall be designed so that no HVAC, satellite dishes, appurtenances and/or any other mechanical equipment visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.

   a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances shall be accomplished by either the construction of [*1*] a roof system described in the *Roof Design Standards* above, or [*2*] an architectural feature that is integral to the building's design and ensures that such rooftop mechanical equipment is not visible from any direction. Fencing or the enclosing of individual mechanical units shall not be permitted.

   b. All rooftop mechanical equipment or architectural features shall be shown on the required building elevations and submitted along with the site plan for review by City Staff, the Architectural Review Board (ARB), and the Planning and Zoning Commission.

4. *Required Architectural Elements.* All buildings that are less than 50,000 SF shall be designed to incorporate a minimum of four (4) architectural elements, buildings over 50,000 SF shall include a minimum of six (6) architectural elements, and buildings over 100,000 SF shall include a minimum of seven (7) architectural elements. The accepted architectural elements for all buildings are as follows:

   - ☑ Canopies, Awnings, or Porticos
   - ☑ Recesses/Projections
   - ☑ Arcades
   - ☑ Peaked Roof Forms
   - ☑ Arches
   - ☑ Outdoor Patios
   - ☑ Display Windows
   - ☑ Architectural Details (*e.g. Tile Work and Moldings*) Integrated into the Building's Facade
   - ☑ Articulated Ground Floor Levels or Bases
   - ☑ Articulated Cornice Line
   - ☑ Integrated Planters or Wing Walls that Incorporate Landscape and Sitting Areas
   - ☑ Offsets, Reveals or Projecting Rib Expressing Architectural or Structural Bays
   - ☑ Varied Roof Heights

NOTE: Other architectural features maybe approved by the Director of Planning and Zoning or his/her designee.

5. *Four (4) Sided Architecture.* All buildings shall be architecturally finished on all four (4) sides utilizing the same materials, detailing, articulation and features. In addition, a minimum of one (1) row of trees (*i.e. four [4] or more accent or canopy trees*) shall be planted along perimeter of the subject property to the rear of the building.

6. *Windows.* The color of all windows shall be reviewed by the Architectural Review Board (ARB), and shall have a maximum visible exterior reflectivity of 20%.

7. *Office Parks, Shopping Centers and Mixed Use Centers.* All buildings within a common retail, commercial or office development shall incorporate complementary architectural styles, materials, and colors. Staff may require a conceptual façade plan and/or sample boards for these types of developments to ensure consistency and compatibility for all buildings within a proposed development. Conceptual façade plans will be used only to ensure compliance to the minimum standards.

8. *Corporate Identity.* A company's building corporate identity that conflicts with the *General Overlay District Standards* shall be reviewed case-by-case basis as a variance in accordance with the requirements of Section 6.16, *Variances to the General Overlay District Standards*.

D. *Site Design Guidelines and Standards.*

1. *Building Setbacks*. The building setbacks adjacent to the *Primary Roadway* (*i.e. IH-30, SH-205, FM-740, SH-66, FM-549, John King Boulevard and SH-276*) shall be as follows:

   (1) Scenic Overlay (SOV) District: 15-feet
   (2) SH-66 Overlay (SH-66 OV) District: 15-feet
   (3) IH-30 Overlay (IH-30 OV) District: 25-feet
   (4) SH-205 Overlay (SH-205 OV) District: 25-feet

(5) North SH-205 Overlay (N. SH-205 OV) District: 25-feet
(6) SH-205 By-Pass Overlay (SH-205 BY OV) District:

- ☑ Residential Land Uses: *See Section 6.3.5, SH-205 By-Pass Overlay (SH-205 BY OV) District*
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

(7) East SH-66 Overlay (E. SH-66 OV) District:

- ☑ Residential Land Uses: 25-feet
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

(8) FM-549 Overlay (FM-549 OV) District:

- ☑ Residential Land Uses: 25-feet
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

(9) SH-276 Overlay (SH-276 OV) District:

- ☑ Residential Land Uses: 25-feet
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

All other building setback regulations shall be the same as set forth in the underlying zoning district.

2. *Parking Restrictions*. No more than one (1) full row of parking (*i.e. two rows of parking with a drive aisle*) shall be allowed between the primary building façade and the right-of-way of the *Primary Roadway* (*i.e. IH-30, SH-205, FM-740, SH-66, FM-549, John King Boulevard and SH-276*).

3. *Access/Ingress/Egress*. In an effort to minimize potential vehicular and pedestrian conflicts, special attention must be given to the location of median breaks along major thoroughfares, the number and location of driveways providing ingress/egress, the design of driveways providing ingress/egress in relation to the parking areas and sight/visibility distances. Taking this into consideration it is important to review all site plans for the following guidelines:

   (a) Driveways should be spaced a minimum of 100-feet from the intersection of any major thoroughfare.
   (b) The ingress/egress driveways shall have a minimum radius of 30-feet;
   (c) Driveways should maintain an appropriate visibility triangle at ingress/egress driveways.
   (d) Main entrances should generally be located at median breaks that provide left turn access into the site.
   (e) Main entrances should connect to a *straightaway* aisle that does not dead end or require an immediate turn to approach the main building.
   (f) Aisles intersecting with entrance drives should be spaced at a minimum of 20-feet from the property line to provide for smooth turning movements.

4. *Cross Access*. *Cross Access Easements* may be required by the Planning and Zoning Commission at the time of site plan approval to ensure access to future median breaks and to reduce the number of curb cuts needed along roadways.

5. *Shared Parking.* In all office parks, shopping centers and mixed use centers cross access and shared parking agreements may be required by the City Council along with final plat approval.

6. *Loading and Service Areas*. All loading and service areas shall be located on the rear and side of buildings where possible. In the event that a loading or service area faces towards the *Primary Roadway* (*i.e. IH-30, SH-205, FM-740, SH-66, FM-549, John King Boulevard and SH-276*), additional screening of the loading and service area may be required by the Architectural Review Board (ARB) and Planning and Zoning Commission. A minimum of a ten (10) foot masonry screening wall shall be required to screen the view of loading docks and loading spaces intended for tractor/semi-trailer delivery from any public right-of-way. This ten (10) foot masonry screening wall must screen the entire loading dock or loading space. Screening materials shall utilize similar masonry materials as the front façade of the primary building. The accommodation of adequate access for service delivery trucks shall be evaluated to determine the extent of screening required.

7. *Trash/Recycling Receptacles and Dumpster Enclosures*. Trash/Recycling Enclosures shall be four (4) sided. These receptacles shall be screened by a minimum eight (8) foot, solid masonry dumpster enclosure that utilizes the same masonry materials as the primary building and incorporates an opaque, self-latching gate. These enclosures shall be located to the side or rear of the primary building, and shall not front on to a public right-of-way. Every effort shall be made to reduce the visibility of these structures utilizing landscaping and/or the building.

8. *Play Structures*. Play structures shall not be placed between the primary building façade and a public right-of-way.

9. *Plan Review*. In addition to the other processes and factors established by this Unified Development Code (UDC), all concept plans, development plans and site plans for property situated within an established overlay district shall be reviewed for the following:

   a. The conformance of the proposed site plan to the site design guidelines and standards.
   b. The conformance of the proposed landscape plan to the intent of the landscaping and screening requirements.
   c. The conformance of the building elevations to the intent of the architectural standards.
   d. The provision of sufficient cross access and circulation on the site plan.
   e. The provision of sufficient visibility triangles to avoid congestion at ingress/egress driveways.

E. *Landscape Standards*.

1. *Landscape Buffers*. The minimum landscape buffer adjacent to *Primary Roadways* (*i.e. IH-30, SH-205, FM-740, SH-66, FM-549, John King Boulevard and SH-276*) [*outside of and beyond any required right-of-way dedication*] shall be as follows:

   (1) Scenic Overlay (SOV) District: 20-feet
   (2) SH-66 Overlay (SH-66 OV) District: 20-feet
   (3) IH-30 Overlay (IH-30 OV) District: 20-feet
   (4) SH-205 Overlay (SH-205 OV) District: 20-feet
   (5) North SH-205 Overlay (N. SH-205 OV) District: 20-feet
   (6) SH-205 By-Pass Overlay (SH-205 BY OV) District:

      ☑ Residential Land Uses: 50-feet
      ☑ Retail/Commercial Land Uses: 25-feet

- ☑ Industrial/Office/Technology Land Uses: 50-feet

(7) East SH-66 Overlay (E. SH-66 OV) District:

- ☑ Residential Land Uses: 25-feet
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

(8) FM-549 Overlay (FM-549 OV) District:

- ☑ Residential Land Uses: 25-feet
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

(9) SH-276 Overlay (SH-276 OV) District:

- ☑ Residential Land Uses: 25-feet
- ☑ Retail/Commercial Land Uses: 15-feet
- ☑ Industrial/Office/Technology Land Uses: 50-feet

All landscape buffers shall incorporate ground cover, a *built-up* berm and/or shrubbery or a combination thereof along the entire length of the frontage. Berms and/or shrubbery shall have a minimum height of 30-inches and a maximum height of 48-inches. In addition, two (2) canopy trees and four (4) accent trees shall be planted per 100-feet of linear frontage along the *Primary Roadway*. In the E. SH-66 Overlay (E SH-66 OV), FM-549 Overlay (FM-549 OV), and SH-205 By-Pass Overlay (SH-205 BY OV) Districts the required landscape buffer shall incorporate one (1) additional cedar tree per 100-feet of linear of frontage along the *Primary Roadway*.

2. *Plant Material Sizes and Selection*. All canopy trees, accent trees, shrubs and ground cover proposed to be planted in any overlay district shall be in conformance to the tables depicted in Appendix F, *Landscaping Guidelines and Requirements*, of this Unified Development Code (UDC) and shall be subject to the following sizes:

   a. *Canopy Trees* shall be a minimum of four (4) caliper inches at DBH.
   b. *Accent Trees* shall be a minimum of four (4) feet in total height.
   c. *Deciduous Shrubs* shall be a minimum of two (2) gallons in size.
   d. *Evergreen Shrubs* shall be a minimum of two (2) gallons in size.

3. *Erosion Control/Retaining Walls.* Any slope embankments or retaining walls within the public right-of-way or within the required landscape buffer must be terraced every four (4) feet in height (maximum) with a minimum of a two (2) foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material, which matches the masonry materials used on the primary structure. The planting area must incorporate shrubs, ground cover and grasses.

F. *Signs.* All signage requirements and variances to these requirements shall conform to Chapter 32, *Signs*, of the Municipal Code of Ordinances; however, approval of any variance to the sign standards for property situated within an established overlay district shall require approval by the City Council by a supermajority vote (*i.e. a three-fourths vote of those members present*), with a minimum of four (4) votes in the affirmative required for approval.

G. *Lighting Standards.* No light standard, light fixture, light pole, pole base or combination thereof shall exceed 20-feet in total height in any overlay district with the exception of the IH-30 Overlay (IH-30 OV) District, which shall be limited to a maximum height of 30-feet.

H. *Utility Placement.* All overhead utilities within any overlay district shall be placed underground.

I. *Residential Standards.* No screening walls shall be erected adjacent to the *Primary Roadway* (*i.e. IH-30, SH-205, FM-740, SH-66, FM-549, John King Boulevard and SH-276*) in conjunction with any residential development. In addition, *eyebrow drives* with clusters of lots (*i.e. 5 – 12 homes*) shall be utilized along the *Primary Roadway* for residential developments. In lieu of *eyebrow drives,* a 50-foot landscape buffer may be utilized as an alternative. Farm fencing, including wood rail type and metal pipe and cable fencing, is allowed within the 50-foot landscape buffer. For residential developments within the SH-205 By-Pass Overlay (SH-205 BY OV) District, see *Section 6.3.5, SH-205 By-Pass Overlay (SH-205 BY OV) District*.

SUBSECTION 6.03 ~~6.02~~: HISTORIC OVERLAY (HO) DISTRICT

Subsection 6.03, *Historic Overlay (HO) District*, is omitted from this ordinance change, but is retained in its entirety.

SUBSECTION 6.04 ~~6.02-1~~: NORTH GOLIAD CORRIDOR OVERLAY (NGC OV) DISTRICT

Subsection 6.04, *North Goliad Corridor Overlay (NGC OV) District*, is omitted from this ordinance change, but is retained in its entirety.

~~*SUBSECTION 6.03: NEIGHBORHOOD PRESERVATION OVERLAY (NPO) DISTRICT*~~

~~A. Purpose. Neighborhood preservation districts may be designated in certain established neighborhoods. The purpose of such districts will be to preserve the cultural importance and neighborhood uniqueness in order to promote economic, cultural, educational, and general welfare of the city. It is recognized that within the City of Rockwall numerous areas, neighborhood sites and structures represent the distinguishing characteristics of a period style or method of construction that shaped the identity of generations of citizens, collectively and individually, and produced significant historic, architectural and cultural resources that constitute their heritage, and therefore this overlay district is intended to:~~

~~1. Protect, identify, enhance and preserve neighborhoods with historical, architectural, and cultural characteristics and landmarks which represent distinctive cultural, social, economic, political, and architectural history of Rockwall;~~
~~2. Foster civic pride in the accomplishments of the past;~~
~~3. Protect and enhance Rockwall's attractiveness to visitors and the support and stimulus to the economy thereby provided;~~
~~4. Ensure the harmonious, orderly and efficient growth and development of the city;~~
~~5. Promote economic prosperity and welfare of the community by encouraging the most appropriate use of such property within the city; and~~
~~6. Stabilize and improve values of such properties.~~

~~B. Neighborhood preservation officer. The neighborhood preservation officer shall administer this section and advise the board on matters submitted to it.~~

~~C. Standards. Standards are established for each Historic District which is created. Please refer to the zoning ordinance establishing the district for detailed standards which must be complied with.~~

D. Designation of Neighborhood Preservation Overlay Districts.

1. The city council may designate by zoning ordinance, certain areas as neighborhood preservation districts. Such districts shall bear the word "neighborhood" in their zoning designation.
2. The city council may recommend designation of qualified areas within the city after conducting public hearings and determination that neighborhood preservation designation is appropriate. Property owners within a proposed neighborhood district shall be notified prior to the planning and zoning commission and city council hearing to consider such designation. At the public hearing, owners, and interested parties may present testimony or documentary evidence which will become part of a record regarding the neighborhood enhancement, historic, architectural, or cultural importance of the proposed neighborhood preservation district. The record also may contain staff reports, public comments, or other evidence offered outside of the hearing.

Upon recommendation of the neighborhood preservation officer, the proposed neighborhood preservation district shall be submitted to the planning and zoning commission for review and recommendation. The planning and zoning commission shall give notice, conduct a public hearing, and make recommendations to the city council according to the same procedures as specifically provided in other sections of this [Unified Development Code].

If designation consideration has been requested by a citizen, property owner, or other interested party, the neighborhood preservation officer shall make its recommendation, to be forwarded to the planning and zoning commission, within 30 days from the date of submittal of designation request. The planning and zoning commission shall schedule a public hearing to be held within 45 days of receipt of such recommendation from the neighborhood preservation officer and city manager.

Upon designation of an area as a neighborhood preservation district by action of the Rockwall city council, the designation should be recorded on the official zoning maps. All zoning maps should indicate the designated districts by an appropriate mark.

A neighborhood preservation district may be designated if an area meets one or more of the following:

a. It possesses significance in history, architecture, archeology, and/or culture.
b. It is associated with events that made a significant contribution to the broad patterns of local, regional, state and/or national history.
c. It is associated with the lives of persons significant in the city's past.
d. It embodies the distinctive characteristics of a type, period, and/or method of construction.
e. It represents the work of a master designer, builder, and/or craftsman.
f. It represents an established and familiar visual feature of the city.
g. It constitutes a district section of the city.
h. A specific enhancement effort is underway for the neighborhood.

The boundaries of each designated neighborhood preservation district henceforth shall be specified in detail and shall be filed, in writing, in the city secretary's office for public inspection.

E. Additional standards. The city council may consider special requests in furtherance of neighborhood preservation and enhancement within an established neighborhood preservation overlay district. Such requests may include, but not necessarily be limited to, neighborhood signage plans, use of building materials not otherwise allowed, authorization of specific land uses not otherwise allowed, or other requests submitted for consideration.

Upon receipt of such special requests, the city council shall review same and forward its recommendation to the planning and zoning commission for consideration. Upon recommendations

from the planning and zoning commission, the city council may approve said requests by amendment of the ordinance designating such neighborhood district. Any such amendment shall preempt any other underlying zoning restrictions in this Unified Development Code. Such special requests may be denied by the city council by passage of a motion to deny.

(Ord. No. 10-14, § 35, 7-6-2010)

SUBSECTION 6.05 6.04: SOUTHSIDE RESIDENTIAL NEIGHBORHOOD OVERLAY (SRO) DISTRICT

Subsection 6.05, *Southside Residential Neighborhood Overlay (SRO) District*, is omitted from this ordinance change, but is retained in its entirety.

SUBSECTION 6.05: MIXED USE OVERLAY (MUO) DISTRICT

A. Purpose. The Mixed Use Overlay District applies to those areas specified in the comprehensive plan as "mixed use." These areas may be developed as a pedestrian-oriented district which includes "urban residential" uses. Urban residential uses include residential development which at least partly face streets or public sidewalks, or are located above retail, office or service uses. Ground floor urban residential should have direct access to a sidewalk via a stoop or landing, and a majority of parking should be located in a structure.

B. Application and boundaries.

1. It is intended that the Mixed Use Overlay District be applied at the time that development is imminent.
2. Mixed use standards will be applied using the planned development (PD) process as specified in the city's Unified Development Code and modified by ordinance.

(Ord. No. 10-14, § 37, 7-6-2010)

3. The zoning application shall include a minimum of ten acres. 4. At the time of PD application, a traffic impact analysis must be submitted to establish impacts on site access points and surrounding roadways and intersections.

C. Permitted uses. Allowed uses may include town homes, urban housing, retail, office, recreation and entertainment. A list of allowed uses, shall be specified in the PD application.

D. District standards.

1. Residential. Residential uses shall be governed by the following standards:

a. They must be integrated with retail and/or office uses in terms of site planning. The separate uses must not be perceived as separate or discrete developments.
b. They may not exceed four square feet of residential use for at least one square foot of nonresidential use (unless approved as part of the PD) for each phase of development.

2. Open space. A minimum of 20 percent of the site shall be devoted to open space. This requirement may be satisfied by either public or by a combination of public and private open space. Open space shall be satisfied with each phase of development, or the developer must execute a reservation of open space in a form that will ensure the city that such open space will be provided.
3. Enhancements. a. Pedestrian areas shall be enhanced with trees, decorative paving and pedestrian-level lighting. b. Public and private open space shall be developed to the extent reflected in the plan.

4. Height. The development should average two to three stories in height, but not exceed three stories unless otherwise approved as part of the PD. If adjacent to single-family zoned areas, this height should taper down to two stories if development is close to the property line.
5. Parking. Parking shall meet the following standards:

   a. Parking required for a building shall primarily be located behind the building. On-street parking may be allowed to partially meet the required parking for a building or use.
   b. A majority of parking shall be structured or decked to minimize the amount of land given over to parking.
   c. Site access and nonresidential use parking shall be shared between nonresidential uses.
   d. The minimum amount of required parking may be ten percent below the city's standard requirement for all uses allowed within the PD.
   e. The minimum amount of parking may be further reduced where parking is shared by multiple uses and is justified by the applicant.

E. Procedures. There are three types of plans that may be required as part of the development process within a PD district. Each successive plan may modify the previous plan provided that it does not substantially change the general intent of the original PD district. Each successive plan becomes part of this [Unified Development Code] governing the property and replaces the previously approved plan.

1. PD concept plan. The PD concept plan is mandatory and is intended to be used as the first step in the PD development process. It establishes the most general guidelines for the PD district by identifying the land uses and intensities, thoroughfare locations, and open space boundaries (including public trail systems). It may include images of intended style and type of development. The concept plan illustrates the integration of these elements into a master plan for the whole PD district. The PD concept plan, as incorporated in the PD ordinance, and together with the text of the ordinance, establishes the development standards for the PD district.
2. PD development plan. A PD development plan is optional and is intended to be used where appropriate as the second step of the PD development process. It may be required by the PD ordinance, or it may be submitted voluntarily by the property owner. A PD development plan constitutes an amendment to the approved PD concept plan and PD ordinance and may be used where the developer requests, or the council requires, certain standards for the PD district to be specified after initial establishment of the PD district. A PD development plan includes more detailed information as to the specific land uses and their boundaries. The purposes of a PD development plan are to allow flexibility in the development process by deferring specification of all development standards at the time of PD District creation and to enable developers to satisfy conditions imposed on creation of the district prior to submittal of a PD site plan.
3. PD site plan. A PD site plan is mandatory and is the final step of the PD development process. The purposes of a PD site plan are to ensure that the development of individual building lots, parcels, or tracts within the PD District are consistent with the approved concept plan and development plan, if any, and to ensure that the standards applicable within the PD District are met for each such lot, parcel or tract. A PD site plan shall continue to be valid for a period of three years after it is approved by the commission; however, such period may be extended by the council upon recommendation of the planning commission.

   a. The site plan shall be accompanied by building elevations and landscape and master sign plans, which shall be reviewed by the architectural review board for consistency with the overall objectives of the district. The board's recommendation shall be forwarded to the planning and zoning commission for consideration in their recommendation to city council.
   b. A PD site plan shall terminate at the end of such three-year period (or extended period if approved by the council) unless, within such period, a preliminary plat has been filed with the city for all of the land covered by the PD site plan. In which case, the site plan will remain valid

as long as there is an approved plat for the property. If a PD site plan terminates, development of the land covered by the terminated plan cannot occur until a new PD site plan has been approved for the land as provided by this article.

SUBSECTION 6.06: IH-30 OVERLAY (IH-30 OV) DISTRICT

A. *Purpose.* The intent of the IH-30 Corridor Overlay (IH-30 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and, as well as to those passing through, the City of Rockwall area. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the an architectural review committee Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, residential single-family land uses shall be excluded from these standards except as otherwise stated.

B. *Application and Boundaries.* The IH-30 Corridor Overlay (IH-30 OV) District includes the entirety of all properties which adjoin or are located within 500-feet of the future right-of-way of IH-30. The IH-30 Corridor Overlay (IH-30 OV) District Zone spans east to west along IH-30 from the eastern city limits (approximately 3,600-feet east of FM 549), west to the western city limit on line along Lake Ray Hubbard. The standards and regulations set forth in the IH-30 Corridor Overlay (IH-30 OV) District Zone are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the IH-30 Overlay (IH-30 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

C. *Architectural standards.*

1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.

a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;

☑ That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;
☑ That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;

- ☑ That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;
- ☑ That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and
- ☑ That the manufactured stone product shall have a minimum warranty of 75 years.

b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.

2. Roof design standards. Rooftop mechanical equipment and other appurtenances must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory-treated, non-metallic, matte finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.

3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.

a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances shall be accomplished by either the construction of: (a) the construction of the roof systems described in subsection C.2 above; or (b) an architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.

b. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.

4. All buildings shall be designed to incorporate no less than four of the architectural elements from the list below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:

1. Canopies, awnings, or porticos;
2. Recesses/projections;
3. Arcades;
4. Peaked roof forms;
5. Arches;
6. Outdoor patios;
7. Display windows;
8. Architectural details (such as tile work and moldings) integrated into the building facade;
9. Articulated ground floor levels or base;
10. Articulated cornice line;
11. Integrated planters or wing walls that incorporate landscape and sitting areas;
12. Offsets, reveals or projecting rib used to express architectural or structural bays;
13. Varied roof heights;
14. Or other architectural features approved by the director of planning or his designee.

5. All retail/commercial buildings shall be architecturally finished on all four sides with same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
6. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of glass shall be reviewed and approved by the director of planning or his designee.
7. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

   a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

8. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

D. *Site design standards.*

1. *Building setback.* All lots within the IH-30 Corridor Overlay District shall maintain a minimum building setback of 25 feet from the front property line adjacent to IH-30. All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.
2. *Parking area restrictions.* No more than one full parking bay (two rows of parking with a driving aisle) shall be allowed between the primary building and the IH-30 right-of-way.
3. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances.

   a. *Further guidelines.*

   ☑ Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare;
   ☑ The ingress and egress drives shall have a minimum radius of 30 feet;
   ☑ Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
   ☑ Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
   ☑ Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
   ☑ Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.

   b. *Cross access.* Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.

4. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces IH-30, additional screening of the area may be required. A minimum ten-foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semi-trailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of

adequate access for service delivery trucks may be evaluated to determine the extent of screening required.

5. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from IH-30.
6. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.
7. *Plan review.* In addition to other factors set out in this Unified Development Code, concept plans, development plans, and site plans shall be reviewed for:

   a. Meeting the intent of the landscape ordinance: article VIII, Landscape Standards, as amended, and the screening provisions therein.
   b. Achieving the intent of the architectural standards and site design standards.
   c. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

F. *Landscape standards.* All sites shall, as a minimum, meet the following standards and the standards set out in article VIII, Landscape Standards. Where the following standards conflict with the landscape ordinance, these requirements shall prevail:

1. *Buffer strips.* The buffer strip shall be a minimum of 20 feet wide and include a "built-up" berm and/or shrubbery or a combination of both along the entire length of the subject property's frontage along the IH-30 right-of-way. The minimum required height of the aforementioned berm and/or shrubbery or a combination thereof is 30 inches and shall not exceed a maximum height of 48 inches.
2. *Buffer strip plantings.* Two canopy trees, along with four accent trees shall be required per 100 feet of the IH-30 right-of-way as set out below.
3. *Plant material sizes.* The following minimum sizes shall be required:

   Canopy trees: four-inch caliper.
   Accent trees: four-foot height.
   Shrubs.
   Deciduous: 15 inches; two-gallon minimum.
   Evergreen: 12 inches; two-gallon minimum.

4. *Plant material selections.* The following materials are recommended for planting in the buffer strip; however, other materials may be acceptable:

   Canopy trees: Afghan Pine, Bald Cypress, Bur Oak, Cedar Elm, Eastern Red Cedar, Homestead Elm, Lacebark Elm, Little Gem Magnolia, Live Oak, October Glory Maple, Red Oak, Texas Ash, Texas Red Oak.
   Accent trees: Desert Willow, Eastern Redbud, Eves Necklace, Mexican Buckeye, Possumhaw Holly, Shangtung Maple, Yaupon Holly.

5. *Erosion control/retaining walls.* Any slope embankments or retaining walls within the public right-of-way or within the required buffer strip must be terraced every four feet in height (maximum) with a minimum of a two-foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry material used on the front facade of the primary building. The planting area must contain plant materials other than grass.

G. *Signs.* All signage requirements and variances to these requirements shall conform to Chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the IH-30 Overlay (IH-30 OV) District shall require city council approval by a three-quarter majority vote.

H. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this section would create a hardship. Approval of any variance to any provision of this section shall require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.

(Ord. No. 05-49, 9-19-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 10-14, § 38, 7-6-2010; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)

SUBSECTION 6.07: SH-205 OVERLAY (SH-205 OV) DISTRICT

A. *Purpose.* The intent of the SH-205 Corridor Overlay (SH-205 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and, as well as to those passing through, the City of Rockwall area. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the an architectural review committee Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, residential single-family land uses shall be excluded from these standards except as otherwise stated.

B. *Application and Boundaries.* The SH-205 Corridor Overlay (SH-205 OV) District includes the entirety of all properties which adjoin or are located within 200-feet of the future right-of-way of SH-205. The SH-205 Corridor Overlay (SH-205 OV) District Zone spans north to south along SH-205 from the intersection point of SH-205 and FM 740, south to the southern city limits (approximately 2,800-feet south of FM-1139). The standards and regulations set forth in the SH-205 Corridor Overlay (SH-205 OV) District Zone are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the SH-205 Overlay (SH-205 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

D. *Architectural standards.*

1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.

a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As

the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;

- ☑ That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;
- ☑ That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;
- ☑ That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;
- ☑ That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and
- ☑ That the manufactured stone product shall have a minimum warranty of 75 years.

b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.

2. Roof design standards. Rooftop mechanical equipment and other appurtenances must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory-treated, non-metallic, matte finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.

3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site:

a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances screening shall be accomplished by either:

a) The construction of the roof systems described in subsection C.2 above; or
b) An architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way.

b. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.

c. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.

4. All buildings shall be designed to incorporate no less than four of the architectural elements listed below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:

1. Canopies, awnings, or porticos;
2. Recesses/projections;

3. Arcades;
4. Peaked roof forms;
5. Arches;
6. Outdoor patios;
7. Display windows;
8. Architectural details (such as tile work and moldings) integrated into the building facade;
9. Articulated ground floor levels or base;
10. Articulated cornice line;
11. Integrated planters or wing walls that incorporate landscape and sitting areas;
12. Offsets, reveals or projecting rib used to express architectural or structural bays;
13. Varied roof heights; or
14. Other architectural features approved by the director of planning or his designee.

5. All retail/commercial buildings shall be architecturally finished on all four sides with the same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
6. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of the glass shall be reviewed and approved by the director of planning or his designee.
7. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

8. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

E. *Site design standards.*

4. *Building setback.* All lots within the SH 205 Corridor Overlay District shall maintain a minimum building setback of 25 feet from the front property line adjacent to SH 205. All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.
5. *Parking area restrictions.* No more than two rows of parking shall be allowed between the primary building and the SH 205 right-of-way.
6. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances.

Further guidelines:

a. Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare or as per the Texas Department of Transportation on state maintained roads;
b. The ingress and egress drives shall have a minimum radius of 30 feet;
c. Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
d. Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
e. Main entrance drives should connect to a "straightaway" aisle that does not dead-end or require an immediate turn to approach the main building;

d. Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.
e. Cross access. Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.

7. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces SH 205, additional screening of the area may be required. A minimum ten-foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semitrailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.
8. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from SH 205.
9. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.
10. *Plan review.* In addition to other factors set out in this Unified Development Code, concept plans, development plans, and site plans shall be reviewed for:

a. Meeting the intent of article VIII, Landscape Standards, and the screening provisions below.
b. Achieving the intent of the architectural and site design standards.
c. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

F. *Landscape standards.* All sites shall, as a minimum, meet the following standards and the requirements of article VIII, Landscape Standards. Where the following standards conflict with the article VIII, these requirements shall prevail:

11. *[Required width and height.]* The buffer strip shall be a minimum of 20 feet wide and include a "built-up" berm and/or shrubbery or a combination of both along the entire length of the subject property's frontage along the SH 205 right-of-way. The minimum required height of the aforementioned berm and/or shrubbery or a combination thereof is 30 inches and shall not exceed a maximum height of 48 inches.
12. *Buffer strip plantings.* Two canopy trees, along with four accent trees shall be required per 100 feet of the SH 205 right-of-way. Canopy trees, accent trees, and shrubs as defined, along with sizes and types are included in subsections E.3 and E.4.

Plant material sizes. The following size requirements shall be required:

Canopy trees: four-inch caliper.
Accent trees: four-foot height.
Shrubs.

Deciduous: 15 inches; two-gallon minimum.
Evergreen: 12 inches; two-gallon minimum.

13. *Plant material selections.* The following materials are recommended for planting in the buffer strip; however, other materials may be acceptable:

Canopy trees: Afghan Pine, Bur Oak, Caddo Maple, Cedar Elm, Lacebark Elm, Leyland Cypress, Little Gem Magnolia, Live Oak, October Glory Maple.
Accent trees: Desert Willow, Eastern Redbud, Eves Necklace, Mexican Buckeye, Possumhaw Holly, Shangtung Maple, Yaupon Holly.

G. *Erosion control/retaining walls.* Any slope embankments or retaining walls within the public right-of-way or within the required buffer strip must be terraced every four feet in height (maximum) with a minimum of a two-foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry material used on the front facade of the primary building. The planting area must contain plant materials other than grass.

H. *Signs.* All signage requirements and variances to these requirements shall conform to chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the SH 205 Overlay (SH 205 OV) District shall require city council approval by a three-quarter majority vote.

I. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this section would create a hardship. Approval of any variance to any provision of this section shall require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.

(Ord. No. 05-40, 8-15-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 10-14, § 39, 7-6-2010; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)

SUBSECTION 6.08: SCENIC OVERLAY (SRO) DISTRICT

A. *Purpose.* The Scenic Overlay (SOV) District is a specialized overlay district along FM-740 which has been identified in the Comprehensive Plan as a scenic thoroughfare. The identified scenic aspects of FM-740 include views of the lake, existing natural topography, and existing natural landscaping. The district has been established to protect scenic or historic qualities through the use of additional development criteria and by requiring uses compatible with both existing uses and with the visual environment. The development requirements for non-residential uses are more restrictive than in other commercial classifications in order to encourage development that will protect and enhance the existing views, topography, landscape and quality of development. This district is designed to be primarily an office and retail/commercial shopping district with an intensity of uses normally found along major thoroughfares; however, these uses may be located close to residential areas. The type of allowed uses and the more restrictive development requirements provide protection for residential areas. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the Architectural Review Board (ARB).

1. The Scenic Overlay District is a specialized zoning district overlay along FM-740 which has been identified in the comprehensive land use plan as a scenic thoroughfare. The identified scenic aspects of FM-740 include views of the lake, existing natural topography, and existing natural landscaping. The district has been established to protect scenic or historic qualities through the use of additional development criteria and by requiring uses compatible with both existing uses and with the visual environment. The development requirements for nonresidential uses are more restrictive than in other commercial classifications in order to encourage development that will protect and enhance the existing views, topography, landscape and quality of development.
2. This district is designed to be primarily an office and retail/commercial shopping district with an intensity of uses normally found along a major thoroughfare. These uses may, however, be located

~~close to residential areas. The type of allowed uses and the more restrictive development requirements provide protection for residential areas.~~

~~3. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through an architectural review committee.~~

B. *Application and Boundaries.* ~~This~~ The Scenic Overlay (SOV) District shall apply to all property located within the established boundary along FM-740 (*as set forth in Ordinance No. ~~on Exhibit A of Ord. No. 87-64~~*). Property that has been zoned, platted and site planned at the time of adoption of the ordinance, from which this section is derived, shall be exempted from the provisions of this section unless and until an application for zoning, platting, or site planning is re-submitted on the property. All property developed within the Scenic Overlay (SOV) District must meet both the terms and requirements of the underlying zoning classification applicable to the property and the provisions set forth in the Scenic Overlay (SOV) District. The most restrictive requirement applicable to the property shall apply.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the Scenic Overlay (SOV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

~~C. *Special use standards.* All development within the Scenic Overlay District shall comply with the land use tables in article IV, Permissible Uses, as amended; however, the following uses may be considered on a case-by-case basis only and shall require a specific use permit.~~

~~1. Gasoline service stations, and retail outlets where gasoline products are sold as an accessory to a retail use, subject to the conditions established in article IV, Permissible Uses.~~
~~2. Car wash (all types), subject to the conditions of article IV, Permissible Uses.~~
~~3. Any structure over 36 feet in height.~~

~~D. *Architectural standards.*~~

~~1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.~~

~~a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;~~

~~☑ That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;~~
~~☑ That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;~~

- ☑ That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;
- ☑ That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and
- ☑ That the manufactured stone product shall have a minimum warranty of 75 years.

b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.

2. Roof design standards. Rooftop mechanical equipment and other appurtenances must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory-treated, non-metallic, matte finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.

3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.

a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances screening shall be accomplished by either:

a) The construction of the roof systems described in subsection D.2 above; or
b) An architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way.

b. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.
c. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.

4. All buildings shall be designed to incorporate no less than four of the architectural elements listed below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:

a) Canopies, awnings, or porticos;
b) Recesses/projections;
c) Arcades;
d) Peaked roof forms;
e) Arches;
f) Outdoor patios;
g) Display windows;
h) Architectural details (such as tile work and moldings) integrated into the building facade;
i) Articulated ground floor levels or base;
j) Articulated cornice line;
k) Integrated planters or wing walls that incorporate landscape and sitting areas;
l) Offsets, reveals or projecting rib used to express architectural or structural bays;

m) Varied roof heights; or
n) Other architectural features approved by the director of planning or his designee.

5. All retail/commercial buildings shall be architecturally finished on all four sides with the same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
6. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of glass shall be reviewed and approved by the director of planning or his designee.
7. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

   a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

8. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

E. *Site design standards.*

1. *Building setback.* All lots within the Scenic Overlay District shall maintain a minimum building setback of 15 feet from the front property line adjacent to FM 740. All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.
2. *Parking area restrictions.* No more than two rows of parking shall be allowed between the primary building and the FM 740 right-of-way.
3. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances.

   Further guidelines:

   a. Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare or as per the Texas Department of Transportation on state maintained roads;
   b. The ingress and egress drives shall have a minimum radius of 30 feet;
   c. Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
   d. Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
   e. Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
   f. Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.

4. *Cross access.* Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.
5. *Shared parking.* In master planned retail centers, cross access and shared parking agreements are required for final platting.
6. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces FM 740, additional

145

screening of the area may be required. A minimum ten-foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semitrailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.

7. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from FM 740.
8. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.
9. *Plan review.* In addition to other factors set out in this Unified Development Code, concept plans, development plans, and site plans shall be reviewed for:

a. Meeting the intent of article VIII, Landscape Standards, and the screening provisions below.
b. Achieving the intent of the Architectural and Site Design Standards.
c. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

F. *Landscape standards.* All sites shall, as a minimum, meet the following standards and the requirements of article VIII, Landscape Standards. Where the following standards conflict with the article VIII, these requirements shall prevail:

1. *[Required width and height.]* The buffer strip shall be a minimum of 20 feet wide and include a "built up" berm and/or shrubbery or a combination of both along the entire length of the subject property's frontage along the FM 740 right-of-way. The minimum required height of the aforementioned berm and/or shrubbery or a combination thereof is 30 inches and shall not exceed a maximum height of 48 inches.
2. *Buffer strip plantings.* Two canopy trees, along with four accent trees shall be required per 100 feet of the FM 740 right-of-way. Canopy trees, accent trees, and shrubs as defined, along with sizes and types are included in subsections F.3 and F.4.

Plant material sizes. The following size requirements shall be required:
Canopy trees: four-inch caliper.
Accent trees: four-foot height.
Shrubs:

Deciduous: 15 inches; two-gallon minimum.
Evergreen: 12 inches; two-gallon minimum.

4. *Plant material selections.* The following materials are recommended for planting in the buffer strip; however, other materials may be acceptable:

Canopy trees: Afghan Pine, Bur Oak, Caddo Maple, Cedar Elm, Lacebark Elm, Leyland Cypress, Little Gem Magnolia, Live Oak, October Glory Maple.

Accent trees: Desert Willow, Eastern Redbud, Eves Necklace, Mexican Buckeye, Possumhaw Holly, Shangtung Maple, Yaupon Holly.

5. *Erosion control/retaining walls.* Any slope embankments or retaining walls within the public right-of-way or within the required buffer strip must be terraced every four feet in height (maximum) with a minimum of a two foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry material used on the front facade of the primary building. The planting area must contain plant materials other than grass.

G. *Signs.* All signage requirements and variances to these requirements shall conform to chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the Scenic Overlay (SOV OV) District shall require city council approval by a three-quarter majority vote.

H. *Lighting standards.* In addition to the requirements of the outdoor lighting requirements no light pole, pole base or combination thereof shall exceed 20 feet in the Scenic Overlay District. All lighting fixtures shall focus light downward and be contained on the site.

I. *Utility placement.* All overhead utilities within the Scenic Overlay District shall be placed underground.

J. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this section would create a hardship. Approval of any variance to any provision of this section shall require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.

(Ord. No. 05-49, 9-19-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)

SUBSECTION 6.09: SH-66 OVERLAY (SH-66 OV) DISTRICT

A. *Purpose.* The SH-66 Overlay (SH-66 OV) District is a specialized overlay district along SH-66 and Washington Street between Lake Ray Hubbard and SH-205, which has been identified as one of the important entry points into the City of Rockwall. The identified important scenic aspects of this corridor include views of the lake, existing natural topography, and existing natural landscaping adjacent to residential neighborhoods. The district has been established to protect scenic or historic qualities through the use of additional development criteria, and by requiring uses compatible with both existing uses and with the visual environment. The development requirements for non-residential uses are more restrictive than in other commercial classifications in order to encourage development that will protect and enhance the existing views, topography, landscape and quality of development. This district is designed to be primarily an office and retail/commercial shopping district with an intensity of uses normally found along major thoroughfares; however, these uses may be located close to residential areas. The type of allowed uses and the more restrictive development requirements provide protection for residential areas. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the Architectural Review Board (ARB).

1. The S.H. 66 Overlay District is a specialized zoning district overlay along S.H. 66 and Washington Street between Lake Ray Hubbard and S. H. 205 which has been identified as one of the important entry points into the City of Rockwall. The identified important scenic aspects of this corridor include views of the lake, existing natural topography, and existing natural landscaping and adjacent residential neighborhoods. The district has been established to protect scenic or historic qualities through the use of additional development criteria and by requiring uses compatible with both existing uses and with the visual environment. The development requirements for nonresidential uses are more restrictive than in other commercial classifications in order to encourage development that will protect and enhance the existing views, topography, landscape and quality of development.

~~2. This district is designed to be primarily an office and retail/commercial district with an intensity of uses normally found along a major thoroughfare. These uses may, however, be located close to residential areas. The type of allowed uses and the more restrictive development requirements provide protection for residential areas.~~

~~3. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through an architectural review committee.~~

B. *Application and Boundaries.* ~~This~~ The SH-66 Overlay (SH-66 OV) District shall apply to all property located within the established boundary along SH-66 and Washington Street, between Lake Ray Hubbard and SH-205 (*as set forth in Ordinance No. ~~on exhibit A of Ord. No.~~ 01-18*). Property that has been zoned, platted and site planned at the time of adoption of the ordinance, from which this section is derived, shall be exempted from the provisions of this section unless ~~and until~~ an application for zoning, platting, or site planning is resubmitted on the property. All property developed within the SH-66 Overlay (SH-66 OV) District must meet both the terms and requirements of the underlying zoning classification applicable to the property and the provisions set forth in the SH-66 Overlay (SH-66 OV) District. The most restrictive requirement applicable to the property shall apply.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the SH-66 Overlay (SH-66 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

~~C. *Special use standards.* All development within the SH 66 Overlay District shall comply with the land use tables in article IV, Permissible Uses, as amended; however, the following uses may be considered on a case-by-case basis only and shall require a specific use permit.~~

~~1. Gasoline service stations, and retail outlets where gasoline products are sold as an accessory to a retail use, subject to the conditions established in article IV, Permissible Uses.~~
~~2. Car wash (all types), subject to conditions of article IV, Permissible Uses.~~
~~3. Any structure over 36 feet in height.~~

~~D. *Architectural standards.*~~

~~1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.~~

~~a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;~~

- ☑ That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;
- ☑ That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;
- ☑ That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;
- ☑ That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and
- ☑ That the manufactured stone product shall have a minimum warranty of 75 years.

b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.

2. Roof design standards. Rooftop mechanical equipment and other appurtenances must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory-treated, non-metallic, matter finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.
3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.
4. Screening of rooftop mechanical equipment and/or other rooftop appurtenances screening shall be accomplished by either:

a) The construction of the roof systems described in subsection D.2 above; or
b) An architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way.

5. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.
6. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.
7. All buildings shall be designed to incorporate no less than four of the architectural elements listed below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:

- ☑ Canopies, awnings, or porticos;
- ☑ Recesses/projections;
- ☑ Arcades;
- ☑ Peaked roof forms;
- ☑ Arches;
- ☑ Outdoor patios;
- ☑ Display windows;
- ☑ Architectural details (such as tile work and moldings) integrated into the building facade;
- ☑ Articulated ground floor levels or base;
- ☑ Articulated cornice line;

☑ Integrated planters or wing walls that incorporate landscape and sitting areas;
☑ Offsets, reveals or projecting rib used to express architectural or structural bays;
☑ Varied roof heights; or
☑ Other architectural features approved by the director of planning or his designee.

8. All retail/commercial buildings shall be architecturally finished on all four sides with the same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
9. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of glass shall be reviewed and approved by the director of planning or his designee.
10. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

11. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

E. *Site design standards.*

1. *Building setback.* All lots within the SH 66 Overlay District shall maintain a minimum building setback of 15 feet from the front property line adjacent to SH 66. All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.
2. *Parking area restrictions.* No more than two rows of parking shall be allowed between the primary building and the SH 66 right-of-way.
3. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances.

Further guidelines:

a. Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare or as per the Texas Department of Transportation on state maintained roads;
b. The ingress and egress drives shall have a minimum radius of 30 feet;
c. Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
d. Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
e. Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
f. Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.

4. *Cross access.* Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.
5. *Shared parking.* In master planned retail centers, cross access and shared parking agreements are required for final platting.

150

6. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces SH 66, additional screening of the area may be required. A minimum ten-foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semitrailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.
7. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from SH 66.
8. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.
9. *Plan review.* In addition to other factors set out in this Unified Development Code, concept plans, development plans, and site plans shall be reviewed for:

   a. Meeting the intent of article VIII, Landscape Standards, and the screening provisions below.
   b. Achieving the intent of the architectural and site design standards.
   c. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

F. *Landscape standards.* All sites shall, as a minimum, meet the following standards and the requirements of article VIII, Landscape Standards. Where the following standards conflict with the article VIII, these requirements shall prevail:

1. *[Required width and height.]* The buffer strip shall be a minimum of 20 feet wide and include a "built-up" berm and/or shrubbery or a combination of both along the entire length of the subject property's frontage along the SH 66 right-of-way. The minimum required height of the aforementioned berm and/or shrubbery or a combination thereof is 30 inches and shall not exceed a maximum height of 48 inches.
2. *Buffer strip plantings.* Two canopy trees, along with four accent trees shall be required per 100 feet of the SH 66 right-of-way. Canopy trees, accent trees, and shrubs as defined, along with sizes and types are included in subsections F.3 and F.4.
3. *Plant material sizes.* The following size requirements shall be required:

   Canopy trees: four inch caliper.
   Accent trees: four foot height.
   Shrubs:

   Deciduous: 15 inches; two gallon minimum.
   Evergreen: 12 inches; two gallon minimum.

4. *Plant material selections.* The following materials are recommended for planting in the buffer strip; however, other materials may be acceptable:

   Canopy trees: Afghan Pine, Bur Oak, Cedar Elm, Lacebark Elm, Little Gem Magnolia, Live Oak, October Glory Maple, Red Oak, Texas Ash, Texas Red Oak.

   Accent trees: Desert Willow, Eastern Redbud, Eves Necklace, Mexican Buckeye, Possumhaw Holly, Shangtung Maple, Yaupon Holly.

5. *Erosion control/retaining walls.* Any slope embankments or retaining walls within the public right-of-way or within the required buffer strip must be terraced every four feet in height (maximum) with a minimum of a two-foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry material used on the front facade of the primary building. The planting area must contain plant materials other than grass.

G. *Signs.* All signage requirements and variances to these requirements shall conform to chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the SH-66 Overlay (SH-66 OV) District shall require city council approval by a three-quarter majority vote.

H. *Lighting standards.* In addition to the requirements of the outdoor lighting requirements no light pole, pole base or combination thereof shall exceed 20 feet in the SH 66 Overlay District. All lighting fixtures shall focus light downward and be contained on the site.

I. *Utility placement.* All overhead utilities within the SH 66 Overlay District shall be placed underground.

J. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this section would create a hardship. Approval of any variance to any provision of this section shall require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.

(Ord. No. 05-49, 9-19-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)

SUBSECTION 6.10: SH-205 BY-PASS OVERLAY (SH-205 BY OV) DISTRICT

A. *Purpose.* The intent of the SH-205 By-Pass Bypass Corridor Overlay (SH-205 BY OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting, as well as to those and passing through, the City of Rockwall area. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility and plan review shall be conducted through the Architectural Review Board (ARB)an architectural review committee. These development requirements shall apply to non-residential and multi-family uses only. All other residential uses shall be excluded from these standards except has otherwise stated.

B. *Application and Boundaries.* The SH-205 By-Pass Bypass Corridor Overlay (SH-205 BY OV) District includes the entirety of all properties which adjoin or are located within 500 feet of the current and future right-of-way of John King Boulevard Blvd. The SH-205 By-Pass Bypass Corridor Overlay (SH-205 BY OV) District Zone extends along the current and future right-of-way of John King Boulevard Blvd. to the existing city limits. The standards and regulations set forth in the SH-205 By-Pass Bypass Corridor Overlay (SH-205 BY OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the SH-205 By-Pass Overlay (SH-205 BY OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

D. *Special District Requirements*.

(1) *Residential Frontage Requirements*. To ensure proper separation of residential land uses from John King Boulevard all residential developments that have direct frontage on John King Boulevard shall

utilize one (1) or a combination of the following design alternatives along the entire frontage of John King Boulevard:

a. *Increased Landscape Buffer*. A minimum of a 100-foot landscape buffer maybe substituted for the required landscape buffer as depicted in *Design Alternative #1*.

b. *Increased Rear Yard Building Setback*. A minimum of 50-foot rear yard building setback may be incorporated adjacent to the required landscape buffer as depicted in *Design Alternative #2.*

c. *Incorporation of a Slip Street*. A slip street -- *meeting the Engineering Department's requirements for right-of-way design* -- may be incorporated adjacent to and running parallel with the required landscape buffer. Homes are permitted to front or side to the slip street. Examples of this design alternative are depicted in *Design Alternative #3* and *Design Alternative #4*.

d. *Incorporation of an Eyebrow*. An eyebrow street meeting the -- *Engineering Department's requirements for right-of-way design* -- with a minimum cluster of five (5) homes and a maximum cluster of 12 homes can be incorporated with a 30-foot landscape buffer. All homes should front onto the eyebrow street and have a minimum of a 25-foot front yard building setback. An example of this design alternative is depicted *Design Alternative #5.*

(2) *Design Alternatives*.

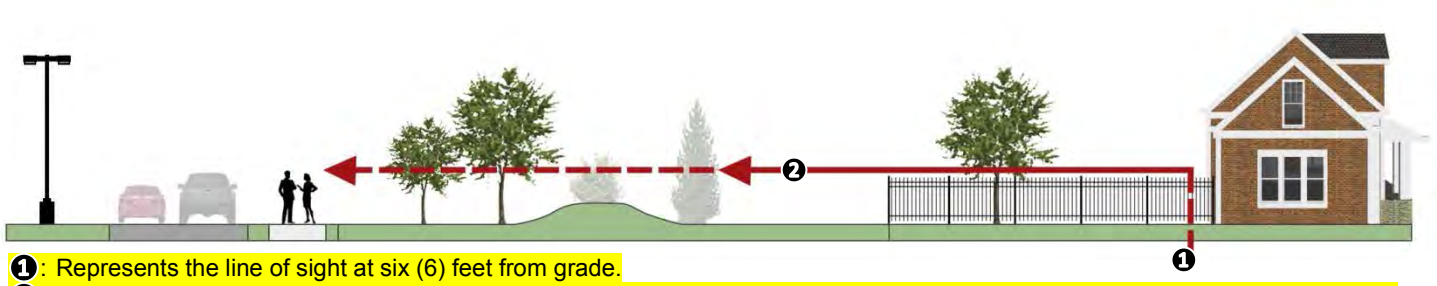
(3) *Line of Sight Requirements*. Homes that back to a required landscape buffer should be built in such a manner where the required berm visually impairs visibility to John King Boulevard. In cases where a berm proves to be ineffective at screening traffic from John King Boulevard (*due to topography, height, etc.*) the developer shall be responsible for incorporating additional landscaping to provide sufficient screening in the required landscape buffer. This will be reviewed by the Planning and Zoning Commission at the time of site plan.



❶: Represents the line of sight at six (6) feet from grade.
❷: The solid red line shows that visibility is impaired from John King Boulevard by [*1*] a row of trees or [*2*] a berm and/or row of shrubbery.

~~C. *Architectural standards.*~~

~~1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XIII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.~~

~~a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;~~

~~That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;~~
~~That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;~~
~~That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;~~
~~That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and~~
~~That the manufactured stone product shall have a minimum warranty of 75 years.~~

~~b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.~~

159

2. Roof design standards. Rooftop mechanical equipment and other appurtenances must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.
3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.

   a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances screening shall be accomplished by either:

      a) The construction of the roof systems described in subsection C.2 above; or
      b) An architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way.

   b. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.
   c. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.

4. All buildings shall be designed to incorporate no less than four of the architectural elements listed below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:

      a) Canopies, awnings, or porticos;
      b) Recesses/projections;
      c) Arcades;
      d) Peaked roof forms;
      e) Arches;
      f) Outdoor patios;
      g) Display windows;
      h) Architectural details (such as tile work and moldings) integrated into the building facade;
      i) Articulated ground floor levels or base;
      j) Articulated cornice line;
      k) Integrated planters or wing walls that incorporate landscape and sitting areas;
      l) Offsets, reveals or projecting rib used to express architectural or structural bays;
      m) Varied roof heights; or
      n) Other architectural features approved by the director of planning or his designee.

5. All retail/commercial buildings shall be architecturally finished on all four sides with the same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
6. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of glass shall be reviewed and approved by the director of planning or his designee.
7. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

8. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

D. *Site design standards.*

1. *Building setback.* All lots within the 205 Bypass Corridor Overlay District shall maintain the following minimum front yard building setbacks:

Retail/Commercial: 15-Feet
Industrial/Office/Technology: 50-Feet

All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.

2. *Parking area restrictions.* No more than two rows of parking, approximately 60 feet in width, shall be allowed between the primary building and the John King Blvd. right-of-way.
3. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances. In addition:

a. Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare or as per the Texas Department of Transportation on state maintained roads;
b. The ingress and egress drives shall have a minimum radius of 30 feet;
c. Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
d. Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
e. Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
f. Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.

4. *Cross access.* Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.
5. *Shared parking.* In master planned retail centers, cross access and shared parking agreements are required for final platting.
6. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces John King Blvd., additional screening of the area may be required. A minimum ten-foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semitrailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The

accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.

7. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from John King Blvd.

8. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.

9. *Plan review.* In addition to other factors set out in this Unified Development Code, any concept plans, development plans, and site plans shall be reviewed for:

a. Meeting the intent of the landscape ordinance: article VIII, Landscape Standards, as amended, and the screening provisions herein.
b. Achieving the intent of the architectural standards and site design standards.
c. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

E. *Landscape standards.* All sites shall, as a minimum, meet the following standards and the standards set out in the landscape ordinance: article VIII, Landscape Standards. Where the following standards conflict with the landscape ordinance, these requirements shall prevail:

1. Landscape Buffer. The buffer strip shall be a minimum of 25 feet wide for retail/commercial use; 50 feet wide for residential use; and 50 feet wide for office, research technology and industrial use, and include a "built-up" berm and shrubbery along the entire length of the subject property's frontage along the John King Blvd. right-of-way. The minimum required height of the aforementioned berm and is 48 inches..

2. Buffer-strip plantings. Two (2) canopy trees, along with four (4) accent trees shall be required per 100 feet of the John King Blvd. right-of-way. Canopy tree, accent tree, and shrub sizes and types are included in Subsection F.3, District Landscaping Requirements, of Appendix F, Landscaping Guidelines and Requirements, of the Unified Development Code. In addition, all shrubs shall be a minimum of two (2) gallons in size and 15 inches in height (i.e. deciduous or evergreen).

3. Erosion control/retaining walls. Any slope embankments or retaining walls within the public right-of-way or within the required buffer strip must be terraced every four feet in height (maximum) with a minimum of a two-foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry material used on the front facade of the primary building. The planting area must contain plant materials other than grass.

F. *Signs.* All signage requirements and variances to these requirements shall conform to chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the 205 By-Pass Overlay (205 BY-OV) District shall require city council approval by a three-quarter majority vote.

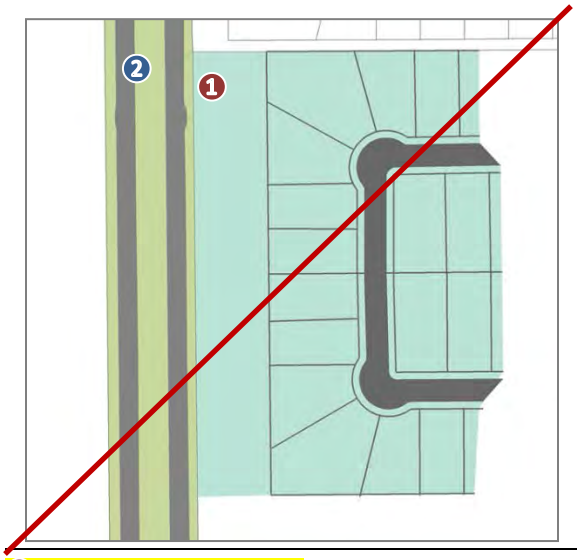
G. *Lighting standards.* In addition to the requirements of the outdoor lighting requirements no light pole, pole base or combination thereof shall exceed 20 feet in the 205 Bypass Overlay District. All lighting fixtures shall focus light downward and be contained on the site.

H. *Utility placement.* All overhead utilities within the 205 Bypass Corridor Overlay District shall be placed underground.

I. Residential Frontage Requirements. To ensure proper separation of residential land uses from John King Boulevard all residential developments that have direct frontage on John King Boulevard shall

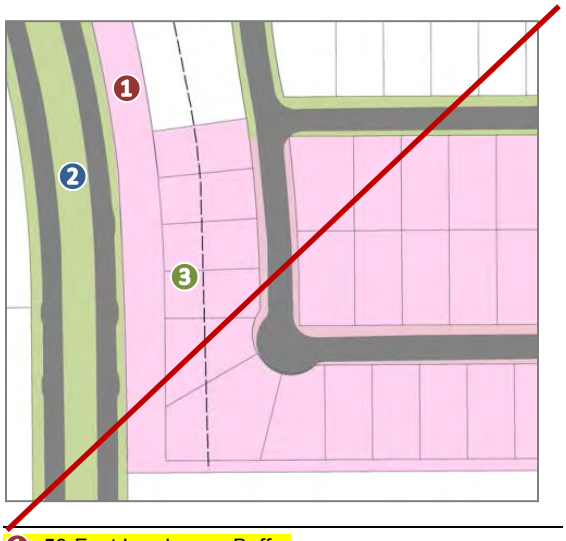
~~utilize one (1) or a combination of the following design alternatives along the entire frontage of John King Boulevard:~~

~~(1) Increased Landscape Buffer. A minimum of 100-foot landscape buffer maybe substituted for the required landscape buffer.~~



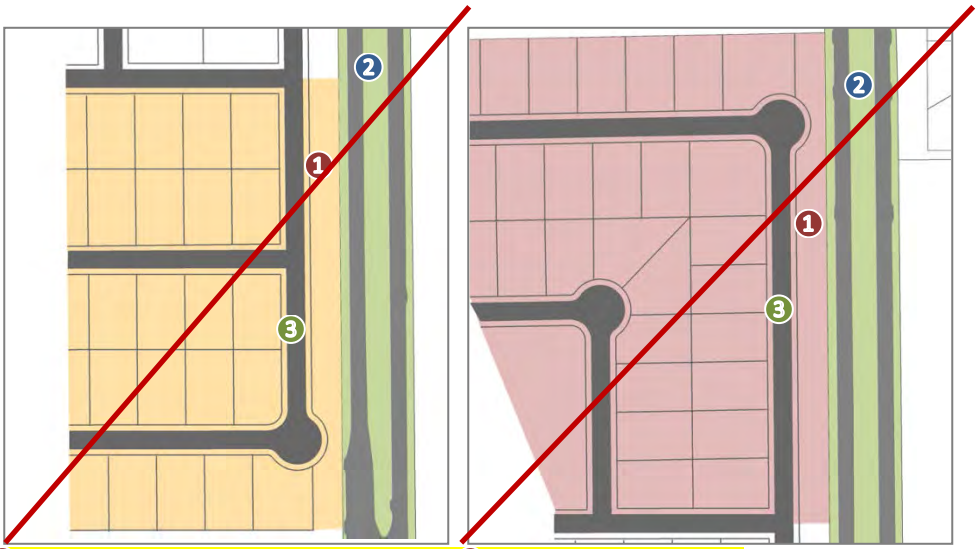
~~1: 100-Foot Landscape Buffer~~
~~2: John King Boulevard~~

~~(2) Increased Rear Yard Building Setback. A minimum of 50-foot rear yard building setback may be incorporated adjacent to the required landscape buffer.~~



~~1: 50-Foot Landscape Buffer~~
~~2: John King Boulevard~~
~~3: 50-Foot Rear Yard Building Setback~~

~~(3) Incorporation of a Slip Street. A slip street meeting the Engineering Department's requirements for right-of-way and design may be incorporated adjacent to and running parallel with the required landscape buffer. Homes are permitted to front or side to the slip street.~~



1: 50-Foot Landscape Buffer
2: John King Boulevard
3: Slip Street

1: 50-Foot Landscape Buffer
2: John King Boulevard
3: Slip Street

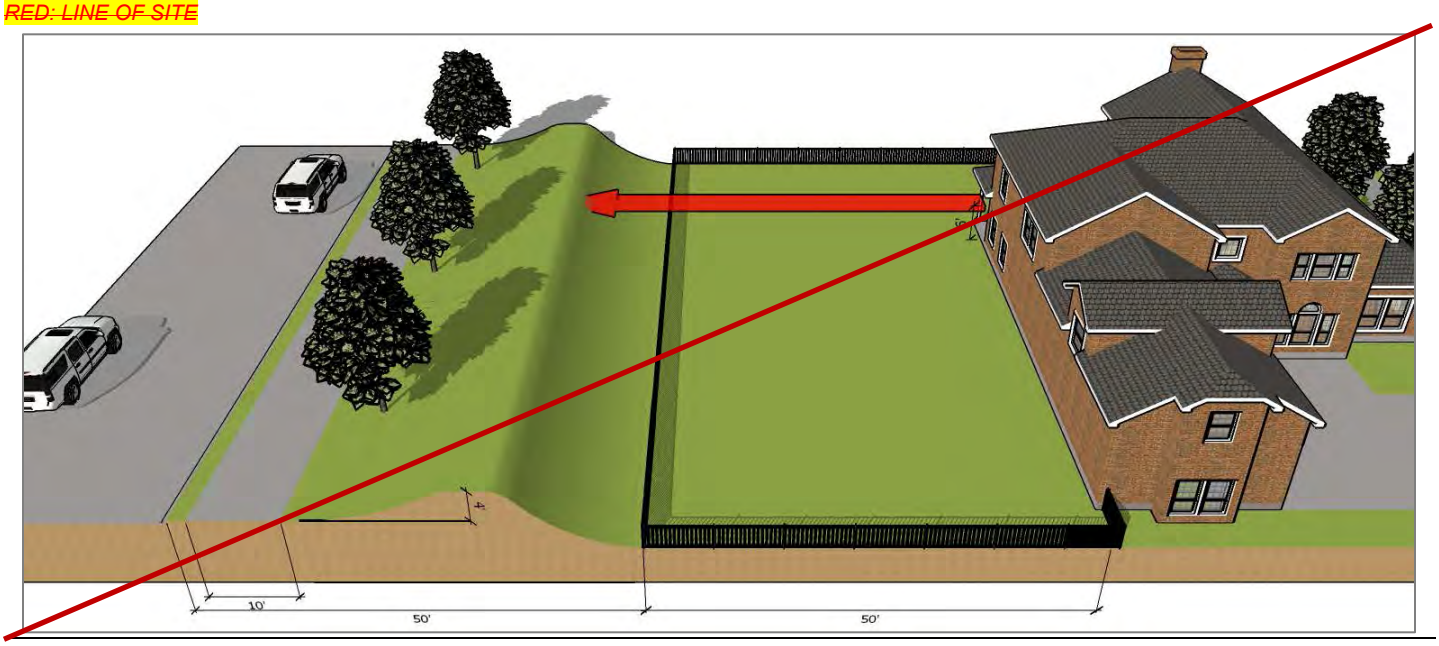
(4) Incorporation of an Eyebrow. An eyebrow street meeting the -- Engineering Department's requirements for right-of-way and design -- with a minimum cluster of five (5) homes and a maximum cluster of 12 homes can be incorporated with a 30-foot landscape buffer. All homes should front onto the eyebrow street and have a minimum of a 25-foot front yard building setback.

1: 30-Foot Landscape Buffer
2: John King Boulevard
3: Eyebrow Street
4: 25-Foot Front Yard Building Setback

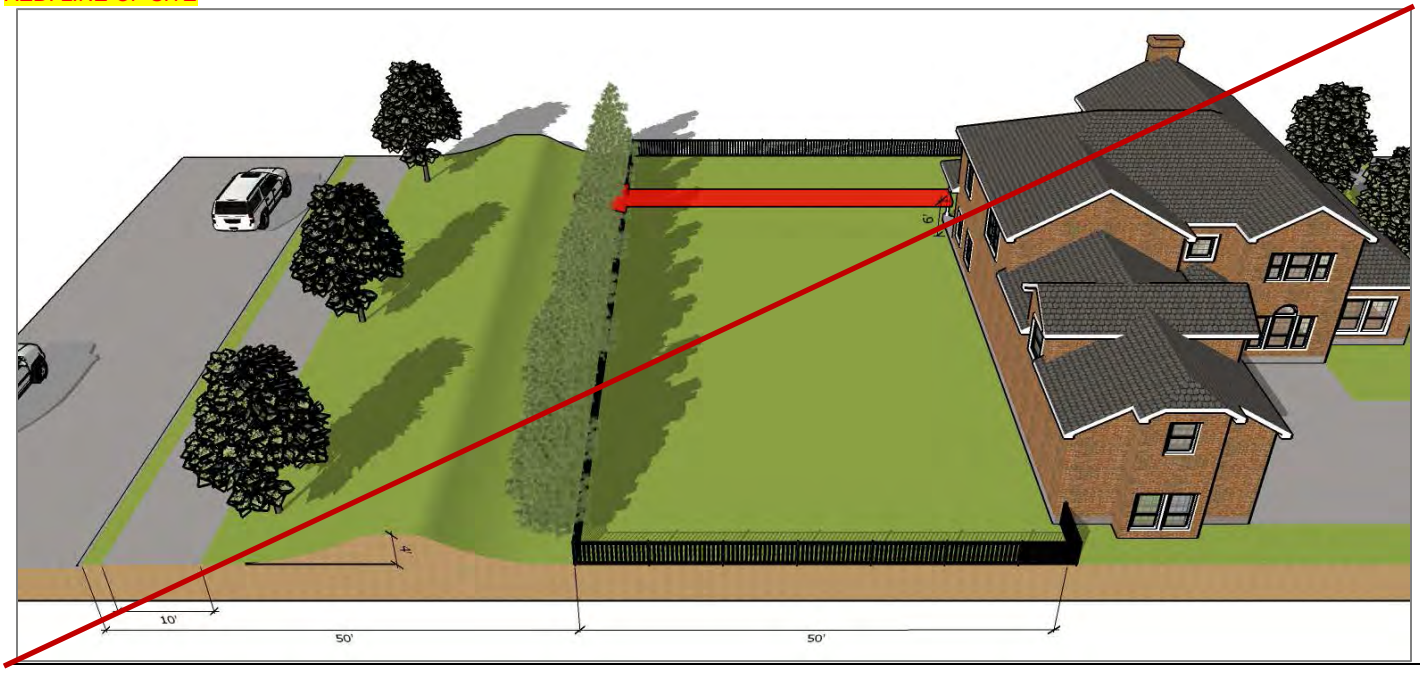
In addition, homes that back to a required landscape buffer should be built in such a manner where the required berm visually impairs visibility to John King Boulevard. In cases where a berm proves to be ineffective at screening traffic from John King Boulevard (due to topography, height, etc.) the developer shall be responsible for incorporating additional landscaping to provide sufficient screening in the required landscape buffer. This will be reviewed by the Planning and Zoning Commission at the time of site plan.

Example 1:

RED: LINE OF SITE



Example 2: Additional Landscaping Required
RED: LINE OF SITE



J. *Residential Subdivision Fence Standards.* No screening walls shall be erected adjacent to the John King Blvd. right-of-way in conjunction with any residential development. Eyebrow drives with clusters of lots (5—12 homes) shall be utilized along the John King Blvd. right-of-way for residential development or a 50-foot landscape buffer can be used as an alternative to the eyebrow drive design. Farm fencing, including wood rail type and metal pipe and cable fencing, is allowed within the 50-foot landscape buffer.

K. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this section would create a hardship. Approval of any variance to any provision of this section shall

require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.

(Ord. No. 05-49, 9-19-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 10-14, §§ 40—44, 7-6-2010; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)

SUBSECTION 6.11: NORTH SH-205 OVERLAY (N. SH-205 OV) DISTRICT

A. *Purpose.* The intent of the North SH-205 Corridor Overlay (N. SH-205 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and, as well as to those passing through, the City of Rockwall area. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the an architectural review committee Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, residential single-family land uses shall be excluded from these standards except has otherwise stated.

B. *Application and boundaries.* The North SH-205 Corridor Overlay (N. SH-205 OV) District includes the entirety of all properties which adjoin or are located within 500-feet of the current or future right-of-way of N.orth SH-205. The North SH-205 Corridor Overlay (N. SH-205 OV) District Zone spans north to south along SH-205 from the northern city limits (approximately 4,200-feet north of FM-552), south to the intersection point of SH-205 and Health Street. The standards and regulations set forth in the North SH-205 Corridor Overlay (N. SH-205 OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the North SH-205 Overlay (N. SH-205 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

C. *Architectural standards.*

1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XIII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.

a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;

That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;

That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;
That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;
That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and
That the manufactured stone product shall have a minimum warranty of 75 years.

b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.

2. Roof design standards. Rooftop mechanical equipment and other appurtenances, must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.
3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.

a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances screening shall be accomplished by either:

a) The construction of the roof systems described in subsection C.2 above; or
b) An architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way.

b. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.
c. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.
4. All buildings shall be designed to incorporate no less than four of the architectural elements listed below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:

a. Canopies, awnings, or porticos;
b. Recesses/projections;
c. Arcades;
d. Peaked roof forms;
e. Arches;
f. Outdoor patios;
g. Display windows;
h. Architectural details (such as tile work and moldings) integrated into the building facade;
i. Articulated ground floor levels or base;
j. Articulated cornice line;
k. Integrated planters or wing walls that incorporate landscape and sitting areas;

l. Offsets, reveals or projecting rib used to express architectural or structural bays;
m. Varied roof heights;
n. Or other architectural features approved by the director of planning or his designee.

5. All retail/commercial buildings shall be architecturally finished on all four sides with the same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
6. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of glass shall be reviewed and approved by the director of planning or his designee.
7. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

8. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

D. *Site design standards.*

1. *Building setback.* All lots within the North SH 205 Corridor Overlay District shall maintain a minimum building setback of 25 feet from the front property line adjacent to North SH 205. All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.
2. *Parking area restrictions.* No more than two rows of parking, approximately 60 feet in width, shall be allowed between the primary building and the SH 205 right-of-way.
3. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances. In addition,

a. Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare or as per the Texas Department of Transportation on state maintained roads;
b. The ingress and egress drives shall have a minimum radius of 30 feet;
c. Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
d. Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
e. Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
f. Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.

4. *Cross access.* Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.
5. *Shared parking.* In master planned retail centers, cross access and shared parking agreements are required for final platting.
6. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces SH 205, additional

screening of the area may be required. A minimum ten-foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semitrailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.

7. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from SH 205.
8. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.
9. *Plan review.* In addition to other factors set out in this Unified Development Code, any concept plans, development plans, and site plans shall be reviewed for:

   a. Meeting the intent of the landscape ordinance: article VIII, Landscape Standards, as amended, and the screening provisions herein.
   b. Achieving the intent of the architectural standards and site design standards.
   c. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

D. *Landscape standards.* All sites shall, as a minimum, meet the following standards and the standards set out in the landscape ordinance: article VIII, Landscape Standards. Where the following standards conflict with the landscape ordinance, these requirements shall prevail:

1. *[Required width and height.]* The buffer-strip shall be a minimum of 20 feet wide and include a "built-up" berm and/or shrubbery or a combination of both along the entire length of the subject property's frontage along the North SH 205 right-of-way. The minimum required height of the aforementioned berm and/or shrubbery or a combination thereof is 30 inches and shall not exceed a maximum height of 48 inches.
2. *Buffer-strip plantings.* Two canopy trees, along with four accent trees shall be required per 100 feet of the SH 205 right-of-way. Canopy trees, accent trees, and shrubs as defined, along with sizes and types are included in subsections E(3) and (4).
3. *Plant material sizes.* The following size requirements shall be required:

   Canopy trees: four-inch caliper.
   Accent trees: four-foot height.
   Shrubs:

   Deciduous: 15 inches; two-gallon minimum.
   Evergreen: 12 inches; two-gallon minimum.

4. *Plant material selections.* The following materials are recommended for planting in the buffer-strip; however, other materials may be acceptable:

   Canopy trees: Afghan Pine, Bur Oak, Caddo Maple, Cedar Elm, Lacebark Elm, Leyland Cypress, Little Gem Magnolia, Live Oak, October Glory Maple.

   Accent trees: Desert Willow, Eastern Redbud, Eves Necklace, Mexican Buckeye, Possumhaw Holly, Shangtung Maple, Yaupon Holly.

5. *Erosion control/retaining walls.* Any slope embankments or retaining walls within the public right-of-way or within the required buffer strip must be terraced every four feet in height (maximum) with a minimum of a two-foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry material used on the front facade of the primary building. The planting area must contain plant materials other than grass.

E. *Signs.* All signage requirements and variances to these requirements shall conform to chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the North SH-205 Overlay (N. SH-205 OV) District shall require city council approval by a three-quarter majority vote.

F. *Lighting standards.* In addition to the requirements of the outdoor lighting requirements no light pole, pole base or combination thereof shall exceed 20 feet in the North SH 205 Overlay District. All lighting fixtures shall focus light downward and be contained on the site.

G. *Utility placement.* All overhead utilities within the North SH 205 Corridor Overlay District shall be placed underground.

H. *Residential standards.* No wall, screening or otherwise, shall be erected adjacent to the North SH 205 right-of-way in conjunction with any residential development. Eyebrow drives with clusters of lots (5—12 homes) shall be utilized along the North SH 205 right-of-way for residential development or a 50-foot landscape buffer can be used as an alternative to the eyebrow drive design. Farm fencing, including wood rail type and metal pipe and cable fencing, is allowed within the 50-foot landscape buffer.

I. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this section would create a hardship. Approval of any variance to any provision of this section shall require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.

(Ord. No. 05-49, 9-19-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 10-14, § 45, 7-6-2010; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)

SUBSECTION 6.12: EAST SH-66 OVERLAY (E. SH-66 OV) DISTRICT

E. *Purpose.* The intent of the East SH-66 Corridor Overlay (E. SH-66 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and, as well as to those passing through, the City of Rockwall area. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the an architectural review committee Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, residential single-family land uses shall be excluded from these standards except has otherwise stated.

A.

B. *Application and boundaries.* The East SH-66 Corridor Overlay (E. SH-66 OV) District includes the entirety of all properties which adjoin or are located within 500-feet of the current or future right-of-way of E.ast SH-66. The East SH-66 Corridor Overlay (E. SH-66 OV) District Zone extends from FM-1141 to the east approximately 2,700-feet, and on property that lies within 500-feet of the south right-of-way line of SH-66 beginning at a point approximately 2,700-feet east of FM-1141 and then continuing east to FM-549. The standards and regulations set forth in the East SH-66 Corridor Overlay (E. SH-66 OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the East SH-66 Overlay (E. SH-66 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

~~C. *Architectural standards.*~~

~~1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XIII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.~~

~~a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;~~

~~☑ That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;~~
~~☑ That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;~~
~~☑ That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;~~
~~☑ That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and~~
~~☑ That the manufactured stone product shall have a minimum warranty of 75 years.~~

~~b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.~~

~~2. Roof design standards. Rooftop mechanical equipment and other appurtenances, must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.~~

~~3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.~~

~~a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances screening shall be accomplished by either:~~

a) The construction of the roof systems described in subsection C.2 above; or
b) An architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way.

b. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.
c. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.

4. All buildings shall be designed to incorporate no less than four of the architectural elements from the list below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:

a. Canopies, awnings, or porticos;
b. Recesses/projections;
c. Arcades;
d. Peaked roof forms;
e. Arches;
f. Outdoor patios;
g. Display windows;
h. Architectural details (such as tile work and moldings) integrated into the building facade;
i. Articulated ground floor levels or base;
j. Articulated cornice line;
k. Integrated planters or wing walls that incorporate landscape and sitting areas;
l. Offsets, reveals or projecting rib used to express architectural or structural bays;
m. Varied roof heights;
n. Or other architectural features approved by the director of planning or his designee.

5. All retail/commercial buildings shall be architecturally finished on all four sides with the same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
6. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of glass shall be reviewed and approved by the director of planning or his designee.
7. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

8. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

B. *Site design standards.*

1. *Building setback.* All lots within the East SH 66 Corridor Overlay District shall maintain the following minimum front building setbacks:

Residential: 25 feet.

Retail/commercial: 15 feet.
Industrial/office/technology: 50 feet.

All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.

2. *Parking area restrictions.* No more than two rows of parking, approximately 60 feet in width, shall be allowed between the primary building and East SH 66 right-of-way.
3. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances. In addition:

   a. Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare or as per the Texas Department of Transportation on state maintained roads;
   b. The ingress and egress drives shall have a minimum radius of 30 feet;
   c. Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
   d. Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
   e. Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
   f. Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.

4. *Cross access.* Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.
5. *Shared parking.* In master planned retail centers, cross access and shared parking agreements are required for final platting.
6. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces East SH 66, additional screening of the area may be required. A minimum ten foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semi-trailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.
7. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from East SH 66.
8. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.
9. *Plan review.* In addition to other factors set out in this Unified Development Code, any concept plans, development plans, and site plans shall be reviewed for:

   a. Meeting the intent of the landscape ordinance: article VIII, Landscape Standards, as amended, and the screening provisions herein.
   b. Achieving the intent of the architectural standards and site design standards.

d. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

F. *Landscape standards.*

1. *[Required width and height.]* The buffer strip shall be a minimum of 15 feet wide for retail/commercial use; 25 feet wide for residential use; and 50 feet for office, research-technology and industrial use and include a "built-up" berm and/or shrubbery or a combination of both along the entire length of the subject property's frontage along East SH 66. The minimum required height of the aforementioned berm and/or shrubbery or a combination thereof is 30 inches and shall not exceed a maximum height of 48 inches.
2. *Buffer strip plantings.* Two canopy trees, along with four accent trees shall be required per 100 feet of the East SH 66 right-of-way. Canopy trees, accent trees, and shrubs as defined, along with sizes and types are included in subsections E(3) and (4). The East SH 66 Corridor Overlay shall include an average of one cedar tree for each 100 feet of frontage planted in clusters of three to five trees.
3. *Plant material sizes.* The following size requirements shall be required:

Canopy trees: four-inch caliper.
Accent trees: four-foot height.
Shrubs:

Deciduous: 15 inches; two-gallon minimum.
Evergreen: 12 inches; two-gallon minimum.

4. *Plant material selections.* The following materials are recommended for planting in the buffer strip; however, other materials may be acceptable:

Canopy trees: Afghan Pine, Bur Oak, Caddo Maple, Cedar Elm, Lacebark Elm, Leyland Cypress, Little Gem Magnolia, Live Oak, October Glory Maple.

Accent trees: Desert Willow, Eastern Redbud, Eves Necklace, Mexican Buckeye, Possumhaw Holly, Shangtung Maple, Yaupon Holly.

5. *Erosion control/retaining walls.* Any slope embankments or retaining walls within the public right-of-way or within the required buffer strip must be terraced every four feet in height (maximum) with a minimum of a two-foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry material used on the front facade of the primary building. The planting area must contain plant materials other than grass.

C. *Signs.* All signage requirements and variances to these requirements shall conform to chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the East SH 66 Overlay (E. SH 66 OV) District shall require city council approval by a three-quarter majority vote.

D. *Lighting standards.* In addition to the requirements of the outdoor lighting requirements no light pole, pole base or combination thereof shall exceed 20 feet in the East SH 66 Corridor Overlay District. All lighting fixtures shall focus light downward and be contained on the site.

E. *Utility placement.* All overhead utilities within the East SH 66 Corridor Overlay District shall be placed underground.

F. *Residential standards.* No screening walls shall be erected adjacent to the East SH 66 right-of-way in conjunction with any residential development. Eyebrow drives with clusters of lots (5—12 homes) shall be utilized along the East SH 66 right-of-way for residential development or a 50-foot landscape buffer

can be used as an alternative to the eyebrow drive design. Farm fencing, including wood rail type and metal pipe and cable fencing, is allowed within the 50-foot landscape buffer.

G. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this section would create a hardship. Approval of any variance to any provision of this section shall require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.

(Ord. No. 05-49, 9-19-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 10-14, § 46, 7-6-2010; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)

SUBSECTION 6.13: FM-549 OVERLAY (FM-549 OV) DISTRICT

A. *Purpose.* The intent of the FM-549 Corridor Overlay (FM-549 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and, as well as to those passing through, the City of Rockwall area. In order to ensure that the visual impact of development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the an architectural review committee Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, residential single-family land uses shall be excluded from these standards except has otherwise stated.

B. *Application and boundaries.* The FM-549 Corridor Overlay (FM-549 OV) District includes the entirety of all properties which adjoin or are located within 500-feet of the current or future right-of-way of FM-549. The FM-549 Corridor Overlay (FM-549 OV) District Zone extends from SH-276 to a point approximately 800-feet north of IH-30 and on property that lies within 500-feet of the west right-of-way line of FM-549 from a point approximately 800-feet north of IH-30 to SH-66. The standards and regulations set forth in the FM-549 Corridor Overlay (FM-549 OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the FM-549 Overlay (FM-549 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

C. *Architectural standards.*

1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XIII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.

a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;

175

That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;
That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;
That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;
That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and
That the manufactured stone product shall have a minimum warranty of 75 years.

b. Secondary materials used on the facade of a building are those that comprise less than ten percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.

2. Roof design standards. Rooftop mechanical equipment and other appurtenances must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.

3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.

a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances screening shall be accomplished by either:

a) The construction of the roof systems described in subsection C.2 above; or
b) An architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way.

b. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.
c. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.

4. All buildings shall be designed to incorporate no less than four of the architectural elements listed below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:

a. Canopies, awnings, or porticos;
b. Recesses/projections;
c. Arcades;
d. Peaked roof forms;
e. Arches;

176

f. Outdoor patios;
g. Display windows;
h. Architectural details (such as tile work and moldings) integrated into the building facade;
i. Articulated ground floor levels or base;
j. Articulated cornice line;
k. Integrated planters or wing walls that incorporate landscape and sitting areas;
l. Offsets, reveals or projecting rib used to express architectural or structural bays;
m. Varied roof heights;
n. Or other architectural features approved by the director of planning or his designee.

5. All retail/commercial buildings shall be architecturally finished on all four sides with the same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
6. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of glass shall be reviewed and approved by the director of planning or his designee.
7. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

8. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

B. *Site design standards.*

1. *Building setback.* All lots within the FM 549 Corridor Overlay District shall maintain the following minimum front building setbacks:

Residential: 25 feet.
Retail/commercial: 15 feet.
Industrial/office/technology: 50 feet.

All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.

2. *Parking area restrictions.* No more than two rows of parking, approximately 60 feet in width, shall be allowed between the primary building and FM 549 right-of-way.
3. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances.
4. *Further guidelines.*

a. Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare or as per the Texas Department of Transportation on state maintained roads;
b. The ingress and egress drives shall have a minimum radius of 30 feet;
c. Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
d. Main entrance drives should generally be located at median breaks providing left turn access to and from the site;

177

e. Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
f. Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.

5. *Cross access.* Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.
6. *Shared parking.* In master planned retail centers, cross access and shared parking agreements are required for final platting.
7. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces FM 549, additional screening of the area may be required. A minimum ten-foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semitrailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.
8. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from SH 276.
9. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.
10. *Plan review.* In addition to other factors set out in this Unified Development Code, any concept plans, development plans, and site plans shall be reviewed for:

a. Meeting the intent of the landscape ordinance: article VIII, Landscape Standards, as amended, and the screening provisions herein.
b. Achieving the intent of the architectural standards and site design standards.
c. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

D. *Landscape standards.* All sites shall, as a minimum, meet the following standards and the standards set out in the landscape ordinance: article VIII, Landscape Standards. Where the following standards conflict with the landscape ordinance, these requirements shall prevail:

1. *[Required width and height.]* The buffer strip shall be a minimum of 15 feet wide for retail/commercial use; 25 feet wide for residential use; and 50 feet for office, research-technology and industrial use and include a "built-up" berm and/or shrubbery or a combination of both along the entire length of the subject property's frontage along FM 549. The minimum required height of the aforementioned berm and/or shrubbery or a combination thereof is 30 inches and shall not exceed a maximum height of 48 inches.
2. *Buffer-strip plantings.* Two canopy trees, along with four accent trees shall be required per 100 feet of the FM 549 right-of-way. Canopy trees, accent trees, and shrubs as defined, along with sizes and types are included in subsections E(3) and (4). The area of the FM 549 Corridor Overlay from Airport Road to SH 66 shall include an average of one cedar tree for each 100 feet of frontage planted in clusters of three to five trees.
3. *Plant material sizes.* The following size requirements shall be required:

Canopy Trees: four-inch caliper.

Accent Trees: four-foot height.
Shrubs:

Deciduous: 15 inches; two-gallon minimum.
Evergreen: 12 inches; two-gallon minimum.

4. *Plant material selections.* The following materials are recommended for planting in the buffer-strip; however, other materials may be acceptable:

Canopy trees: Afghan Pine, Bald Cypress, Bur Oak, Caddo Maple, Cedar Elm, Lacebark Elm, Leyland Cypress, Little Gem Magnolia, Live Oak, October Glory Maple, Red Oak, Texas Ash, Texas Red Oak.

Accent trees: Desert Willow, Eastern Redbud, Eves Necklace, Mexican Buckeye, Possumhaw Holly, Shangtung Maple, Yaupon Holly.

5. *Erosion control/retaining walls.* Any slope embankments or retaining walls within the public right-of-way or within the required buffer strip must be terraced every four feet in height (maximum) with a minimum of a two-foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry material used on the front facade of the primary building. The planting area must contain plant materials other than grass.

C. *Signs.* All signage requirements and variances to these requirements shall conform to chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the FM-549 Overlay (FM-549 OV) District shall require city council approval by a three-quarter majority vote.

D. *Lighting standards.* In addition to the requirements of the outdoor lighting requirements no light pole, pole base or combination thereof shall exceed 20 feet in the FM-549 Corridor Overlay District. All lighting fixtures shall focus light downward and be contained on the site.

E. *Utility placement.* All overhead utilities within the FM-549 Corridor Overlay District shall be placed underground.

F. *Residential standards.* No wall, screening or otherwise, shall be erected adjacent to the FM-549 right-of-way in conjunction with any residential development. Eyebrow drives with clusters of lots (5—12 homes) shall be utilized along the FM-549 right-of-way for residential development or a 50-foot landscape buffer can be used as an alternative to the eyebrow drive design. Farm fencing, including wood rail type and metal pipe and cable fencing, is allowed within the 50-foot landscape buffer.

G. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this section would create a hardship. Approval of any variance to any provision of this section shall require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.

(Ord. No. 05-49, 9-19-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 10-14, § 47, 7-6-2010; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)

SUBSECTION 6.14: SH-276 OVERLAY (SH-276 OV) DISTRICT

A. *Purpose.* The intent of the SH-276 Corridor Overlay (SH-276 OV) District is to provide for consistent development of office, retail and commercial areas in concert with the most efficient and aesthetically pleasing appearance of the frontage, which serves as the initial impression to those visiting and, as well as to those passing through, the City of Rockwall area. In order to ensure that the visual impact of

development does not detrimentally affect the area in which it is proposed, landscaping plans, building elevations and site plans are required. Architectural compatibility will be reviewed through the ~~an architectural review committee~~ Architectural Review Board (ARB). These development requirements shall apply to non-residential and multi-family land uses only, ~~residential~~ single-family land uses shall be excluded from these standards except ~~h~~as otherwise stated.

B. *Application and boundaries.* The SH-276 ~~Corridor~~ Overlay (SH-276 OV) District includes the entirety of all properties which adjoin or are located within 500-feet of the current or future right-of-way of SH-276. The SH-276 ~~Corridor~~ Overlay (SH-276 OV) District ~~Zone~~ extends from SH-205 east to the eastern city limits ~~line~~, as may be extended with future annexation(s). The standards and regulations set forth in the SH-276 ~~Corridor~~ Overlay (SH-276 OV) District are superimposed and shall supersede the standards and regulations of any underlying zoning district which are in conflict.

C. *Overlay District Standards*. If any portion of a property is situated within the boundaries of the SH-276 Overlay (SH-276 OV) District, the entire property shall be subject to the requirements of Section 6.01, *General Overlay District Standards*.

~~C. *Architectural standards.*~~

~~1. Masonry requirements. Each exterior wall shall consist of 90 percent masonry materials, excluding doors and windows, as defined in article XIII, Definitions, excluding cast stone and cultured stone, on walls which are visible from a public street or open space, including a minimum of 20 percent natural or quarried stone.~~

~~a. Primary exterior materials shall include natural or quarried stone, brick, glass block or glass, tile, cast metal and custom concrete masonry units. The use of other cementaceous products (e.g. stucco, Hardy Plank, or other similar materials approved by the building official) shall be limited to 50 percent of the building's exterior finishes where it is deemed important as a design feature and where it will be applied under the highest standards for quality and durability. However, stucco may not be located in the first four feet above grade on a facade visible from a street or public area. Each elevation's masonry requirement shall incorporate accent bricks or stones. As the term is used, an "accent brick or stone" is one that provides a contrast by color, shape, size, and/or texture to the field of primary bricks or stones in an elevation. Additionally, the Planning and Zoning Commission may consider the use of high quality manufactured or cultured stone if the following standards of manufacturing and warranty apply to the product;~~

~~That the manufacturing molds should be made from actual stones and each piece should complement each other having the right shape, texture, size and detail of natural stone;~~
~~That the overtones of color should be integrated into the stone during the molding process, while the base color of the stone is blended entirely throughout;~~
~~That highly skilled artisans should be utilized to hand paint each piece in order to give each stone depth and variation of color;~~
~~That the use of the highest quality synthetic mineral oxides should be used to infuse the surface with rich, authentic tones; and~~
~~That the manufactured stone product shall have a minimum warranty of 75 years.~~

~~b. Secondary materials used on the facade of a building are those that comprise less than two percent of an elevation area. Permitted secondary materials are all primary materials, aluminum or other metal, EIFS, cast stone, cultured stone or other materials as approved by the director of planning or his designee.~~

2. Roof design standards. Rooftop mechanical equipment and other appurtenances must be properly screened. All structures having a footprint of 6,000 square feet or less shall be constructed with a pitched roof system. Those structures having a footprint greater than 6,000 square feet shall be constructed with either a pitched, parapet, or mansard roof system (enclosed on all sides). Standing seam metal roofs shall be constructed of a factory finish. Metal roofs with lapped seam construction, bituminous built-up roofs, and flat, membrane-type roofs which are visible from adjacent public right-of-way shall be prohibited.
3. Mechanical equipment screening. All buildings must be designed such that no mechanical equipment, HVAC, or satellite dishes shall be visible from any direction. This shall include equipment located on the roof, on the ground, or otherwise attached to the building or located on the site.

   a. Screening of rooftop mechanical equipment and/or other rooftop appurtenances screening shall be accomplished by either:

      a) The construction of the roof systems described in subsection C.2 above; or
      b) An architectural feature which is integral to the building's design and ensures that such equipment is not visible from adjacent public right-of-way.

   b. The fencing or enclosing of individual mechanical units shall not be permitted except as described above.
   c. All rooftop mechanical equipment or architectural features described herein shall be shown on the required building elevations and submitted along with the site plan for approval.

4. All buildings shall be designed to incorporate no less than four of the architectural elements listed below. Buildings over 50,000 square feet must include a minimum of six of the referenced architectural elements. Buildings over 100,000 square feet must include a minimum of seven of the referenced architectural elements:

   a. Canopies, awnings, or porticos;
   b. Recesses/projections;
   c. Arcades;
   d. Peaked roof forms;
   e. Arches;
   f. Outdoor patios;
   g. Display windows;
   h. Architectural details (such as tile work and moldings) integrated into the building facade;
   i. Articulated ground floor levels or base;
   j. Articulated cornice line;
   k. Integrated planters or wing walls that incorporate landscape and sitting areas;
   l. Offsets, reveals or projecting rib used to express architectural or structural bays;
   m. Varied roof heights; or
   n. Other architectural features approved by the director of planning or his designee.

5. All retail/commercial buildings shall be architecturally finished on all four sides with the same materials, detailing, and features with one row of trees planted on the perimeter behind the building.
6. Windows shall have a maximum exterior visible reflectivity of 20 percent. Color of glass shall be reviewed and approved by the director of planning or his designee.
7. All buildings within a common retail/commercial development, as shown on a concept plan or site plan, shall have similar architectural styles, materials, and colors.

a. Conceptual facade plans and sample boards shall be submitted with the site plan application for all nonresidential uses. The purpose of the conceptual facade plan is to ensure consistency and compatibility for all buildings within a single development. Facade plans will be used only to ensure minimum standards are met.

8. Corporate identities that conflict with the building design criteria shall be reviewed as a variance as defined in this section and reviewed on a case-by-case basis by the planning and zoning commission and approved by the city council.

B. *Site design standards.*

1. *Building setback.* All lots within the FM 549 Corridor Overlay District shall maintain the following minimum front building setbacks:

Residential: 25 feet.
Retail/commercial: 15 feet.
Industrial/office/technology: 50 feet.
All other building setback regulations shall be the same as set forth in the underlying zoning district except as otherwise noted herein.

2. *Parking area restrictions.* No more than two rows of parking, approximately 60 feet in width, shall be allowed between the primary building and SH 276 right-of-way.
3. *Access/ingress/egress.* To minimize potential vehicular and pedestrian conflicts particular attention must be given to the location of median breaks along major thoroughfares, number and location of entry/exit drives, design of entry/exit drives in relationship to the parking areas, and sight distances.
4. *Further guidelines.*

a. Driveways should typically be spaced a minimum of 100 feet from the intersection of a major thoroughfare or as per the Texas Department of Transportation on state maintained roads;
b. The ingress and egress drives shall have a minimum radius of 30 feet;
c. Driveways should maintain an appropriate sight distance triangle at all perimeter entrances and exits;
d. Main entrance drives should generally be located at median breaks providing left turn access to and from the site;
e. Main entrance drives should connect to a "straightaway" aisle that does not dead end or require an immediate turn to approach the main building;
f. Aisles intersecting with entrance drives should be spaced at a minimum of 20 feet from the property line to provide for smooth turning movements.

5. *Cross access.* Cross access easements may be required by the city council at the time of the site plan approval to ensure access to future median breaks and to reduce the number of needed curb cuts.
6. *Shared parking.* In master planned retail centers, cross access and shared parking agreements are required for final platting.
7. *Loading and service areas.* Loading and service areas shall be located on the rear and side of buildings whenever possible. In the event that a loading or service area faces SH 276, additional screening of the area may be required. A minimum ten-foot solid screening wall shall be required to screen views of loading docks and loading spaces intended for tractor/semitrailer delivery from any public right-of-way. This ten-foot wall must screen the entire loading dock or space. Screening materials shall utilize similar masonry materials to the front facade. The accommodation of adequate access for service delivery trucks may be evaluated to determine the extent of screening required.

8. *Trash receptacles and recycling receptacles.* Trash and recycling receptacles shall be four-sided with a gate and located outside buffer strips, and to the side or rear of the primary building. The receptacles shall be screened by a minimum eight-foot solid masonry screen and shall utilize similar masonry materials to the principal structure. Every effort shall be made in order to screen trash/recycling receptacles from SH 276.
9. *Play structures.* Play structures shall not be placed between the primary building and any adjacent public right-of-way.
10. *Plan review.* In addition to other factors set out in this Unified Development Code, any concept plans, development plans, and site plans shall be reviewed for:

    a. Meeting the intent of the landscape ordinance: article VIII, Landscape Standards, as amended, and the screening provisions herein.
    b. Achieving the intent of the architectural standards and site design standards.
    c. Proper site entry identification and cross access circulation to avoid congestion at ingress and egress points.

E. *Landscape standards.* All sites shall, as a minimum, meet the following standards and the standards set out in the landscape ordinance: article VIII, Landscape Standards. Where the following standards conflict with the landscape ordinance, these requirements shall prevail:

1. *[Required width and height.]* The buffer strip shall be a minimum of 15 feet wide for retail/commercial use; 25 feet wide for residential use; and 50 feet for office, research technology and industrial use and include a "built-up" berm and/or shrubbery or a combination of both along the entire length of the subject property's frontage along SH 276. The minimum required height of the aforementioned berm and/or shrubbery or a combination thereof is 30 inches and shall not exceed a maximum height of 48 inches.
2. *Buffer strip plantings.* Two canopy trees, along with four accent trees shall be required per 100 feet of the SH 276 right-of-way. Canopy trees, accent trees, and shrubs as defined, along with sizes and types are included in subsections E(3) and (4).
3. *Plant material sizes.* The following size requirements shall be required:

    Canopy trees: four-inch caliper.
    Accent trees: four-foot height.
    Shrubs:

    Deciduous: 15 inches: two-gallon minimum.
    Evergreen: 12 inches: two-gallon minimum.

4. *Plant material selections.* The following materials are recommended for planting in the buffer strip; however, other materials may be acceptable:

    Canopy trees: Afghan Pine, Bald Cypress, Bur Oak, Cedar Elm, Eastern Red Cedar, Homestead Elm, Lacebark Elm, Little Gem Magnolia, Live Oak, October Glory Maple, Red Oak.

    Accent trees: Desert Willow, Eastern Redbud, Eves Necklace, Mexican Buckeye, Possumhaw Holly, Shangtung Maple, Yaupon Holly.

5. *Erosion control/retaining walls.* Any slope embankments or retaining walls within the public right-of-way or within the required buffer strip must be terraced every four feet in height (maximum) with a minimum of a two-foot planting area provided between each vertical plane. Materials used for the vertical elements shall be natural stone or any masonry material which matches the masonry

~~material used on the front facade of the primary building. The planting area must contain plant materials other than grass.~~

~~C. *Signs.* All signage requirements and variances to these requirements shall conform to chapter 32, Signs, of the Code of Ordinances; however, approval of any variance to the sign standards for property included in the SH 276 Overlay (SH 276 OV) District shall require city council approval by a three-quarter majority vote.~~

~~D. *Lighting standards.* In addition to the requirements of the outdoor lighting requirements, no light pole, pole base or combination thereof shall exceed 20 feet in the SH 276 Corridor Overlay District. All lighting fixtures shall focus light downward and be contained on the site.~~

~~E. *Utility placement.* All overhead utilities within the SH 276 Corridor Overlay District shall be placed underground.~~

~~F. *Residential standards.* For any residential development adjacent to SH 276, a seven-foot wall comprised of masonry and wrought iron style fencing set back at least 25 feet from the right-of-way is required in addition to landscaping of the area. At least ten percent of the wall shall be a wrought iron style. Such walls adjacent to SH 276 shall be off-set by at least eight feet for at least 16 feet for every 100 feet of length.~~

~~G. *Variance.* The city council may, upon request from the applicant, grant a variance to any provision of this section where unique or extraordinary conditions exist or where strict adherence to the provisions of this ordinance section would create a hardship. Approval of any variance to any provision of this section shall require city council approval by a three-quarter majority vote of those city council members present with a minimum of four affirmative votes.~~

~~*(Ord. No. 05-49, 9-19-2005; Ord. No. 06-14, 4-17-2006; Ord. No. 10-14, § 48, 7-6-2010; Ord. No. 15-23, § 2, 8-3-2015; Ord. No. 15-32, § 1, 12-7-2015; Ord. No. 18-23, § 1, 5-7-2018)*~~

SUBSECTION 6.15: LAKE RAY HUBBARD TAKELINE OVERLAY (TL OV) DISTRICT

Subsection 6.15, *Lake Ray Hubbard Takeline Overlay (TL OV) District*, is omitted from this ordinance change, but is retained in its entirety.

SUBSECTION 6.16: VARIANCES TO THE GENERAL OVERLAY DISTRICT STANDARDS

Unless otherwise specified in this section, an applicant may request the Planning and Zoning Commission grant a variance to any provision contained in *Section 6.02, General Overlay District Standards*, where unique or extraordinary conditions exist or where strict adherence to the technical requirements of this section would create an undue hardship. If the Planning and Zoning Commission denies a variance request, the applicant may appeal the decision to the City Council by filing a written request to the Planning and Zoning Department. The request should provide justification for the variance or variances being requested (*i.e. detail the unique or extraordinary conditions that exist and/or the undue hardship created by strict adherence to the technical requirements*). Approval of any variance to the requirements of this section by the Planning and Zoning Commission or City Council shall require a supermajority vote (*i.e. a three-fourths vote of those members present*), with a minimum of four (4) votes in the affirmative required for approval.

SECTION 7: DISTRICT DEVELOPMENT STANDARDS

SUBSECTION 7.01: RESIDENTIAL DISTRICT DEVELOPMENT STANDARDS

Residential District Development Standards Zoning Districts → Development Standards ↓		Single-Family Estate 1.5 (SFE-1.5) District	Single Family Estate 2.0 (SFE-2.0) District	Single-Family Estate 4.0 (SFE-4.0) District	Single-Family 1 (SF-1) District	Single-Family 16 (SF-16) District	Single-Family 10 (SF-10) District	Single-Family 8.4 (SF-8.4) District	Single-Family 7 (SF-7) District	Zero Lot Line (ZL-5) District	Two-Family (2F) District	Agricultural (AG) District
Abbreviation		SFE-1.5	SFE-2.0	SFE-4.0	SF-1	SF-16	SF-10	SF-8.4	SF-7	ZL-5	2F	AG

Required Parking Spaces[7]		2[8]	2[8]	2[8]	2[8]	2[8]	2[8]	2[8]	2[8]	2[9]	2[10]	2[8]

ADDITIONAL REQUIREMENTS:

[1]: The Single Family 1 (SF-1) District allows for one (1) unit per gross acre.

[2]: Frontage on a Public Street

[3]: The side setback adjacent to a street is treated the same as a front yard building setback.

[4]: Minimum maintenance easement is ten (10) feet. Minimum maintenance easement on the non-zero lot line side, when adjacent to another lot in the same zoning district is five (5) feet (*this easement shall be maintained as an open space except upon a finding by the building official that the proposed improvements do not impede the use of said easement for maintenance of the adjoining structure*).

[5]: Abutting structures separated by fire retardant walls.

[6]: Townhouses separated by firewall meeting the requirements of the building code may build to the property line where such structures abut.

[7]: Minimum length of driveway pavement from public right-of-way for rear and side yard is 20-feet.

[8]: An enclosed garage shall not be considered in meeting the off-street parking requirements. For all other uses see Article VI, *Parking and Loading*.

[9]: A two (2) car garage is required.

[10]: Two (2) off-street parking spaces plus one (1) garage parking space for each dwelling unit is required.

[11]: A minimum lot size of ten (10) acres is required for the construction of any single-family dwelling.

SUBSECTION 7.02: MULTI-FAMILY DISTRICT DEVELOPMENT STANDARDS

Multi-Family District Development Standards Zoning Districts → Development Standards ↓		Multi-Family 14 (MF-14) District [1]
Abbreviation		MF-14
Dwelling Units/Acre		14.0[2]
Minimum Lot Requirements	Site Area (Square Feet)	10,000
	Lot Area (Square Feet)	2,000 (*Per Unit*)
	Width (Feet)[3]	60
	Depth (Feet)	100
Minimum Setbacks	Front (Feet)	25
	Rear (Feet) w/ Residential Adjacency (Feet)[3 & 8]	One Story = 25
		Two Stories = 50
		Three Stories = 75
	Rear (Feet)	10
	Side w/ Residential Adjacency (Feet)[4 & 8]	One Story = 25
		Two Stories = 50
		Three Stories = 75
	Side (Feet)	One Story = 10
		Two or More Stories = 15
Between Buildings (Feet)		Main to Accessory = 10
		Two Main Buildings w/ Doors or Windows in Facing Walls = 20
		Two Main Buildings w/o Doors or Windows in Facing Walls = 15
Building Height (Feet)		36
Minimum Masonry Content (%)		100
Maximum Lot Coverage (%)		45[5]
Minimum Landscaping (%)[7]		25% of Total Lot Area w/ 30% of Total Required in the Front and Alongside Buildings w/ Street Frontage [6]
Required Parking Spaces		See Article VI, *Parking and Loading*

ADDITION REQUIREMENTS:

[1]: Duplexes shall meet the requirements of the Two-Family (2F) District, with only one (1) duplex per lot.

[2]: Density is calculated by gross acre.

[3]: Unenclosed carports may be built within five (5) feet of any property line that abuts an alley, but no closer than 20-feet from any street intersection.

[4]: Side on street is treated the same as a front yard building setback.

[5]: Each development containing over 100 dwelling units shall provide 300 SF of open space per two (2) and three (3) bedroom units, with at least one (1) open area with the minimum dimensions of 200-feet by 150-feet. Swimming pools, tennis courts and other recreational facilities can be counted toward the overall open space requirement, but not toward the required 200-feet by 150-feet area.

[6]: Any parking lot with more than two (2) rows of parking spaces shall have a minimum of two (2) percent of the interior of the parking lot landscaped. Such landscaping shall be counted toward the landscaping requirement.

[7]: All required landscaped areas shall be permanently maintained and shall have an irrigation system installed meeting all applicable city codes.
[8]: Lots with more than five (5) dwelling units that are contiguous to a residential zoning district, must be separated by a buffer as established in Article VIII, *Landscape Standards*.

SUBSECTION 7.03: NON-RESIDENTIAL DISTRICT DEVELOPMENT STANDARDS

Non-Residential District Development Standards *: For development in the Downtown (DT) District see the standards in Section 4.8, *Downtown (DT) District*. Zoning Districts → Development Standards ↓		Residential-Office (RO) District	Neighborhood Services (NS) District	General Retail (GR) District	Commercial (C) District	Heavy Commercial (HC) District	Light Industrial (LI) District	Heavy Industrial (HI) District

Blue: When adjacent to Interstate 30.
H: Building Height
1/2*H*>36: One-Half the Building Height Over 36-Feet
FRW: Fire Retardant Wall
w/o FRW: Without Fire Retardant Wall

ADDITIONAL REQUIREMENTS:
[1]: A maximum building size of 5,000 SF in area, unless otherwise approved through a Specific Use Permit (SUP) by the Planning and Zoning Commission and City Council.
[2]: A maximum building size of 25,000 SF in area, unless otherwise approved through a Specific Use Permit (SUP) by the Planning and Zoning Commission and City Council.
[3]: Maximum lot area is 43,560 SF.
[4]: From future right-of-way as shown on the adopted Master Thoroughfare Plan or as actually exists, whichever is greater.
[5]: Parking should not be located between the front façade and the property line.
[6]: Lots with non-residential uses that have a side or rear yard contiguous or separated only by an alley, easement, or street, from any residential district must be separated from such residential district by a buffer as defined in Article VIII, *Landscape Standards*, or as approved by the Planning and Zoning Commission.
[7]: Not to exceed 50-Feet.
[8]: Building height may be increased up to 60-feet if approved through a Specific Use Permit (SUP) by the Planning and Zoning Commission and City Council.
[9]: Building height may be increased up to 240-feet if approved through a Specific Use Permit (SUP) by the Planning and Zoning Commission and City Council.
[10]: (or) as approved by Planning and Zoning Commission.
[11]: A minimum of seven (7) percent of the interior of the parking lot -- *not including the setback and landscape buffer* -- shall be pervious land area with additional plantings to create an amenity open space.
[12]: Parking shall not be permitted in the required setback.
[13]: Building height may be increased up to 120-feet if approved through a Specific Use Permit (SUP) by the Planning and Zoning Commission and City Council.

SUBSECTION 7.04: ACCESSORY STRUCTURE DEVELOPMENT STANDARDS

Accessory Structure Development Standards Zoning Districts or Accessory Structure Type → Development Standards ↓		Accessory Structures & Accessory Buildings [1, 8, & 9]							
		Single Family Estate 1.5 (SFE-1.5) District	Single Family Estate 2.0 (SFE-2.0) District	Single Family Estate 4.0 (SFE-4.0) District	All Other Single Family Zoning Districts (*i.e. SF-7, SF-8.4, SF-10, SF-16 & SF-1*)	Two Family (2F) District	Portable Accessory Building 0 SF – 120 SF [8]	Detached Garage [8]	Carports [7 & 8]
Number of Accessory Structures or Number of Specific Accessory Structure		2[2]	2[2]	2[2]	2	1	1	1	1
Maximum SF of Accessory Structure [2]		1,250[2]	1,500[2]	2,000[2]	225[6]	100	120	900	500
Minimum Setbacks	Rear (Feet)	10	10	10	3	3	3	10	10
	Rear w/ Alleyway (Feet)	20[4]	20[4]	20[4]	3	3	3	20[4]	20
	Side (Feet)	*See Zoning District*	*See Zoning District*	*See Zoning District*	*See Zoning District*	3	3	*See Zoning District*	*See Zoning District*
Between Buildings (Feet)		10	10	10	6	3	3	10	10
Building Height (Feet)		15	15	15	15	10	10	15	15
Minimum Masonry Content (%) [3]		80[5]	80[5]	80[5]	80[5]	80[5]	0	80[5]	80[5]

ADDITIONAL REQUIREMENTS:

1: Accessory buildings and accessory structures shall be accessory to a residential use and located on the same lot. Unless stipulated above, only two (2) accessory structures are permitted per single-family lot; excluding carports that are integrated into the main accessory structure.

2: If more than one (1) accessory building is proposed or if an accessory building, 625 SF or less, is existing then the maximum accessory building that can be constructed is 625 SF. If there is an existing accessory building greater than 625 SF no additional accessory buildings or structures are permitted.

3: Greenhouses are exempt from the minimum masonry requirements.

4: If the accessory building does not have garage doors facing the alleyway the setback is the same as the base zoning district.

5: The exterior of the accessory building or structure shall be clad in the same materials in roughly the same proportions as the primary structure; however, accessory buildings or structures that are less than 120 SF and under ten (10) feet in height may be constructed with non-masonry materials, or may be all metal with a baked-on pre-painted surface.

6: Each property shall be permitted one (1) detached garage up to 900 SF and one (1) accessory building up to 225 SF.

7: In residential districts, carports must be open on at least two (2) sides, architecturally integrated into the primary structure, and be located 20-feet behind the corner of the front façade and meet the garage setback adjacent to an alley. Porte-cocheres are not considered carports, and are allowed, if they are attached and integral with the design of the house.

8: Accessory buildings and accessory structures not meeting the masonry requirements shall require the approval of an exception from the Planning and Zoning Commission.

9: Barns used for agricultural and/or farm animal purposes, on sites ten (10) acres or more that are zoned Agricultural (AG) District, are excluded from this masonry requirement.

CITY OF ROCKWALL, TEXAS
MEMORANDUM

TO: **Richard Crowley, City Manager**

FROM: **Kenneth Cullins, Fire Chief**

DATE: **November 14, 2018**

SUBJECT: **FEMA Assistance to Firefighters Grant**

Diesel exhaust within a fire station presents a significant health risk to firefighters and others working in fire stations. In keeping with our strategic goal of ensuring the health and safety of the membership the department has applied for a grant that would allow us to install vehicle exhaust capture and removal systems in all of our stations. The system has totally automatic start-up and disconnect features and is a generally accepted best practice for controlling carcinogenic diesel exhaust emissions in the station. The total cost of the project is expected to be $201,800. 90% of the project will be funded by the grant, and the remaining 10% will be funded by a match from the city.

Should we be fortunate enough to be awarded the funding I would ask that council consider accepting the grant and the associated 10% commitment. Should council choose to not accept the grant we will respectfully withdraw our application prior to the awards being announced.

CITY OF ROCKWALL, TEXAS
RESOLUTION NO. 18-24

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, SUPPORTING APPLICATION FOR GRANT FUNDING THROUGH THE FEDERAL EMERGENCY MANAGEMENT AGENCY'S (FEMA'S) 'ASSISTANCE TO FIREFIGHTERS GRANT' FOR THE PURCHASE AND INSTALLATION OF VEHICLE EXHAUST CAPTURE AND REMOVAL SYSTEMS IN ALL CITY OF ROCKWALL FIRE STATIONS; DESIGNATING THE CITY MANAGER AS BEING RESPONSIBLE FOR AND ACTING FOR AND ON BEHALF OF THE CITY FOR THE PURPOSE OF ACCEPTING THE GRANT (SHOULD IT BE AWARDED) AND EXECUTING ANY ASSOCIATED DOCUMENTS; PROVIDING FOR FUTURE CONSIDERTAION OF REQUIRED MATCHING FUNDS; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, diesel exhaust within fire stations presents a significant health risk to firefighters and others working in fire stations; and

WHEREAS, in keeping with the fire department's strategic goal of ensuring health and safety, the Rockwall Fire Department has applied for a grant that, if awarded, will allow for the installation of a vehicle exhaust capture and removal system in all city fire stations; and

WHEREAS, the system has totally automatic start-up and disconnect features and is a generally accepted "best practice" for controlling carcinogenic diesel exhaust emissions in fire stations; and

WHEREAS, the total cost of the project is expected to be $201,800 with 90% of the project cost ($181,620) being funded by the grant, and the remaining 10% ($20,180) being funded by a match from the City.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THAT:

Section 1. the Rockwall City Council hereby expresses a commitment to support the Rockwall Fire Department's application for the grant for the purposes described above; and

Section 2. should the grant in fact be awarded, the Rockwall City Council hereby authorizes and directs its City Manager, Rick Crowley, to act on behalf of the City for the purpose of accepting the grant and executing any associated documents; and

Section 3. the Rockwall City Council acknowledges that it will take appropriate action to consider the 10% matching funds requirement associated with the grant should it be awarded.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF ROCKWALL, TEXAS, THIS THE 19th DAY OF NOVEMBER, 2018.

ATTEST: **Jim Pruitt, Mayor**

Kristy Cole, City Secretary

City of Rockwall
The New Horizon

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Amy Williams, P.E., Director of Public Works/City Engineer**

DATE: **November 15, 2018**

SUBJECT: **County Line Road Reconstruction**
Construction Contract

The County Line Road Reconstruction Project from Horizon Road (FM 3097) to Renee Drive is one of the four Roadway Capital Improvement Projects passed in the 2012 Bond Election. The existing asphalt 24 to 22 foot wide County Line Road will be reconstructed to concrete curb and gutter roadway with a 5-foot concrete sidewalk on each side. The new roadway will vary in width from 37 ft wide from Horizon Road (FM 3097) to Eva Place, 29 foot wide from Eva Place to Russell Drive, and 24 foot wide from Russell Drive to Renee Drive. Additional improvements for the project will include new underground storm sewer system, installation of new waterlines along the road, and the raising of the road out of the floodplain at Horizon Road.

The City hired Freese and Nichols, Inc. to provide the engineering design and specifications for County Line Road Reconstruction Project. Three (3) bids for construction were received and opened on September 13, 2018. The low bidder is McMahon Contracting, LP with a Bid of $5,335,467.51. The engineering consultants have verified the McMahon Contracting, LP. references and provided a letter of recommendation. Funding will be provided through the Street Bond Fund and the Water / Sewer Fund.

Staff requests City Council consider approval of the County Line Road Reconstruction Project and authorize the City Manager to execute a contract with McMahon Contracting, LP. in an amount of $5,335,467.51, to be funded by Street Bond Fund and the Water / Sewer Fund, and take any action necessary.

Re: Rockwall – County Line Road Reconstruction
(FNI Project # ROK15508) CIP2015-009
Recommendation of Award

Dear Mr. White:

A total of three (3) bidders submitted bid packages for the above referenced project on Thursday, September 13, 2018. A quote for soil stabilization was also provided by Earthlok but was determined to be non-responsive to the bid requirements. Bids were for the construction of County Line Road improvements including pavement reconstruction, retaining walls, sidewalks, waterline, sanitary sewer, storm sewer, and traffic signal installation. McMahon Contracting provided the lowest responsive bid for the project. A summary of the bids is provided in the table below, and the detailed bid tabulation is attached.

BID SUMMARY

	BASE BID TOTAL AMOUNT
McMahon Contracting, LP	$ 5,335,467.51
Tiseo Paving Company	$ 5,431,064.75
Ed Bell Construction Company	$ 5,639,244.90

McMahon Contracting, L.P. submitted the low bid of $5,335,467.51. McMahon Contracting is a paving contractor headquartered in Irving, Texas. The unit costs provided by McMahon Contracting are similar to what we have seen on recent projects, and their bid was approximately 15% below the Engineer's estimate.

Freese and Nichols, Inc. has no recent construction experience with McMahon Contracting, L.P.; however, we checked multiple references and received mixed but overall positive feedback. These references consisted of city engineers who were responsible for the projects through the design and construction phases (see attached summary). We, therefore, recommend the contract for construction

of County Line Road Improvements to be awarded to McMahon Contracting in the amount of $5,335,467.51.

Sincerely,

Freese and Nichols, Inc.

Alan D. Hendrix, P.E.

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Amy Williams, P.E., Director of Public Works/City Engineer**

DATE: **November 15, 2018**

SUBJECT: **County Line Road Reconstruction**
Construction Materials Testing

City Engineering Standards of Design and Construction require that Construction Material Testing occur on all projects constructed by the City. Proper materials testing ensures that the City gets projects constructed that meets city standards and reduces maintenance and operation expense in the future after construction is complete.

Staff requests City Council consider approval of the Construction Materials Testing for County Line Road Reconstruction Project and authorize the City Manager to execute a contract with Alliance Geotechnical Group for an amount of $54,883.50 to be funded by Street Bond Funds, and take any action necessary.

Engineering Inspection & Testing Services
AGG Proposal No: P18-0933C

Dear Mr. White:

Alliance Geotechnical Group (AGG) is pleased to confirm our firm's interest in providing materials inspection and testing services for the proposed project noted above. Our estimate for providing these services is **$54,883.50**. A schedule of unit fees for this project is attached. Actual charges will be based on the contractors/client scheduling.

After reviewing our fee schedule if you have any questions, please contact the undersigned at (972) 444-8889. If acceptable, please either sign below and return to our office, or issue a Purchase Order as our Authorization to Proceed. We look forward to the opportunity of working with you on this project.

Respectfully submitted,

ALLIANCE GEOTECHNICAL GROUP

Aaron J. Allen, P.E
CME Division Engineer

MEMORANDUM

TO: **Rick Crowley, City Manager**

FROM: **Amy Williams, P.E., Director of Public Works/City Engineer**

DATE: **November 15, 2018**

SUBJECT: **S. Lakeshore Drive and Summit Ridge Drive Reconstruction Project Construction Contract**

The S. Lakeshore Drive and Summit Ridge Drive Reconstruction Project from SH 66 to FM 740 is one of the four Roadway Capital Improvement Projects passed in the 2012 Bond Election. The existing 36 foot wide S. Lakeshore Drive will be reconstructed to a narrower 22 foot wide roadway with a 5 foot concrete sidewalk on each side, traffic circles at four-way intersections and parking niches in various locations. Summit Ridge Drive will be reconstructed to 22 foot wide with 5 foot concrete sidewalks on both sides and traffic circles at the four-way intersections. Additional improvements for the project will include new underground storm sewer system, installation of new waterlines and wastewater lines along the road.

The City hired Kimley–Horn and Associates, Inc. to provide the engineering design and specifications for S. Lakeshore Drive and Summit Ridge Drive Reconstruction Project. Two (2) bids for construction were received and opened on November 6th, 2018. The low bidder is Tiseo Paving Co. with a Base Bid of $9,192,153.80 an add Alternate A Bid of $151,127.00 and add Alternate B Bid of $364,769.00. The alternates stated above are for different roadway subbase material and thickness. Alternate A is to construct the roadway with 6 inches of flex base and Alternate B is 10 inches of flex base in lieu of 6 inch standard lime subbase. Constructing the roadway with flex base decreases construction time and strengthens the road base. The engineering consultants have verified the Tiseo Paving Co. references and provided a letter of recommendation. Funding will be provided through the Street Bond Fund and the Water / Sewer Fund.

Staff requests City Council consider approval of the S. Lakeshore Drive and Summit Ridge Drive Reconstruction Project and authorize the City Manager to execute a contract with Tiseo Paving Co. for the Base Bid and add Alternate Bid A for a total amount of $9,343,280.80, to be funded by Street Bond Fund and the Water / Sewer Fund, and take any action necessary.

RE: S. Lakeshore Drive / Summit Ridge Drive Reconstruction
KHA No. 064420911

Dear Mr. White:

On November 6, 2018, the City of Rockwall received bids for the S. Lakeshore Drive / Summit Ridge Drive Reconstruction. The following bids were received:

Bidder	Base Bid	Alternate A	Alternate B
Tiseo Paving Company	$9,192,153.80	$151,127.00	$364,769.00
FNH Construction, LLC.	$11,954,130.00	$183,390.00	$416,020.00

Kimley-Horn and Associates, Inc. has reviewed the lowest bidders' qualifications and has verified that the Contractor's bonding company is licensed in the State of Texas. Based on these reviews, it appears that Tiseo Paving Company is the lowest responsive bidder.

Enclosed is a copy of the Bid Tabulation for your reference. Thank you for the opportunity to be of service to the City of Rockwall. Should you have any questions or comments, please to not hesitate to contact us.

Sincerely,

KIMLEY-HORN AND ASSOCIATES, INC.

Jacob Reinig, P.E., ENV SP
